

Last Days 143

Chapter 143 Practical

"I see." Samuel nodded in understanding.

He felt that Riya's ability was really good. To be able to make these things, which were really practical for their lives.

For some reasons, Samuel started to feel regret for not learning more life related skills in that world. He could only use his sword and kill his enemies in front of him. Even though his offense was called the best, but when it came to problems that involved his own life being, Samuel really couldn't do anything.

In that world, he didn't have any living difficulties, so Samuel didn't bother to learn many things that didn't have any relation with battle and so on.

After all, the most important thing for him at that time was to hunt those magic beasts.

So he focused on various combat skills.

If the two of them had to compare, Samuel had no problem killing other magic warriors who were of the same rank or even a rank higher. Because he had various means to fight and kill people who were of higher ranks.

Riya had some means to use formation to counterattack and so on. But if she had to say, rune master was more of a support and there were many methods that needed to be laid on in advance. She had no problem protecting herself but if she had to kill other magic warriors of higher level, it would have been impossible.

Because there might be some killing formation and runes that Riya used to kill the magic beasts, but it would be hard for her to do more.

Of course, in terms of defense and support, Riya had no problem protecting herself to a certain degree.

This was the main reason why she didn't go down to find the next special magic core. She could ensure that she would not die, but she couldn't be sure to kill her enemies. So why should she go down and possibly risk her life?

So Riya didn't go.

When she reached rank 5, she would be able to make more better formation to protect her life. At that time, she could try to take some risks and head down to find the next special magic core.

"I might exchange some with you in the future," Riya said. "But it'll be exchanged with other more valuable things."

"Of course." Samuel nodded in agreement.

He knew very well how valuable these storage space scrolls would be in the future. When resources became more difficult to find, they would like to have some storage space scrolls to keep their belongings safe.

After all, if they carried a lot of things behind him, it would be very inconvenient.

But this storage space scrolls were different. How difficult is it to carry a scroll with them? After imbued with the runes, the storage space scrolls were not so easily torn anymore and it could be said to be very hard. Unless they were rank 4 magic warriors, it was unlikely for them to be able to tear it apart.

And the better storage magic scrolls would have better runes used on them, which would make it even more durable.

"The specifics can be discussed later," Riya added when she saw Amelia and Arnold coming back after killing a few magic beasts. The corpses of these magic beasts were being dragged by the other people to the truck specifically prepared to carry these magic beasts' corpses.

After all, they would get medicine and other things from the warehouse later. It couldn't be combined with these magic beasts' corpses.

Otherwise, some materials would turn bad.

"Ok." Samuel also nodded.

Considering that what Riya used was also a rank 1 storage space scrolls, he guessed that she might plan to wait until she could make a better one before trading.

Besides, the need for storage space scrolls were not so high right now.

People would be more eager to find some food to eat rather than this thing. If they couldn't even live, how could they think about making their lives more comfortable?

So, he didn't bother with it.

"Brother, I killed the magic beasts myself!" Amelia came to Samuel and said proudly, her chin raised upwards.

Sean, who was walking not far from them, turned his head to look at his sister and immediately complained, "You're only killing one magic beast but you take a long time. It's better for me to who kill them quickly."

Samuel: "..."

He didn't watch their battles just now because he was conversing with Riya. But he also knew that Amelia's speed when dealing with these magic beasts were really slow. This made him realize that Amelia might not be suitable to become a magic warriors.

Her reflex were a bit too bad.

But if she wanted to become pure mage, her talent was not good enough either. So for the best, he still taught her to become a magic warrior.

"Don't make trouble. There's still a long way to go," Samuel said.

"I'm not making trouble!" Amelia looked at her younger brother with dangerous look. "Let's compare who deal with more magic beasts before we arrive at the warehouse!"

"Deal!" Sean snorted. Who's afraid of his sister?

Seeing the two of them were already making such arrangement, Riya fell into silence. It seemed that these two siblings could not stop comparing themselves with each other.

For some reasons, it looked very childish.

"Come on, we still have to go," Arnold said to Amelia.

And on the other side, Joan also knocked Sean's forehead. There was a smile in her eyes, but she still reprimanded Sean.

Riya looked at this scene and silently looked at the sky.

There were crisis because of the magic beasts' appearance, but she felt that these four people only came out because they wanted to spread dog food. Thinking about it, Riya wanted to sigh deeply.

She was sure that other people were struggling to survive but the picture turned strange when it came to Samuel and his two siblings.
