

LORD OF WAR

Chapter 9: .This is the Forest of Stars!

The wind-stripe black wolf is indeed a social creature, but it was impossible for this kind of monster to appear directly in the game at the beginning, after all, it was not in a large copy. And Xiao En, also waited for a minute without seeing any signs of the wolf tide, and finally remembered some small details that he had forgotten.

In the Forest of Starfall, you can occasionally encounter a team of three to five wind-stripe black wolves. These wind-stripe black wolves are not foraging for food or fighting for territory, but just "walking". And what many players like most is that they can encounter these "single" wind-stripe black wolves in the Forest of Starfall, because the wind-stripe black wolves encountered in the belly of the forest are not only the leader of the wolf king. , The others are ordinary wind-stripe black wolves that don't drop anything special, and only these three to five groups of single-wind-stripe black wolves can give birth to a leader-level existence.

According to the original classification in the game, monsters in a race can be divided into lord level, leader level, captain level, and elite level from strong to weak.

Sean is not sure whether there will be such a distinction in this real world, but it is obvious that from the current appearance of the wind-stripe black wolf, the game's experience in the distribution of monsters is obviously still desirable.

The three wind-stripe black wolves indicate that there are no swift wind-stripe black wolves commonly called "captain monsters" by players, so it is much easier to deal with. However, no matter how simple it is, there will still

be a time limit, because social creatures will have a "seeking for help" feature. If these wind-stripe black wolves cannot be resolved within ten minutes from the sound of the wolf and leave here, Then I am afraid that they will be attacked by an endless pack of wind-stripe black wolves.

"Cecilia, push the two wind-stripe black wolves away." Shaun looked at the two wind-stripe black wolves with a steady gaze, and at the same time gave a new order.

Cecilia and Sean have cooperated for a long time, and the two have some tacit understanding with each other. At this time, after hearing Sean's words, Cecilia immediately knew what to do. When her last chant ended, Cecilia's magical power fluctuations immediately became intense, a hot breath instantly radiated from the air, and a fireball about the size of a fist had already taken shape.

Inferior Fireball!

Following Cecilia's mental traction, the small fireball flew out with a whistling sound and landed in the middle of the two wind-stripe black wolves, causing an explosion.

The explosion of the fireball caused the shock wave and the heat generated by the splashing sparks, which finally forced the two wind-stripe black wolves to make a low roar and then had to separate temporarily. However, this separation did not play a critical role. As long as the two wind-stripe black wolves circumvented this small piece of flame, they could still merge again, which was no different from before.

So when he heard this tactical order from Sean, Du Luen frowned.

As a noble from the Kingdom of Portoroa, even though Du Luen did not know what kind of species the wind-stripe black wolf was, this could not be an excuse to limit his vision. Every citizen of the Kingdom of Portoroa is very

clear about the theorem of the magical world, and the theorem of fire attribute magic in physics magic is the basis of the foundation, and it is the derivative law of this theorem. , Fire attribute magic is used to deal with wind attribute creatures, and it can definitely cause more damage.

Even if it is only a secondary fireball spell of apprentice-level magic, if it is applied to the wind-stripe black wolf, it can definitely cause a certain amount of damage.

At least, Du Luen knows very well that if he is in charge of directing the battle, he will definitely let Cecilia focus his secondary fireball on a wind-stripe black wolf, and then use the collective power to give priority to solving a wind-stripe. Black Wolf, not like it is now, wasted a secondary fireball spell. After all, Cecilia is just a magic apprentice, and not to mention the singing time, even the mental power and magic power are not enough for her to perform too many secondary fireball skills.

Du Luen shook his head slightly. He was ready to take over the command and start a deadly battle. He knew even better that he would only sacrifice one or two people in this battle.

In fact, just as Du Luen expected, the two wind-stripe black wolves soon merged again after bypassing the small piece of flame, and this time the speed was a bit faster than before, which was obviously affected. Because of the interference of Cecilia's secondary fireball technique, she became angry.

The faces of the four guards were obviously more panicked.

"All for stability, what are you afraid of!" Sean yelled coldly, "The big guy in the middle, give me back half a meter.... Cecilia, fireball, or push them away."

"Can you command!?" Du Luen froze for a moment, and immediately scolded, "They are wind-attribute beasts! Don't you know that fire-attribute magic

restrains the wind attribute? You actually wasted the secondary fireball spell In such a place! A magic apprentice can only cast lesser fireball three times at most!"

Sean didn't pay attention to Du Luen's meaning at all. He just glanced at the guards and saw that they seemed a little hesitant under Du Luen's words, and even shouted: "The two idiots in the middle, you don't step back half a meter, you are The first one to die! The two next to me, you have to stand firm, and you are not allowed to take a half step back when you die!" At this point, Sean had obviously started to ignite, and finally took a moment to give Du Luen a slanted look: " Don't forget, this is the Forest of Stars!"

A word, immediately suffocated Du Luen's aura.

And Cecilia, because of the magic that she just cast, her spirit and magic are in a relatively active state, so the second secondary fireball spell is significantly faster than before. According to Sean's instructions, she locked her spirit in a short distance in front of the four guards, and then the secondary fireball screamed out again.

This time, the two wind-stripe black wolves clearly saw the impact of the secondary fireball technique. Not only did they not have the slightest fear, but they showed bloodthirsty excitement in their eyes. And their four legs also produced a faint whirlwind at this time, just a light leap, and the two wind-patterned black wolves leaped to the left and right sides. The body shape was as light as a feather, and it lightly avoided Cecilia. His secondary fireball attack, and at the moment he landed, he slaughtered the two more prominent guards like lightning.

is still close to four meters away from each other, but this distance seems to be completely non-existent in the eyes of these two wind-stripe black wolves.

Lianyue culled!

This is one of the two attack skills of the Black Wolf.

The culling speed of the wind-stripe black wolf was too fast, and there was almost no time for the two guards to react.

But at this moment, Sean's voice sounded again: "Two people on the left and right, take a step back. The two guards in the middle, half a meter forward, attack the back neck of the wind-stripe black wolf at the same time!"

Sean's voice came so abruptly that the two guards didn't have the time and emotion to think at all. They moved like a conditioned reflex: they were already prepared to raise a shield to resist, but at this time The two of them took a big step back immediately. As for the two guards who had retreated half a meter before, they immediately ran up. The distance of half a meter can be said to be fleeting.

The lightning culling of the two wind-stripe black wolves happened to stop at the place where the two guards first stood. If the two guards did not retreat, they would definitely be culled by the wind-stripe black wolf at this moment. Fell to the ground. But it is unbelievable, but it is not just that the two wind-stripe black wolves failed to kill, and after the two guards in the middle rushed forward for half a meter, they had already stood back to their original positions. But at this moment, they happened to stand beside the two wind-stripe black wolves—the two wolves arrived at almost the same time.

No need to think, the curved blades in the hands of these two guards slashed towards the back neck of the wind-stripe black wolf.

The air current surrounding the wind-stripe black wolf burst out for the first time, blocking the slash of the curved blade. It seems that there is no difference from the previous Druen attack, and it can even be said to be

worse. After all, this The two are defense-oriented guards, and they are not very good at offensive methods.

But looking at this scene in front of him, Du Luen's eyes flashed with surprise.

Because he saw two wind-stripe black wolves looking up at the guards, the position of his throat was completely exposed.

"Shoot the one on the right!"

Xiao En said in a deep voice, and at the same time, he also activated the sprint skills in an instant, and rushed towards the wind-printed black wolf on the left.

Boom!

The sound of the arrow shooting when the bowstring is loosened is only half a second slower than Sean's sprint. From this point, it can be seen that the shooter's reaction speed is very good.

But the real surprise is still Sean.

In the eyes of everyone, Sean rushed towards the wind-printed black wolf on the left at a speed that was not inferior to the wind-printed black wolf culling the two guards. Then as he approached the wind-stripe black wolf, Sean abruptly stopped the rush-stopping halfway through the sprint. This is a skill that all experienced warrior players know, but in the eyes of others. , It's not like that.

Because the stillness caused by high-speed movement will shock the internal organs of the body, strong people who are not high-ranking dare not do this at all, but the problem is that Sean's rank is only a first-order [mercenary] That's it!

In the consternation look of the crowd, Xiao En stood indifferently in front of the wind-stripe black wolf, and at this time, the fluctuation of the airflow caused by the stop of the sprint finally made the wind-stripe black wolf alert. His eyes There was obviously a hint of panic. When he was about to leap away from Sean, the long sword in Sean's hand had been pierced from the throat of the wind-stripe black wolf, and directly placed the nucleus crystal of the wind-stripe black wolf in the throat. Shattered, completely ending this monster in front of me.

On the other hand, the arrow shot by the archer is obviously also his skill, because ordinary arrows are difficult to shoot into the hard fur of the beast. Originally, Sean's plan was to attract hatred to the archer. After all, there is a knight named Du Luen there, and his task is to quickly solve a wind-stripe black wolf, then concentrate everyone's power to kill the other one, and then go to help Old Peter.

But the current situation seems that the shooter's strength is obviously not bad, which saves Sean a lot of work.

At the moment when these two wind-stripe black wolves died, a scorching heat suddenly poured into Xiao En's body, making his body seem to be burned by flames. In the blink of an eye, Xiao En's face turned pale, and the breath he exhaled was even a bit hot, which made the guard who was closer to him even more horrified.

It's just that Sean just stopped and said, "It's okay."

In stark contrast to this sudden burning sensation, it was Sean's ecstasy at the moment. After killing two wind-stripe black wolves, his experience value gained a lot of growth. Although he had long guessed that as long as he was able to obtain experience points in the form of a commission contract, Sean still did not expect to retain the reward system for leapfrog killing monsters in this real world.

Of course, judging from the current situation, I'm afraid that killing monsters by leapfrogging is not all a good thing. At least if this kind of burn is stronger, it will kill him.

And the burning feeling in Sean's body receded slightly, and the third whine sounded. Sean turned his head in amazement and looked at the other side of the battlefield that had been ignored at the beginning, but saw Old Peter fighting hard. With the injury of a paw, a shot pierced the throat of the wind-stripe black wolf.

Similarly, almost at the moment when this wind-stripe black wolf died, the burning sensation that had faded in Xiao En's body instantly erupted again. While making Xiao En let out a muffled grunt, it also directly adjusted his level. Pushed to level seven. ;
