

## Little Girl 47

Chapter 47: The User Manual of the Life Book?

The soft glow emanated from the newly added lines on the Past Book.

Xin Lin was somewhat surprised.

"Temporarily seal the Ancient Corpse, receive 20 Heaven-defying Values. Heaven-defying Value, the life master increases cultivation, the foundation for defying the heavens and changing destiny. Each counterevent will earn a different amount of Heaven-defying Values."

Wow~

Xin Lin's mouth slightly agape, tongue-tied in astonishment, it seems like this is the instruction manual for the Heaven-defying Book.

"It should have been like this from the start, had it been clear where the Heaven-defying Values came from, I wouldn't have been scammed so miserably."

Xin Lin couldn't help but grumble.

Had she not been clever, that Rascal Corpse would've skewered her with a single claw.

Now with instructions, it's going to be much easier to handle.

Xin Lin continued to read.

Following that line of instructions, there was another line of smaller text.

"Heaven-defying Value record:

Knock out mortal Liu Sanniang, Heaven-defying Value +1,

Violently suppress Martial Arts Apprentice Sikong, Heaven-defying Value +2,

Mock Sixth Rank Xuanwu Practitioner Bai You, Heaven-defying Value +2,

Foil Great Spirit Master Yuan Yi's plot, Heaven-defying Value +5,

Acquire the life master's gift package, Heaven-defying Value -10,

Temporarily seal the Ancient Corpse??? Heaven-defying Value +20."

On the Past Book, as records of Heaven-defying Values kept emerging, the characters on it moved like flowing water.

That line of text meticulously recorded Xin Lin's series of events in obtaining and expending Heaven-defying Values.

"It seems the amount of Heaven-defying Value gained is related to the strength of the opponent; the stronger the opponent, the more Heaven-defying Value obtained."

Xin Lin nodded in understanding, roughly grasping the ins and outs of the Heaven-defying Value.

It appears that the cultivation of the Ancient Corpse is the highest; simply by sealing it, you can gain 20 points of Heaven-defying Value.

Xin Lin's gaze lingered on the word 'temporarily' for a moment, murmuring to herself.

But it was a good thing she sealed the Rascal Corpse; now she was a little rich lady with 20 points of Heaven-defying Value in hand.

"Life Book, bring me two gift packages."

Xin Lin's exceedingly generous hand waved, keen to exchange for two gift packages with Heaven-defying Values.

points of Heaven-defying Value could open the Modern Book once; last time, what appeared on the Future Book was a gift package.

This time, with 20 Heaven-defying Values, she should have enough to open the Future Book twice.

A Sealing Spirit Talisman can seal even big bosses like the Rascal Corpse, it must be effective against other nefarious creatures.

With two in hand, she felt fantastic.

As soon as Xin Lin finished speaking, the Future Book very reluctantly presented a line of text.

"The life master's gift package can only be exchanged once; treasure it and use it well, the life master has already wasted one chance."

Can only exchange once?

Seems like that's the case, but what's this about wasting one chance?

She clearly used a Sealing Spirit Talisman to seal the Rascal Corpse and got an additional 20 Heaven-defying Values in return, killing two birds with one stone.

"Better to use 10 Heaven-defying Values to open the Future Book once."

Xin Lin was curious what treasures might appear this time.

The Heaven-defying Book is so powerful, surely the items appearing on the Future Book won't be ordinary, Xin Lin consoled herself.

"The Future Book has three modes: Heavenly, Earthly, and Human. Which one does the life master wish to open?"

The Future Book revealed another line of text at a steady pace.

Upon hearing this, Xin Lin realized there were indeed modes, much like the modern gaming modes of easy, normal, and hard.

Was there even a need to choose? The harder the mode, the richer the rewards, and Xin Lin never turns down rewards.

"Heaven-level Future Book."

Xin Lin said without hesitation.

"The Life Book prompts, the life master's rank is not sufficient to open the Earth-level Future Book or the Heavenly-level Future Book, automatically selecting to open the Human-level Future Book."
