

Last Days 149

Chapter 149 Temperature Talisman and Cold Talisman

"What's the difference of these two talismans?" Arnold was now interested.

"Cold talisman can only reduce the temperature around you so that you can feel comfortable. The temperature regulator talisman could reduce or increase the temperature in accordance to what you want," Riya replied. "If you find it troublesome, you can also set it to directly increase or reduce the temperature until it reached the most appropriate temperature."

This talisman was very popular in that world.

It could be said that for many rune master and talisman master, the temperature regulator talisman was the first talisman they would learn after they mastered a few ordinary talisman. Because this talisman was used by many magicians and magic warriors.

That world has many extreme environment.

Some areas were extremely hot and some other areas were extremely cold.

Due to the large differences in temperature, many people couldn't stand it and some people even fell sick in the beginning. Later on, they had to bring the temperature regulator talisman with them so that they would not feel uncomfortable.

Of course, those who needed it were usually magicians and magic warriors under rank 4.

So this talisman was only popular for lower ranked magicians and magic warriors. For those above it, they could bear the extreme temperature and would not bother to buy it. After all, the temperature could also temper their body, so they would rather let their body experienced it.

Riya herself learned it after learning how to make hot talisman and cold talisman. These two talisman were used for ordinary people and easy to use. The temperature regulator talisman combined the principle of these two talismans to make it possible for them to control the temperature around them.

"I see." Arnold nodded in understanding.

He didn't expect that there were actually such magical thing.

"If the world is normal, people would rather use air conditioner or heater," Arnold added with a chuckle.

"Well, of course." Riya shrugged helplessly.

Who would want to use talisman when they could use electronic appliances?

Even Riya would be unwilling to waste her mana using these talisman if she could use other things. Unfortunately, electricity was somewhat a luxury here unless they used the rank 1 magic core.

Speaking of magic core, that rank 2 invisible magic beast's magic core should be in Samuel's hand.

The magic core of the invisible beast was a bit special because it would be non elemental.

Non elemental meant that it could not be used the same way as the others when she formed the runes. It could only be used to recharge some non elemental formation or used for other means in magic tolls.

Riya couldn't make magic tools, so she couldn't say anything about this.

Four years were far from enough for her to learn many things in that world no matter how talented she is. Besides, Riya was not sure she was talented in other subjects since her talent in runes were something that she found coincidentally.

"Since you're a mage, does it mean that your training is different?" Arnold thought about something else.

"Yes, it's different." Riya didn't explain what was different, though. It would take a long time for her to explain the meditation and so on. "How about you, Mr. Arnold? Can I know your abilities?"

"I tell you not to call me so politely." Arnold looked embarrassed and then said, "I have earth element and Samuel is helping me to learn a few useful spell."

With his strong body, Arnold felt that he should be able to become the tank in the team and helped their party when it was needed. Moreover, the earth element would help him to build walls if he wanted to. Incorporating earth element to the weapon was usually to make it harder and to hide the weapon in the earth.

It was a bit sneaky if he had to say.

Thankfully, Samuel had four elements and could teach him some useful magic spells.

"Earth element..." Riya nodded when she heard this and then asked, "Any other elements?"

"Well, Samuel didn't know how to test other elements..." Arnold passed a look at Samuel, who was still meditating.

When they were meditating, they were usually focused and would not pay attention to what happened in the outside world. But if there was any danger, Samuel would immediately wake up without others reminding him first.

So Arnold knew that even when he was meditating, Samuel was actually still very alert.

It could be said that he would pay attention to what happened outside, especially if they were not staying in the base and busy going out.

"I can help you with that." Riya smiled and took out a paper. She then wrote some runes and then handed it over to Arnold. "This method required you to already have mana, so it's not very convenient for ordinary people."

"What should I do?" Arnold hold the steering wheel in one hand and the other took the paper from Riya. Looking at the runes drawing that actually looked like scribble, he didn't know what to do for a moment.

"Just pour your mana inside."

Arnold did as Riya said and then the runes moved over and formed three different rune markings. Upon seeing this, Arnold was stunned.

Does this mean he had three elements?

"Earth, wood, and metal," Riya read the three runes in front of her. This method required one to have high knowledge of runes and knew how to read and make it. "The highest are the earth and wood while the lowest is metal. It's advised you only train the first two elements and use the last one as auxiliary element to help."

"Wow... I mean, thank you." Arnold was stunned and put the paper down before focusing to drive again.

Because of his distraction, the car shook for a moment.

This made Amelia, who was having a hard time to focus meditating to open her eyes instantly. "Brother Arnold, drive carefully~."
