

Last Days 190

Chapter 190 Analysis

It's amazing.

Riya sighed deeply.

This was the first time she realized that there were actually people who could make such arrangement.

And this arrangement was made in such a place...

Riya didn't know what their intention was and whether it would be a good idea to have these magic beasts coming out of this place.

But perhaps...

The main reason why the earthquake happened was because these magic beasts wanted to run away from these pillars. They knew that they were treated as reserve resources by these pillars.

Yet at the same time, the environment in this place was very favorable for their growth.

It was contradictory.

'But it seems that whoever made these things would not come out so easily,' Riya thought to herself and looked around. Through the two pillars, she had known that the shape of the formation was a bit special.

Aside from the fact that there were 12 pillars altogether, the positioning of these pillars showed that there should be 4 inner pillar and 8 outer pillars. These two pillars that she took the special magic core from were the outer pillars.

When the outer pillars were disturbed, there would be a series of effect for the formation.

But the formation would not be destroyed.

Because the focus was in the inner pillar.

'And the auto correction formation might have been made because they estimated that there might be some magic beasts that come to take these special magic cores.'

The special magic cores were not only tempting for humans but also for these magic beasts.

Because both humans and magic beasts could take these special magic cores, there were many cases when they could take it and then consumed it in the wilderness.

So...

'So the next process is to capture these magic beasts into the killing formation and used their own blood, purifying them and compress so that it could make the next special magic core to support the formation's operation.'

Riya sighed.

She had to admit that in front of whoever made this formation, she was still too naive.

But at the same time, Riya could guess that the loss of one special magic core would not make them alert.

The problem is...

Once they take these special magic cores, they had to get away as soon as possible to avoid being killed by the formation set in this place.

Riya looked at the pillar in front of her, to be precise, looking at the set of runes there. She really wanted to study these runes and learn many things... but at the same time, Riya knew that she couldn't do that.

The runes she made had hastened the recovery and the making of the special magic cores.

Now that she took it again...

Well, the formation will definitely triggered again soon.

But...

"The special magic cores is only rank 5."

This was another point that made Riya a bit concerned. Previously, the special magic core that she took was also rank 5. While the sub rank was higher than this core in her hand, but it was still rank 5 nevertheless.

Does it mean that this formation was made recently and then the special magic core's rank increased slowly?

Or it was because the special magic cores needed for the outer pillars were only rank 5, so when they start to make the cores again, the final rank was only rank 5?

It might also be that the special magic core has always been rank 5 from the beginning to the end and the correction formations around it were used to replenish it quickly?

There were a lot of questions in Riya's mind.

But most importantly...

These magic beasts' races were similar to the ones that she had seen in that magic world. Does it mean the two worlds were actually connected to each other or there were other channels?

After all, her experience couldn't be called normal.

To stay in that world for four years in a completely different body and experienced a completely different life...

sigh

Riya took a deep breath.

There were indeed a lot of questions in her mind, but she had no answers.

The only thing that she could do was to take this special magic core and let the formation killed these magic beasts on their behalf. Even if these formations were the one that allowed these magic beasts to grow stronger, but the self correction of these pillars would allow them to be the one to kill the magic beasts too.

Isn't it very convenient?

It's very good.

Riya pressed down all the other questions that she had in her mind. She had no way to figure out their answers for now, so she could not think about it. The only thing that she could feel rest assured was the fact that no one will come to her after she took these special magic cores.

These special magic cores could help her to advance quickly in her rank and at the same time, helped her to kill more magic beasts through the formation here.

It was very good.

Riya put the special magic core into her world and then looked at the blood on the ground. By now, it could barely reach her ankle and it would take some time for the auto correction formation to gather enough magic beasts.

This would ensure that there wouldn't be many magic beasts in this area.

It seemed that her effort and this thing had allowed the number of magic beasts to decrease sharply in this area.

'In that case, the one in City B...'

Riya thought about the pillar that was located nearer to City B and worked hard to suppress her impulse. She knew very well that she couldn't go there right away because Samuel was right here in front of her.

Well, behind her.

But in any case, Riya didn't want to show Samuel that she knew too much about this place.

Besides, there was another point that she was concerned of...
