

Last Days 122

Chapter 122 Showdown (3)

"Humans can't absorb the magic core, but animals can eat it and it'll help them to advance and become magic beast faster," Riya said and put down the magic core on Sophia's hand. "Of course, you should test Melly's attribute first to determine which attribute magic core is suitable for it. This magic core is the non attribute one, so you can try it first if you want to."

"This..." Sophia was at loss.

On the other hand, Riya took out another magic core from her bag. The color of the magic core didn't seem to show any difference and only the uneven shape told them that this was a different magic core.

"This is water magic core and the main use of this magic core is to be used for water related activity." Riya then took out a jade pen from her bag. The jade she had obtained before were either used for formation and the smaller ones were reshaped in accordance to what she needed.

This jade pen was one of them.

Infusing mana into the jade pen, Riya silently draw on the magic core to form the word water. After it was over, Riya put down the magic core on an empty bowl on the table and water slowly came out from the magic core.

"This is..."

"Water source," Riya replied. "Through the use of runes, the water produced will contain gentle mana and the violent mana is restrained within the magic core until the mana is exhausted and what left will be nothing more than the cracked small core. This water attribute rank 1 magic core can produce up to 50 liters of water provided that you use the correct runes."

"Can I brought it for testing?" Ruby couldn't help but ask. Seeing such a magical scene, Ruby's occupation disease just emerged. She really wanted to snatch the bowl over and ran back to the research institute to test it.

Riya tilted her head at Samuel. "What do you think?"

Samuel was silent for a moment and looked at Riya carefully. This kind of runes was not uncommon because the people in that world used it almost all the time. In fact, it could be said that it was usually sold by rune master at cheap price because it was really easy and worthless.

After all, a rank 1 magic core was limited.

But it was useful for daily needs and many low ranked rune master would learn this trick to fend for themselves.

As for making runes that were suitable for combat?

They had to reach higher ranked in their runes attainment or it would have been impossible for them to do it.

"Would you like to work for the base?" Samuel asked.

"No."

"How about cooperation with the base?" Samuel continued, not surprised by Riya's refusal. He had some doubts about the inheritance matter that Amelia mentioned before but seeing Riya's ability, Samuel was somewhat convinced.

At the side, Sean's mouth was opened wide, staring at the magic stone that still produced water on the bowl. The speed was slow, but this was something that he had never expected to see in his entire life.

It seemed that his worldview continued to be challenged.

"How to cooperate?"

"I'll provide you with what you want and you can help the base to make some basic runes for daily use. I believe that other attribute rank 1 magic core had other uses, right?" Samuel continued.

While this ability seemed tasteless for battle, but it was very beneficial for daily life.

And what do they need right now?

Resources!

If these magic cores could be exchanged for resources, there would be many people who would come over to exchange for it.

Besides, Samuel also knew that rank 1 magic core's mana was very limited. Even if it was incorporated into weapons and so on, it would not have much uses yet. But if it was used to exchange for clean water like this, then it would be perfect.

The water attribute magic core couldn't really be used for weapon anyway.

"Yes," Riya nodded and then looked at Samuel suspiciously. "Are you not afraid that I'll ask something that you can't do?"

"I believe you won't ask something like that," Samuel said seriously.

Riya's heart skipped a beat when she saw Samuel's gaze and heard his trusting word. Taking a deep breath, Riya nodded. "Ok, I agree."

"Shall we talk in details?" Samuel asked and then looked at his father. "And I'm sure my father has some other questions to ask too."

Looking at Mr. Jones, Riya pursed her lips. She had guessed that Mr. Jones would come to find her sooner or later.

She could actually stay in the wilderness all the time and never return.

But...

It was really lonely.

Not having anyone to talk with, having to do everything by herself. She had already brought white tiger along and could communicate with it, but it was still different from humans.

So she wanted to be able to spend more time with Amelia and her other friends.

"Ok."

With that, the three people left to Samuel's study room.

Only the few people were left in the room and Mrs. Jones was looking at the study room and then turned to look at her daughter. "Do they have a good relationship?"

It was rare to see his son trust someone so much. Even though they didn't talk many things in detail just now, Mrs. Jones could see that Samuel trusted that Riya would not make any excessive request.

That kind of trust... was really rare.

It was even more so when human's ugly nature was exposed repeatedly during this special period of time.

"Uh... I don't know whether it's good or not but they can talk about many things I don't understand," Amelia admitted. "Besides, Brother can fall asleep beside her back in the dormitory..."

"Wait, what?"

"He entered your dormitory?"

Sophia and Ruby were shocked when they heard this.

"No, wait, listen to my explanation!" Amelia felt desperate. If her brother heard her saying nonsense, she would be dead!
