

Kryptonian 71

Chapter 71 The Divine Authority is Me

The Void Engine is a very powerful thing in the original plot.

It should be noted that the Void Engine and the Void Controller are not the same thing. The Void Controller is a Void program or Void weapon installed on the Void Engine or Anti-Void Engine.

Luther does not care about the ability of the Void Engine in other worlds. He even needs the effect of the Void Engine on himself!

I don't know if this thing can modify his super gene and define it as a fusion state?

At that time, he will not need the Doomsday Biomass Computer, and it will be completely fused.

It's not that there is no fusion now, but there is still no way to maximize the performance of the two genes.

In other words, it's like an alloy. He is now just a complementary alloy with a strength higher than ordinary steel, but the actual strength should be that of a super alloy such as titanium alloy.

Then you can also use the Void Engine to dig out a more powerful Doomsday gene and repair the loopholes in the Kryptonian gene, etc. A lot of benefits.

Of course, if Luther can get a Void Engine, then the Void Particles will not be a scarce commodity for him.

As long as you understand the structure of the Void Particles, you can have as many as you want.

Void matter is everywhere. The sub-biological engines that Holy Kesha gave to Angel Yan, Angel Zhui, and Angel Zhixin were made of void matter.

However, the energy level and magnitude of void engines made of void matter and void particles are very different.

The quality of void particles is too high, surpassing everything, and it is not comparable to void matter that has been floating in the universe for who knows how many years.

Luther appeared, and Snow looked at the main god who appeared out of thin air and couldn't help but lower his head.

He was proud in his heart, and only felt that his god was the god who mastered the truth of the known universe, and anyone was vulnerable in front of my god Carl.

It's just that my god Carl is not ready yet.

Death God Carl appeared almost the moment he appeared.

"Hello, respected Kryptonian main god, Mr. Luther."

Death God Carl said to Luther.

"What to talk about?"

Luther got straight to the point, and didn't play any pretense and mutual respect between gods with Death God Carl.

Death God Carl was not surprised. From Luther's behavior pattern and the language analysis collected, Luther is most likely a civilization god who is a part-time battle god and scientific research god.

This thing does not mean that scientific research gods cannot be battle gods, and battle gods cannot be scientific research gods.

The problem is that this does not mean that cross-fields can cross-fields. In fact, the difference is quite large. At least Death God Carl does not think he can be a battle god, and He Xi will not think that she can be a battle god. She is destined to be a scientific research god, and she has specially developed a clone to assist her in fighting.

In the case of computing power suppression, scientific research gods can of course fight, but in the case of no advantage, under the same conditions, when scientific research gods and battle gods fight, most of the deaths are scientific research gods.

Therefore, in terms of thinking mode, Death God Carl is really not sure about Luther's state.

Research gods are calm and full of wisdom, and most battle gods have a very direct thinking mode. Occasionally, a few high-IQ ones tend to be direct.

Luther is so direct now, it may be a disguise, or it may be true.

Death God Carl silently collects data. For scientific research gods, data is a weapon!

"I came here to invite His Majesty Luther to join our plan to destroy the strongest civilization god in the known universe, Holy Kesha."

"Conditions?"

Luther nodded and asked.

There was no doubt at all.

"Although His Majesty Luther has obtained the fourth-generation divine body technology, he should not have the materials needed for the fourth-generation divine body, right? I can provide a set of materials for the fourth-generation divine body, as well as the fourth-generation divine body technology information stored in the big clock by Shenhe civilization, the once top civilization in the known universe."

Death Karl said.

"Not enough."

Luther was concise.

"What are the conditions, His Majesty Luther?"

Death Karl nodded. Bargaining means there is still room for negotiation.

"Void technology and knowledge, void matter, void particles, a complete set of void engines, source code and data programs of celestial-level supercomputers, plus the fourth-generation divine body materials and technology you mentioned."

What Luther said startled Death Karl.

"Are there civilizations interested in the void in the marginal space?"

Death Karl was thoughtful.

"This is too much, Your Majesty Luther."

Death Karl said calmly.

"Okay."

Luther turned and left.

"Please wait a moment, Your Majesty Luther!"

Death Karl didn't expect Luther to really turn around and leave, without even talking, so straightforward and direct?

This feels like a scientific research god again, he doesn't like inefficient negotiations and exchanges and processes, if it works, it works, if it doesn't, it doesn't, he doesn't want to waste time.

Luther didn't indulge him, there are other ways to get the void engine, at worst he would catch the Taotie King Shihao and get its mechanical version of the void engine.

Although it is not suitable for biological and super genes, he can study it.

Looking at Luther who disappeared in an instant, Death Karl frowned, and the big clock quickly searched, but found nothing.

This ability to block dark plane information over a large area is too bad.

Of course, it is not impossible for the Death God Carl to solve it. The big clock can break through the cleverness with force. It is just that he is not suitable for such a big move now. The plan has not started yet. Just teleporting Demon No. 1 may attract the attention of Holy Kesha, not to mention forcibly observing the dark plane information of a blocked area.

Death God Carl, who dealt with Luther for the first time, also fell into the same doubts as Tianji Wang Hexi.

This person... is he too decisive, and he is unquestionable. If he can do it, he can do it. If he can't do it, he can't do it. He won't waste time with you, and there is no possibility of negotiation.

Hegemony and kingly way are fully displayed.

"Krypton civilization in the marginal space is likely to be similar to the position of angel civilization in the known universe..."

This kind of self-confidence, this kind of arrogance, this kind of domineering, this kind of divine power is me, and the feeling of treating other gods as nothing, Death God Carl is too familiar.

Isn't Holy Kesha like this? Of course, Holy Kesha will pretend to respect other gods.

Luther's words, just don't care at all.

I am the only one, looking down on the world.

Death God Carl realized that he might have found a god who could really fight against Holy Kesha.

However, the current situation was difficult to deal with.

Luther returned to his home, and Qilin just woke up.

"Luther... I..."

Qilin remembered what happened before.
