

Kryptonian 88

Chapter 88 Get ready to start!

Morgana was still thinking about taking revenge on Luther, but now Death Karl said that Luther is indestructible?

"Impossible, how can there be something indestructible in the known universe? One supernova explosion is not enough, then let's have ten, one hundred!"

Morgana said to Death Karl unwillingly.

Death Karl didn't know how to tell Morgana about the concept of absolute rigid body. Morgana was a scientific god, but she had been wasting too long, and she had no time to study because she was being hunted by Holy Kesha.

"But it's not impossible to destroy..."

Death Karl just said that it was almost indestructible. If a supernova explosion couldn't solve it, could a black hole solve it?

For Death Karl, Luther, who pursued an indestructible God of War level fourth-generation body, was easier to deal with.

Because his body was so powerful and difficult to solve, he must not be good at wormhole transportation technology, although others also found it difficult to transport him and solve his body.

But for Death Karl with a big clock, it was not a problem at all. Wasn't Holy Kesha also difficult to solve?

However, he redefined the spatial position of Holy Kesha, provided that Holy Kesha did not move. If she moved, it would be difficult for Death Karl to locate her.

"Do you have a way to deal with him?"

Morgana immediately became excited.

"Yes, but wait until Holy Kesha is destroyed."

Death Karl said speechlessly.

...

Holy Kesha looked at Luther, and then looked at his men.

"What is the name of this Kryptonian god?"

Holy Kesha broke the tense atmosphere between Kryptonian civilization and Angel civilization.

"God King."

Luther said calmly.

Anyway, Holy Kesha claimed to be the king of gods. When Angel Yan faced Pan Zhen, she also said that if Queen Kesha was still there, she would make Pan Zhen kneel down.

At that time, Angel Yan had just become a god, and the gap between him and Pan Zhen was so big in terms of strength and status. It is conceivable how crazy these angels were when Kesha was there.

No wonder the Lieyang civilization would think of agreeing to the cooperation of Death Karl to let Holy Kesha bid farewell.

"Your Majesty, you said this is your doorstep, so do you want to make Chiwu Star System and Milky Way your home?"

Sacred Kesha asked calmly.

"Wherever I am, that is where Kryptonian civilization is."

Luther said.

Then Angel Yan and other angels all felt the pressure, two terrifying dark energies were fighting each other.

Sacred Kesha raised her eyebrows. Now Luther and the people of Kryptonian civilization are within her sacred domain. As long as she wants, she can make silver blades grow in their bodies.

But Luther is something she can't solve, and if Sacred Kesha takes action first, this matter will not end well.

Luther's driving dark energy is just a show, but Sacred Kesha's dark energy reserves are indeed beyond imagination. Morgana is a little bit behind her in dark energy.

Sacred Kesha feels that Luther's dark energy is a bit strange.

The dark energy of gods, gods and super soldiers all has its own breath, which can be understood as dark energy with personal code imprints, so it is easy to judge which target the dark energy data meets through this point.

In the original plot, when Hua Ye descended, a huge amount of evil dark energy was detected.

She found it strange that Luther's dark energy was unexpectedly pure, as if it was used directly without coding.

But how could this be possible? Dark energy that has not been coded can be driven by the enemy at will?

She tried it and found that these dark energies seemed to be not coded by the algorithm. In fact, she couldn't drive these dark energies. It seemed that there was a special technology.

There are too many unknowns in the edge space.

Holy Kesha became interested.

"Is the tomboy going to fight with Luther?"

He Xi's clone naturally saw these things, and she could only say that she was convinced by Luther's family background.

Because no one knows that the void engine can pinch resources infinitely, they all think that the family background of Krypton civilization was obtained by plundering the edge space.

That is the edge space. God knows how many resources there are. After all, they dare not go to the edge space after the known universe failed to calculate the details of the edge space.

Who knows if the aerospace technology is pointed out in that place and the wormhole is crossed, it will hit a black hole or a star.

Otherwise, don't they know that the edge space may be much larger than the known universe, with much more resources?

"The dark energy drive technology is also very different from ours. I can't see anything for the time being."

He Xi didn't know if they would fight. The tomboys have always been strong in the known universe, and they may not be weak in the face of the super-god civilization from the edge space.

And the Kryptonian civilization doesn't seem to be the one who will bow down.

So, the two of them may fight, or they may let their subordinates fight?

He Xi is very much looking forward to it. Anyway, she is not worried about the tomboy.

She only thinks that if they fight this time, she will probably be able to collect a lot of data from the Kryptonian civilization, right?

"The words of the God King are too arrogant."

Sacred Kesha suddenly said.

"Fight! Fight! Kill Kesha, that bitch!"

Morgana cheered in her Demon No. 1.

"Don't waste your saliva, just fight if you want to."

Luther declared very domineeringly.

Holy Kaisha raised her eyebrows and raised her hand, and then pieces of silver blades emerged from the ripples of space, forming a pair of huge silver wings.

"Queen Kaisha's silver wings!"

The angels' confidence soared.

"Dark Su Silver Weapon?"

Luther supported his cheek with one hand, and placed the other hand flat on the armrest of the seat, and then raised his fingers.

"Clang clang clang!"

The angels stared in amazement at the various shapes of strange and colorful divine weapons that appeared from the golden ripples in front of Luther!

"These are all Dark Su Silver Weapons, God-killing Weapons, and Flame-level weapons!"

Holy Kaisha only took a glance to see the details of these weapons.

The angels shared the computing power bonus of Holy Kaisha's knowledge treasury, so they could naturally see the details of these weapons.

"How is it possible, there are so many Dark Su Silver Weapons, God-killing Weapons, and Flame-level weapons?"

Angel Yan couldn't believe it.

"This is the King's Treasure House of my God. The weapons collected here are all weapons of civilizations defeated by our Kryptonian civilization."

The leading God of War spoke calmly.

"King's Treasure House?"

Saint Kesha was thoughtful when she heard the name. Does it look like the same thing as her own arsenal?

"How many civilizations have been destroyed?"

Looking at the golden halo that covered the sky, even the sky and the earth were rendered golden.

Angel Yan muttered to himself.

"Come on."

Luther put down his finger, and the next moment, these divine weapons were aimed at the angels.
