

## **Last Days 141**

### Chapter 141 Arnold and Joan

Coming out this time, Riya felt that she should have a chance to hunt a few magic beasts and kept their corpses intact. Anyway, eating these magic beasts would allow the white tiger to grow and become a powerful magic beasts on his own.

After eating, they went out and saw two people who were already waiting.

One of them was a young man around the same age as Samuel. He was wearing field training clothes and also carried a backpack and weapon on his back. It seemed that he was prepared to go out with Samuel.

The other one was a young woman who was wearing soldiers' clothing. She had a sling bag on her, which looked a bit conspicuous. Other than that, she looked really beautiful.

"Your two brother and sisters are going to come this time?" The young man asked with a smile.

Samuel nodded. "They should learn to practice going out. It's unlikely that these magic beasts' matter will be solved anytime soon. In addition, this is Riya, my sister's friend."

Riya was attracted by Samuel's second sentence.

She knew very well that the matter of the magic beasts would never be solved if they didn't go down the crack and cleared those formations. She had taken two special magic cores, which was of great help to her.

But if Riya had to say, she knew very well that there were 10 more out there.

She didn't know how long the formation had been operating, but she knew that the nearest special magic core was located deep.

Before she reached rank 5, she would not dare to go there.

Otherwise, it would be too risky.

What Riya hoped was that these magic beasts would not grow too strong during this period of time or it would be difficult for her.

"Hello," Riya greeted when she heard Samuel introducing her in the next sentence. Even if she had a lot of activities in her mind, it had actually only passed a short period of time on the surface.

"Hello. I'm Joan," Joan introduced herself with a smile.

"I'm Arnold." The young man nodded and then looked at Samuel. "Do you want to call the other two?"

"No need this time." Samuel shook his head. "Our target is the warehouse at the edge of the city and it wouldn't take a long time to go and come back."

"Alright."

Since they had said that, Arnold would not say anything else.

They talked a bit more and then went to the car and truck. When Riya saw the big truck, she wondered whether this truck could be used on the road. With so many magic beasts and other messes on the road, Riya was a bit worried that the truck would be overturned when it was time.

"Come on, we'll take the smaller car," Amelia said and pulled Riya to the small car.

Just as Riya was confused for the reason, she saw Arnold and Samuel were also in the small car. Sean and Joan would be in the second car along with the other helpers and there would be more people who were driving the truck.

Riya: "..."

She was now sure that what Amelia wanted was to stay in the same car as Arnold, but she chose not to break this matter to Amelia.

Anyway, her friend had thin skin.

It was not good to say this.

"By the way, can the cars pass the road?" Riya asked.

"We'll clean up the road while we're going out," Arnold said as he sat on the driver seat. "This is also the reason why your brother and the other magic warriors come along. They're only at rank 1, but they're pretty good."

Only rank 1?

Riya pursed her lips and felt that it was really inconvenient for them to do this, but she said nothing in the end.

Because the power of a rank 1 magic warrior was very limited and there was no way these people would be able to clean up these magic beasts so quickly. They might be unranked magic beasts, but their number was still a lot.

Moreover, there were not only magic beasts on the road but also abandoned cars, fallen trees, destroyed buildings, and so on.

It wouldn't be easy for them to pass through the road.

But Riya chose not to talk about this matter and let it be. Because she knew that it was useless for her to talk about it.

They went to the car and Riya looked at the road outside. The areas around the base has been cleaned up by the military and also the groups of people who wanted to eat meat. With the purification method spread, the people in the base basically knew how to do it.

It was just that...

The magic spell made them felt rather embarrassed.

Many of them didn't want to learn it.

The problem is, even if they wanted to learn it, they couldn't. Not everyone managed to cultivate mana and they could only use magic spells after they reached rank 1 or the mana would be insufficient.

So these people could only start through meditating first.

As for others?

Wait until they were strong enough.

Riya didn't pay attention to these because she was not interested in the magic spells. Her special profession as rune master destined to make her a bit different from the others. The way she showed her spells were also different from others.

As long as she could draw the runes, there would not be any problem for her to use various types of magic.

Bang!

After a while, they reached the areas that were not cleaned up yet and had to drive more carefully. There was a car in front of them, shooting the magic beasts that came towards them and then there would be some others who would pick up the bodies.

Riya watched this process and her expression turned a bit strange.

It was really troublesome.
