

Kryptonian 66

Chapter 66 Peak Beast Body

Of course, Luther knew that his current strength was not as good as that of the super Kryptonian Hale, but in terms of potential, he definitely surpassed Hale!

That is, Silver Superman and Golden Superman might be a little stronger.

"I have no... Forget it, this sentence cannot be said."

Luther was very alert, this sentence was a DEbuff.

Those who said this sentence had an accident, which was very scary.

"Taotie?"

Luther's super vision was at the level of an astronomical telescope, or even stronger, so he could observe the fleet of Taotie civilization that had come to Blue Star through the Big Bug Bridge.

"I remember that Taotie seemed to send people to test the level of Blue Star... I don't know if Death Karl told these Taotie about me."

Luther was thoughtful. After Morgana lost contact and dark plane information, Death Karl would definitely find out, just like when Sumali died, He Xi ran over.

Luther didn't believe that Death Karl didn't monitor Morgana.

So Death Karl must have known his existence and his information.

In front of Morgana and the God of Death Carl, Luther, who was already face to face, could not hide his information. He could block the dark plane information just to make people unable to read his information. Face to face, didn't Morgana have the ability to record?

Unfortunately, Morgana didn't know that Luther didn't take her seriously and didn't expose much ability. They didn't gain anything except speculating that Luther mastered a new energy technology and unknown super genes.

Without knowing Luther's biggest trump card and many magics, even if the God of Death Carl was an illusion, Luther had a way to deal with him.

This is the benefit of keeping a hand in everything.

Although Taotie might be affected and change, Luther still planned to keep an eye on Qilin recently to prevent her from having any accidents.

He also didn't want Qilin to awaken the super gene of Shenhe Sniper. Qilin in the original plot was too miserable. She was completely at the cost of her life. A first-generation super gene played a lot of output that the second-generation super gene and the third-generation super gene could not play.

But every time he fought for his life, in contrast, a deserter completely ignored his responsibility, which was chilling.

He no longer hated iron for not becoming steel, because he was not even iron in the first place.

Anyway, I am here to protect Qilin, and other things will be left to fate.

"I should have a few subordinates in Super God..."

Luther was thoughtful. With his transformation magic, he would not lack materials or anything, and it would be easier for him to build subordinates than others.

And if Luther understood the structure of celestial-level supercomputers, he could directly transform celestial-level supercomputers and mass-produce them.

"He Xi is still on Blue Star. What does this woman want to do?"

Luther also found that the king of the sky base, He Xi, had not left. From the looks of the other party, it seemed that he planned to stay on Blue Star permanently.

This did not happen in the original plot, so it was easy to analyze that He Xi probably stayed for him.

He showed too much value, so it was not surprising that he would attract He Xi.

It's just that Blue Star is now in a mess, and forces from all sides have gathered here.

In this case, Morgana quietly returned to Blue Star.

Her Demon No. 1 was also teleported by the God of Death Carl, and Morgana's group of demon subordinates were resurrected.

"Queen!"

Ato felt guilty. He was not here and could not be the Queen's shield, so the Queen was destroyed once!

This was the negligence of their subordinates.

"Stop talking nonsense. You hand over the peak beast body to Taotie. Queen, I will dismantle the current fourth-generation divine body as materials to rebuild my divine body!"

Morgana consumed resources to resurrect her subordinates halfway. This time she did not intend to use life as materials, worried that Luther would come to her door again. In addition, the God of Death Carl gave her resources twice, Morgana was also generous for a rare time.

"Yes, Queen!"

Ato knew that Queen Morgana not only wanted to completely rebuild her divine body, but she also had to analyze and compare data.

Using the stored dark data of Demon No. 1 to compare with the current dark data, search and replace, this is not a big project, but it is very time-consuming.

In this case, of course, the Queen's problem is more important. Isn't it just handing over a peak beast body?

Then Atuo soon regretted it. He didn't expect that this peak beast body was out of control!

Death God Carl calculated that Morgana would definitely compare the data, but he thought that with Morgana's desire for a super soldier, she would definitely subdue the peak beast body first. As

a result, Morgana first gave herself a self-examination, which resulted in no one being able to control the Crocodile God Soton.

Even if the Crocodile God Soton was weak and insufficient in energy, it was not something that Atuo, who was not a god body yet, could deal with.

"Didn't your death god tell you how to control this peak beast body?"

Atuo watched his brother being killed by Crocodile God Soton with a casual knife, just like cutting melons and vegetables, and Taotie couldn't subdue Crocodile God Soton.

"My God Carl said that Crocodile God Soton might have his mind implanted by angels, and it would take the Demon Queen to subdue him."

Taotie said blankly.

"Why didn't you say this earlier?"

Atuo was speechless. Being implanted by angels was no different from brainwashing.

Even Atuo didn't dare to take this peak beast body. God knows what the angel did and how big the impact of the thought implantation is?

Actually, it's quite big. The original Crocodile God Soton was cruel and cunning, but now he is cute and silly. The angel's thought implantation is not thorough. I don't know if it's because of insufficient energy, poor skills, or too strong resistance of the peak beast body.

Crocodile God Soton still kills and eats, but after becoming silly, it's easier to deal with.

The Taotie chased the Crocodile God Soton to the street, and the passers-by on the street were panicked.

Some people even thought it was a movie.

"So much food!"

Crocodile God Soton was chased so hard that he had no time to eat. Now seeing the people on the street, he was excited, and his weak body made him sit on the ground panting.

The demon and Taotie followed closely.

"Deal with it as soon as possible, it has consumed most of its energy!"

Atuo said with a serious face.

This crocodile is really hard to deal with. It obviously still has a lot of energy, but it pretends to be on the verge of energy exhaustion and hibernation, which made them careless and let it run so far.

Fortunately, there should be no super warriors on Blue Star. It was a rare accident that the queen met a civilized god. Even Devil No. 1 could not calculate this possibility.

Seeing Atuo and Taotie chasing after him, Crocodile God Soton had to stand up again and fight with a curse.
