

Kryptonian 83

Chapter 83 The Advent of Holy Kesha

The reason why Morgana did not do this in the original plot was partly because she obtained the peak beast body Crocodile God Thorton.

The peak beast body is still very powerful, and the flaming sword can't break through the defense. The crocodile god Thorton was destroyed once by Angel Chase with flame bombing, and there will be no time for Angel to charge up and use flame bombing.

Otherwise, there is no way to explain that the high-level guarding angels like Angel Fanxing behind would be easily killed by Crocodile God Thorton. She did not have time to accumulate energy to use flame bombing, and her physical strength could not defeat the peak beast body. It is also normal to be killed by the crocodile god Thorton.

On the other hand, the original plot did not have such a big threat as Luther. He robbed the Demon Queen, chopped melons and vegetables, the Demon Warrior, and stole the peak beast body. This brought a lot of uneasiness and uncalculated fear to Morgana. .

She hasn't experienced such fear for a long time. Who wouldn't be afraid of a guy who doesn't know his purpose but has the ability to take your life at any time?

So Morgana sent out nuclear bombs to destroy the mobs and accumulated a large number of subordinates. In any case, the more subordinates she had, the greater her advantage would be in the world of Super Seminary.

This is what the Tiangong Group is like later. After Hua Ye retrieved the Tiangong, millions of scum gathered together. Even the angel civilization was retreating. They lost due to lack of manpower. Even though their technology was more advanced than the scum, they couldn't hold it back. The scum of heaven is numerous and powerful.

It can only be said that this is the idea and style of gods of the older generation like Morgana. However, after the super gene strike function of the Void Engine came out, it is no longer a problem to kill a large number of third-generation gods in an instant, nor is strength in numbers.

Although the super gene attack function needs to analyze the opponent's super gene, the temporary analysis depends on whether the computing power is enough. If you don't give the void engine time to analyze, you can still win, but the high-frequency void engine can complete the analysis in an instant.

Luther's own super gene has several layers of protection, so even if the black hole engine wants to analyze it, it is impossible.

"Queen, if we develop the demon army so aggressively, will it cause Holy Kesha to come to Blue Star early?"

A'tuo said to Morgana worriedly.

"What are you afraid of? There will be a fight sooner or later anyway."

Morgana said nonchalantly. In the original plot, she relied on the Blue Star Celestial Dynasty not knowing how terrible the Taotie Civilization and the Demonic Civilization were, and holding Demon No. 1 to die with the Great Gorge City, so that Holy Kesha did not immediately attack her. .

The Power of the Galaxy did not authorize her to destroy Morgana. Holy Kesha respected the Power of the Galaxy, the future of the angelic civilization, and allowed Morgana to live for so long. Then when everything is ready, go straight to war.

Now, Morgana and Death God Karl both judge that Holy Kesha will not start a war on Blue Star because of the power of the galaxy.

However, she still made the Taotie Civilization slow down its offensive. With the wisdom of God, she could naturally see the situation of Blue Star.

Hundreds of countries are fighting among themselves to compete for resources on a small and insignificant planet. When other civilizations have long since unified towards space civilization, they are still fighting among themselves.

Morgana couldn't help but sigh that Blue Star was much more chaotic than she imagined.

Kunsa Planet was not so chaotic back then.

So she asked the Taotie civilization to take action against other countries. The Celestial Empire sent a company of soldiers to help out of the same race and civilization. On the one hand, the people of the Celestial Dynasty knew that everyone else was dead and only the Celestial Dynasty people were left. is a good thing.

They also need others to attract firepower, otherwise they will be more likely to be targeted if they are the only one left.

On the other hand, they plan to use these gluttonous aliens and little devils to train their troops.

Not only training the heroic company, but also training their own army.

However, these things are not optimistic. The troops supported by the Chinese Empire suffered heavy casualties, which also aroused the incomprehension of many people.

There is no problem in rescuing Ba Tie, but why should we rescue Xiao Baga, Xiao Xiba and Xiao Fake?

These are all our enemies. Xiao Baga and Xiao Xiba can be ignored if they are simply disgusting. But Xiao Fake is not simply disgusting, but is also hostile to others. Shouldn't we just sit back and watch them fend for themselves?

...

Without Luther's instructions, the gods of war and soldiers of the Kryptonian civilization could only stay outside the Blue Star orbit.

Fortunately, Luther built a barely capable celestial supercomputer. The technology came from the Demon 1 and Deno 3 that he had invaded.

Morgana thought that Luther had only obtained the fourth-generation divine body technology, but she didn't know that Luther had taken away her panties.

Celestial supercomputer + combat celestial body, it has become the current "Supreme Heaven".

In the memories of the Kryptonian gods of war and soldiers, their Kryptonian civilization is the top overlord-level super-god civilization in the edge space, and the Supreme Heaven is their top-level celestial-level supercomputer and combat celestial body.

Luther's own barely adequate calculation is compared with the treasure house of sacred knowledge and the big clock. In fact, after his research and innovation, the computing power of the Supreme Heaven is not much worse than that of the treasure house of sacred knowledge, and because Luther himself does not need to add computing power. Yes, so the celestial body in the supreme heaven is not in the dark plane.

It looks like an asteroid, and there are even flowers, trees, mountains and rivers on it.

Because of the information shielding in the dark plane, the Supreme Heaven has never been discovered.

They watched indifferently as Blue Star was invaded and ravaged by the Taotie civilization.

To them, these are irrelevant matters.

At this moment, an alarm sounded in the Supreme Heaven.

"Dark energy information is detected, the value reaches the standard, and it is determined that the fourth generation divine body is the main god level!"

The faces of the war gods suddenly changed. The fourth generation of divine bodies?

You should know that they are only the third generation of divine bodies of the Kryptonian civilization, "Kryptonian War Gods". Their main gods are the fourth generation of divine bodies. They know that there are fourth generation divine bodies in the known universe. For example, the queen of the demon civilization is the fourth generation of divine bodies.

It's just that they are not the opponents of their king, but now there is another fourth generation divine body?

Holy Kesha seemed to feel something. After coming to the Chiwu star system, the Holy Knowledge Treasure House calculated all the data of the Chiwu star system.

"Interesting, so many things have happened here. Kryptonian civilization... Did the main god rob Morgana?"

Holy Kesha read the dark information and dark data at that time. Luther could block his own dark plane information, but he couldn't block Morgana's.

After all, he was still very rough at that time, not as detailed as now.

Mainly because there was no technology to observe the dark plane, it could only be so rough, but now it is different.

"Queen, who robbed Morgana?"

Angel Leng asked in surprise when he heard his queen say this.
