

## Little Girl 146

Chapter 146: Three Corpse Poison Blood

Xin Lin finally understood that using the Dan Wood Furnace, just like using the Heaven-defying Book, required Heaven-defying Values!

Earlier, her Heaven-defying Values were insufficient, no wonder no matter how she fiddled with the Dan Wood Furnace, there was no response.

With enough Heaven-defying Values, both the furnace and the book would immediately react; without enough, they completely ignored her.

Could these things be any more opportunistic?

Xin Lin helplessly massaged her temples.

At this point, what else could she do but accept the reality?

However, this time, she hadn't put anything into the Dan Wood Furnace; could the furnace possibly produce something out of nothing?

With a bit of curiosity, Xin Lin agreed to use her Heaven-defying Values in exchange for the right to use the Dan Wood Furnace.

The moment Xin Lin agreed, inside the room, the originally dull surface of the Dan Wood Furnace swiftly changed.

The dust quickly faded away, and the body of the furnace glowed as if it were a red-hot branding iron, turning bright red.

Xin Lin's eyes lit up, and she saw a dark red bead appearing inside the furnace.

"What is that?"

Xin Lin recognized that bead—it was the blood left on the furnace surface by Silly Chu when he was injured earlier.

The blood was absorbed by the Dan Wood Furnace, and had condensed together.

Ding—

After a crisp and pleasant sound, the drop of blood in the furnace suddenly disappeared.

The instant the blood vanished, rows of text emerged on the surface of the Dan Wood Furnace.

"Three Corpse Poison Blood, Jade Grade Upper Stage Poison, origin Chu Bei Qing. This poison, exceedingly malevolent, is refined using ninety-nine types of insect poisons over three years. Antidote: Jade Grade Upper Stage Jade Marrow Pill. Formula: three taels of Golden Crow Shell, one pennyweight of Wind Breath Grass, three ten-year Su Zi, five inches of Ilex Vine, two Ginkgo Nuts. Fire intensity seven-tenths, simmer for three hours and a quarter, it can then be produced."

Seeing those lines of text, Xin Lin's eyes narrowed.

Unexpectedly, after Chu Bei Qing's poisoned blood was sucked into the Dan Wood Furnace, it had analyzed both the poison in his body and the antidote.

What Three Corpse Poison was, Xin Lin had completely never heard of, but it seemed that it was the poison within Chu Bei Qing.

"Rascal Corpse was telling the truth; this thing is truly a treasure, I almost missed it."

Xin Lin quickly noted down the formula on the Dan Wood Furnace.

Truly found effortlessly after looking everywhere without success.

Just as she was worrying about how to save Chu Bei Qing's life, the Dan Wood Furnace had resolved everything.

Earlier, Xin Lin was still worried about her 10 Heaven-defying Values, fearing that the Life Book might trick her again, but now, she felt that these 10 Heaven-defying Values were incredibly worthwhile.

With it in hand, should she ever be secretly poisoned, it seemed she could also find a cure.

Xin Lin snapped out of it and looked at the Dan Wood Furnace again; the stove had returned to its dusty, hazy appearance, as if nothing had happened.

She carefully stored away the Dan Wood Furnace.

Now that she had the formula, the next step was to gather the medicinal ingredients.

Although Xin Lin had visited the Alchemy Hall in Ping'an County, she wasn't familiar with the market for medicinal ingredients. She thought she would need to visit the Alchemy Hall in Purple Cloud City during the day to buy some.

Thinking of buying medicine, Xin Lin remembered another issue: she knew the ingredients but where was the money?

Xin Lin didn't have much silver on her; traveling from Bainiao City to Purple Cloud City had already been costly, and afterwards, she had the addition of Noble Lady Shi and her son.

She thought about it and decided to discuss with Noble Lady Shi to see if she still had any money.

Xin Lin left the room to find Noble Lady Shi and Silly Chu.

As soon as she entered, she heard Noble Lady Shi's persuading voice.

"Imperial Physician Chu, please eat a bit, starving yourself won't do."
