

LORD OF WAR

Chapter 12: .Advance without retreat

Xingmet Lake.

A lake formed by the power of stars, but for some unknown reason, this lake is not safe, but is full of violent and chaotic magical power. The closer you get to the center of the lake, the more terrifying this force becomes. Those viscous liquids flowing from the uneven holes on the stars will be directly shredded by the violent magic power if anyone touches them.

And this piece of star lake, although it looks like the magic power that has escaped, it is no different from ordinary lakes, but in fact the bottom of the lake is full of frantic undercurrents. Anyone who falls into the water will also have the same effect. Ended up with a body torn to pieces by the undercurrent.

Warcraft did not dare to approach, because they simply could not bear the violent magic power here.

Even humans, Du Luen and others have already begun to feel physical discomfort.

Regarding the history of Starfall Lake and Starfall Forest, there were countless textual players in the game who tried to make investigations and inferences based on the historical background of the game, but until Sean came to this world, there was still no clear answer. Or in other words. However, no matter how these people argue, there is a fact that makes all the sophisticated parties have to default, that is, there is indeed a Tier 5 dungeon entrance under Xingyuhu, but the entry conditions are more demanding.

In "Miracle", there are two types of copies, one is ordinary copy, and the other is rank copy. Normal dungeons can be entered by anyone. This type of dungeon does not have too obvious restrictions. Dungeon dungeons, regional dungeons, etc. belong to this category. For example, the "Wandering Darkness" completed by Sean before is considered to belong to this category. This kind of copy, and this kind of copy is everywhere in the world.

As long as you think you are strong enough, it's okay to challenge those instances of monsters with very high levels.

As for the rank dungeon, it is not so easy to enter. This type of dungeon is somewhat similar to the relic copy of "Prosperity" in the past, and it is not specific, and this type of dungeon must be completed after completing related tasks before having the opportunity to enter. For example, a dungeon that requires Tier 5 to enter, then you If there is only Tier 4 or Tier 6 already, then it is absolutely impossible to enter this dungeon. Only those dungeons that require Tier 5 or higher can enter the Tier 6 dungeon.

Therefore, the requirement is whether the rank or above is required. At the beginning, players were required to carefully identify it. If you don't pay attention, you may miss it.

However, everything about Xingyu Lake at the moment has nothing to do with Xiao En and others, and Xiao En did not intend to cause other troubles here. He just told everyone not to get too close to this Xingyu Lake, and then let him They can rest at will.

The exhaustion in the past few days, let Xiao En know that if this team does not get enough rest here, then they do not need to continue the next trip. And looking at the appearance of the wind-stripe black wolves still refusing to disperse, Sean also knows very well that their back path is gone. Now if they don't completely traverse the entire Starfall Forest, all of them will probably do it. Buried here.

Although everyone is a little uncomfortable because of the violent magic power of Xingyu Lake, it is rare that they can really calm down and rest. So soon the most exhausted guards fell asleep first, snoring slightly. And then, Harley, Cecilia, and the archer couldn't stop the physical and mental exhaustion and sleepiness, and soon fell asleep, just looking at Cecilia's face, obviously not very comfortable.

But think about it, after all, the violent magic power emanating from Xingyu Lake is really terrifying, and with Cecilia's amazing talent, it is not a good thing at the moment.

The only people who are still awake are Sean, Du Luen and Old Peter. As a veteran, one of his professional rewards is to reduce the physical strength and energy consumed in battle by 50%. In other words, even if everyone on the scene falls, he still has one. The power of war. Moreover, professional talents can be opened after Tier 3, and with the promotion of ranks, professional talents can also be re-selected or enhanced. However, at this point, Sean is not clear which one old Peter's professional talents chose. NS.

Old Peter's military sword was lost at night when he was attacked by wind-stripe black wolves, but even so, with a long spear, Old Peter's combat effectiveness was extremely sturdy, and he was facing the wolves. Under the attack, long weapons are indeed cheaper than short weapons.

At this time, Old Peter sat on the ground, and then began to tear up the jerky and chewed slowly.

Seeing Old Peter's movements, a wind-stripe black wolf let out a low growl, and then rushed across the cordon that made the wolves jealous, and rushed towards Old Peter, wishing it Also treat old Peter as jerky. But before the

wind-stripe black wolf rushed over, countless blue fluorescence rushed into its body as if attracted by something, swelling its body.

boom!

There was a loud noise, and everyone was awakened, but before everyone could react, a rain of blood was thrown down.

Among the countless pieces of flesh and blood, Old Peter was covered in blood, but the dried meat chewing in his mouth did not stop because of it. It looked very terrifying, but his eyes showed a solemn color: "These magic wolves The discipline is so high that only one can be attracted in this way."

Old Peter's jerky is naturally the meat of the wind-stripe black wolf.

Xiao En wanted to say something, but at this moment, a loud voice of wolf sounded in the distance, and all the wind-stripe black wolf movements stopped, and one after another pricked up their ears as if they were listening, and then there was another one. There was a long hurried sound of two wolf sounds, and all the black wolves with wind patterns turned around and left. In an instant, all the black wolves with wind patterns surrounding Xingyu Lake walked away cleanly. If it weren't for the piece of fine flesh and blood in front of them, no one could believe that they were almost wiped out not long ago.

"Wolf King." Sean frowned, and there was a faint premonition in his heart.

If there is anything in the entire Starfall Forest that makes him the most troublesome at this stage, then there are only two third-tier lord-level bosses, the Windprint Black Wolf King and the Blood Flame Lion King. As for the other corpse monster, it was after all the boss in the dungeon, and it was a target that Sean and others had to face, so even if it was tricky, he couldn't help it. Only these two monster bosses, if possible, Sean definitely does not want to provoke them.

But at present, this is obviously impossible.

After all the wind-stripe black wolves had left, a giant wolf that was twice as tall as a normal wind-stripe black wolf walked out of the forest.

The black fur on its body has a streamer-like texture. On the surface, it does not have the obvious green texture like the general wind-stripe black wolf, but in fact, it has the same green under the black fur. The texture, but it is no longer exposed on the fur, but branded on the flesh. This wind-stripe black wolf just stood in front of everyone, did not make a roaring sound or grinning appearance, but everyone, including Du Luen and Old Peter, had their faces changed. They could be very angry. Obviously felt the extremely strong dangerous aura and oppression on this wind-stripe black wolf.

Wind pattern black wolf king.

But what made everyone feel a little relieved was that the wind-stripe black wolf king did not step into the Xingyi Lake's range of influence, but after looking at everyone from a distance, he turned and left, which made everyone a little relaxed. The feeling of the tone, if this wind-stripe black wolf king really rushed in, they really didn't know how to deal with it. For Du Luen and others, if there is any beast in the forest of the stars that makes them feel the most terrible, then only the wind-stripe black wolf is the species. The ineffective combat method of physical attacks is indeed very difficult to adapt.

"What's the matter with you?" When everyone was fortunate, only Old Peter discovered the abnormality on Sean's face.

"We are really being targeted this time." Sean's face was very ugly.

He knew very well that the wind-stripe black wolf king actually had the ability to enter the Xingyun Lake's area of influence without being directly poured into the body by magic like other wind-stripe black wolves. But this wind-stripe black wolf king did not do this, so it is obvious that it still has some scruples, but what it really scruples about is not the size of the team of Sean

and others. Judging from the results of the past two days , Everyone is actually very clear that once they are besieged by the wind-stripe black wolves, they will definitely be dead.

Therefore, there is actually only one person that the Windwen Black Wolf King really cares about.

Cecilia.

As a magician, in fact, it is also affected by the tide of magic power. Of course, this influence is not static, and it may be a bad thing or a good thing. Fortunately, Cecilia's influence is a good thing, because in Xingyi Forest, she can play the strength of a third-order official magician, and close to Xingyi Lake as it is now, Cecilia's Magic power will become more powerful. It is precisely because of this that the Black Wolf King did not venture into this place to fight with Sean and the others, because as long as it is dragged, Cecilia alone has enough means to make it deadly.

"Everyone gets up, we don't have time to rest." Looking up at the bright moon in the night sky of the Forest of Stars, Sean said with a gloomy expression, "Now we have half of our journey left, thanks to the beasts. Fu, we arrived here nearly three days earlier than expected, and then as long as we pass through the outpost, we can leave the forest."

Hearing Xiao En's words, everyone's expressions showed a hint of joy that could not be concealed. They were fed up with the encounters over the past few days.

"but!"

The sentence "but" immediately made everyone's hearts awkward.

"The next journey will be more difficult than what we have encountered these days." Xiao En's words made everyone suddenly startled.

more difficult? What kind of concept is that?

"Originally, I should have given you all a good rest before going on the road, but now it really doesn't work." Sean sighed softly, "I'm just telling you that these wind-stripe black wolves have experienced congestion. The war between Rian and Podoroa, and the IQ of Warcraft was not low. Without the constraints of the Wolf King, they were not too clever. But the Wolf King is here. It will be around half an hour. They are all covered with their eyeliners, and as soon as we step out of Xingyu Lake's range of influence, we will be attacked by countless wind-stripe black wolves."

"Our way of retreat is long gone, so we only have one way left now, and that is to set off immediately and step into the black soil before the encirclement of the wind-stripe black wolf pack is formed."

"Black soil!?" Cecilia let out an incredible exclamation.

"The second half of our journey is in the black soil area?" And Du Luen's face changed suddenly in an instant. ;
