

Kryptonian 56

Chapter 56 Getting the item

Angel Yan invaded all the electromagnetic wave signals of Blue Star, and then controlled them to make sounds together, and also broadcast on the free channel of dark communication in the dark plane.

"Our angel civilization hopes to continue trading with you, and we are willing to add three super gene engine materials."

"Our angel civilization hopes to continue trading with you, and we are willing to add three super gene engine materials."

...

The Blue Star people don't know why, what kind of Kryptonian civilization, what kind of angelic civilization?

Which hacker's prank is this?

Luther really didn't expect such an operation.

"Three super gene engine materials..."

I have to say that Luther was excited. If he collected the materials by himself, he didn't know how long it would take. After all, it was a dark matter computer, the kind that could implant genes. Just thinking about it would tell you how difficult this thing is.

"But I have omnipotent transformation magic. Maybe the materials can be transformed directly?"

Luther thought.

Alas, defeated.

Luther shook his head and soared into the sky.

Angel Yan was still repeating the broadcast over and over again, and then he saw a person flying in front of him very fast.

"Angel, I am Luther from the Kryptonian civilization."

Luther recognized Angel Yan, and then looked to the side. He Xi's clone also flew up, following closely behind.

"King Tianji..."

Angel Yan instantly recognized who this sister was and quickly said respectfully.

"Everything is here, where is An Suyin?"

He Xi was afraid that Luther would run away again, so he quickly took out his things.

Although the super gene engine material is not precious to her, He Xi is a hamster, a man who has a tendency to get in and out, and has a severe end-stage hoarding habit. This man-in-law will feel very distressed for her.

But there was nothing I could do, who could let this be my own mistake.

"An Suyin???"

Angel Yan was shocked and finally understood why Queen Kesha was so anxious and nervous.

"Let me check first."

Luther did not take out Ansu Yin immediately, but said to He Xi.

"Can't you trust the credibility of our angels?"

He Xi said speechlessly.

"Wullingqi no longer has any credibility with me."

Luther said with a smile.

"Urling?"

Angel Yan was confused, Tianji King Hexi was not named like this.

He Xi quickly blocked the communication channel and asked Angel Yan to stay quiet and stop talking nonsense.

Angel Yan had no choice but to do as he was told and watched Luther check things.

Then Luther quickly browsed the information on super gene engine technology and the information on divine body technology.

Sure enough, there were a lot of vacancies. According to the previous inference, it was probably about the angel's super gene.

However, Luther saw what gave him a headache. The super gene engine was not ready to use. Even the materials that had been made into dark matter computers were not suitable for every super gene.

Unless it is a mass-produced super gene, it can be adapted.

In other words, after Luther gets the materials, he still has to research a dark matter computer that can adapt to his current Destruction Day Kryptonian genes, not to mention that he also wants to fuse Broly's genes.

There are both super genetic technology and super genetic code, but the latter are relatively rare. Only angel civilization and demon civilization understand this. It represents eternity, which is the method used by demons to directly resurrect. Angel civilization respects life and does not Use this method to revive.

The super genetic code is similar to the "Wedge" of Naruto's Otsutsuki clan, which can copy itself and digitize itself, and then penetrate it into other people's bodies.

A black diamond-shaped mark will appear on the palm of the person's hand as a symbol. This mark is "Wedge". In fact, Wedge is Otsutsuki's own body data.

The compressed file will be "unfrozen" little by little over a long period of time, and the "unfreezing" can also be accelerated through combat. When all the data is "unfrozen", the body of the "device" will be "replaced" with Otsutsuki's own data. The existence of "Qi" completely disappeared, and Otsutsuki himself completed the resurrection.

The super genetic code is more powerful and can be directly reshaped with only enough energy and material, but it is more convenient to use the original carrier for resurrection.

Super gene technology is a technology that radiates and mutates ordinary genes and allows them to naturally evolve into super genes.

After Luther quickly thought about it in his mind, he judged that the Kryptonian gene was already a completed super gene and did not need to undergo radiation mutation. On the contrary, it would be dangerous. After all, he did not have a celestial-level supercomputer to control and guide the mutation. .

Besides, it's even more inappropriate now that he's Doomsday in human form.

"How about it?"

He Xi asked with a smile. Although Luther said that her credibility in front of him was gone, He Xi would not take this kind of thing to heart. She was just greedy for Luther's body and didn't know what kind of super Gene.

"Give."

Luther took out Sumali.

I don't know what will happen to Sumali. She will probably enter Kesha's arsenal. This is still good. If the corpse is cut into pieces and made into a dark silver weapon... hiss, that would be too miserable.

Angel Yan was even more shocked, such a large piece of dark silver? ? ?

He Xi took it casually, analyzed it, and threw it into the wormhole. Dark Su Yin is very easy to analyze and calculate. Even Sumali, a backward second-generation, can solve Dark Su Yin without the assistance of dark matter computers and genetic systems. You can see how easy it is to solve.

"Goodbye."

Luther said to He Xi with a smile, and he disappeared the next moment.

He Xi's space-based system, which has fully opened up its computing power, said that it could not detect wormholes, dark energy information, or...

"This guy has more and more secrets."

He Xi frowned.

"Sky-based King?"

Angel Yan didn't know why Sky-based King He Xi appeared here. For Dark Su Yin? That's too much of a fuss. Wouldn't it be better to send an angel over?

"Don't tell anyone about what happened today, Angel Yan."

He Xi said to Angel Yan.

"Yes."

Angel Yan could only obey. Of course, she would still report this matter to Queen Kesha, and she would make the decision.

"Okay, do what you should do."

He Xi waved her hand.

Then she left first.

Only Angel Yan was left here.

Angel Yan first sent the information about the dark plane that just happened to Holy Kesha, and then entered Blue Star.

After Luther returned to Blue Star with the materials and information, he conducted in-depth study and research.

Relying on the super brain, he learned the vast knowledge in less than a day. This is something that all scientific research gods cannot do, and it is Luther's advantage.
