

LORD OF WAR

Chapter 11: .Xingyi Lake

The shining starry sky brings an unexpected sense of tranquility to people. The bright moon that hangs above the night sky has become more and more round.

The Forest of Stars and Meteorites is changing at a speed visible to the naked eye.

It was originally a light blue fluorescence like a firefly, but now it gradually becomes brighter. When these fluorescences are connected together, they look like strips of blue light; while those in the forest are as tender as fluffy. The grasses are also growing at an incomprehensible rate at this time. They not only become hard, they even begin to grow taller; as for the trees in the forest, they are not illusory or real, as if overnight. These big trees, which require several people to hug each other, have also grown taller.

The influence brought by the wave of magic power is obviously gradually changing the entire Starfall Forest.

A figure walked out from behind a big tree next to it.

Under the reflection of the moonlight, it can be clearly seen that the figure's left hand is tied with a round shield, and the right hand is holding a curved blade. The armor on his body has obvious mottled marks and damage. When the figure walked a few steps forward again, the moonlight finally shone on his face. It was a face full of exhaustion, and the unkempt and dirty appearance did not know that it had not been taken care of for a few days. Now, the new scars with blood on his face fully illustrate his hardship.

Afterwards, another man dressed in exactly the same manner as the man in front came out, and his situation was obviously not much better.

However, the two people did not stop because of this. They moved forward numbly and mechanically. With the sound of their footsteps, there were more and more people behind them, but the tired look on everyone's face was the same. of.

"Hold on a little longer, when we reach the Xingyu Lake in front, we can take a rest." A somewhat hoarse voice sounded, causing everyone to raise their spirits a little.

This person is Sean.

However, what is different from the spirited look before is that Sean's face also looks very tired at the moment, and there are inevitably more injuries on his body, one of which is deeply visible. If it weren't for Old Peter's first aid skills, it's true. Extraordinary, Sean felt that it would be difficult for him to survive. But even so, the pain from the wound made him consume a lot of energy, and the scabbard of that Charles' saber didn't know where it was dropped.

This is the sixth day that Sean has led the team into the Forest of Starfall. There are only nine people left in the team.

When I first encountered the wind-stripe black wolf, the importance of Sean was indeed the most obvious manifestation, and because of Sean's command and familiarity with the Starfall Forest, in the next few days, everyone The itinerary can be described as smooth sailing. Although the various monsters along the way looked terrifying, but under the precise dissection command of Sean like a scalpel, these monsters became toothless tigers in the eyes of everyone. Not only could they be easily crushed, but even Afterwards,

everyone also harvested more than ten first-level nuclear crystals, and the average manpower made everyone feel excited.

Of course, as a group of senior veterans, everyone did not take it lightly. The night vigil and vigilance were not down. They still strictly followed the usual distribution instructions. Even because of the danger of the Starfall Forest, the situation of the night vigil was changed from the usual two. The shift rotation system was changed to three shifts, and the number of people was increased by one.

But even so, Sean still underestimated the impact of the real world.

On the fourth night after everyone set off, the influence of the magic wave had already begun. The first to notice this was Cecilia. After all, she had a talent that shocked Sean. Although Sean knew that the wave of magic power would produce a deeper level of demonization in the forest of the stars, he still did not realize that the real world had a completely different change from the situation in the original game. Of course, he did not anticipate the wind. The hatred of the tattooed wolves towards them will be so deep.

All of these things were impossible in the original game.

After solving the three wind-printed black wolves that day, the wolves that came afterwards did fight other monsters, and the casualties were heavy for the wolves. After all, the wind-printed black wolf king soldiers did not appear that day. However, Xiao En and others did not take this matter to heart. Instead, they continued to rush towards their destination. They fought a few wind-patterned black wolves on the way, and they still used the previous bloodletting method, precisely because Only then was the wolves stared at him.

Finally on the fourth night, while the magic wave changed, the wolves suddenly launched an attack.

Fortunately, Xiao En and others did not sleep soundly, and all of them woke up the moment the battle broke out, but they looked at more than 30 wind-marked black wolves, and even the swift wind-marked black wolf known as the Captain Monster. Sean can only order a breakthrough.

It was a fierce battle. Although everyone succeeded in breaking through the encirclement, one of the guards was still surrounded by wolves because of his slow speed, and he was finally killed in the wolf's belly.

And in the next two days, it was a battle between Sean and the others and the wolves.

On average, there is an encounter with wolves every few hours, and over time, the number of wolves has not decreased but increased. In the most recent encounter, the number of wolves has exceeded fifty. . In such a situation of insufficient rest, the combat effectiveness of Sean and others is naturally getting weaker and weaker, and the tired look on the faces of everyone is becoming more and more obvious. Coupled with the increase in injuries, the smell of blood is naturally unable to Cover up, the monsters that came to attack were no longer limited to the wind-stripe black wolf.

If it weren't for the influence of the magic wave, Cecilia could temporarily exert the strength of the third-order [magic], I am afraid that everyone can no longer hold on. In such a fierce battle, Sean's experience points soar as if riding a rocket, and he has risen to level 9 in just six days. Now he can kill the wind-stripe black wolf or other beasts. Finally, his experience value no longer makes him feel the pain of burning like before.

At the beginning, in the game, before Tier 3, he was a newcomer, and the tasks he could do were basically to understand the world background and game system. If you really want to integrate into this world, you still have to be at least Tier 3. Only with Tier 3 and above can you truly form a mercenary group, and even seek a position in the kingdom you belong to, or be an

adventurer, start to take risks all over the world, and experience this completely different world.

Although he now has a name saying that he built a mercenary group with Cecilia, he knows very well that no matter where they are, he and Cecilia are not placed by any mercenary group at all. In the eyes. Because in this world, wanting to establish a mercenary group is by no means just talking about it. It must be approved by the official text of the mercenary guild. For the same reason, you want to become an adventurer, a pioneer or even a hunter. The devil must also pass the test of those guilds.

And these guild tests all require ranks above the third rank. Of course, if you want to join a mercenary group or pioneer group, it is not so strict, but the premise is that the other party is willing to accept you.

So at level 9, Sean really didn't take it seriously. The only thing that can satisfy him is that he has saved eleven proficiency points now. This is the biggest difference between him and others, and he is able to stay here. The greatest guarantee for a foothold in the world. And he also has a secret that no one knows, that is, normal adults in this world are all "5 (10 attribute points, but when he came into this world, his attribute points were The full point attribute of "10 (10.

After taking the position of [Mercenary] and obtaining Charles's Sabre, his five personal attributes have become "Strength: 11+3 (13); Stamina: 11+1 (14); Agility" : 10 (13); Wisdom: 10 (12); Will: 10 (13, this data is slightly stronger than ordinary people who have just taken up the second-tier ranks, and only after a long period of time like Old Peter and Du Luen With time of battle and training, the talents who can achieve the maximum potential value they can achieve will be better than Sean.

Sean was thinking about how to use these eleven proficiency points to maximize his combat effectiveness, but the sudden sound of a wolf cried interrupted his thinking.

Almost after this wolf howl sounded, one after another the wolf howl sounded again, and everyone's face suddenly changed.

"No need to run anymore." Xiao En looked back at the place where the wolf howl came from. The exhaustion on his face was no longer hidden, but completely revealed, and the whole person was obviously relaxed. In this area, no monsters dare to come over, we will rest here for a while."

Seeing Sean's relaxed look, everyone around him also relaxed. In the past six days, everyone has unknowingly regarded Sean as the backbone of the entire team. All actions are completely in accordance with his instructions, even Durun, who has always insisted on the pride of the nobility. , Also lowered his body and took the initiative to cooperate with Sean.

Because he knew very well that if it weren't for Sean, I'm afraid they wouldn't be able to stay in this forest for so many days.

The Forest of Stars and Falling Stars was even more terrifying than he had imagined.

But in this way, Du Luen became more curious about Sean, but he knew that it was not the time to explore these.

Just as Xiao En said, the wind-stripe black wolves quickly caught up, but this time they did not rush towards everyone as they did in the past. Instead, they stayed ten meters away, angry. Pawing his claws and yelling constantly, he just didn't dare to take a step forward again.

The blue fluorescent light band, like a warning line, forms two worlds inside and outside.

And about 30 meters in front of everyone, there is a huge lake with a radius of more than 100 meters. At the center of the lake is a huge black stone full of bumps, which looks at least nearly 50 meters in size. diameter. And in the concave and convex holes of this black boulder, there is a continuous surging of extremely viscous dark blue liquid, and then it flows into the lake, covering the entire surface of the lake with a layer of dark blue luster. The magical power that is so strong that it is almost substantive radiates over the entire lake, but this magical power is full of extremely strong chaotic aura.

This is the star that fell at the end of the twilight era that year.

The entire lake is completely condensed by the power of the stars escaping from this star. It can even be said that the source of the alienation of the entire Starfall Forest is entirely from the Starfall Lake in front of everyone. ;
