

Kryptonian 581

Chapter 581 Peak Thunder God!

Thor was not nosy, because the nine worlds were originally protected by Asgard.

Upon learning that the Saiyans had reappeared, Thor did not dare to be negligent.

He clearly remembered that the last time he fought with the Saiyans, the Saiyans were so powerful and cruel that he had to be very alert to deal with them.

In contrast, the dark elves that had once given Asgard a headache were like insignificant little characters in front of the Saiyans.

The cunning and trickery of the dark elves may cause some trouble at some times, but their power is a world apart from that of the Saiyans.

Thor took a deep breath and summoned the Rainbow Bridge through the "Power of Thor", which was a mysterious passage to various worlds. His figure looked even taller and more powerful under the illumination of the Rainbow Bridge.

After arriving on Earth, Thor learned about the current situation from Tony and Captain Marvel.

Steve died tragically, Hulk also died, and most of the Illuminati were killed.

Doctor Doom is missing. Luther knows that he is preparing to summon the devil from hell and then possess him to gain unique and powerful magic to fight against the Saiyans!

The Doctor Doom in this universe is naturally close to the comic version, and because of Luther, he was discovered too early and became a member of the Illuminati.

Influenced by his mother, Doctor Doom has been exposed to magic since he was a child and has learned magic that is not inferior to Doctor Strange. At the same time, his high IQ and high technology also allow him to compete with Iron Man in the field of technology.

Back to the point, after knowing the situation, Thor immediately tracked the Saiyans.

"Loki?"

Thor widened his eyes, looking at the strange and familiar face in front of him, his heart full of doubts.

He remembered his younger brother Loki, the guy who was always naughty but smart.

But the man in front of him, although he had Loki's face, was wearing women's clothes, and his manners also revealed a feminine softness and elegance.

Thor couldn't help but frowned, he didn't know why his brother became like this.

He remembered that Loki had always been a man, so how come he had become a woman now? Moreover, why was he with these Saiyans?

After all, Luther only modified Loki's perception of himself and his gender, but there was no change in Odin and Thor.

Loki thought that she had been a girl since she was a child. Her mother and father knew about this, and even Thor didn't know.

Loki frowned and turned to look at her silly brother.

A hint of complex emotions flashed in her eyes, but was quickly replaced by indifference.

"Thor?"

Loki said coldly.

"What are you doing here?"

Thor did not answer his question, but said directly: "Loki, I don't know why you are with these Saiyans, but you must understand that they are our enemies. We can't stand with them."

Loki sneered and said: "Enemy? In my opinion, you are my enemy!"

Thor was shocked when he heard this. He didn't expect Loki to say such a thing. He always thought that the relationship between him and Loki was close, but now it seems that it is not the case.

"Loki, you misunderstood me." Thor tried to explain, but Loki didn't want to listen to him anymore.

As she said that, she raised her hand and ordered Vegeta: "Vegeta, kill him!"

But it doesn't matter. If she kills Thor here, she can become the co-lord of the Nine Realms!

Now only Vegeta is intact, and other Saiyans can't.

Vegeta heard this, and then he raised his hand and waved, and a powerful Qigong wave pressed towards Thor like a sky curtain.

The Qigong wave carried the momentum of destroying everything and was going to swallow up the entire battlefield.

The feeling given to Thor was like facing the Rainbow Bridge, the unstoppable and surging waves!

Thor's fighting spirit was completely ignited in the face of this unstoppable Qigong wave.

He took a deep breath, feeling the surging power of the Thunder God in his body, and the thunder of the Nine Realms was cheering for him.

He tightly grasped the Thor's Axe in his hand, and billions of thunders burst out at this moment, condensing into an extremely violent force.

Thor's eyes were firm, and he swung out the Thor's Axe with force.

This axe gathered all his strength and faith, and the electric light jumped on the axe blade, forming a dazzling beam of light. The beam of light cut through the sky, with the force of thunder, and rushed straight towards Vegeta's Qigong wave.

When the Thor's Axe came into contact with the Qigong wave, the whole world fell into a brief silence.

Then, a dazzling light burst out, as bright as the sun.

The light illuminated the entire battlefield, making it impossible to look directly at it.

A huge roar sounded at this moment, shaking everyone's heart. The entire battlefield was trembling and was about to collapse under the impact of this force.

I saw that the Thor's Axe easily split the Qigong wave like cutting tofu, and instantly defeated the powerful energy.

The Qigong wave quickly collapsed under the axe blade, turning into countless energy fragments that scattered, as gorgeous as fireworks but short-lived.

This scene shocked Vegeta, Loki and Ultron.

They watched Thor swinging the Thunder God's Axe to split the Qigong wave, and an indescribable fear surged in their hearts.

Vegeta's pupils shrank suddenly when he saw this.

He felt Thor's thunderous power, and a strong sense of crisis surged in his heart.

But he did not retreat, but covered his body with more energy, preparing for the next attack.

Seeing this, Thor curled his lips into a sneer.

He flashed and appeared in front of Vegeta in an instant.

In the sky where thunder danced wildly, Thor held Thor's axe tightly, his eyes burning with persistence for victory and contempt for the enemy. His arm muscles were as hard as iron and stone, and his veins bulged, as if he wanted to inject all his strength into this axe.

He took a deep breath, and the breath in his chest surged like a raging wave. With a low roar, Thor's axe was instantly chopped out, with the momentum of thunder, and went straight to Vegeta.

This axe condensed the power of thunder between heaven and earth.

At the same time, Vegeta also showed his Saiyan arrogance and power.

He roared, and his voice echoed in the air like thunder, shocking people.

His fists were clenched, and his muscles were tense, as if he wanted to concentrate all his strength on his fists.

The attacks of the two met in the air, and an astonishing energy wave erupted.

The light was so bright that it seemed to illuminate the entire space.

The huge energy shock wave spread out from the two people, tearing the surrounding air apart.

Chapter 582 Giant Ape Team Building

Thor felt an unprecedented resistance, and his Thor's Ax was actually blocked by Vegeta's fist.

He was shocked, he didn't expect this Saiyan to be able to catch his Thunder God's Ax with his bare hands.

What the hell are Saiyan fists made of?

Thor himself didn't even dare to use his fists to block the blade of Thor's axe!

In this regard, Vegeta would only say, this is the power of Qi!

Vegeta also felt a powerful force impact, and his fist seemed to be tightly bound by an invisible force, unable to move forward any further.

He gritted his teeth and tried his best to push his fist forward, but the force was as solid as a mountain and difficult to shake.

The two were in a stalemate like this, each trying their best to defeat the other.

Their eyes were shining with determination, as if they wanted to completely destroy each other.

Suddenly, Thor let out a roar, and all the muscles in his body tensed up, as if he was about to burst out all his strength.

He pushed forward hard, and the Thor's Ax instantly burst out with more dazzling light, forcing Vegeta back a few steps.

Not to be outdone, Vegeta roared again, and the power in his fists increased again.

He rushed forward suddenly and started a more intense hand-to-hand combat with Thor.

The figures of the two people intertwined in the air, each attack carried the power of thunder, and every collision erupted with astonishing energy fluctuations. The entire space seemed to be shaking from their battle.

Thor kept swinging the Thor's axe, and every slash carried the power of thunder, seeming to tear the entire space apart.

Vegeta also showed his Saiyan arrogance and strength. His fists were as hard as hammers, and every time he swung them out, he had the potential to destroy the world.

The battle between the two became more and more intense, and it seemed that the whole world was about to be overturned.

Their figures moved quickly in the air, and every confrontation was frightening.

Suddenly, Thor seized an opportunity and swung the Thor's ax hard, hitting Vegeta directly in the chest.

Although Vegeta reacted quickly, he still couldn't completely avoid the axe. His chest was struck by Thor's axe, and blood immediately splattered everywhere.

Vegeta let out a scream, and his body flew backwards, hitting the mountain wall in the distance heavily. He struggled to stand up, but his face had turned extremely pale.

"What?"

Luo Ji looked at what was happening in front of her in disbelief.

His idiot brother actually defeated a Saiyan as powerful as Vegeta?

When did he become so powerful! ! !

Moreover, Luo Ji also discovered that Thor's hammer was missing. Both hammers were gone, replaced by a huge metal axe.

Could it be the reason for this axe?

"What should I do? Vegeta seems to be no match for your brother."

Ultron fell next to Luo Ji and said.

"Where are Raditz and that Saiyan?"

Luo Ji feels that there is still hope, that is, to control Thor!

Three Saiyans besieged Thor, and she didn't believe that Thor could handle it.

"They have been put into the cradle of life, but it will take time to repair."

Ultron said, he did not say that he had done anything, Raditz and Nabal might become his subordinates later.

Luo Ji didn't think much, she just hoped that there would be enough time, otherwise if Thor defeated Vegeta, her plan would fail.

Thor was also panting heavily, and his energy was almost exhausted.

But he did not relax his vigilance. He knew that Vegeta was a tenacious opponent and could fight back at any time.

Sure enough, just when Thor relaxed his vigilance a little, Vegeta suddenly launched a counterattack.

He roared angrily, and his body disappeared instantly. When he reappeared, he was already behind Thor.

Thor was shocked. He didn't expect Vegeta's recovery ability to be so strong.

However, when he wanted to turn around, it was already too late.

Vegeta's figure suddenly appeared behind him and punched him hard in the back.

The huge force knocked Thor away, and he rolled in the air, feeling as if his body was being torn apart.

"Damn it!"

Thor was already sure that Vegeta's power was far greater than that of Raditz. He felt a sharp pain spread throughout his body, almost making him unable to breathe.

"You guy, how dare you cut me!"

Vegeta was even more angry. He planned to let Thor see what despair meant!

The next moment, he raised his hand and released a ball of light. Thor originally thought Vegeta was going to attack him, but found that the ball of light just flew into the sky.

Immediately afterwards, Thor noticed the ball of light flying into the sky, and then bursting out with a dazzling light.

"See hell!"

Vegeta roared.

His voice was full of anger and murderous intent, making Thor feel a twinge of heart palpitations.

Thor's pupils shrank, and he immediately realized what Vegeta was going to do.

He had seen Raditz's giant ape form and knew that it was an extremely terrifying power. And now, Vegeta seems to be entering this form as well.

Thor immediately activated the gravitational ability of Thor's Ax, which was the ability to smelt the gravitational hammer, in an attempt to contain Vegeta.

However, Vegeta's power was far beyond his imagination, and he felt as if he was attracted by a huge force and could not break free.

At this moment, Vegeta's body began to swell, his muscles became stronger, and his skin became rough. His combat uniform shattered during the expansion process, revealing his strong and ferocious body.

"not good!"

Sol was shocked. He knew that once Vegeta completely transformed into a giant ape, it would be difficult for him to have a chance to defeat him.

At this moment, there was a sudden commotion on the ground.

Thor looked up and saw that the mass-produced Saiyan legions defeated by Vegeta were also beginning to change. They all looked up to look at the ball of light, and then their bodies began to expand and entered the state of giant apes.

And because they are not advanced warriors, they have no way to control their own rationality. After becoming violent, they attack all targets except the giant apes indiscriminately.

Captain Marvel and Tony hurried over and saw this hellish scene.

"Farke!"

"Gift crab!"

Both of them couldn't help but explode.

What's going on?

When Thor discovered that they were coming, he immediately breathed a sigh of relief.

"You deal with those giant apes, I'll kill the strongest one first!"

Thor shouted to them.

Then, he continued to use his power and at the same time summoned the fire of hell to spurt out.

Flames and thunder intertwined to form a huge energy field.

"Kill me first?"

Vegeta thought it was ridiculous.

Chapter 583 Break through the Earth!

"Don't be too arrogant, Earthlings!"

Vegeta's eyes flashed with contempt and disdain, and he clenched his fists as if he wanted to crush all enemies.

Then, he punched Thor on the opposite side.

Thor roared angrily, his voice rolling like thunder, shaking the surrounding air.

"I'm not a Midgardian, I'm an Asgardian!"

Thor loudly corrected Vegeta's mistakes, and at the same time waved the Thor's Ax in his hand, preparing to receive Vegeta's attack.

"Boom!!!"

The huge sound echoed on the battlefield like thunder, shaking the hearts of every living creature. Thor held the Thor's Ax and violently collided with Vegeta's fist, like two meteors colliding in the air, bursting out with bright light.

The energy of hellfire burned in Thor's axe, seeming to swallow up the entire world.

The flame was so hot that it seemed to ignite the air, forming twisted heat waves. Under the influence of this force, Vegeta's fist was split open, and blood and power burst out together, forming a thrilling scene.

Vegeta had a shocked expression on his face. He didn't expect Thor's power to be so powerful, beyond his imagination. He felt unprecedented pain spreading throughout his body, as if every cell was being torn apart by this force.

He doesn't know that this mainly comes from the pain of hell fire burning the soul!

"Hmph, it seems I have to change my strategy."

Vegeta thought to himself, knowing that he could not defeat Thor with the power of fists and feet alone. So, he decided to give up attacking with fists and kicks, and instead used Qigong Cannon to deal with Thor.

He opened his mouth and took a deep breath, as if he wanted to suck the entire universe into his body. Then, he spit out a powerful Qigong Cannon.

This Qigong Cannon contains all the power of Vegeta's 180,000 combat power. Its power is not much different from the neutron star energy impact that Thor endured in the original plot, and may even be more powerful!

When the Qigong Cannon came into contact with Thor's body, it made a deafening sound.

The sound echoed on the battlefield like thunder, shaking everyone's heart.

Thor was driven deeply into the ground by this force, and seemed to be pressed down violently by an invisible big hand, like a meteorite hitting the earth.

His figure quickly disappeared on the ground, leaving only a huge hole.

The energy of the qigong cannon was raging deep underground, like a violent dragon shuttling underground. It continuously impacts the surrounding rocks and soil, crushing them, evaporating, and gasifying them! For a time, the entire underground world was shaken by this power, and it seemed that a devastating disaster was about to happen.

Thor's body continued to fall downwards driven by this force. He passed through the thick crust and reached the mantle. The mantle is a hot region inside the Earth where temperatures reach thousands of degrees and rocks and minerals are in a molten state.

However, Thor didn't seem to feel any pain. He held the Thor's Ax tightly and continued to contend with the power of the Qigong Cannon.

The qigong cannon continued to wreak havoc in the mantle. Wherever it went, rocks and lava were instantly evaporated into nothingness. Huge energy fluctuations reverberated in the mantle, seeming to tear the entire earth apart.

Driven by this force, Thor's body continued to travel downwards, seeming to penetrate the entire earth.

Over time, the Qigong Cannon's power gradually weakened.

But its destructive power is still astonishing, and it is still a mess wherever it goes. Finally, when this force completely dissipated, Thor had passed through the entire mantle and reached deeper into the earth.

Here, he felt unprecedented pressure and high temperature. The surrounding rocks and minerals were in a strange molten state, seeming to swallow him up.

However, Thor did not give up. He clutched Thor's ax tightly and continued to move forward.

He passed through oceans of lava and crossed geological faults.

Every step forward was accompanied by great pain and difficulty, but he never gave up. He knew that only by passing through this area could he find the exit and return to the ground.

After some hard work, Thor finally passed through this area and came to the other side of the earth.

He broke out of the earth and returned to the ground.

He was exhausted at this moment, but his eyes shone with determination.

"puff!"

Thor suddenly spat out a large mouthful of blood, and his chest heaved violently, obviously being severely injured. His eyes widened, filled with disbelief, because the blow just now almost killed him. If he hadn't relied on his strong physical fitness and the power of the Thunder God's Ax to completely withstand Vegeta's Qigong Cannon, I'm afraid he would have been a corpse at this moment.

The power of that qigong cannon was simply too terrifying to describe.

It is like a small sun, bursting out with dazzling light and hot temperature. Thor only felt an irresistible force coming from all directions, as if to tear him into pieces. His skin was scorched, his muscles were torn, and his bones were almost shattered.

However, just when Thor was about to fall into despair, Thor's Ax suddenly burst into dazzling light. A powerful divine power surged out of the axe, quickly repairing Thor's injuries.

His wounds healed at a speed visible to the naked eye, and his charred skin gradually returned to its original appearance.

Thor stood up with difficulty, his eyes flashing with determination.

He knew that he couldn't just fall down like this.

The earth was in crisis, hundreds of giant apes were rampaging, and if he didn't stand up to stop Vegeta, the entire planet would be destroyed.

Before Thor could find Vegeta, Vegeta came first.

"You're not dead yet?"

Vegeta didn't expect Thor to be able to withstand his Qigong cannon, but the surface of Thor's body had been scorched by the Qigong cannon, and his body was covered with scars.

At this moment, Vegeta launched another attack.

He flashed and turned into a residual image and rushed towards Thor.

Thor didn't have time to react, and was kicked away by Vegeta. His body drew a long arc in the air, and then fell heavily on the ground.

"Bang!"

With a loud bang, Thor smashed out a huge basin.

The surrounding soil and stones were shaken and splashed everywhere, forming a mess. Thor lay at the bottom of the basin, feeling that his bones were about to fall apart.

However, Vegeta did not give him a chance to breathe. He appeared behind Thor again, clasped his fists, and hammered Thor hard on the back.

Chapter 584: Hulk doing sit-ups

Thor only felt an indescribable force coming from all directions, as if countless hammers were hitting him at the same time.

His body was involuntarily thrown away by this force again, like a fired cannonball.

This time, Thor's flight trajectory was even more thrilling.

He streaked across the sky like a meteor and crashed directly into a small hill in front of him.

Although the hill was not very tall, it was as fragile as paper under Thor's thunderous force.

He crashed through one side of the hill, sending rubble and smoke flying, then broke out from the other side and flew into the distance.

Thor's body was covered with shocking scars, and blood seeped out from the gaps in his armor, staining the tight-fitting suit under his armor red.

Every scar is like a medal engraved on his body, witnessing the brutality of his battle with powerful enemies.

However, despite being seriously injured, Thor had no intention of giving up.

He struggled to stand up, although his steps were unsteady, his eyes were as firm as iron.

He held the Thunder God's Ax tightly in his hand. The Thunder God's Ax connected with his mind and emitted a dazzling light.

"What's wrong, why don't you give up?"

Vegeta looked at Thor's shaky figure and said with a sneer.

His voice was full of disdain and ridicule. In his eyes, Thor was already a weakling destined to fail.

Just when Vegeta was about to launch the next attack, a huge green figure suddenly ran from a distance.

The figure was as towering as a mountain, and every step made the earth tremble.

When the figure approached, Thor saw clearly that it turned out to be the Green Hulk!

"Hulk!"

After Thor saw the figure clearly, a trace of surprise flashed in his eyes.

He didn't expect that Green Hulk would suddenly appear at this critical moment.

His heart was filled with doubts. Didn't Tony and the others say that Green Hulk and Steve were killed by Saiyans?

Where did the Green Hulk in front of me come from?

However, now is not the time to think about this.

The Green Hulk didn't say anything, just roared, and then suddenly jumped on Vegeta's head. He wanted to smash Vegeta's head to pieces with his own power.

However, Vegeta is now in the giant ape state, and his strength has exceeded Green Hulk's imagination.

"Another strange Earthling came?"

Vegeta did not regard Green Hulk as the previous Green Hulk, he only thought that it was another big Earthling. After all, the aliens looked exactly the same, and there were many cases where it was difficult to distinguish them.

Just like the Namekians, he couldn't tell which Namekian was who.

He sneered, without the slightest panic, but slapped Green Hulk hard on the body as if swatting a fly.

The power is so great that it cannot be described in words.

It was like a mountain collapsing, pressing down with the force of destroying the heaven and the earth.

Green Hulk only had time to let out a scream before Vegeta slapped him to the ground, instantly creating a big crater.

Green Hulk was lying there, his bones all over his body were shattered by the shock, and his internal organs were turned into pulp.

It wanted to get up, but its body no longer obeyed.

It could only lie there, staring at Vegeta with eyes full of anger and unwillingness.

When Thor saw this scene, he couldn't help but feel horrified.

He didn't expect Vegeta to be so powerful that even monsters like the Green Hulk couldn't pose the slightest threat to him.

"Go to hell!"

Vegeta raised his feet, preparing to give the Earthling who dared to challenge him a fatal end.

Thor immediately became anxious. He knew that he could not just watch the Green Hulk die like this.

He took a deep breath and shouted, "Come on, Vegeta, let's continue this fight!"

Thor's voice echoed in the empty valley, full of determination and courage. He rushed towards Vegeta, trying to attract Vegeta's attention and give Green Hulk a chance to escape.

Vegeta looked at Thor rushing over, a hint of amusement flashing in his eyes.

He did not take Thor seriously. After all, in his opinion, although this earthling called Asgardian had some strength, it was not enough to compete with him.

Moreover, Vegeta also guessed why Thor shouted, he wanted to attract his attention!

Therefore, Vegeta was very mean and ignored Thor, but stepped on the Green Hulk hard.

"boom!"

There was a loud noise and the ground shook again.

Green Hulk's body completely collapsed under Vegeta's foot and turned into a puddle of flesh.

Its life breath completely disappeared at this moment and could never be restored.

When Thor saw this scene, a trace of sadness and anger flashed in his eyes.

Although he and Green Hulk are not close friends, they can be regarded as comrades fighting side by side.

Now, Green Hulk died tragically in Vegeta's hands. How could he not be angry?

"You bastard!"

Thor roared angrily, and the Thor's Ax in his hand glowed even more dazzlingly.

He rushed towards Vegeta, swung the Thunder God's Ax, and unleashed even more powerful lightning power.

Each thunder and lightning roared towards Vegeta like a giant dragon, trying to drown him in the sea of thunder and lightning.

However, Vegeta didn't care at all about these attacks.

He sneered and waved his arms, striking away the thunder and lightning one by one.

His power was so powerful that Thor felt a little desperate.

"You're really annoying."

Vegeta said, his voice cold and cruel.

"However, since you took the initiative to send it to my door, then I will help you."

As he spoke, he waved his huge fist and smashed it towards Thor.

The wind pressure brought by that fist made Thor feel suffocated.

Thor gritted his teeth and waved the Thor's Ax in his hand with all his strength.

The power of thunder and lightning condensed into a dazzling light on the ax head, and then struck Vegeta's fist fiercely.

Those thunder and lightning were like giant silver dragons, circling and flying in the air, and then struck Vegeta hard.

Although Vegeta was powerful, he was caught off guard by this sudden attack.

He quickly waved his arms to resist, but the power of thunder and lightning still left deep scars on his body.

Thor took the opportunity to launch a more violent attack.

He kept swinging the Thunder God's Ax, releasing more violent thunder and lightning power.

Every attack made Vegeta feel a little bit of pressure, and he began to realize that this earthling was not that easy to deal with.

"It seems that you are a little stronger than I thought."

Vegeta said coldly, his voice full of disdain and ridicule.

"But this still doesn't change your fate."

Chapter 585: Fragile Planet, Real Physics Engine

"strength!"

"I want power!"

Thor roared angrily, his voice full of endless anger and unwillingness.

He clenched the Thor's Ax in his hand, and veins popped out, like winding rivers flowing on his arms.

Swing it with all your strength, releasing more powerful lightning power than before.

Those thunder and lightning were like giant silver dragons, circling and flying in the air, with a destructive momentum, and struck Vegeta fiercely.

However, Vegeta just sneered, a hint of amusement flashing in his eyes.

He did not dodge, but rushed forward to face the thunder and lightning, punched out, and collided fiercely with the thunder and lightning dragon.

"boom--"

A loud noise shook the sky, and the energy wave generated by the collision of thunder and lightning spread instantly, shattering the surrounding rocks and sending smoke and dust everywhere.

Thor only felt an irresistible force coming from him. His body felt like being hit by a giant hammer, and he instantly lost control. The light in his eyes began to fade, and his consciousness began to blur.

"Bang!"

After a loud noise, Thor's figure fell from the sky and hit the ground like a meteor.

His speed was extremely fast, and he had already rushed to the ground in the blink of an eye.

At this moment, a huge impact came from the ground. Thor felt as if his body was lifted up by an invisible force, and then hit the ground hard.

"ah--"

Thor let out a shrill scream. He felt that all his internal organs were shaken out of place, and the bones in his body seemed to be shattered.

He struggled to get up, but his body no longer obeyed.

But at this moment, he suddenly discovered that his location had undergone earth-shaking changes.

A huge depression has now appeared on the originally flat ground, and the surrounding rocks have been shaken to pieces.

What shocked Sol even more was that his location was actually on the edge of the Australian plate.

"Rumble--"

At this moment, a more violent vibration came. Sol looked up and saw that the Australian plate in the distance began to slowly rise.

Thor looked at the scene in front of him in shock. He could not imagine that this Saiyan had such a powerful power.

He felt as if his heart was about to beat out of his chest, and the blood all over his body was boiling.

At this moment, he suddenly discovered that the other side of the Australian plate also began to slowly rise.

Because the force of Sol's impact was so great, the entire Australian plate began to slowly tilt up.

Like a huge seesaw, the end where Thor hits is the fulcrum, while the other end is tilted high.

The seawater was quickly pushed away, exposing a large area of the seabed.

The creatures and plants that were originally hidden deep under the sea were exposed to the air, and they struggled to adapt to the sudden change.

The tilted end of the Australian plate has formed a huge slope, rising straight into the sky.

The rocks and soil on the high slope were thrown into the air, forming a spectacular earth-yellow storm.

The storm raged in the air, throwing up countless amounts of dust and debris. They were flying in the air, forming a spectacular scene.

"not good!"

Thor was shocked, and he immediately understood that this was a chain reaction caused by the power of Vegeta's punch.

If this is allowed to continue, the entire Australian plate may be overturned, which will cause unimaginable disasters.

Thinking of this, Thor immediately struggled to get up, but his body was seriously injured and he couldn't move at all.

"Damn it!"

Thor cursed in his heart, knowing that he had to find a way to prevent this from happening.

At this moment, he suddenly discovered that the Thunder God's Ax in his hand was trembling slightly.

With a thought in his heart, he immediately grasped the handle of the ax tightly and used all his strength to raise the Thunder God's Ax high.

Thor shouted loudly and slammed Thor's ax to the ground.

"boom--"

After a loud noise, Thor's Ax hit the ground instantly.

"Kacha kacha——"

The ground began to crack, and cracks spread rapidly.

And the originally tilted Australian plates began to sink slowly, as if suppressed by an invisible force.

When Thor saw this, he felt happy.

He knew that he had successfully stopped the chain reaction of Vegeta's punch.

However, he did not relax.

The battle between him and Vegeta is not over yet. He must recover from his injuries as quickly as possible before engaging in another fierce battle with this Saiyan.

Thinking of this, Sol endured the pain in his body and struggled to stand up.

He held the Thor's Ax tightly and looked firmly at Vegeta in the distance.

And Vegeta didn't expect that his punch would cause such earth-shattering changes.

He looked at the slowly sinking Australian plate in the distance, with a hint of surprise in his eyes.

"This planet is too fragile to withstand even the aftermath of my attack."

If it were placed on Planet Vegeta, Vegeta's punch would never be able to cause such a scene.

Luther saw it very deeply.

"This is a real Saiyan battle."

In any case, Vegeta is a super life form with the power to easily destroy a planet. Normal aeration can cause global tremors and earthquakes on Dragon Ball Earth, not to mention Vegeta after he turned into a giant ape?

It's good that Thor didn't fly out of the earth with one punch.

"But Thor hasn't awakened his divine power yet?"

Luther couldn't help but complain. He had awakened his Thor power after being beaten by his sister in the original plot, but now he hasn't awakened after being beaten so badly by Vegeta?

Although the enhancement and bonus brought by the Thor's Axe made Thor surpass the peak Thor in the original plot, he can actually surpass himself now!

Odin is also paying attention to this battle.

Thor is already very strong, beyond imagination, but it's not enough. Facing Hela, this kind of power is not enough!

To break Ragnarok, he needs to become stronger!

Odin's one eye stared at Heimdall.

"Come on, Thor, awaken your true divine power!"

However, on the battlefield, Thor was still hung up and beaten by Vegeta.

Vegeta was tired of playing. Although Thor could fight back and Hellfire could hurt Vegeta, Vegeta's Chi was not for show.

If the strength was strong enough, the Chi could be immune to most attacks, even Dapur's petrification magic.

At this moment, a huge green arm emerged from the ground and grabbed Vegeta's leg.

"What?"

Vegeta was caught off guard.

Chapter 586 Wandering on the Moon

That's the Hulk!

The creature in front of him is no longer the green giant who seemed honest but had a violent heart.

At this moment, he seemed like a demon crawling out of the depths of hell. His body was so huge that it was jaw-dropping. His five-meter-high body stood in front of everyone like a towering mountain.

His muscles were as hard as steel, and each muscle contained amazing explosive power, as if it would erupt like a volcano at any time.

"The power of hell..."

Luther whispered, his eyes full of doubt.

He could feel that the power emanating from the Hulk was beyond his cognition. That power seemed to come from another dimension, full of evil and chaos.

According to common sense, although the Hulk has a strong regenerative ability, his power is also limited.

However, the Hulk in front of him seemed to have endless power, which made Luther think of a terrible possibility-this Hulk has been targeted by OBA under all things.

OBA is described as the real lord of hell in the comics. OBA's hell is more accurately called the "chaotic zone" (different from the ordered zone and the unowned zone), and Mephisto's hell is more accurately called the "low-level filthy earth/burning (flame) scorched earth" (different from the high-level pure earth/watered (milk and honey) moist soil and the middle-level turbid soil/opening up (mortal) dry soil).

Luther didn't find anything wrong just now, but it is not ruled out that the "green door" has been opened, and he just didn't notice it.

Luther's heart tightened. He was worried that the "green door" might have been quietly opened by OBA, but he didn't notice it.

If this is true, then the Green Hulk in front of him may be the messenger sent by OBA, and he will bring endless disasters to this world.

"It's too dangerous, let's go to other worlds later."

Luther felt too scary and had to stay away from it.

"Another tough guy..."

Vegeta frowned. He originally thought that these green earthlings were just some minions, but the Hulk in front of him made him feel unprecedented pressure.

He tried to break free from the Hulk's restraints, but the strong arm held his legs tightly like a clamp, making him unable to move.

The Hulk's power seemed endless. After grabbing Vegeta's legs, he smashed him to the ground like throwing a toy.

The huge impact force made the ground tremble, and the surrounding buildings collapsed under this force.

"Hulk!!!"

This roar seemed to come from the depths of hell, with endless anger and violence.

The sound waves spread at an astonishing speed and spread throughout the world in an instant.

The whole world seemed to tremble at this moment.

High-rise buildings were crumbling under the impact of sound waves, and glass fragments were flying everywhere; vehicles on the streets were shaken and rolled up, making a harsh collision sound; pedestrians screamed in fear and fled everywhere, fearing that they would be affected by this sudden disaster.

The waves in the ocean were also affected by the sound waves. Huge waves rolled towards the shore, hitting the reefs and dams. The creatures in the sea fled the area one after another, fearing that they would be injured by the sound waves.

Even satellites far away in space captured this abnormal sound wave fluctuation.

Scientists were shocked to find that this sound wave actually passed through the atmosphere and was transmitted directly into space.

And deep in the core of the earth, those long-dormant ancient powers seemed to be awakened by this sound wave.

They began to become restless, trying to break through the constraints of the earth's crust and resonate with this violent force on the surface.

The whole world seemed to be caught in a vortex of chaos. Smoke and dust filled the air, buildings collapsed, streets broke, and it was a doomsday scene.

In the center of this violent force, the Green Hulk stood firm, his figure looming in the flying dust, like a violent beast.

The Green Hulk's skin was dark green, his muscles bulged like hills, full of explosive power.

There was a crazy light in his eyes, as if he wanted to swallow the whole world.

Every breath he took seemed to bring a gust of wind, blowing away the smoke and dust around him.

His chest rose and fell violently, as if it contained endless energy.

He continued to swing his huge fist and smashed it hard on the ground.

Every smash made the ground shake violently, as if it wanted to destroy the whole world.

The ground shattered like fragile glass under his fist, and the cracks spread like a spider web. The surrounding buildings collapsed under his power and turned into ruins.

It seems that the Green Hulk still maintained his sanity and just attacked Vegeta madly.

Vegeta was hit so hard by the Hulk's crazy attack that he couldn't fight back for a while, but he was now in the form of a giant ape, and his mouth could also fire a qigong cannon.

So he attacked with hatred.

"Go to hell!"

The huge mouth opened, and the terrifying and fiery energy condensed. Finally, when the energy reached its peak, Vegeta roared, and a huge qigong wave instantly ejected from his mouth.

This qigong wave was like a lightning that broke through the sky, rushing straight towards the Hulk with the power of destroying the world.

The Hulk seemed to feel this powerful energy fluctuation. He raised his head and a hint of surprise flashed in his eyes.

However, he did not dodge, but rushed towards the qigong wave.

The huge Qigong wave hit the Hulk fiercely, making a deafening explosion.

Smoke and debris flew everywhere, and the Hulk disappeared in the air wave.

The impact of the explosion was so great that the whole earth was shaking under the impact of this force.

The ground shook violently again, as if it was going to tear the whole world apart. The waves in the ocean rolled and roared like a giant beast. The clouds in the sky were also stirred by this force.

And under the impact of this force, the Hulk appeared on the moon.

It turned out that Vegeta's Qigong wave not only hit him, but also blasted him directly to the moon.

A huge crater appeared on the surface of the moon under the impact of the Hulk, and smoke and debris spread on the surface of the moon.

The Hulk lay in the crater, his body covered with scars, but his eyes were still flashing with crazy light.

He stood up slowly, and his huge body was extremely conspicuous on the surface of the moon. He looked up at the earth, his eyes full of anger and unwillingness.

When the Qigong wave hit the Hulk, the whole earth seemed to tremble.

The force was so strong that it not only blasted the Hulk to the moon, but also tore the gravitational orbit between the moon and the earth apart!

Chapter 587 Recovery

The moon, driven by the Qigong waves, began to slowly break away from the earth's gravitational pull.

It drifted farther and farther, as if it had become a lonely planet wandering in the universe.

As a result, the earth's gravity changed dramatically, the ocean tides became extremely violent, and the waves were surging, as if they were going to swallow up the whole world.

As the moon moved away, the earth's gravitational field changed dramatically, causing the activity of the crustal plates to intensify.

Earthquakes and volcanic eruptions occurred frequently, and the entire earth fell into chaos.

Under the impact of this force, the atmosphere was also affected. Storms and hurricanes raged around the world, turning the originally calm sky upside down.

The clouds were torn apart, revealing the lightning hidden in them. Lightning streaked across the sky, illuminating the entire world.

In this catastrophe, people fell into panic and despair.

They looked at the sky helplessly, only to see the moon gradually moving farther and farther away. This disaster was beyond their imagination and control.

As the moon moved away, the gravitational balance in the solar system was broken.

Other planets seemed to feel this strange force, and their orbits began to change subtly. The celestial bodies that were originally running stably seemed to be pulled by some force and began their own "dance".

Neptune and Uranus, two cold planets at the edge of the solar system, began to have more elliptical orbits, as if trying to find a new balance.

Mars and Venus, two close neighbors of the earth, had slight oscillations in their orbits, as if they were frightened and restless.

Asteroids and comets in the solar system, which once ran steadily in their fixed orbits, also began to become restless.

They were affected by the change in the moon's orbit, and some originally quiet asteroids began to change their orbits and fly toward the sun or other planets.

Comets seemed to have received some kind of call, flying from the edge of the solar system, crossing the sky, leaving behind bright light tracks.

The energy distribution in the solar system has also changed.

The sun's light seems to become more dazzling, while the cold outer space becomes deeper and darker.

This change in energy has a profound impact on the climate and ecological environment in the solar system.

On the moon, the Hulk didn't seem to stop his roar and destruction.

He waved his huge fist and slammed it hard on the surface of the moon.

Every time he hit the moon, it trembled, as if it was going to collapse under this force.

On the moon, the figure of the Hulk looked extremely lonely and huge.

He stood on the bumpy surface of the moon, looking at the earth getting farther and farther away, and the anger and unwillingness in his heart became stronger and stronger.

There was a crazy light flashing in his eyes, as if he wanted to swallow the entire universe.

His roar echoed in the universe, and the sound waves spread like ripples.

This sound wave not only shook the surface of the moon, but also affected other planets around it.

Some asteroids and satellites deviated from their orbits under the impact of this sound wave, and some were even smashed directly.

And the Hulk didn't seem to be satisfied with this. His roar became louder and louder, as if he was going to tear the entire universe apart.

The surface of the moon became bumpy under his smash, and gravel and dust flew everywhere.

With his roar and smash, the orbit of the moon became more and more unstable.

It began to waver in the universe, like a bomb that could fall at any time.

"You guys, just fight if you want to, what's the point of affecting other people's homes?"

At this moment, Luther took action to stabilize the solar system.

The biological force field in his body exploded instantly.

This force was so powerful that it seemed to be able to shake the entire universe. His biological force field quickly spread out, covering the entire solar system and even most of the Milky Way.

Under the influence of this force, the chaos in the solar system began to gradually subside.

The originally restless planets and small celestial bodies seemed to be smoothed by an invisible big hand and returned to their proper orbits. The orbits of Neptune and Uranus have returned to stability, and the shocks of Mars and Venus have also subsided.

The orbit of the moon has also gradually stabilized under the influence of Luther's biological force field.

It no longer continues to move away from the earth, but begins to slowly return.

The roar and smash of the Green Hulk seemed so insignificant in front of Luther's biological force field. His power was completely suppressed and could no longer have any impact on the moon.

The chaos on Earth also began to subside.

The waves gradually became calm, and the activity of the crustal plates also slowed down. Storms and hurricanes dissipated in Luther's power, and the sky regained its tranquility.

The clouds dispersed, the thunder and lightning disappeared, and the whole world seemed to have experienced a baptism and became brand new.

"Luther!"

Tony and his friends were desperately trying to escape. Now seeing this scene and hearing the voice that spread across the solar system, they were immediately excited.

"This guy, is he finally not hiding?"

Tony complained.

It seems that Luther took action only after the impact on Mars?

However, how strong is Luther now to make the moon, which has left the Earth's orbit and has been accelerated to an unimaginable speed, return to its original orbit?

Moreover, he can also restore everything on Earth.

Vegeta also looked at the moon that had returned to its original point in disbelief, as well as the earth environment that had returned to normal around it. The damage caused by the hundreds of giant apes was now easily smoothed out and restored.

Ganata's eyes widened, but he couldn't see the guy who made the move.

"How terrible! There are such powerful guys on Earth?"

Ganata had been watching the show, and Vegeta didn't know that he would become Ganata's meal at any time. Ganata wanted to make a move just now, after all, losing the moon would affect her life.

Now, Ganata was scared.

Even though she knew that she couldn't be killed, she didn't want to be targeted.

"Good boy, it's not time for you to come out yet."

Then Ganata stomped on the ground.

The ancient existence under the ground suddenly fell silent.

Even Ganata was scared like this, not to mention Loki and Ultron.

"It's Luther!"

"Emperor Luther!"

This long-lost name, this name they thought would never appear again.

Loki was even more frightened, she had only seen such great power in one person.

That was her father, the Lord of the Nine Worlds, God King Odin!

But she didn't know whether Odin could balance the nine planets and restore them to normal.

Ultron ran away without hesitation. If Emperor Luther returned to Earth, he would be dead.

Loki was not much better.

Chapter 588 The Final Battle

Loki's departure was like a gust of wind. She took Napal and Raditz through the secret passage of the Nine Realms, and she didn't even care about Vegeta.

She even deliberately didn't bring Ultron with her.

The reason why she didn't bring Ultron with her was also out of a complicated mentality.

Loki has always been vigilant about Ultron's ability. She didn't want him to have the opportunity to interfere with her plan.

For Ultron, Loki's departure didn't make him feel too much of a surprise.

He had long expected this day to come, so he didn't feel too much loss or frustration.

He had also made other preparations for himself.

Now, only Vegeta was left on Earth to face Thor, the Green Hulk who jumped back from the moon, the Smurf Steve who didn't know when he got up, and Captain Marvel.

Tony didn't dare to go up and chose to wait and see.

He stood aside and witnessed all this happening.

He had seen Vegeta's powerful strength and knew that every move he made could cause earth-shaking changes.

Therefore, he wisely chose to keep his distance and avoid being involved in this battle.

He recalled the amazing power that Vegeta had once displayed, and the shocking scene of a qigong wave piercing the earth was still vivid in his mind.

There was also that time when Vegeta used only a qigong wave to push the Green Hulk and the moon out of the earth's orbit. That kind of power was beyond human imagination.

He was afraid that he would be killed by Vegeta's sneeze. This was not impossible. With Vegeta's current strength, his sneeze could produce a storm beyond the earth. That unprecedented hurricane was enough to plunge the entire planet into chaos.

Tony didn't want to be a victim of Vegeta's sneeze. He knew that his strength was a world apart from Vegeta's.

Therefore, Tony chose to act cautiously.

He stood aside and observed the development of the battle, always ready to deal with possible changes. He knew that this battle was not something he could intervene in, and he could only try his best to protect himself.

Vegeta took a deep breath and released his qi.

The powerful air wave swept the entire battlefield like a storm. Thor's lightning, Hulk's roar, Steve the Smurf's will, and Captain Marvel's energy fluctuations all seemed so small in this air wave.

Vegeta, the giant ape, made the earth tremble every time he landed, and every time he swung his giant fist, he had the power to destroy everything.

"Luther, that guy, don't you have any thoughts or plans to attack?"

Tony sighed. He was still counting on Luther to fall from the sky and crush Vegeta.

Now it seems that Luther only attacked because Vegeta's attack affected Mars.

"Hulk!"

The battle was about to start.

Hulk was still so brave and fearless, and he took the lead in launching an attack.

Because of the power brought by anger, Hulk's height is now more than eight meters. He rushed towards Vegeta like a moving green mountain.

Vegeta also realized that many of the people present could threaten his life, especially this unreasonable green earthling who became stronger and stronger.

Hulk's fist was like a huge hammer, hitting Vegeta hard.

However, Vegeta just turned slightly to avoid the blow, and then his giant hand grabbed Hulk's arm like a chicken, and threw Hulk's whole body to the distant mountain wall with a strong swing.

Hulk's body drew an arc in the air, and then hit the rock heavily, making a deafening sound.

Steve and Thor saw this and hit Vegeta at the same time.

The two worked together, and Steve hit Vegeta's leg. His willpower has now reached the strongest period in history, comparable to the battle with Thanos.

That was the peak of his life, with a mortal body, fighting against the god-like Thanos.

Now, the stronger his willpower is, the stronger his strength is.

When his willpower merged with his physical strength, Steve's whole body shone with blue light, and the blue Hulk like Hulk became the shining blue Hulk!

His body became stronger in the blue light, every muscle was as perfect as a sculpture, and the flame of battle burned in his eyes.

His collision was like a planet hitting the earth. Vegeta was caught off guard and his huge body was knocked to the ground. A huge hole was smashed in the ground and dust flew.

Thor swung his Thor's Axe, and the axe streaked across the air. His power was fully released at this moment. His goal was Vegeta's head. He knew that was the weakness of the giant ape Vegeta.

However, Vegeta's reaction speed was beyond his imagination. One of his hands quickly protected his head and blocked Thor's attack.

The axe collided with Vegeta's arm, making a metallic collision sound and sparks flying. Vegeta's arm was left with a deep mark, but he didn't seem to care.

Vegeta's body suddenly jumped up and kicked Thor. Thor tried to block it with the axe, but Vegeta's power was too strong, the axe was kicked away, and Thor was also repelled.

Vegeta, transformed into a giant ape, stood on the battlefield. His body was like an insurmountable mountain, and his eyes were full of desire for battle.

Green Hulk climbed up from the ruins. His anger made his body even bigger. His eyes burned with green flames, and every step made the earth tremble.

He rushed towards the giant ape Vegeta, and the two huge bodies collided on the battlefield. Every confrontation was like the collision of two planets, shocking. The Green Hulk's fist was full of devastating power, but the giant ape Vegeta was fearless, and every counterattack made the Green Hulk feel great pressure.

At this moment, Captain Marvel joined the battle. She was extremely fast and came to Vegeta almost instantly. Her fist, with powerful energy, hit Vegeta's head directly. Vegeta did not hesitate at all, and his fist collided with Captain Marvel's fist in the air.

The power of the two produced a powerful shock wave in the air, shaking the surrounding buildings.

Vegeta felt the pressure, and this battle was much harder than he expected. Although his body was huge, his movements were still agile. Fighting alone, none of these people were his opponents.

However, when they united, even Vegeta felt the pressure. His fighting instinct was fully aroused at this moment. His body kept changing positions during the battle, and every movement brought with it a powerful airflow that seemed to be able to tear apart space.

Chapter 589 The Real Thunder God

Vegeta's attack became more fierce, and every punch was powerful enough to shake the planet.

Thor picked up his Thor's Axe again, and his eyes flashed with lightning, as if there was a stormy world hidden inside.

The brilliance was so dazzling that it seemed like the stars gathered together, and people dared not look directly at it.

His Thor's Axe shone with dazzling brilliance in his hand, and every swing was accompanied by a thunderous roar.

The roar was shocking, and the world was trembling with it.

The edge of the axe flashed with sharp light, as if it could split all obstacles.

At this moment, Thor was completely awakened, and his Thor's power was like an unlocked torrent, surging. That power seemed to come from the ancient Thor, containing endless thunder and lightning power.

He was no longer the Thor who needed time to accumulate power. The awakened Thor's power allowed him to release powerful lightning at will. Those lightnings shuttled through the air like dragons, and every strike was like a punishment from heaven, which frightened the enemy.

Thor's Thor's Axe drew dazzling tracks in the air, and every swing seemed to summon the thunder in the sky. The power of thunder poured down like a storm, drowning the enemy in endless thunder and lightning.

A field of thunder and lightning formed around him, and thunder and lightning shuttled through it, as if waiting for his order. Whenever Thor's mind moved, those thunder and lightning would quickly attack like loyal soldiers and defeat the enemy.

Every breath of Thor was synchronized with the thunder and lightning, his body seemed to become a part of the thunder and lightning, and his will was the will of the thunder and lightning. He merged with the thunder and lightning and guarded the world together.

Sol became much stronger than before, not knowing whether it was because he was angered by Vegeta and his own incompetence, because of his faith, or when the Thor's Axe was created, he was one step ahead of time to familiarize himself with the power of the Thor buried deep in his body.

The power of thunder that Thor triggered changed from the source of power and successfully completed the transformation.

The real power of Thor was stimulated, and it was even overbearing to repel all power!

He seemed to be the master of thunder, controlling the power of thunder and lightning, making it impossible for the enemy to get close.

Every attack of his made Vegeta feel a strong shock, and that power seemed to be able to destroy everything.

"Saiyan!"

Thor shouted angrily, and rushed towards Vegeta like the wind.

His eyes flashed with blazing thunder and lightning, as if he could see through all illusions.

The Thor's Axe in his hand shone brightly, and the light was dazzling, as if it contained endless thunder power.

Thor's breath suddenly surged, and a powerful pressure swept across the battlefield.

He was no longer the ordinary Thor, but the real Thor, with endless power and majesty.

Every time the Thor's Axe was swung, it was accompanied by a thunderous roar, and the whole world was shaking.

"The energy dissipation is too serious."

Luther commented after seeing it. These special effects are actually caused by Thor's inability to control the infinitely growing Thor's power in his body. If he could not leak any thunder and lightning to the outside, that would be the most terrifying.

Now, 50% of the Thunder God's power has been wasted.

Vegeta felt the powerful aura emanating from Thor and frowned.

At this moment, facing the awakened Thor, he also felt unprecedented pressure.

The two figures intertwined in the air, and every collision burst out dazzling light and powerful energy. Thor wielded the Thunder God's Axe, and every swing was accompanied by a thunderous roar, as if to tear the entire sky apart.

Vegeta was not to be outdone. He roared wildly, his figure turned into a residual image, and quickly approached Thor. His fist hit Thor like a hammer, but Thor cleverly dodged it every time.

The battle reached a white-hot stage, and both Thor and Vegeta showed amazing strength and skills. Their attack and defense reached an extremely high level, which was dazzling.

Thor knew that Vegeta was powerful and he had to go all out to defeat his opponent. So he began to gather more thunder power and prepared to release a one-hit-kill attack.

The lightning on his Thor's Axe became more and more dense, as if it was going to swallow up the entire sky. His eyes became more and more fierce, as if he wanted to completely destroy Vegeta.

Finally, Thor released his attack. A huge lightning bolt struck out from the Thor's Axe, and it rushed straight towards Vegeta like an angry thunder dragon.

The power of the lightning was so great that it left a charred mark in the air, and everything was destroyed wherever it passed. A huge hole was blown out of the ground, and the surrounding trees and rocks were shattered by this force.

Vegeta felt an unprecedented crisis, and he tried desperately to dodge, but the speed of the lightning was amazingly fast. He could only watch the lightning strike his head.

"Boom!" With a loud bang, lightning struck Vegeta's body, submerging him in lightning. His body rolled in the air and was blown away by the power of lightning.

A huge explosion sounded, and the whole battlefield trembled. When the smoke dissipated, people were surprised to find that Vegeta was still alive.

Although he was seriously injured, he stood up tenaciously.

Thor did not relax his vigilance because of this attack. He knew that Vegeta's strength should not be underestimated. He held the Thor's Axe tightly, ready to meet Vegeta's counterattack.

Sure enough, Vegeta roared and rushed towards Thor again.

His speed was faster than before, and his attack was more fierce.

Thor and Vegeta started a fierce battle again. Their figures intertwined in the air, and every collision made a deafening sound.

Thor wielded the Thor's Axe, and every attack contained the power of thunder.

His Thor's Axe seemed to have become his right-hand man, communicating with him and fighting against the enemy together.

The battle between the two became more and more intense, and the entire battlefield was affected by their energy.

The surrounding trees and rocks were shattered, and the air was filled with a thick smell of gunpowder.

At this moment, Thor suddenly noticed that Vegeta's head would be briefly exposed when attacking.

This was a great opportunity!

Thor immediately adjusted his attack method, wielding the Thor's Axe and slashing at Vegeta's head. This time, his attack was more swift and accurate.

Vegeta also noticed Thor's intention, and he tried desperately to dodge, but it was too late. Thor's Thunderbolt struck his head like lightning.

"Bang!" With a loud bang, Thor's Thunderbolt struck Vegeta's head fiercely. This attack was more deadly than the previous lightning.

Chapter 590 Killing Vegeta

This attack was more violent than any previous one.

Thor poured all the Thor power in his body into the Thor's axe, and the light of the ax instantly became dazzling, as if it contained endless thunder power.

"Boom!" With a loud noise, Thor's attack finally hit Vegeta's flaw. Huge energy exploded instantly, destroying everything around him beyond recognition. The air wave generated by the explosion swept across the entire battlefield, making it impossible for people to look directly.

After receiving Thor's thunderous blow, Vegeta's huge body swayed in the air a few times, and then fell heavily to the ground like a kite with its string broken.

White smoke emitted from his body, and he was obviously severely injured.

He let out a painful roar, his voice full of unwillingness and anger. However, no matter how hard he struggled, he could not stand up again.

Thor panted, looking at Vegeta lying on the ground, he also breathed a sigh of relief.

This battle was not easy for him. Vegeta's strength was beyond his imagination. If he hadn't awakened the power of Thor in time, the outcome of this battle would have been hard to say.

The Thunder God's Ax in his hand still exudes a faint light of thunder, as if telling the story of the thrilling battle just now. Thor planted the ax on the ground and supported his tired body.

The surrounding smoke and dust gradually dispersed, revealing its original appearance. The battlefield was a mess, with cratered ground and broken trees everywhere. Thor looked around, feeling a sense of sadness in his heart.

He knew that although the battle was over, the trauma it left on this land was indelible. Those innocent lives and those destroyed homes will become eternal pain in their hearts.

At this moment, Captain Marvel, Steve, Green Hulk, Tony and others also arrived on the battlefield. They were attracted by the loud noises and smoke rising in the distance, and their hearts were filled with tension and worry.

When they saw Vegeta lying on the ground and the exhausted Thor, they all had solemn expressions on their faces.

Tony was the first to step forward. He knelt down and carefully inspected Vegeta's condition. He noticed that Vegeta's chest was still rising and falling, faintly but definitely.

This shocked Tony. He knew very well that the Saiyans had a tenacious vitality. If he didn't take the opportunity to kill him now, it would probably cause even greater disaster in the future.

Captain Marvel stood aside, staring at Vegeta with cold eyes.

She recalled her previous confrontation with the Saiyans, and that kind of powerful power still left her with lingering fears.

She knew that the Saiyans were an extremely dangerous race and that their existence posed a huge threat to the earth and the entire universe.

Especially when Raditz disappeared before, it turned out that he was rescued by Rocky and Ultron. Once there was a second time, not to mention that Vegeta was much more dangerous than Raditz.

They were even less capable of imprisoning such dangerous individuals, which made her even more wary and hostile towards Saiyans.

"We must kill him."

Captain Marvel said decisively. There was an unmistakable firmness in her voice.

Steve didn't say anything. Even if he was the Holy Mother, Steve knew that some people had to die. He nodded silently.

The Saiyans are such people. They are really too dangerous. If Luther hadn't taken action this time, the earth and the solar system would have been doomed.

Even if Luther took action, those who died could not be resurrected. The Saiyan invasion alone caused hundreds of millions of human casualties.

They are dangerous elements more terrifying and terrifying than all wars and terrorists in human history.

Green Hulk looked at Vegeta angrily, his hostility towards the Saiyans never dissipated. He roared, as if he wanted to rush forward and tear Vegeta into pieces.

Tony analyzed the situation calmly.

He knew that the power of Saiyans could not be measured by common sense. They have amazing combat power and recovery ability. Once they are allowed to escape or recover, the consequences will be disastrous. Therefore, they must kill Vegeta now to avoid future troubles.

Everyone gathered around, preparing for Vegeta's final execution. They know this is a difficult decision, but one that must be made. They couldn't let the Saiyan threat continue.

However, at this moment, Vegeta suddenly opened his eyes.

He felt the murderous intention of everyone, and his heart was filled with unwillingness and anger. He struggled to stand up, but his body was too weak to move.

"Damn it, I, Vegeta, the Prince of the Saiyans, am going to die here?"

He said through gritted teeth. Although his voice was weak, it revealed a strong unwillingness.

Luther was also stunned for a moment. He didn't expect that there was no accident.

No, you are so determined to kill Vegeta?

Didn't you ever think about capturing Vegeta for research?

If you're like this, what should I do with Vegeta's "return"?

But it seemed normal. The Saiyans had caused so many casualties, and it was impossible for them to ignore the Saiyan threat.

Even the craziest Tony is no exception. A dead Saiyan is a good Saiyan.

This was Tony's idea.

At this moment, Thor raised the Thor's Ax in his hand.

He looked at Vegeta firmly, ready to give him the final blow. He knew this was a difficult decision, but he also knew it was for the sake of peace on earth and the entire universe.

Vegeta no longer had the strength to resist.

He lay on the ground and could only watch the crowd approaching. His heart was filled with unwillingness and anger, but he also knew that he had no hope of escape.

Finally, Thor raised the Thor's Ax and aimed it at Vegeta's neck. He took a deep breath and then struck hard.

There was a scream, and Vegeta's head was split open by the Thor's axe, and blood splattered everywhere.

His body twitched a few times, and then completely lost his life.

He could no longer be indestructible in front of Thor's axe.

Everyone looked at Vegeta lying on the ground and breathed a sigh of relief. They knew that this dangerous Saiyan had finally been eliminated.

Captain Marvel stepped forward and looked at Vegeta's body, a coldness flashing in his eyes. She knew that the Saiyans were an extremely dangerous race and they could not leave any hidden dangers behind.

So, she decided to take Vegeta's body away herself to ensure that he would not be resurrected or used.

In space, she flew at faster than light speed and threw Vegeta's body into the sun.

She knew that this was the only way to ensure that Vegeta would never appear again.

Captain Marvel even watched Vegeta being captured by the sun's gravity and submerged into the star before returning.
