Chapter 125: The Impressive Cultivation Method?

A Spirit Cultivation Method five hundred times stronger than the Five Spirits Introduction?

Originally feeling secretly displeased, Xin Lin's spirits lifted when she heard Rascal Corpse's words.

Although Rascal Corpse was annoying, his strength was undoubted. Could this Summoning Technique really be so impressive?

Xin Lin was delighted and began to study the page carefully.

On the paper, Gui Hu's handwriting danced wildly, embodying a carefree and unrestrained spirit.

Who would have thought, this Rascal Corpse actually had such good handwriting.

Xin Lin inwardly praised, then continued reading.

With this look, Xin Lin's eyebrows furrowed, then relaxed, and soon, furrowed again.

"Rascal Corpse! You big pig's knuckle!"

Internally, little Xin Lin was full of sorrow. What nonsense Summoning Art, looks good but utterly useless, isn't it!

The Spirit Cultivation Method given by Gui Hu, indeed, was as he said, much faster and more powerful than the common Spirit Cultivation Methods flowing from the Five Spirits Introduction.

Because this Spirit Cultivation Method does not involve cultivating oneself, but using Five Elements Spiritual Beasts, meaning controlling the Five Elements Spiritual Beasts, letting the Spiritual Beasts

cultivate in replacement of Xin Lin herself, and similarly, releasing the Spiritual Beasts to fight directly against foes.

Compared to humans, Spiritual Beasts possess more advantages in Spirit Cultivation, therefore, if truly able to summon spirits, it would naturally be quicker and more effective than cultivating Spiritual Formulas oneself.

But the problem also arose with this.

Xin Lin, being a half-baked Spirit Warrior without even a shadow of a Spirit Root, where could she find a controllable Spiritual Beast?

Previously, even a second-level Water Spirit Beast, Red Toad, with unimpressive attack power almost took her life.

So, this so-called Summoning Technique, for Xin Lin, was truly like fetching water with a bamboo basket—all efforts ending in vain.

"Unless I also have a Sealing Spirit Technique like the old geezers of Xuantian Sect, to seal and control Spiritual Beasts."

Xin Lin recalled how Elder Yuan once used the Sealing Spirit Technique, releasing a mastiff to assist in attack. Regrettably, such Sealing Spirit Techniques are only available to disciples of major sects like Xuantian Sect.

"No, if I have a Sealing Spirit Talisman, perhaps I could seal a spirit too."

Considering this, Xin Lin glanced at the Sealing Spirit Talisman where Rascal Corpse resided.

This Sealing Spirit Talisman was the first treasure Xin Lin acquired after obtaining the Heaven-Defying Book.

Although it was just a scrapped Immortal Talisman, previously filled with many complaints by Xin Lin, it must be said, this thing saved Xin Lin's life at a critical moment.

If not for it, she might have already been killed by Rascal Corpse.

But such a scrapped talisman is only obtainable at the novice's gift package, and for each life master, it can only be opened once.

"Maybe, I can ask the Heaven-Defying Book if there's still a chance to get another Sealing Spirit Talisman."

Despite always feeling the Heaven-Defying Book is unreliable.

But the various treasures obtained from the unreliable Life Book always end up playing unexpectedly vital roles.

Thinking of this, Xin Lin's mind stirred, and the Heaven-Defying Book already appeared in her mind.

The last time she got that broken wood stove, Xin Lin was annoyed with the Life Book for a good while, these past few days she even neglected to glance at the Heaven-Defying Book.

Today, upon looking, she discovered that the Heavenly Destiny Book had quietly changed again.

In the Book of the Past from the Past Book, two new records of Heaven-defying Value had been added.

"Learned Fire Cloud Arrow, Heaven-defying Value +10.

Outsmarted the fake Imperial Physician Chu Yuan, Heaven-defying Value +5."

Similarly, on the present book, Xin Lin's Heaven-defying Value also increased accordingly. With this calculation, Xin Lin gained another 15 points of Heaven-defying Value.
