

Lord of War 71

Chapter 71: .Sean's perfect strategy (3)

Shaun was an excellent strategy party in the game.

He is different from the theoretical school who only watches videos and relies on imagination, and he is not like the practical school who likes to do everything by himself. What he pursues is only four words.

Simple and practical.

The most obvious characteristic of any Raiders party is that their purpose is to complete the final Raiders. In this process, whether they are good or bad, they will never let go as long as they are applicable, even if they use various bugs or even open a cheat device, it makes no difference to them.

Only in essence, the Raiders Party is actually a complement to the Practical Party, because they will absorb all the advantages of other factions, not just confined to a problem-solving method.

In this Raiders by Sean, there are only four steps.

Alfred creates a momentum to attract attention, draws out the strongest Crypt Demon, and destroys the balance between the Crypt Demon and the Bloodcry Mercenary Group. This is the first step. The key to success is Sean's understanding of the solidified thinking of these crypt demon, knowing that they will solve the mighty Alfred as quickly as possible-of course, the job of solving this crypt demon is naturally Give it to Sean, only he can be sure to kill the Crypt Demon in the shortest time.

After completing the first step, the second and third steps are carried out at the same time, or it is possible to summarize these two steps into one.

Alfred rushed into the battle circle and forced the head of the bloodweeping mercenary group back, so that the remaining Crypt Demon and the bloodweeping mercenary group once again returned to a situation of balance and confrontation. The key to this step lies in the bloodweeping mercenary group-there is no doubt that the current situation is naturally successful, because they are just like Alfred said, they are a group of selfish guys.

As for Cecilia's role, it is the final balance of power. She must attract the attention, or hatred, of the Medusa Chamber of Commerce magician, so that he can't support those Crypt Demons. The balance created by Sean and Alfred will not be broken. And once this magician who is good at spirit energy magic has performed a spiritual invasion on Cecilia, he completed the move by dealing with the cryptic demon, and invisibly approached Sean of the magician. , Will give him the final and most deadly blow.

And the fourth step is the final finale-annihilating the Crypt Demon and the Blood Weeping Mercenary Group.

This is a perfect strategy that doesn't seem to be too flawed. The reason why there are not too many flaws is that there are two uncertain factors in this plan. One is whether the Blood Weeping Mercenary Group is really a group of selfishness. Self-interested guy, the other is whether the magician will really be irritated by Cecilia.

From the current situation, it seems that there is no problem.

Shaun's long sword is only three inches away from the heart of the magician, and he has calculated the distance particularly accurately.

When his sprint is over, the sword in his hand will be only an inch away from the magician. At that time, he only needs to send it gently to pierce into the magician's body, and easily complete the opponent's heart. Chopped.

Seeing this magician's face pale and scary due to the influence of his mental recoil, and his figure staggered almost unsteady, Xiao En's heart naturally arose with excitement. He knew that as long as the magician died, The rest is no longer a problem. But I don't know why, looking at the calm look on this magician's face, Xiao En suddenly felt a little uneasy in his heart.

I didn't feel the sharp sting of danger in this trace of anxiety, but it was like a thorn that suddenly took root in Xiao En's heart.

Long sword, only two inches left.

The mage's mouth moved suddenly, and Xiao En's face suddenly became very difficult to look at.

"Barrier."

Long sword, one inch away.

The sprint is over.

Ripples, leisurely swing away.

Although the magician's face was pale, he was not sluggish. There were blue veins in the position of his temples, and his facial muscles were slightly twitching, obviously he was holding back the severe pain. But his eyes were very calm. He didn't even look at Cecilia again. Instead, he turned his head and stared at Sean. It felt like a poisonous snake staring at its prey and whispering.

This time, Sean felt a slight tingling sensation in the center of his eyebrows. He knew this was a signal that danger was approaching.

"Fireball!" Sean immediately shouted loudly, and at the same time he retreated. He had seen the magician's lips move slightly, obviously chanting the spell of spiritual invasion.

is just the target of this spell, but it is no longer Cecilia, but Sean!

This is a magician with extremely rich combat experience!

After receiving Cecilia's mental recoil, he immediately realized that the magic of spiritual invasion is completely invalid for her. At this time, he should naturally prepare other attack magic to solve Cecilia first, because as long as there is a barrier, He was in an invincible state within a minute, so naturally there was no need to worry about Sean. With the pride of being a magician, do you still feel that you can't solve a magician apprentice in one minute? Moreover, the Crypt Demon had also realized the seriousness of the problem, abandoned the Blood Weeping Mercenary Corps, and ran back towards the magician.

As long as they come back to help, this magician naturally doesn't have to be afraid of Sean, the "apprentice". Even if Alfred is also attacking, there is no need to worry under normal circumstances, because they are obviously more crowded here. Crowd.

Of course, this is the normal thinking logic of ordinary people!

But this magician gave up on Cecilia's counterattack, and instead locked the target of the attack on Sean!

The opposite is completely true!

But undoubtedly, this is the most effective counterattack!

Because of Sean's will, it is impossible to withstand the spiritual invasion of this magician!

When Cecilia heard Sean's cry, she naturally understood the criticality of the situation. The more in this situation, Cecilia became calmer. She accurately and quickly pronounced the sub-fireball technique. The incantation, with the help of the crimson flame, the powerful fire element became abnormally boiling. Moreover, when so nervous, Cecilia's magical power fluctuations doubled and became stronger, so the fireball that was condensed was not a secondary fireball technique, but a formal magic. The real fireball skill of the teacher, and the fireball was successfully condensed in one step ahead of the opponent's magician!

The howling fireball suddenly fell down!

There was a strong roar, and the fireball exploded in front of the barrier.

Circles of ripples kept rippling, and the flames spread along the ripples like running water, wrapping up most of the magician's body, but everyone knew that under the protection of the barrier, the magic The teacher will never be in any danger. It's just that while the flames enveloped the magician, it also blocked his sight. The burning tongue seemed to express the anger that could not be swallowed up at the target, and it was constantly licking and sweeping around. Burning.

The strong air current generated by the fireball explosion has even lifted some of the surrounding gravel into the air, splashing out like bullets indiscriminately.

Xiao En, who was already retreating violently, was even more agitated by this strong air current. He couldn't hold his figure anyhow, and his whole body crashed into the arms of a crypt demon. And Sean was not welcome. He took the opportunity to take the opportunity to send a backhand sword to the back, directly piercing the chest and abdomen of the Crypt Demon, and he was spinning and retreating, pulling his sword out at the same time. Swinging the sword, he lifted the head of the crypt demon.

All the confrontations are completed in an instant.

Only then did Sean have the extra energy to take a glance at the magician with the corner of his eye: The barrier can indeed protect him from any harm, but the strong air current can't resist it anyway, and his posture is unstable. Naturally, under the impact of this strong air current, his whole person also fell down, and the spell chanted to the end was naturally interrupted. Of course, this magician failed to cast.

But at this moment, Sean is not happy at all, because his perfect strategy was completely destroyed by this accident!

The five Blood Weeping Mercenary Corps members, taking advantage of the moment when these Crypt Demon returned to help, immediately turned and fled back to the tunnel, how could they continue to stay here, let alone fight for their lives to intercept this A few crypt demon's backs. On the other hand, the leader of the Blood Weeping Mercenary Group who was fighting Alfred was completely at a disadvantage, and he was about to be killed, but because of such an accident, he caught it very keenly. Alfred's momentary loss of focus, as a result of being injured, turned around and ran back into the corridor.

Alfred looked at the other person's back, and when he gritted his teeth, he did not chase, but turned and ran towards Sean to support him.

Because at this time, Sean has fallen into the circle of three crypt demon. Although he can solve these three crypt demon, but he can't do it easily, because there are two more crypt demon who are good at defense. People, even if the line of protection unfolded by them is Sean, it will not be able to break through for a while, not to mention that there is a crypt demon hiding in this line of protection to launch a counterattack against Sean.

He is not afraid of these three crypt demon, but he is afraid of the magician. And Alfred saw this, so he gave up the leader of the Blood Weeping Mercenary Corps and turned back to support Sean. Only his joining can completely reverse Sean's situation. These Crypt Demons launched a counterattack-after seeing that Sean killed a Crypt Demons simply and neatly, Alfred was also convinced that Sean himself was not a joke to say that he could beat five.

The battle is still going on, but the situation has changed slightly.

Cecilia, the second fireball spell was ready, but it didn't crash down immediately, but was controlled by levitation. Although she knows that this is very magical, she also knows that only the strong air current generated by fireball can knock the opponent's magician to the ground and interrupt his spiritual invasion!
