

Kryptonian 87

Chapter 87 The Terrifying Kryptonian Civilization

Holy Kesha sighed at the wealth of Kryptonian civilization. The black armor was dark silver plated with dark alloy and dark titanium elements, and even the swords held by these gods were dark silver weapons, and they were even equipped with God-killing engines!

Of course, if analyzed carefully, Holy Kesha could still know that they were not real dark silver weapons. Dark silver was also just a coating, and there were still God-killing weapons inside. This was like the flaming holy sword upgraded by Angel Yan to her subordinates after she became the queen in the later period, that is, the flaming sword + silver plating.

The hardness increased, but silver was different from dark silver. It was not mixed with dark iron, so it was not as indestructible and indestructible as dark silver.

"God-killing power type war god gene?"

In addition, Holy Kesha also analyzed some of the dark plane information of these black-armored black-winged gods, and could not read their dark data and super gene information. The Supreme Heaven was not a place to eat, and the gene lock was still very strict.

Through the dark plane information she read, Holy Kesha knew that these gods with black armor and black wings were the super genes of the God-killing Power type that she feared the most.

And they were also the cutting-edge combat super genes of the God-killing-level units.

Holy Kesha feared the God-killing-level super genes of the God-killing Power because they were too fast.

An axe chopped off half of a planet, which was also shocking in the universe war.

If the stellar energy was not used, such as launching solar wind, solar flares, or triggering nuclear fusion effects, it would be very difficult to destroy a planet.

But the God-killing Power could do it easily, which was the horror of anti-dark matter energy.

Although she imitated the original No Star God of War, studied God-killing weapons and God-killing combat, and armed more powerful Guardian Angels.

But she knew very well that high-level Guardian Angels were no match for the God-of-War-level units.

Not to mention that these Gods of War had the ability to fly behind them, and the angels' biggest advantage was gone.

Ten Gods of War with black armor and black wings!

This is enough power to run rampant in the known universe!

The remaining super warrior with golden armor and golden wings is not simple either. Holy Kesha analyzed the data of the peak beast body and the invincible body. She didn't know how the edge space combined the peak beast body and the invincible body. Could the beast body gene and the Shenhe body gene also be fused?

They held the flame-level weapons in their hands. The basic information obtained by the analysis was similar to the flame sword, except that they were called the Explosion Flame Sword, which could also release flame bombardment and easily destroy and burn the terrible attack of the peak beast body.

The angels were basically killed when they were hit, after all, even Soton was dead.

Holy Kesha looked at Luther. Is this the Kryptonian Lord who traded with the old goblin?

Is he also the Kryptonian Lord who robbed Morgana?

After knowing the gold content of his men, Holy Kesha could no longer ignore the Kryptonian civilization. This is a terrible super-god civilization that is fully capable of severely damaging the angel civilization!

"Queen Kesha!"

The angels gathered together and confronted the warriors of the Kryptonian civilization on the opposite side.

Luther said that and then stopped talking, waiting for Holy Kesha to speak.

He was halfway through studying the black hole engine, and after discovering Holy Kesha, he came out to say hello.

Of course, Luther would not protect Morgana from doing anything to Holy Kesha, and destroying Holy Kesha now would not allow him to obtain the entire angel civilization.

This is also the reason why he doesn't care about throwing the void matter to the God of Death Carl. The angel civilization will only be possible to be obtained by him if it is desperate, and the same is true for the Fiery Sun civilization.

Luther's appearance is just to show his background, telling the future Angel King and the little fool Dilena that my Kryptonian civilization is invincible!

If you have no choice, come to me!

Unlike the angels who are facing a great enemy, the attitudes of the war gods and warriors on the Kryptonian civilization are very relaxed and full of confidence, just like the mentality and momentum of the Han people looking at the Hu people when the Han people were fighting against the five Hu people.

Luther also shaped their memories in this way. Anyway, there is Sumali's battle memory, so just compile it into them.

Don't bother with the things in the marginal space! I said that Kryptonian civilization is invincible, dominating and sweeping the fringe space. Kryptonian civilization is dominating the fringe space!

As for Luther himself, he was wearing a divine robe of Hades.

He always felt that the most handsome black armor was Hades's divine robe and Hades' armor in the Super Beast Armor.

In this kind of occasion, of course, it is more appropriate to wear Hades's divine robe.

He was already very handsome, and now with this divine robe, he is even more handsome, and full of majesty and sacredness.

"So many third-generation divine bodies and third-generation super soldiers!"

Angel Yan also saw the level of the Kryptonian civilization on the opposite side, and could only say one thing, that is, it was scary.

If they went to war with the Kryptonian civilization, perhaps their group of high-level guarding angels and those angel vanguards would all die here.

The combat capability of the war god-level units is too strong. At best, they can only be regarded as scientific research warriors who can fight, and they are not as good at fighting as the war god-level.

"Fuck, this guy is so rich and he robbed me???"

Morgana's eyes turned red when she saw this scene. Ten war gods, fuck you!

How could she be robbed and blackmailed by the main god of such a civilization.

"Karl, this guy is too outrageous. I guess he can deal with Holy Kesha alone!"

Morgana said to the god of death Karl.

"Fourth-generation divine body, he has been promoted to the fourth-generation divine body."

Death Karl was silent for a while, then said.

"What? The last time we met, he was still a third-generation divine body. So soon, he has become a fourth-generation divine body?"

Morgana couldn't believe it.

"His atoms are very special. It is very likely that he is a fourth-generation divine body of the god of war."

Death Karl read part of Luther's information through the big clock, but it was Luther himself who deliberately let people read it. He wanted people to know how strong he was.

Of course, these are just shells. Luther would never let people read his super genes.

So what Death Karl read was the shell of the fourth-generation divine body created by Luther.

Death Karl has studied the fourth-generation divine body technology of Holy Kesha's Holy Body. The holy atoms are almost indestructible. Supernova explosions can only scatter but not destroy any holy atoms, but the atoms he read of Luther's fourth-generation divine body are even more exaggerated.

"The atoms are locked together by strong gravity and strong interaction. In the macroscopic realm, his divine body is almost indestructible. Even a supernova explosion cannot hurt him!"

Death Karl said to Morgana.

"What?"

Morgana was shocked.
