

Kryptonian 68

Chapter 68: Large-scale fog of war

"Karl, I can't bear it anymore, or we should destroy him!"

Morgana said fiercely.

"Calm down, it's not that easy to destroy a god."

Karl, the god of death, said helplessly. Let's not talk about their plans. With the process and experience of being chopped down and chopped down by Morgana and the demon civilization, do you still want to destroy Luther?

Can you stop each other?

Luther is different from Holy Kesha. Although Holy Kesha is also invincible, she rarely takes action. Morgana can still withstand it and delay time.

As for Luther, he is still alone and takes action all by himself. He can easily destroy the super warrior. The divine body of Morgana is also fragile in front of him. What can he do to stop her?

In particular, the peak beast body was chopped into dozens of pieces by Luther and taken away. This shows that Luther's attack power is very good. He can be regarded as having the lethality of Holy Kesha's Silver Wings, or even more terrifying. exist.

Just thinking about it gave Karl, the God of Death, a headache.

He has no fighting power at the moment, and neither does his subordinates. He can't just take out the void engine while Holy Kesha is still there. Isn't that asking for death?

"I'll find him as soon as possible."

Karl, the God of Death, didn't want to drag it on any longer.

I plan to negotiate openly and honestly with Luther.

If Luther does not accept it, then the only choice is to send void warriors to secretly deal with Luther.

However, it is still unknown whether the Void Warrior can solve Luther, so the God of Death, Karl, wants to negotiate to resolve this matter.

The reason why Luther could not be found before was entirely because Karl, the God of Death, did not pay attention to it.

Now Karl, the god of death, pays attention and calls on the power of the big clock!

Then... still can't find it.

Just kidding, Luther just upgraded himself. The biological force field can cover a larger area. In addition, he now has the ability to observe the dark plane and drive dark energy. Modifying the dark plane information is already a big deal for Luther. It is as simple as drinking water and eating.

Luther can now do the four very advanced technologies of observing dark plane information, erasing dark plane information, blocking dark plane information, and modifying dark plane information.

Originally, this should be something that the Death Song Academy, which specializes in dark information, is good at.

"He modified the dark plane information!"

The god of death, Karl, showed a surprised expression for the first time.

He originally wanted to find Luther through big data. After all, Luther had shown that he could not be located like dark alloy and blocked the dark plane information technology. If the big clock really wanted to find it, would it be possible to find him? come out?

There are only a few people in Blue Star, and it doesn't even take a second to find out all their dark plane information.

Before, I was just not sure whether Luther was still at Blue Star, so I didn't spend so much effort.

But now, Luther has directly modified and blocked the dark plane information within the entire biological force field coverage. In other words, the dark plane information within this range, regardless of friend or foe, is now incapable of observation.

The most difficult problem of the Super Seminary was directly solved by Luther.

This area is now like a fog of war, and there is still a fog of war that cannot be dispelled. Everyone seems to be hiding in the grass, and neither the insertion eye nor the real eye can detect their existence.

It can only be seen with the naked eye.

I guess the angels would be very confused. After all, what they like to do most is to use their eyes of insight to read people's information.

Now, even Tianji King Hexi cannot observe the dark plane information in this area.

"It directly blocked the dark plane information of the entire Celestial Dynasty... Could it be that guy?"

Tianji Wang Hexi did not expect such a thing to happen. Fortunately, the dark plane communication was not affected, otherwise her clone would probably be offline.

It was easy to guess who did this, because the only person He Xi didn't know was Luther.

"Is it within the scope of the Celestial Empire?"

Then based on the coverage, He Xi, Death God Carl and Morgana all deduced that Luther was now within the scope of the Celestial Dynasty, because the information about the dark plane in other places was clear at a glance, and Death God Carl also specially checked the dark planes in other places. Based on the above information, I am convinced that the only one in this range is China.

Hexi became interested. She didn't expect Luther to be able to do such a thing. Her space-based system couldn't even resist it.

If you force it, you can still read the dark plane information, but you can only read a single target. There is a mysterious force field affecting the dark plane!

Just analyzing this force field consumes a lot of computing power and energy, and the result is still impossible to analyze.

She has never seen anything like this. Hexi's enthusiasm for unknown things is a necessary quality for every scientific researcher.

Angel Yan is naturally also a confused member. Originally, she was going to contact and negotiate with people from the Super Seminary. The Taotie civilization has arrived in the Chiwu star system. Angel Yan plans to bring justice and protect Blue Star from the Taotie civilization. of infringement.

The premise is that Blue Star wants to join the Order of Justice.

If this was just an ordinary civilization, the angels would naturally let them join the righteous order directly. However, there is a Deno civilization and a super seminary on Blue Star, so the theocratic order of Holy Kesha can take effect.

Holy Kesha respects every god and super warrior and communicates equally, provided that it is friendly.

On the one hand, she has to consider the young people and old immortals under her command and make arrangements for them. However, there are too few male gods and super warriors in the known universe. The Lieyang Civilization still produces and sells itself. The fourth concubine is very beautiful, how could she accept a life-long relationship like an angel.

Styx Civilization...forget it, just Snow and the God of Death, Karl.

The male god among the space mercenaries? Forget it, there is no peaceful life in being homeless.

Scumbag? This is even more important.

On the other hand, if Holy Kesha doesn't respect the order she established, then what order is there?

But now that something like this happened, Angel Yan couldn't help but wonder if it was the Deno Civilization and Super Seminary that did it.

After all, it seems that they are the only ones with this technology.

Although she had seen the deal between Luther and Tianji King Hexi, she didn't know how capable Luther was. She only knew that he was a god.

A strange male god, maybe one of her sisters' male god in the future, this was the only impression she had of Luther.

"Sister Yan, what should I do?"

Angel Chase and Angel Moi asked.

"Don't worry, the Super Seminary won't do anything to us. It may be prepared for the Taotie Civilization."

Angel Yan said calmly, she didn't think Super Seminary and Deno Civilization had the guts to kill Angel.
