

Lord of War 74

Chapter 74: . Sean's Abacus

"What's the matter?" Cecilia was obviously awakened by Sean's laughter.

She rubbed her still sleepy eyes, and then suddenly realized that she was actually sleeping on the soft skin of the cave worm, but she did not scream because of it, but frowned slightly, and then stood soon. Get up, stay away from here. For a little girl, it is actually quite normal to be afraid of these things, but Cecilia also knows that if she wants to be a mercenary, she will inevitably encounter such things in the future, so she can only do it as soon as possible. Force yourself to adapt.

Looking at the little panic that Cecilia was holding back, Sean smiled and squeezed Cecilia's cheek who ran to him.

Cecilia was very unhappy and reached out and patted Sean's hand, and said angrily: "Don't put your dog's paw on my face!"

"It's fun." Sean smiled, and at the same time passed the ring in his hand to Cecilia, "Look at what this is?"

"This is... the magician's thing?" Cecilia glanced at the ring. As a quasi-magic, she could feel the powerful magic flowing on the ring better than Sean. There is no elemental aura, and the diamonds are also gray jade crystals. It should be an arcane magic ring, but I don't know what type of magic it belongs to. It may take a while for me to interpret it."

Magic jewelry is a special item independent of jewelry. Its biggest feature is that it does not occupy the equipment bar.

At the beginning, in the game, a player's jewelry column only had five equipment columns: necklace, two rings, and two wristbands. Although the game does not restrict players from wearing a lot of jewelry, the only thing that can really play the role of attribute bonuses is the five pieces placed in the equipment slot-even if a player wears a dozen necklaces or ten. All fingers wear rings, but the only ones that can be used effectively are one necklace and two rings.

Only magic jewelry does not occupy the jewelry column, but it can still be effective. Of course, for this magic jewelry to work, you must know the password of this jewelry. This is the real problem that plagued many players at the beginning, because each magic jewelry has a different

password. If you want to know the password, you can only find the old immortals in the Magic Guild, which naturally will be severely slaughtered.

So in the later stage, many magicians took part-time jobs in a life profession called "magic researcher" in order to avoid being blackmailed by the magic guild.

Although Sean probably guessed that this world would definitely have such a situation, he did not expect that Cecilia had already had a career in life, and she was also a magician researcher! It's no wonder that Sean repeatedly wanted Cecilia to be an alchemist, but Cecilia refused. After all, there can only be one career.

Thinking of this, Sean once again checked Cecilia's personal information. This time, there was one more display than before, and even the profession had changed!

[Name: Cecilia]

【Race: Human】

【Combat Class: Magician (Tier 3)】

【Life occupation: Magician researcher】

[Personal Attributes-Strength: 4 (13); Endurance: 7 (16); Agility: 4 (14); Wisdom: 21+12 (31); Will: 24+15 (30)]

glanced at Cecilia's attributes, there was no particularly big change, but the growth limit of wisdom and will increased by one point, and the current will increased by two points.

After a little thought, Sean understood that because Cecilia had just advanced, her magician level was only one level. Although the attributes have slightly improved, it is not very obvious, so there is no obvious change in all aspects of attributes, presumably even Cecilia herself does not know that she is already a magician. As for the improvement in will, it should be related to her continuous maintenance of fireball before. After all, insisting on this kind of thing is also very mental and magical, and the sequelae are not necessarily more than Sean. The mental impact is light.

Of course, if there is no such continuous effort before, when facing the magician of the Medusa Chamber of Commerce, she would not be able to break through the limit of magic.

But for now, Sean does not intend to talk about this to Cecilia for the time being. Let Cecilia continue to practice with the mentality of an apprentice sorcerer until his attributes have been significantly improved. It's not too late. As for the magic ring, although he knew what the password was, since Cecilia was going to study it, Sean didn't mind it, anyway, it would take a day and a night before the ring could be used again.

At this moment, Sean turned his head to look at the eggs of the Crypt Ice Spider, and then said: "Will you catalyze it?"

"Catalysis?" Cecilia was still studying the ring, but at the moment when she heard Sean's words, she was obviously taken aback, "What do you want to do?"

"The Crypt Ice Spider is a very good beast." Sean glanced at the spider eggs on the platform in the cave, and then said, "Although this kind of beast cannot survive on the surface, it does not mean it is really useless. Many nobles like to use them to protect some basements or treasure rooms.... Whether we use them or sell them, the price of Crypt Ice Spider eggs is definitely higher than that of Crypt Ice Spiders."

Hearing Sean's words, Cecilia immediately began to think.

She is a person from the magic empire, and she is far better than the average person in terms of vision and other aspects. It can even be said that although she is only thirteen years old now, she is not necessarily better than Alfred who was once the head of the group. People are poor, especially in the field of magic. Only Sean who has opened a cheat device can compare her, and even if she is better than her, it is not because of domain knowledge, but Sean has knowledge that people in this world cannot understand.

After a while, Cecilia finally raised her head, her eyes glowing with a strange brilliance: "I see what you mean. Crypt ice spider eggs are easier to control than crypt ice spiders, so its price Higher, if we catalyze directly to catalyze the Crypt Ice Spider Queen egg, then its price will be even higher.... But, do we have the opportunity to use it ourselves?"

"Why not?" Xiao En chuckled. "The natural incubation period of the Crypt Ice Spider is as long as one year. Even if the Beast Contract is concluded and its vitality is provided to it, there will still be an incubation period of nearly one month. In other words, we can completely conclude the contract

without providing vitality transformation. In this case, we also have one year to arrange. Who knows what will be like one year from now?"

"But Crypt Ice Spiders will not dig caves." Cecilia's brows frowned slightly.

"This is the problem that bothers me." Shaun obviously also considered a lot of things. "In fact, I personally prefer to conclude a Warcraft contract. In this way, we will have a Warcraft that obeys us, which will greatly affect our future behavior. s help."

Cecilia looked at Sean with some confusion, and did not understand the meaning of this sentence: "Could it be that our mercenary group will be underground in the future? If not, the Crypt Ice Spider has no value to us at all. It's better to sell for two watchdogs."

"The problem is that it is the Crypt Ice Spider Queen." Sean said softly.

Only a word, Cecilia immediately woke up.

If it is the Crypt Ice Spider, then whether it is for personal use or for sale, it is a one-off transaction. But if a Crypt Ice Spider Queen can really be cultivated, then this business can become long-term, because they have a steady supply of goods. And what excites Cecilia most is that she has never heard of anyone doing it before, whether in her family or in her empire, even if it is recorded in historical books, no one has ever done it. The matter can create an unprecedented event, which is naturally extremely attractive to Cecilia, a magician.

After all, Cecilia is still a person who is used to thinking about problems from the perspective of magic theory.

However, after calming down, Cecilia showed doubts and asked curiously: "But, for a high-level beast like the Crypt Ice Spider Queen, the general beast contract won't work at all, you really Can it be controlled?"

"Of course." Sean smiled, "I happen to know a Warcraft contract that can control the Crypt Ice Spider Queen."

For Sean's words, Cecilia has always blindly trusted, and would not doubt others at all.

"I understand." Cecilia nodded and said with a serious face, "But the previous battle destroyed a lot of spider eggs, I am a little worried that the catalyst is not enough."

The situation is exactly as Cecilia said.

In the previous battle with the magician of the Medusa Chamber of Commerce, Cecilia's fireball technique burned at least fifty spider eggs on the third-level platform, and many of them already had the ability to transfer to the second. Spider eggs on the level platform.

The process of catalysis is not just smashing spider eggs and then pour the liquid inside onto other spider eggs. It is necessary to let these spider eggs get a buffer process for absorption, and then use this process to select those with more potential. And value spider eggs continue to be cultivated. This not only takes time, but also requires energy. It is by no means simply messing around. Therefore, Cecilia destroyed so many spider eggs before, it is possible that it has destroyed most of the previous work for half a month, and it may even destroy many spider eggs with great potential.

However, Sean has only heard of catalysis. He actually knows nothing, so he can only rely on Cecilia in this regard.

"Let's take a look at the bottom of the spider eggs first." After thinking for a while, Cecilia decided to start with the most essential steps. If there is a spider egg below that is close to becoming the queen of the crypt ice spider, Then she only needs to cultivate this spider egg with all her strength, as for the others, it doesn't matter.

Anyway, they don't need the Crypt Spider Queen—not that they don't need it, but they can't be catalyzed and cultivated.
