

Kryptonian 95

Chapter 95 He Xi: ? ? ?

Luther didn't expect that just as Karl, the God of Death, was sent away by him, Hexi would come from behind.

"The arrival of the Heavenly King of the Angelic Civilization is truly a splendid sight."

Luther looked at He Xi who was invited in, and then looked at the clone of He Xi in Blue Star, and finally confirmed that this was at least a high-configuration battle doll of the fourth generation of gods. As for whether it was the original body, Luther had no idea. Know.

Hexi made too many battle dolls, and no one knew whether she was hiding them or not.

"His Majesty the God King is still so funny."

Luther heard that He Xi's words were teasing their first meeting.

"So, what does the King of Angel Civilization want to know here?"

So Luther simply said that if he had something to say, he would leave as soon as possible.

This made He Xi look at him in surprise, why am I so annoying?

"I came to see the God King on the order of Queen Kesa. The Queen wants to ask the God King what he wants."

Hexi cleared his throat directly and said.

"What do you want?"

Luther lowered his head slightly, and his eyes fell into shadows, making it difficult for He Xi to see his emotions through his eyes.

Although in Luther's situation, it is very likely that his eyes will not reveal any emotional flaws.

However, the Kamigawa civilization or Kamigawa body is accustomed to looking at each other's eyes and expressions.

"According to King Tianji, it seems that I am blocking your way?"

Luther continued.

He Xi paused. She was not surprised that Luther could see this. The angel's performance was not too obvious.

"Judging from the information that I have learned now, five super-divine civilizations, Demon, Angel, Styx, Deno, and Lieyang, are all here. It seems that I have good luck. When I arrive in the known universe, I can directly Entering a critical place."

Luther said with a smile.

"Maybe it's a dangerous place?"

He Xi also laughed.

"I don't care."

Luther said.

"Queen Kesha has ruled the known universe for tens of thousands of years..."

"That's because there was no king before."

"Does the God King want to test whether his sword can stay sharp in the known universe?"

"Then it depends on whether there is a suitable scabbard for me to sheath the sword."

He Xi and Luther exchanged words with each other, seemingly at odds with each other, showing their sharpness and refusing to give in an inch.

In fact, He Xi already knew what Luther meant.

"Angels will not retreat, only in the Chiwu star system."

He Xi said.

"This platform you have built is intended to turn this Red Crow star system into a testing ground for the gods, a training ground for the new gods, and a purgatory for mortals... Who is your target?"

Luther asked directly.

Of course he knows who he is training for, Ge Xiaolun, is there anyone else?

Maybe only Morgana doesn't know.

So Morgana just has no brains.

The purgatory of mortals is real. With the attitude of this group of civilizations, at least thousands of living things will die on the earth. If the war continues for thousands of years, the population of Blue Star may not exist in a hundred, or even become The second Kunsu may not be the same.

Even the angels felt that it would take at least a hundred years to end the war.

Ever since the Deno civilization asked Di Leina to activate the super gene, Blue Star has already become the stage.

From God's perspective, he will not care if Blue Star turns into a purgatory, just like the beautiful country will not care if Iraq and Afghanistan turn into a purgatory.

Even if Luther didn't care about Blue Star, there would still be things that hurt his feelings.

"No matter how much you think about it, it's impossible for me to tell you, right? Your Majesty the God King?"

He Xi said.

She has expressed her bottom line. The angels only want the Chiwu Star System, or in other words, they only want the future of the Galaxy Power, and they can give in to anything else.

"Demons are also your training tools. Do you plan to accompany the growth of a new god in the Chiwu star system?"

Luther asked next.

He Xi looked at Luther with a smile and said nothing.

"Does Morgana know that she has become a whetstone? Holy Kesha was so frightened that she didn't even dare to stand up, which prevented her from directly attacking those super genes. This super gene must be very important to you angels..."

Luther didn't care about her, since he had already lost the darts, and now he only needed to draw the target based on the darts.

The more he spoke, the more frightened He Xi and the eavesdropping Holy Kesa became.

No, how is this possible?

As a king, Morgana didn't even see through the things inside. Luther, a god from the fringe space, was able to judge so many things based on so little information, and it was infinitely close to the truth!

For gods, competing for genetic resources is nothing new, but it is very new for the angel civilization to continue to do so.

Obviously Holy Kesha has used Morgana and the demon civilization as an excuse, why can he still see it?

At first, Holy Keisha had the idea of solving Morgana. Once the trial continues, Morgana will have to rest for thousands of years at least. Now that it is stopped, Holy Kesha has changed her mind.

"Kesha's concession..."

Luther saw that she couldn't understand, so he kindly reminded her.

"Is that why?"

He Xi raised his eyebrows.

"I thought you could understand. After all, we are all kings, but now I know that kings are different."

Luther shook his head.

"What's the difference?"

Hexi was very curious about this.

"The king will not give in, the king will not tolerate, the king will not compromise... Once something is violated, there is something more important. Holy Kesha is the king of gods in the known universe and the maker of the order of justice. Do you think she would give in to the King of Gods in another universe?"

Luther's logic is self-consistent. After all, his statement is based on the fact that he himself is well-deserved, the only one who is supreme, and the divine power is my king of gods.

In this way, the angels would not think that he knew something in advance, but would think that they themselves had made an oversight and ignored a loophole that should not have been ignored.

"But Kesha's bottom line is this. It's impossible to give up the interests of angelic civilization for some new god."

He Xi really thought this now, and he never thought that they would be noticed by Luther because of this.

In desperation, He Xi could only say that the angel civilization would not give up the interests of the angel civilization because of super genes.

"I can understand, after all, I won't do this, but if I..."

Luther suddenly stood up.

He Xi looked at Luther in surprise, and then she seemed to have seen something incredible, her expression lost control, and she was stunned.

"What if I am the power of the galaxy?"

Now the dark data she read on Luther suddenly became incomparably consistent with a certain super gene!
