

## Longevity 215

### Chapter 215: Fate Official Seal Transformation! Zhao Feng's Excitement!

"How goes the selection of trusted aides?" Zhao Feng asked Zhang Ming, having collected his thoughts.

"Here is the roster, My Lord. Please review it." Zhang Ming took out a scroll of bamboo slips and respectfully handed it over.

Zhao Feng received it and unrolled the scroll. A list of names appeared before him, and as he read them, their corresponding loyalty values also materialized in his vision.

Taking out a carving knife, Zhao Feng reviewed the list, scratching out more than a dozen names as he went.

"Reject all the ones I've crossed out," Zhao Feng said in a low voice. "Find more."

He tossed the scroll of bamboo slips back to Zhang Ming.

"As you command." Zhang Ming respectfully accepted the order and immediately withdrew.

Once Zhang Ming had left, Zhao Feng immediately issued an order to his system. "Claim the Attribute Points for burying bodies."

"Host's troops buried 45,650 bodies, for a total of 13,695 Attribute Points," the panel reported.

They've buried over forty thousand people. It seems the Logistics Army must have arrived to handle the rest. Zhao Feng remained completely calm at the news. The number of Attribute Points he had collected this time exceeded ten thousand, an unprecedented amount, and he was very satisfied.

Just then, a new prompt appeared on the panel.

"Total Attribute Points collected have exceeded ten thousand for the first time."

"Do you wish to use ten thousand Attribute Points to convert the Fate Official Seal's attributes?"

"Enable claiming Attribute Points through your troops' kills!"

So that's how it works. It requires Attribute Points to make the conversion. No wonder I've always had to bury bodies instead of just relying on killing enemies. A hint of joy lit up Zhao Feng's eyes.

On the battlefield, burying bodies was the duty of the Logistics Army. Although Zhao Feng, as Main General, could command the fifty-thousand-strong Logistics Army, their official chain of command led to the Shaofu, which was part of the central army command. This meant the Attribute Points collected from bodies buried by the Logistics Army couldn't be claimed by him. And so, in every campaign since obtaining the power of the Fate Official Seal, Zhao Feng had ordered his own Sharp Warriors to bury the dead. This measure confused many of his generals, who wondered why their frontline combat troops were performing a task meant for the Logistics Army. However, thanks to Zhao Feng's prestige, every

Sharp Warrior complied with his orders despite their confusion. But the burials had indeed delayed the main combat force's advance. It was a disadvantage for the army but a benefit for him.

Now, he had a new option: acquiring Attribute Points through his troops' kills. The choice was obvious. How could he not know what to do? Ten thousand Attribute Points was a huge amount, but compared to the future gains from killing enemies, this was an investment with unimaginable returns.

"Convert," Zhao Feng ordered without hesitation.

"Host's command accepted. Deducting ten thousand unallocated Attribute Points. Converting Fate Official Seal attributes..." the panel announced.

The next moment, the Fate Official Seal floated out from Zhao Feng's body. Visible only to him, it flickered with a radiant glow. After a moment, the light subsided.

"Conversion successful. Equip to view the new Fate Official Seal attributes," the panel prompted.

Zhao Feng immediately equipped it.

[Main General's Seal]: As commander of the army, when the Host leads the charge, the morale of all subordinate soldiers is doubled. Their combat power is also doubled. The Host will acquire 30% of the Attribute Points from enemies slain by their troops.

It's transformed. The acquisition rate is just 10% lower than burying bodies. But overall, I no longer have to order my Sharp Warriors to bury the dead.

Seeing the successfully converted attributes of the Fate Official Seal, Zhao Feng smiled. Coming to his senses, he commanded, "Extract all attributes."

"Congratulations to the Host for surpassing 4,000 in All Attributes. Reward: one First Order Treasure Chest."

"Congratulations to the Host for surpassing 5,000 in All Attributes. Reward: one First Order Treasure Chest."

"Host has surpassed 5,000 in All Attributes and possesses True Qi. New attribute unlocked for collection: [True Qi]," the panel announced.

As the announcements faded, a halo of light enveloped Zhao Feng. He could clearly feel his Physical Body undergoing yet another, more powerful Transformation. Normally, collecting Attribute Points didn't produce such a distinct sensation, but every major breakthrough in All Attributes brought this feeling of sublimation and a massive surge in his power.

Throughout his campaigns, Zhao Feng had not only commanded the entire army but had also fought on the front lines, leading by example. The Attribute Points he had collected from killing enemies himself were countless. This formed the foundation for his All Attributes to break the five-thousand-point mark.

Now that my All Attributes have broken five thousand, my Physical Body alone can unleash over five thousand jin of force. Who in this world can take a single punch from me? Xiang Yu was famous in

history for being strong enough to lift a ceremonial cauldron, and he might have been gifted with a thousand jin of force, but that's nothing compared to my current power! Zhao Feng laughed with excitement.

With such power at his command, this was all capital for the coming End of Qin! By accumulating Attribute Points, by killing enemies, I'm confident I can achieve longevity. Even if Shenzhou were one day unified, countless Foreign Tribes exist beyond its borders for me to conquer. Longevity is attainable!

"Attribute Panel."

With that thought, Zhao Feng summoned his Attribute Panel.

Host: Zhao Feng

Age: 17

True Qi: 786 (The stronger the True Qi, the more abundant the Dantian Vital Energy, and the more powerful its burst.)

Strength: 5543 (The greater the value, the more corresponding force can be exerted.)

Speed: 5123 (The higher the value, the faster the speed.)

Constitution: 5012 (The stronger the Constitution, the faster the recovery from injuries, the more inexhaustible one's stamina, and the quicker the True Qi restoration rate.)

Spirit: 5031 (Spiritual power can be released up to twenty-one zhang. Cultivation allows the absorption of Void Heaven and Earth Spiritual Energy from within a twenty-one zhang radius.)

Lifespan: 155 years + [876 days]

Merit Points: 563 (Can be converted into Free Attribute Points or Skill Points.)
