

Kryptonian 58

Chapter 58 Changes in Blue Star

"It doesn't matter. Your husband has a rich family background."

Luther said to Qilin with a smile.

"Husband, there's nothing to do."

Qilin said.

"I've already decided on you. Don't even think about running away."

Luther hugged Qilin's slender waist. This waist is simply amazing.

A beautiful woman doesn't need a knife to kill people. She relies on her waist to seduce people.

Qilin was hugged by Luther and fell into his strong chest.

...

Angel Yan came to Blue Star for a simple purpose, to inform the Super Seminary of Blue Star that evil is about to come.

She thought that Tianji King Hexi had left after finishing his business, but she didn't know that Hexi was interested in Luther and stayed in Blue Star to observe Luther.

Of course, if Luther didn't show up, she wouldn't know where Luther was. After all, Luther used the transformation technique to meet her, slightly adjusted his appearance, and changed into a pure white short hair and eyebrows, which looked very different from his current appearance.

Maybe Hexi would think that Kryptonians all have white hair.

He Xi did not conclude that Luther was still on Blue Star, but she would not conclude that Luther had left Blue Star, so she would stay to observe the dark plane information of the entire Blue Star.

Once the gods get serious, they will be very dedicated and rigorous. After all, this is a universe where the gods of science and technology have reached the level of science fiction or even fantasy.

As the top scientific research god, He Xi would naturally not ignore this. On the contrary, after she transmitted the situation to the main body, the main body gave her a lot of computing power support. Obviously, the main body was also very interested in Luther's original super gene.

"Does this guy have his own laboratory on Blue Star? Or is the spaceship of Krypton civilization nearby?"

He Xi has read the databases of the Denor civilization and the Super Seminary on Blue Star, and they don't know the existence of Luther.

Although Denor III is also a very powerful supercomputer, it is naturally not enough in front of He Xi. Morgana can come and go freely and read whatever information she wants, not to mention He Xi.

Excluding the possibility of the Super Seminary and Denor civilization on Blue Star, there is not much scope for He Xi to guess.

Even if Luther got the super gene engine material, it would take a long time for him to mix it.

However, there was no special reaction from the wormhole and the worm bridge, so Luther was likely still on Blue Star.

She was not only satisfying her curiosity and thirst for knowledge, but also for the future and evolution of angel civilization.

After knowing this, the man-woman agreed with her approach, but the man-woman also sent out the little angels under her.

The sacred knowledge treasure house could not read Luther's dark plane information, so naturally there was no way to match it. The man-woman probably wanted to calculate the matching results and Luther's data through the contact and interaction between these little angels and Luther.

It's just that the dark plane information cannot be read. It's not that the scientific research gods have no other ways to collect information. It's just that Luther's dragon is elusive, and he doesn't know why he can disappear instantly to hide himself, which increases the difficulty of collecting information for them.

Otherwise, if Luther really showed up in a swagger, even if he could block his dark plane information, He Xi would collect a lot of information.

Luther was worried that he couldn't beat these angels with thousands of years of mind, so he didn't choose to show up, but disguised himself and reduced contact.

In the animation, the performance was insufficient due to the problems of the producer and the script planner, but after becoming a reality, He Xi and Kaisha were not so easy to deal with.

To use a very cool line from Pan Zhen, he pointed to his heart and said: "There are tens of thousands of years of city here."

It's scary just to hear it.

At present, because of Luther's intrusion, the situation on Blue Star has changed not very subtle, and a demon queen who came here has not discovered this.

"This place is not bad, Carl."

Morgana was shopping and eating barbecue, and felt that Blue Star was very decadent, chaotic and free.

She asked the Death Carl when she could teleport her Demon No. 1. It was quite urgent. With Demon No. 1, Morgana had the confidence.

"Ms. Morgana, you know, Holy Kaisha is watching me. If I use the big clock, I will be discovered."

The Death Carl said gently.

"Call me Queen!" Morgana said unhappily. As the top licker, Death Karl naturally followed suit. "I don't care. At worst, I don't want Blue Star anymore. You will still be restricted at that time, so send

Demon No. 1 to me as soon as possible!" Morgana cursed unceremoniously. The purpose of the two people joining forces is not only to share the same interests, but also to benefit. Morgana needs a batch of resources to revive her dead subordinates, and Death Karl just has them. Death Karl needs Holy Kesha to go offline, so that he can let go to study the void and collect void matter! The research is almost done. Now Death Karl only needs void matter. He needs to blow up the black hole. The problem is that Holy Kesha will not allow such a big move. She blocked the way of Death Karl. The hatred of blocking the road is irreconcilable! That's probably what it means. The two hit it off and colluded with each other. However, Morgana did not trust Karl the God of Death very much, because she and Karl the God of Death were actually about to get together, but Karl the God of Death turned into an illusion without saying a word. In Morgana's view, this was a betrayal, so she completely abandoned Karl the God of Death and hated and even feared him.

Death Karl originally wanted to turn Morgana into an illusion. He loved Morgana, but this kind of love was very high-end. As a scholar, Death Karl had no physical desires. He just wanted to turn into an illusion with Morgana, and then stay together forever to study the void and the truth of the universe together.

Morgana couldn't understand and didn't believe this kind of thing. She pursued freedom, decadence and enjoyment. Spiritual love? Can you believe it?

Her fear also came from this. Death Karl became an illusion. Without this kind of desire and need, God knows how much and how long his love for her can last?

Without this kind of emotional maintenance, what kind of love is it?

So it became like this now. Morgana felt that she was courting death. She often worried that Death Karl would kill her or kill her without saying a word. Death Karl licked her all the time. He didn't get angry when he was scolded, and he didn't care about being blackmailed for resources. Anyway, there were plenty.

"I understand, Queen Morgana, I will do it as soon as possible."

Death Karl said helplessly.

Then Morgana hung up the communication.

Luther didn't expect to run into the Demon Queen while walking down the street.

Of course, she should be called Liang Bing now?

Luther could recognize her directly without even using his super brain to search for her.
