

Kryptonian 69

Chapter 69 War

Then Carl, the god of death, quickly figured out a way to find Luther.

After all, he is the God of Death.

Let the Taotie civilization launch an indiscriminate attack on the Celestial Empire and force Luther out as quickly as possible.

It's not that Karl, the God of Death, thought Luther would care about such a Blue Star life form.

But attacking is the fastest way to tell a super soldier from a mortal and a god.

It just so happens that the god of death, Karl, has only the most cannon fodder in his hands. The gluttonous civilization has so much cannon fodder that it is worthless at all.

So it's quite a bargain.

...

The sun sets and night falls.

The night life has begun and the streets are lively.

Luther and Qilin were holding hands and walking on the road. Qilin, who did not pursue material life and conditions, did not have many needs. She just wanted companionship.

It just so happens that Luther is a "big boss" who has nothing to do.

Of course, it is more than enough for him to use his super brain to think about various scientific research issues while using the remaining small part to stay with Qilin. Multi-threaded operations do not lag at all and do not affect the operation of the host.

"Luther..."

Qilin was about to say something when she saw a helicopter flying overhead.

"Helicopter?"

Qilin and other passers-by looked curiously at that helicopter flying at low altitude in the city? Have you applied for this channel?

No, even if you apply, it is impossible to approve such a low-flying helicopter.

"Maybe something happened? It looks like an official helicopter."

Luther said.

"Where does it look like?"

Qilin didn't see it.

"Didn't you see that there are missiles and cannons down there?"

When Luther said this, Qilin thought about it.

In fact Luther already knew what happened, the Taotie attack.

He thought that the plot of Taotie testing Blue Star's super soldiers had finally begun, so he took Qilin home without saying a word.

But then Luther changed his mind, because more and more gluttons appeared, and they continued to emit beams of rays. The vehicles that were hit exploded violently, engulfing pedestrians on the roadside.

"Is this... a direct large-scale invasion?"

Luther was very surprised.

"what happened?"

Qilin was pulled by Lu and ran all the way. She originally wanted to fulfill her duty as a police officer to protect the people and die in front of the people.

However, Luther held her hand tightly and pulled her into an underground parking lot.

"I don't know, maybe other countries are calling."

Luther made random remarks.

"No, I have to go out and evacuate them!"

Qilin said quickly.

"Don't go, what can you do, you don't even have a gun!"

After Luther finished speaking, Qilin fainted, fearing that this silly woman would really rush out.

"Fortunately, I have already achieved results..."

Then several tall figures appeared next to Luther.

Each one has a pair of golden wings behind it, wearing armor, and the overall shape is similar to the golden Saint Sagittarius.

These are the men Luther created based on Sumali's original scum super gene and the super gene engine system of demons like Atuo and others, plus the peak beast body of Crocodile God Thorton.

The strength of the peak beast body is such that even flame-level weapons such as the Flame Sword cannot break through the defense. The new super gene and super gene engine system created by the fusion of Tianzha and Demon give them capabilities that the peak beast body does not have. Super genetic power.

The weapons are naturally the two flame-level weapons of Crocodile God Thorton.

After some research, Luther figured out the technology of the flame-level weapon. However, the flame-level weapon is still different from the angel's flame sword. The angel's flame sword can use flame bombardment to instantly destroy the peak beast body.

The Crocodile God Thorton's pair of weapons naturally does not have the ability to bombard with flames.

But the problem is not big, Luther can study it by capturing the flaming sword.

"Kill them all."

Luther didn't plan to take action himself. It would be too troublesome for him to take action himself against a bunch of weak scumbag gluttons.

This group of golden saints all saluted Luther respectfully.

"Yes, my God!"

They all have simple memories, knowing that they are the creations of the Kryptonian civilization, and that the person in front of them is their creator.

"My god Karl wants us to attack all cities and everyone in China immediately to cause death..."

The Taotie King is a little puzzled by this order from the God of Death, Karl. They often do things like causing death, but rarely in such urgent situations as now.

But naturally they will not disobey my god Karl's orders.

So the advance troops were sent out by Taotie King Shihou.

The gluttons are naturally keen on causing death.

"What's going on!"

The Super Seminary and the Deno Civilization were different. They knew that the Taotie Civilization would invade Blue Star, so they asked Di Leina to activate all the super genes on Blue Star as soon as she arrived.

But they didn't expect that the Taotie civilization would invade so quickly, which caught them off guard.

Although in the original plot, they were almost caught off guard.

I don't know where I got the confidence from.

Now there is a full-scale invasion, leaving them with no time to respond.

The people of Xiongbing Company are still training and studying. How many days have it been?

"The Taotie civilization has invaded, but we haven't reached an agreement with the angels yet, so they dare to invade?"

Di Leina was very puzzled.

She didn't take the Taotie civilization seriously. It was just a space-class civilization. If she hadn't been restricted by the gene lock, Dilena would have dared to deal with this group of Taotie by herself.

It can be said that the invasion of the Taotie civilization this time woke up the Celestial Empire and the Super Seminary.

They frantically dispatched fighters and troops to stop it. However, facing the swarming Taotie scouts and aerial vehicles such as the Grand Cross Ship and Taotie gunboats, they had no power to fight back. They suffered dozens or even hundreds of times the number of casualties of the other side, but their record was pitiful.

At this moment, hope came.

Five golden figures, holding sharp holy swords, their golden wings cut through the sky, bringing Taotie rain.

Their flying speed was very fast, so fast that the Taotie scouts riding the floating motorcycles had no time to dodge and were cut in half by a sword.

"Angel?"

Morgana, who was paying attention to the battlefield, widened her eyes.

"It's different, not Kaisha's angel..."

Death Karl also kept paying attention and discovered the existence of these five suspected angels, but they were completely different from angels, especially the pair of golden metal wings behind them.

"Damn, why do they feel more showy than those roast chickens?"

Morgana swore.

They are indeed very showy, the gold armor is very showy, not to mention that Luther prepared the Sagittarius armor for himself!

"Flame-level weapons, with such weapons..."

Death Karl has guessed their identities.
