

Lord of War Vol 2-311

Chapter 311: . Only half right [first more]

Since he decided to make a full shot, of course, Sean's movements will not be slow.

With his current agility and endurance, even if he doesn't use light-weight technique and adrenal stimulation, he will not be much slower than the lower level gold. If it is the lower level gold power who is promoted by the conventional route, Sean can even share the same score with them. se. So when he carried Cecilia on his back, he was already chasing in the direction where the two fled in front of him with all his strength.

At this time, just ahead of the road where Sean was chasing at full speed, two men in their thirties were also running fast.

"Second brother, why are we running away?" the slightly younger middle-aged man on the left asked somewhat puzzledly.

He is wearing a set of leather armor. This leather armor is obviously not tailor-made for him, because it is obviously a little small on his body, so it looks a bit nondescript weird. And he has a machete pinned on his back, without a scabbard, but the blade has a bit of rust. Obviously, this is not a precious weapon. In addition, there is a quiver on the back waist, which is about There are about ten arrows left, and the horned arc bow is held tightly in his left hand.

Even if he is running at full strength at the moment, he regards this bow very importantly.

"We are not his opponent." The man known as the third brother said in a deep voice.

Unlike the middle-aged man on the left, the man on the right is equally burly, but he doesn't wear any protective gear. He even wears a bow, three quivers, and a dagger on his right boot. There are no other weapons. But the evil spirit exuding from him is much stronger than the middle-aged man on the left. It is obvious that this is a person who has really smashed a **** path in countless blood battles.

"No?" Hearing the words of the middle-aged man on the right, the man on the left was surprised, "Third brother, you are not an opponent?"

"No!" The person on the right said very simply, "I'm afraid that no one is his opponent except Big Brother. ... If we knew that it was such a tricky enemy, we shouldn't have made it. Now we have provoked such an enemy for nothing. Very unfavorable."

"What are you afraid of!" The man on the left exclaimed dissatisfiedly, "Is it an opponent? You have to fight it before you know it!"

The man on the right glanced, the face of the middle-aged man on the left was a bit bright, and after mumbling a few sentences with completely unclear meaning, he did not dare to speak any more. However, this time the speed of the two of them increased by a few points, and they quickly turned in mid-air and fled to the northeast. However, the quarrel that erupted from the speed increase just now followed Feng Qi and Xing Xing rushed forward, taking away their breath at the same time.

This is a habitual technique of the demon hunter, of course, there is a means of hiding the breath with this technique.

After all, the beasts rely on breath to hunt down their prey. If there is a demon hunter who can't beat the advanced beasts, then they must find a way to shield the breath to escape. But if you simply shield the breath, it is actually useless, because the more advanced the beast, the more cautious. If they suddenly find that the traced breath disappears, they will only search nearby. Although the breath can be shielded, people are not. Will disappear out of thin air.

So after a long time, the demon hunters came up with this special method to deal with monsters.

About a few minutes later, Sean and Cecilia came to this place.

Just as soon as he got here, Sean stopped, and did not continue to advance as before.

"What's wrong?" Cecilia asked with some confusion.

"It looks like we are very close to the target." Sean sneered as he looked at the front where the breath was gradually drifting away, then turned his head and looked to the northeast, and then immediately got up and chased after him.

If ordinary people are chasing the demon hunter, I am afraid they will really be deceived by this method.

Because they were moving along the airflow just now, it was not just their smell that was taken away, but there was also a trace of a grudge erupting. For masters and strong players, chasing the enemy is based on the clues on the road and the traces of the use of vindictive energy, especially if you use vindictive energy to drive on the road, then the traces of the use of vindictive energy will be very obvious, although the time remaining in the air is not It's not long, but it is already an extremely obvious clue to the strong men who are pursuing.

But Sean is different. He has a lot of dealings with monster hunters in the game. After all, these are a group of real robbers.

So of course he is very aware of this means of getting out.

This is a public skill unique to the Demon Hunter camp.

In the game, the reason why the demon hunter camp is better than the demon hunter is because of this anti-sky escape skill. Almost 80% of the players in the game will choose the demon hunter instead of the demon hunter. . It's just that in the game, this method is almost a bad way, but in the current miracle continent, there are not many people who know this kind of escape technique, and it can even be said to be a rare Jingying.

So when these two middle-aged men used this escape technique, they thought they were safe, so Jing Shen was a little relaxed. But they didn't know that Sean knew even more about how to use this technique than they did, otherwise he wouldn't be able to determine that the two of them were fleeing to the northeast in the first place. If these two people had known that Sean was so terrible and against the sky, then they would not take the initiative to attack Sean if they said anything.

Not long after, the two middle-aged men came to a temporary camp.

Although is a camp, it is actually just a place where you can rest. Let alone a tent here, there is not even a sleeping bag, only a few piles of hay just thrown on the ground with some lime-like powder sprinkled on it, which can effectively prevent the odor from leaving on the hay, and it is

also good for hunting. As far as the devil is concerned, they remember the basic hunting guidelines very clearly and will never make those small mistakes, so the camp chosen is a downside.

The return of the two middle-aged men at this moment quickly attracted the attention of a middle-aged person in the camp who was monitoring the surrounding situation.

If you look carefully at this time, you can find that not only the middle-aged man and the other two people in the camp, but even the two middle-aged men who fled all the way back, have some lime-like powder on their bodies. .

Of course in this world, this kind of powder is not lime, but a kind of shielding powder that can shield odors. It is one of the common tools of demon hunters and demon hunters.

Seeing the two return to the team, the middle-aged man in charge of monitoring immediately asked: "What's the situation?"

"I met a ruthless man." It was the middle-aged man on the right who was speaking. His voice at the moment was low and full of a murderous taste, "I and Robbie are not rivals."

Hearing this middle-aged man said, the pupils of the person who asked the question suddenly shrank, and he was a little surprised.

Their team was put together improvised. The two men in front of him are a pair of brothers. Although he does not know these two men, he knows their eldest brother, who is very much in the hunting circle in the southern part of Darbion. A famous person. And even though the two brothers are still a little different from their eldest brother, how could the people who have been on the verge of death all the year go so bad.

He has the strength of upper silver, but facing the combination of the two brothers, he has to deal with it very embarrassingly. In fact, even if there are three people on his side, even if there are two conflicts with these brothers, they can only maintain an undefeated victory, and it is impossible to kill the two brothers. Besides, even if it can be done, they dare not do it.

After all, their eldest brother is a master at the pinnacle of silver, and belongs to a ruthless man who has already stepped into the golden realm with half his foot.

So now, these two people are saying that they are not opponents of each other. How can this not surprise him?

"What the ***** is going on?" The middle-aged man exclaimed slightly, which caught the attention of the two companions who were resting next to him, and the other two quickly gathered around.

"What's the matter?" someone asked.

"David said he met a ruthless man." The middle-aged man said in a deep voice, "He and Robbie are not each other's opponents."

"Neither of you teamed up against each other?"

The person speaking is a fairly young guy, about twenty-five or six years old, about the same age as Sean, but the aura on his body is not strong, probably only the strength of the lower rank silver, but he is all in one suit. The fierce murderous spirit is only stronger than Sean, but not weaker.

The demon hunter has never been weak, even if it is only bronze strength, but as long as he survives more than a dozen battles, then the combat effectiveness can never be judged by pure strength standards. Perhaps in other places, the murderous intent emanating from this young man will make some nobles look at him, thinking that his potential is absolutely amazing, but in fact the potential of this young man is not high, especially for other experiences. As far as the rich and sophisticated demon hunters are concerned, they all know that if this young man does not have a big opportunity, it is impossible for this young man to become a golden powerhouse.

"Yes." The middle-aged man named David said in a deep voice, "One of the other people hit the trip, and the other one went to help. Rob and I shot two arrows at the right time and was easily blocked by the other party. ."

"You only shot two arrows, so you say you are not an opponent?" It was another person who spoke.

He is not too old, about thirty-two or three years old, but his strength is one of only two high-ranking silver among the five players present. He and the middle-aged man who was questioning just now have been partnering for a long time. Not only are they close in strength, they are also very knowledgeable, and they have developed a deep friendship in countless death adventures.

Therefore, the two have always acted together, but with these two Human strength is not the opponent of the Black Crystal Demon Leopard, so the two brothers David and Rob were found.

As for the young man, it was also brought by the middle-aged man who spoke at this time. It is said that he was the son of one of his distant relatives.

Although the profession of Demon Hunter is dangerous, the benefits are really good, because the hunting materials are all their own, and they can also trade through the underground black market, unlike the Demon Hunter, which requires the Demon Hunter Guild to draw commissions.

Hearing the obvious questioning tone of the middle-aged man, David raised his brows and sneered: "Don't say you didn't trip over a trip or get distracted by other things, even if you know me and Rob I'm going to attack you, but can you block the arrow from the tricky angle of the two of us?"

Being so ridiculed by David, the middle-aged man's spirit stagnated, but he knew that what the other party said was the truth. Let alone a sneak attack, even if he knew that the two brothers were going to attack him, he might not be able to block the two arrows, even if he could, it would definitely not be easy. But now, since David has said so, not only did the other party easily block it, they might not even get hurt at all, otherwise they would never say that they encountered a ruthless person.

Demon hunters are not fools. If they don't even have such a little common sense of judgment, they won't be able to survive.

The atmosphere was temporarily stagnant.

"I haven't played, how do you know it's not an opponent!" The young man suddenly felt a little upset when his uncle was choked.

David glanced at the young man coldly: "You don't need to hit me to know that it's not an opponent. We can still save our lives if we run away, but if we fight against him, I'm afraid Rob and I will suffer a lot even if we can escape. Hurt."

Of course, David did not say one more thing, that is, it is absolutely impossible for the injured demon hunter to survive.

Because this is a circle of the weak and the strong.

But what everyone did not expect was that just as David had just finished saying this, a voice suddenly sounded: "You are only half right."

Chapter 312: .The deterrent power of the sacred stick [second more]

Everyone turned their heads in amazement and looked at the place where the sound was made.

A young man with black hair and black eyes walked out of the forest leisurely.

The dress he wears is very simple, it's just a set of ordinary hunting outfits, but a well-informed hunter can tell at a glance. The specifications of this hunting outfit are typical noble outfits because of its shape. No matter how simple it is, there is a luxurious and introverted temperament. Only tailors who specialize in tailoring clothes for nobles can make such dresses, and in the same way, only nobles dare to wear such dresses.

There is no doubt that this young man with black hair and black eyes is definitely a nobleman.

But, how could a nobleman come to the Forest of Gray Shadows?

Thinking of this, the middle-aged man who was in charge of monitoring the surrounding environment turned his head to look at David, and said with a cold voice, "You don't know if you were being followed!"

"It's impossible!" David had a horrified expression on his face, and even Rob had the same horror on his face.

Blasting direction, this term is a common skill of Jingying Demon Hunters, that is, the special skill used to escape from hunting.

This skill is not easy to master. Many demon hunters are buried directly under the use of this skill. But once you master this skill successfully, even if your strength is low, you can still be respected in the circle of demon hunters—of course, this is for the aborigines and the npcs in the original game, like players have to learn Skills are not that troublesome.

For players, the real trouble is how to receive tasks that can learn skills. But once the skills are successfully activated, if you are willing to invest in proficiency points, it is not difficult to burn the skills to the full level in a short time.

This skill, Sean will of course also, and he will not only do it, he was also one of the few skills he was willing to invest a lot of proficiency in the game, because this skill is used in adventure and some Raiders, indeed Can reap good benefits. However, when Sean decided to become a lord, he did not choose to consume proficiency points to activate this skill, because he felt that he probably won't have any chance to use this skill in the future, so it is better not to waste proficiency points.

However, if it is not activated, it does not mean that he will forget this skill.

"But it's just the turbulent direction when I just started, and I want to get rid of me if I can't even volley. Is that too despising?" Before the other party reacted, Sean already sneered. The words came out.

Blast flow direction, there are a total of ten levels, in the third pole, sixth level, ninth level and tenth level these four levels can make the burst flow direction this skill once strengthened. And these four enhancements are also the criteria that players use to judge whether the opponent's explosive turn is deep.

The three-pole explosive flow direction can get an additional bonus effect, that is, volleying and hiding.

The only effect of this effect is to reduce the aura traces that are produced when turning around after using this skill, because when dealing with monsters above level 6 or those with a keen sense of smell, the simple blast turning is no longer useful, those The cunning beast can also easily distinguish the changes in smell. And only after mastering the volley and hiding, can you escape the chase of these beasts, so the explosive flow below the three poles is just getting started in the player's evaluation.

Even David and Rob didn't understand the term volley, let alone the other three demon hunters who hadn't mastered the special technique of turning and turning. But the two of David and Rob will burst into this special skill, others still know it, and at this moment, the young man who seems to be a nobleman said these words so easily. Five of the present. It was instantly understood that this nobleman was more difficult than David and Rob had imagined.

"But there is one sentence that you were half right just now." Sean's face suddenly changed, and he smiled friendly, but this smile fell in the eyes of David and the five people, it was like a demon. His grin is generally terrifying, "If you two run desperately, then there is indeed hope to survive. But if you fight against me, then you will not be able to survive, let alone escape."

If someone said this to David and Rob before this, like Sean, they would definitely be torn apart by David and Rob.

But as someone who even knows the high-level skills of Explosive Turning, which is only circulated in the circle of magic hunters, even David and Rob did use Explosive Turning to get rid of Sean. At this moment, no one really thinks that Sean is joking. If there is something like regret medicine, David and Rob would definitely rather die than provoke Sean. After all, if they die, it will happen in an instant, but now this atmosphere shrouded in fear is really true. It's too uncomfortable.

"who are you!?"

What surprised Sean a little, was that it was not David or Rob who spoke, but the previous monitor.

Now Sean can be sure that this person is definitely the leader of this improvised team. And from the moment the opponent has the courage to ask questions, trying to appease and stabilize the entire team, only this courage is worthy of Sean's respect.

"Sean Connery." Sean smiled, "Nowadays Bandar leads the Baron."

"Is it... Darby expensive or Ryan noble?" Hearing Sean's words, the middle-aged man hesitated for a moment, but he still asked.

Hearing what the middle-aged man said, Xiao En knew that these guys had not left the Forest of Gray Shadows at least for more than half a year.

Demon hunters are different from hunters. If they die in the process of hunting monsters, they will not touch blood and gold, and even the harvest of their action will be divided by other hunters. So every time they go out to hunt a beast, they will usually not only hunt one, but a large number of hunting, so naturally they have to stay in an area for a long time-this time is also related to the area. The number of Warcraft is related.

Grey Shadow Forest, as a highly active area of beasts, generally if you stay here for three or four months, the gains should be considerable even if they are not great.

These people have stayed here for more than half a year, so usually there are only two possibilities.

"Who is going back to the mountain?" Xiao En asked casually, "Or are you looking at the big guy?"

This time, everyone smiled helplessly.

If Sean had not been taken too seriously before, then no one would dare to ignore him now. Just a few simple conversations can determine their purpose. In addition to proving that the other party is extremely familiar with their circle of demon hunters, there is another point that means that he doesn't care about the five of them at all.

"I'm Ryan Noble." Looking at these demon hunters, Sean said lightly, "It looks like you are looking at the big guy?...Let me guess."

Xiao En's gaze swept away on everyone's faces, and anyone who touched Xiao En's gaze would not help but bow their heads.

This is a very unusual signal.

Demon hunters have always been a group of brave and ignorant guys. Their circle believes in the rules of the weak and the strong, so how can they be afraid of a nobleman, let alone a baron? But at this moment they all chose to bow their heads, which means that their awe of Sean is not because of Sean's identity, but because of the strength that Sean has shown at this moment.

"...This is the edge of the Forest of Gray Shadows. It is generally impossible to see any powerful beasts, even three-pole beasts are rare." Xiao En said calmly, "but you have five people here. , And they are all silver strengths, so there is only one explanation left... The Black Crystal Demon Leopard."

The five people present suddenly looked up at Sean, but their expressions were different. The middle-aged man who led the team, his companion, and the young man looked shocked, while David and Rob were both surprised. Although the person's face is also shocked, but his eyes are a

bit more hideous. The expressions of both David and Rob were the same as Sean had expected. He even knew that although they were a five-man team and were going to kill the Black Crystal Demon Leopard, he was sure that once the Black Crystal Demon Leopard was killed, The other three must die at the hands of David and Rob.

There is no other reason, the value of the Black Crystal Demon Leopard is too high.

If it is said that an excellent demon hunter stays in the Grey Shadow Forest in the first half of the year, he does not need to continue to venture out in the next two years. So as long as the Black Crystal Demon Leopard is successfully hunted, even if it is divided equally by five people, it is enough to live a wealthy life for five or six years.

Of course, if it is to swallow it alone, then it can really be regarded as a perfect retreat.

"This lord..." The demon hunter in the middle hesitated, gritted his teeth and said, "It was our fault to offend you before..."

"I want the blood and skeleton of the Black Crystal Demon Leopard, and the other things can be handed over to you." Before the other party could finish speaking, Sean had already spoken first.

There are three places with the highest value of the Black Crystal Demon Leopard, one is its fur, one is blood, and the last is its skeleton.

Shaun said this, and he immediately asked for the two most valuable materials, which of course would make these demon hunters a little grudge. But Sean knows the character of the demon hunters very well, so he did not eat alone, but left the other parts to these demon hunters, otherwise he even wanted the fur of the black crystal demon leopard. This thing was made. Leather armor not only has high defense, but also has a relatively good penetration magic xing, which is most suitable for the use of mage.

"Good!" The situation is stronger than the others. Although they have not yet played against Sean, they have been weak since Sean appeared. Therefore, even if he is not happy, the middle-aged man can only nod his head and agree.

If it weren't for Sean's strength to be stronger than them, how could they talk nonsense with Sean so much, they would have killed Sean a long time ago.

"But before this..." Xiao En nodded slightly, and then his tone changed suddenly.

After everyone hadn't reacted, Sean had already activated the light-body technique and adrenal stimulation at the same time, and crashed into David and Rob like a meteor!

"I want to solve a little trouble first!"

Chapter 313: .Strong kill

Once Sean decides to make a move, he will never be merciful. As long as he can use a lot of force, he will never be able to use only nine points.

He has seen too many cases where the cao win was stabilized, but it turned out to be overturned.

Especially his former guild president, everyone in the game called him "the undead Xiaoqiang", because he is best at counterattack in adversity, no matter how difficult the situation, he can always find a way to counterattack. Even the guild where the Void Wings were originally located was burnt, but in the end they did not disband because of this, and even became more united, and under the leadership of their guild leader The same method burned the opponent's base camp.

Then, two overlord-level guilds that lost their base camps launched a war that swept across the entire continent here in the southern continent.

Until he came to this world.

So, Sean will never despise any opponent, especially in this real world, only dead people will not be countered by him.

When Sean rushed in front of David and Rob in an instant, the dead bones in his hand had already drawn a pale arc of shadows, and he was severely cut towards David.

In his glance at everyone just now, he has already discovered that David is a pure archer profession. Although he doesn't know the direction of the change, his melee ability is definitely not strong. However, Rob's profession surprised Sean a little bit. This guy is actually an inaugural robber. Strictly speaking, this is indeed a hidden profession. It is stronger than the general professions of the same level, but there are so many professions in this category. The negative impact is even more disgusting than mercenaries.

So this will be done, and Sean will lock the breakthrough on David's body, even if it can't kill with a single blow. But as long as David can be injured, Sean believes that the next battle will go smoothly.

What's more, he is not alone in the fight, but he didn't dare to let Cecilia take action before David was resolved.

After all, Cecilia's job is still a magician, and she can't stop the arrows from the professional archer David.

White se's arc is cut out, but it is a little different from what Shaun imagined.

Because the war bow in David's hand was not cut into two pieces under Sean's sword, it just made a dull low noise, and a crack was added to the bow.

A hint of surprise appeared in Sean's eyes.

To know. The dead bone in his hand is an epic weapon, and it is also a rare weapon that can gradually grow and become stronger. Its sharpness cannot prevent the destruction of the dead bone unless it is equipment above the legendary level. But now, this looks very simple war bow. But it can actually block the dead bone's slash, even if Xiao En dare not use his full strength because of the attack. Leave a bit of energy to prepare for a change. But this one was indeed beyond his expectation.

However, Sean was surprised, but David was more shocked than Sean.

He also obtained this war bow from other places. Although he doesn't know the origin of this bow, it is precisely because of this bow that he becomes a very good hand, even if it is not a hundred steps to wear Yang. You can at least do ten arrows and nine arrows bullseye. Of course, it is more that the material of this bow is not known what it is made of. Not only is it extremely strong, it is impossible for ordinary attacks to cause any damage to the bow. Moreover, the arc angle of the

bow is very sharp, so many opponents who used to bully the archer in close proximity were eventually killed by him.

But now, when this war bow was blocking Sean's slash, a crack appeared on the bow. How could this not surprise him?

This bow has been with him for seven or eight years, and it has been used to block other people's attacks without a thousand or eight hundred times. But even so many times, it has never left a trace on this bow, but now it has a crack!

For an instant, after the shock, David knew that the long sword in Sean's hand was not ordinary.

He thought that his eldest brother was using a long sword, and his heart became hot.

David knows very well that his teaming with Rob is indeed not an opponent of the nobleman in front of him, but that means under normal circumstances, which one of the demon hunters has no special means to work hard? If it is not necessary, who wants to expose these hole cards, maybe some hole cards are used once less once.

But now, David can perceive that Sean's killing intent is absolutely real, which means that this has indeed reached the moment when they have to desperately, so without the slightest hesitation, Damon's left hand holding the bow suddenly moved. At a glance, I didn't know what mechanism I touched. Except for the grip in the middle of the bow, the positions of the two ends suddenly became a blade surface, which looked like a two-edged sword.

And Sean, as soon as he saw the hand revealed by David, he immediately knew why this bow could block a deadly blow.

"Wang Ting Bow!" Even Sean couldn't help but exclaim.

Wang Court Bow?

David is not as knowledgeable as Sean. He doesn't even know the origin of his bow. Even the ejection of the arc blade was only the third year after he obtained the bow that he accidentally discovered such a mechanism. From then on, he knew that this battle bow was definitely from an extraordinary origin, and his original intention of appraisal was gone. After all, he was a demon

hunter. It was taken for granted that he was cautious in everything. He didn't want this battle. The bow was robbed by someone else.

But David doesn't know, but it doesn't mean that others don't know.

The middle-aged man who led the team obviously knew what the royal bow was like.

That is the equipment that the royal troops of the ancient jingling empire can equip!

He never thought that David actually possessed such a weapon!

But even if David had a royal bow, it was nothing to Sean. At best, it became a little tricky, not as easy to solve as he began to imagine. As soon as he understood this, of course, Sean would not continue to spend time with David. After a blow to repel David, Sean turned around and launched an offensive against Rob.

This time, despite the double boost of light body surgery and adrenal stimulation, the distance is too close, so Sean's speed advantage has not been reflected.

And Rob is not as weak as the opponents that Sean has encountered before. Even if he knew he was not Sean's opponent, but watching Sean rush towards him, Rob suddenly roared, holding the hilt of the knife on his back with his right hand, drew the knife abruptly, and turned towards him without even looking. The front fell fiercely.

This knife can be described as a real power sinking!

The surprise in Sean's eyes resurfaced again.

He thought that Rob was only lucky enough to be able to change his job as a bandit, but he did not expect that Rob's potential was really good, at least definitely better than David. Looking at the posture of this sword, Rob's power is definitely the highest peak of his job. In other words, the pure naked outfit is absolutely close to fifty points, this data is even higher than Sean's naked outfit.

But even so, the surprise in Sean's eyes was fleeting.

Rob's potential is really good, if it is not an enemy, Sean really has the idea of including him under his command. After all, once people who are purely on the power development route are trained, their combat effectiveness is also very terrifying. This is also the reason Sean fancy Alfred at the beginning. It's just a pity. Alfred's achievement in the game was the lower level silver that stopped at the fifth level. Now that he can step into the upper level silver is already breaking the limit, but if there is no major change in the future, it is estimated that this is Alfred. Germany has grown to its limit.

But Rob is different. He is a few years younger than Alfred, and his naked strength is definitely more than fifty points. Even Alfred is completely incomparable with this data-don't forget that Alfred is now an upper-ranked silver, but his naked strength is only forty points, which is less than the lower-ranked Rob. Ten o'clock. So no matter whether Rob's future achievements can enter gold, but as long as he enters the upper silver. Then his fighting power absolutely surpassed Alfred.

But unfortunately, he is the enemy.

Even if it's not an enemy, the evil spirit hunter's kind of yin stabbing a knife behind him, even if Sean really wants to use him, he will be cautious.

So in the face of Rob's full blow, Sean would not have the slightest scruples in his shot. He didn't believe that the machete in Rob's hand could still be of the same level as the king's bow? If this is the case, then Sean would be unlucky and meet two ruthless people who pretend to be pigs and eat tigers.

Dead bone, a shallow shadow was drawn in Xiao En's hand, and it accurately hit the blade of the machete.

With Sean's current agility, he can capture even the movements of a high-level golden powerhouse, not to mention that Rob is a low-level silver master who only focuses on strength growth. So he was completely relying on a single force to drop ten guilds. Naturally, he couldn't escape the dynamic capture of Sean, and he was picked by Sean with a single sword.

With just one blow, Rob's savage and crazy ***** se immediately turned into a kind of terrifying horror.

The kind of power feedback sent back from the blade made Rob feel like he was hit by a level five monster. He couldn't believe why such a thin body of Sean had such a terrible explosive power. This was completely beyond his expectations, and even if he didn't want to believe it, he was still opposed by this blow. The shock was a few steps back.

More than that, the machete in his hand was shattered into a pile of shattered iron under the blow of Sean, leaving only the bald handle of the knife in his hand.

"Rob!" Seeing Rob retreat more than ten steps, but this distance is still within the range of Sean's attack, David's face was surprised and angry, "Jerry, don't do it! If I and If Rob dies here, you know the consequences! My eldest brother already knows that we are acting with you!"

Hearing David's threat, the face of the middle-aged man who led the team changed slightly.

He could already see that the young nobleman in front of him was indeed a ruthless horn, and it was not the ordinary ruthless one. He knew how powerful Rob was, but in this confrontation, he didn't get any benefit from this young nobleman. Obviously, this noble who calls himself Sean is definitely stronger than Rob, in other words. In other words, the facts are exactly as he said before, even if David and Rob join forces, they are indeed not the opponents of this nobleman.

To die in battle, that will happen sooner or later.

But what if three of them join in? Jerry knows very well that this young nobleman is also the strength of the upper silver pinnacle, and he and his partner are both the strengths of the upper silver pinnacle. If the three of them join the battle, they might actually be able to influence and even Tilt the situation.

But.....

Jerry glanced at Sean, and suddenly found a trace of disdain in his eyes, and his heart jumped suddenly. This unexpected discovery made him not help. Instead, he carefully observed it again. He soon discovered that Sean's movements were a little slow, but this slowness was not an injury, but a kind of temptation, which was obviously deliberate. The shot of the three of them!

After discovering this, Jerry's cold sweat broke out.

He is already convinced that if they dare to do something, not only will they not be able to tilt the battle, but they may even take their own lives. After understanding this, Jerry immediately stopped the young man who was preparing to give aid. This time even Jerry's old partner showed a trace of confusion in his eyes. He didn't understand why Jerry wanted to stop it. He was very surprised. Know how terrible the big brother of David and Rob is.

"Jerry!" The man named David yelled in a deep anger.

Sean knew that that Jerry was definitely more clear-cut than he was. He had obviously discovered his fake actions, so he made up his mind not to take action. In fact, Sean does have the idea of killing them all at once, but now that Jerry and the others do not take action, Sean has no excuse to kill them. Murderers, not to mention that each of these demon hunters are very cunning. If they can't kill with one blow, it will be very troublesome.

But the words David yelled just now made Xiao En a little wary. The two men seemed to have an older brother.

However, after making sure that Jerry and the three of them would not take action, Xiao En no longer showed mercy. He strode forward, and the dead bones in his hand immediately issued a black sword aura, which was obviously already using the power of dark vindictiveness.

The moment this black sword qi exploded on Rob's body, the blood exploded from Rob's body in an instant. His chest was directly exploded into a shallow pit, and he could even clearly see the beating heart in his chest. . And Rob, still holding the horrified God se on his face, just fell down slowly, although he might not die immediately, but it was obviously impossible to save him in this situation.

As soon as he saw Rob being killed by Sean in the blink of an eye, David didn't stop. It's just that the strength of the original forward momentum exploded with grudge and quickly moved away from Sean, at the same time in order to prevent In the pursuit of Sean, he stretched out his hand and drew a few arrows from the quiver, and the arrow with one hand came towards Sean, completely blocking the direction of Sean's pursuit.

Faced with these arrows full of vigor and strength, of course, Sean did not dare to hold on to it.

But he didn't rush out, but it didn't mean that he would let this person leave: "Cecilia!"

A huge fire snake, almost after Sean shouted Cecilia's name, rushed out in the woods with a whistling, attacking Sean and Cecilia with a completely different amount than before David and Rob. Rushed out at a tricky angle.

I saw a huge mouth of the Fire Snake, and swallowed David in so simply and neatly, and then slammed into the ground fiercely.

The flames burst out into the sky, instantly igniting the surrounding trees.

And in the flames, the chilling screams suddenly sounded!

"Magic!" Jerry and the others all exclaimed.

Chapter 314: . Calm Jerry

Magician is a rare profession on the Southern Continent.

Although there is also a wizard guild on the Southern Continent, the people usually encounter in this guild are apprentice magicians. It is not easy to meet a real magician. Especially high-level magicians, they are even rarer creatures than high-level monsters-the branch president in charge of the Mage Guild of Yero City is a magician with high silver strength, but as the branch president, ordinary people Can you see it casually?

Therefore, when Jerry and the others saw that the fiery snake killed David with a single blow, they had almost completely lost the courage to fight. If it weren't for fear that they would be killed if they escaped, they would have left it alone. Twenty-one ran away directly.

For the demon hunters, the Sombra Demon Leopard can make them a lot of money, but no matter how much money they make, they have to live and enjoy it.

After all, demon hunters and demon hunters are different. They really have nothing when they die, especially those who have married wives and have children. If they fall as the breadwinner of the family, that family is really ruined. Unlike the demon hunters, they are considered to have died in the line of duty when they die. Therefore, the Demon Hunters Association will provide a relief fund every month until the children of the family reach adulthood. If there are no children, they can receive them for 18 years.

Jerry really regrets it at the moment.

He regrets that he should not go to both David and Robbie.

Although the personal strength of these two people is indeed very strong, they are also very arrogant-in fact, this is the norm in the circle of demon hunters, after all, people with strength can naturally be arrogant. But basically the demon hunter never makes enemies easily. The normal way is to make a verbal jingle in advance, and only take action when the opponent does not listen to the jingle. Moreover, the first attack is usually a tentative attack, which is not real. For the purpose of killing.

But David and Robbie are different, because their brother is more famous in the circle of demon hunters on the southern continent, so he has always had no scruples in his actions. Generally, even if they encounter opponents who are stronger than them, they will usually not die because of their brother. Of course, they must also pay some redemption for this, but this situation will not be much after all, because the two brothers The teaming up is really tricky.

Jerry had guessed that with the arrogance of the two of them, sooner or later they would kick the iron plate.

It's just that he didn't expect that he would actually kick the iron plate at this critical time, and the thickness of the iron plate is still thicker than he can imagine.

In the forest, where the fire snake flew out just now, a young girl walked out calmly.

She is not very old, at least Jerry and others can be sure that she will never be over twenty years old, a high-ranking silver magician who is less than twenty years old, this is definitely a genius! What is especially surprising is that the appearance of this girl is really amazing. At least Jerry and others have never seen such a beautiful female Xing. They can't even think of any vocabulary to praise the beauty of the girl in front of them.

But in Jerry's eyes, there is still a thick doubt se.

Although she had never seen a high-level magician's shot, he could perceive that the magic of the fire snake attack just now was definitely not like the power that a high-level silver magician could possess. Because even if David has only lower silver, his personal strength can definitely be regarded as the top group in the lower silver. It is impossible to be bombarded by such a fire snake magic so easily, and even the ability to escape is completely lost. .

But in the next second, the doubt in Jerry's eyes immediately turned into horror.

I saw Cecilia suddenly stretched out her right hand, her palm facing up, and she did not even chant a spell, but the fluctuation of the fire element in the surrounding space had obviously become unusually active.

Immediately afterwards, the wild fire around him suddenly stagnated-it was an obvious pause that was visible to the naked eye, as if the entire space was trapped, and the tongue of fire that was open and licking ceaselessly stopped moving. . This stagnation time is not long, it is almost just a momentary illusion, and then in everyone's eyes, the flames that have swept the surrounding tens of meters are fast and fast with a retreat like a chaos. Retracted toward the place where the fire snake exploded just now.

In just a few seconds, the flames that were almost ignited into a forest fire just now were condensed into a small flame flower, and even the fire element in the air was completely repelled out of this space. However, Jerry knew very well that although the surrounding fire elements were almost completely repelled, and the flower of flame seemed to be nothing, but in fact it contained extremely terrifying amounts of violent violence. After all, it was counted by a square circle. Ten meters of flames condensed.

Even if you are a golden powerhouse, if you are shot by this little flame flower, you will probably have to pay the price of serious injury.

At this moment, if Jerry still doesn't know what kind of person the girl in front of him is, then he won't be able to live to this day.

"Bloodline... Awakener!" Jerry's face became extremely pale.

On the Continent of Miracles, the genius born out of the sky is certainly a shocking thing, because every genius means a glorious future. But there is also a class of people who are far above geniuses. Their future is not only brilliant, but may even be an achievement that shook the entire continent.

This type of person is God-given, that is, blood awakened.

If it is said that in the Southern Continent, meeting a high-level magician is a small probability event comparable to being hit by a meteorite, then the probability of encountering a bloodline awakened person is almost equivalent to the arrival of the end of the world.

But at this moment, Jerry not only meets a senior magician, but this magician is also a blood awakener!

He suddenly felt that he could live to this day. Isn't it true that fate is playing tricks on people?

Hearing Jerry's exclamation, Cecilia glanced at the middle-aged man, then turned to look at Sean, with a little more inquiring in her eyes.

The fact that Cecilia is a bloodline awakened is not a secret in the inner circle of Sean, even Asuna and others know it, but that's all. Because under the deliberate blockade and monitoring of the Void Realm, let alone the other nobles of the Principality of Ryan, even the southern nobles of Darbion who played against Sean did not know the true identity of Cecilia.

Of course, there is Cecilia's low profile and the fact that the Voidland blocked the news, but it is more that few people can see the difference between Cecilia and the Bloodline Awakened. Most people just think she is. It's just a genius magician.

Jerry can recognize Cecilia as a bloodline awakened person, this is not a simple word of knowledge that can explain it.

So facing Sean's questioning eyes, Sean shook his head slightly, so Cecilia clenched her right hand very well, and the flower of flame was crushed in her hand and scattered into stars. The sparks are falling. Originally, if Sean nodded, then this spark would be thrown by Cecilia towards Jerry's trio. With the amount of violent violence contained in the spark, of course it would not cause a second forest fire, but it would In an instant, the area within a radius of tens of meters was directly razed to the ground.

"My lord, please forgive us for our previous offense." Seeing Cecilia pinch out the sparks, Jerry's heart that almost mentioned his throat was finally put down. Although he is a demon hunter, he also clearly looks like Once big people like Sean and Cecilia decide to let them go, they will definitely not take action again, "We are willing to leave here immediately, and never fight the idea of that black crystal demon leopard."

"The Black Crystal Demon Leopard was first discovered by you after all, and it seems that you should have been tracking it for a long time. If you give up now, it will be a big loss for you."

Just now, Sean has scanned the surrounding situation. There are only four large backpacks here, and there are a few empty backpacks beside them. Presumably the four backpacks filled with things

should be these people since they were in the Forest of Grey Shadows. Harvest. Originally, according to their plan, they should have hunted the monsters until these backpacks were full, but because of the temporary discovery of the Black Crystal Demon Leopard, naturally there was no time to hunt for other monsters.

Hearing Sean's words, the faces of Jerry and others did not have any happy gods, but a little uneasy.

I am used to the intriguing yin life. The demon hunters have always maintained the utmost vigilance about this kind of good things falling from the sky, because they knew very early that there has never been a free lunch in this world. Now that Sean had said so, they also knew that it would be impossible to leave on the spot. Anyway, they would kill them all, so they didn't say anything immediately, and just stood there quietly.

But if you think that these three people have already accepted their fate, then it is obviously wrong. Just by looking at the positions of the three of them, you can already know that they are still not letting down on Sean and Cecilia. Moreover, this position is still a life-saving defensive position used by the demon hunters to deal with Warcraft: the anti-devil formation. If Sean and Cecilia want to kill them, then Jerry and his companions will tell Xiao En and Cecilia desperately, even if they can't win, it's okay to struggle for some time.

As for the young demon hunter, you can take this opportunity to escape immediately.

Seeing the other party's reaction, Xiao En laughed a little bit dumbfounded: "Okay, the Anti-Magic Array is useless to me. If I really wanted to kill you, you would have died a while ago, and it is impossible to resist. The Demon Array."

Jerry was a little bit embarrassed when he heard what Shaun said, after all, what Shaun said was the truth.

As for why Sean would recognize their position as the Anti-Magic Array at a glance, Jerry and his companions stopped thinking about the reason. Since Sean even knew the high-end technique that only belonged to the demon hunter, and could even track it, it is naturally not incredible to know the common routines of the demon hunter.

"I don't know what the lord has ordered?" But even if they knew that Sean did not have much malice towards them, but Jerry and others did not relax, and their battles were not relieved, but their attitude was respectful. few.

In this regard, Sean did not say anything, but asked: "I am curious, how do you see that Cecilia is a blood awakened person. You know, the means to gather flames is not blood. Only for the awakened, even if it is a magician who is not strong enough, as long as it is a magician who has a strong jing divine power and has a special tendency to favor fire elements, it can easily do it."

"It's exactly what the adult said, but I noticed one detail." Jerry said, "If it is a general mage, they will keep a certain distance from this kind of flame, but the young lady directly put the flame Holding it in her hand, and her palm did not have any traces of being burned by the flames, even her expression did not change the slightest, it seemed as natural as we eat, drink and breathe.... That's why I know, This young lady is definitely a blood awakened person, and she is still connected to the flame blood."

Hearing Jerry's explanation, both Sean and Cecilia's eyes showed a bit of surprise.

They did not expect that this demon hunter named Jerry would observe so carefully, and in the current situation where life is almost threatened, this calmness is not something that everyone can have.

Chapter 315: .Warcraft Killer Diances

"What do you say your name is?" Jerry's calmness made Sean a little interested. Although the True Eye has now reached the third level, he can actively see whether a person is hostile to him, but he still can't take the initiative to see it. The genus of a person was found out, so Xiao En needed to ask.

Jerry's name was heard by everyone present when David called it, and it was obvious that Sean knew it. But now Sean has to ask again, so although Jerry was a little confused, he still replied: "Jerry Ambaru."

"Ambaru?" Xiao En's brows frowned slightly. He felt familiar with this surname, but he couldn't remember it for a while.

But when Jerry said his name, Sean quickly let him see Jerry's belonging, but he was a little disappointed in the end.

Jerry's genius is not particularly strong, of course, it will not be too weak. It can only be said that it is quite satisfactory and has no special highlights. Of course, if only in the industry of demon hunters, Jerry's genius Xing is considered good, especially his will is xing, which is a bit higher than the other four genius xings, and is almost close to someone who focuses on soul energy. The upper silver magician of magic is probably the main reason why Jerry can calm down no matter when and where.

High will, after all, means stronger beliefs and principles of keeping things in order.

Such people are indeed very suitable to be leaders.

is just the limit of his potential, because his genius list has clearly stated that Jerry is almost completely draining his potential. And a person who has almost completely stimulated his full potential is naturally not a person worthy of special investment and training in Miracle Continent. If that is not the case, Xiao En has the plan to invite him to join his subordinates.

But it is a pity that Jerry's potential has been thoroughly stimulated, and his future has now been determined. Not like Alfred. Although the current strength is almost at its limit, Sean is very clear that Alfred's potential has not been really stimulated, otherwise, with Alfred's ability to kill Tier 6 in the game at the beginning of the game. , It is not impossible to enter the golden realm.

But this may be a good idea, and Sean really can't figure out a way to activate it.

After all, in the game, the reason why Alfred was later called the God of War was purely because his daughter died on the battlefield, so he was driven by unforgettable hatred. In order to complete revenge, he kept wandering on the edge of life and death, stimulating all his potential, so he was able to stand at such a peak. But now he and his daughter are living very well, without the desperate motivation to take revenge at all costs, Alfred can become a high-ranking silver master. It was completely beyond Sean's expectations.

And this is why Sean's evaluation of Alfred will be lower and lower.

If there is no more breakthrough for Alfred. So as Alfred got older. In the future, his possibility of breaking through the limit and becoming a golden powerhouse will become lower and lower. But at the moment, Sean is really not good at giving this breakthrough, so this is why when there is a war, Sean always throws the hardest and hardest battle to Alfred to fight. The purpose is to fight. He was able to break through that limit in these cruel wars.

It's just having little effect so far.

after all. Alfred is a bit older, he is not as talented as Rena, nor is he awakened as early as Xuefanio and Cecilia, and even he lacks passion and belief in comparison with Clover. . Among all the people currently under Sean. Alfred was the first veteran to follow Sean, but his strength development was the slowest in the entire core circle-Neil and William were not good at fighting, so naturally they would not be counted.

Even if Sean has resources to invest now, he must be fully invested in Alfred, so naturally it is impossible to recruit another person similar to Alfred to grab resources. As for the other two companions of Jerry, although the middle-aged man Sean does not know the situation, he should be similar to Jerry. As for the young man, Sean doesn't even need to look at him, knowing his life's achievements are not. It will be too high and it will be difficult to break through the upper silver, let alone gold.

Since these few people are not worthy of Sean's recruitment, of course, Sean no longer wastes time, and instead asks about the Black Crystal Demon Leopard.

After all, this matter is the business.

"The Black Crystal Demon Leopard was discovered by me two months ago." Jerry said, "At that time we had just disassembled a Lihza Lizard, and then we heard signs of fighting not far away, so we Immediately rushed over, and it happened that a group of people were besieging the Sombra Demon Leopard, but the Sombra Demon Leopard was too strong, and all four people in the squad that besieged it became Sombra Demon. Leopard's food, at that time I knew that the three of us were definitely not the opponents of the Black Crystal Demon Leopard."

"So you are looking for someone?" Sean asked.

"Yes." Jerry nodded, "At that time I let Bannock continue to track..."

Bannock is Jerry's partner.

Sean knows that witch hunters rarely have a partner, but if you generally choose a partner, then it is tantamount to handing over your life to the opponent, and he will definitely trust him without reservation. Although he has also seen many instances of the demon hunter partner turning their faces and killing each other because of some benefits, it is clear that this pair of partners has not

turned their faces because of a black crystal demon leopard, and even the distant relative of Bannock Bring them all around, this is true trust.

"Bannock is good at tracking." Seeing Sean's gaze at Bannock, Jerry explained again, "Because we met with David and Robbie before, we know these two Personal approximate location, so I want to invite them to temporarily team up with us to hunt the Sombra Leopard, and the trophies obtained are divided equally."

Five-to-five split, which is a big concession.

Normal conditions, teams that temporarily form teams are generally based on their power output or the number of heads. If it is the former, then in order to obtain more spoils, it will definitely contribute more, and it will be easier to arouse the fighting spirit and combat effectiveness of a temporary team; while the latter distribution is based on the number of teams in the temporary team. Everyone can get a share of the spoils regardless of their output. This is usually a strong buying and selling behavior of the weak and the strong, so it usually only appears in teams with more people than others or stronger than others.

But Jerry, who is stronger and more numerous than David and Robbie in terms of strength and number, did not choose these two distribution methods. This is really a bit confusing. Because of this half-and-half distribution method, Jerry, Bannock, and Bannock's nephew can only account for half of the proceeds, while David and Robbie account for the other half of the proceeds. You have to know This Sombra was discovered by Jerry first, and it can be said that Jerry suffered a big loss.

But when Sean thought of David's attitude towards Jerry before, he understood: "The eldest brother of those two people is really that amazing?"

"Well, it is said that he is about to become a golden powerhouse." Jerry nodded, and then began to explain.

In fact, even if Sean didn't ask, Jerry would definitely talk to Sean about this, even though Sean and his companions were the ones who killed. But his eldest brother knew about David and Robbie's invitation. And now his two younger brothers are dead, but he is still alive. The result is completely imaginable, so he must explain this to Sean clearly. Then he invited Sean to deal with the big brother of David and Robbie, even if he scored a little less on the spoils of Sombra. He doesn't care.

With Jerry's explanation. Sean soon knew who this person was.

Warcraft killer, Diances.

He heard the name, of course it was in the game.

If David and Robbie's backstage is really the man named Diances, then Sean will be able to understand why Jerry backed down so much, and why these two people have been arrogant for so long and have not died.

At the beginning of the game, there were more than thirteen branch mission lines on the Southern Continent all involving this person. Among them, there is no shortage of tasks that require the killing of Diances. Of course, if you kill him, you will also have the task of protecting him, so the conflict of tasks surrounding Diances is definitely not small. But what is really rare is that this monster killer called Diances does have his own advantages. If the player is lucky, he can learn the two skills of Explosive Turn and Warcraft Knowledge.

Everyone knows the effect of the bursting direction, especially for adventurers, it can be called a magical skill, and learning the bursting direction here is also the easiest place in the whole game, as long as it's fine if you have money. It's not like other skill trainers need to look at the messy conditions such as reputation, level, etc. As for the skill of Warcraft knowledge, it was also a relatively rare hidden skill in the game. If Sean does not have True Eye now, he really has to learn this skill to be able to view the data of those Warcraft.

But compared to the knowledge of Warcraft, the effect of the True Eye is obviously much greater.

Moreover, according to Sean's calculations, according to the current timeline, Diances should not be well-known in the aristocratic circles of the countries of the South Continent. He should be only a person active in the circle of demon hunters, and even his strength should be. It has not yet officially stepped into the golden realm.

Thinking of this, Sean understood what Jerry meant: "Are you sure that Diances is still in the Forest of Gray Shadows?"

"Yes, he was hunting down a gray ghost bird before, and he also agreed with David and the others. When that happens, whoever solves the goal first will wait for him in the underground black market in the forest, so I'm sure Diances He must still be in the Forest of Gray Shadows." Jerry is asking for

help now, so he knows everything about Sean's question, completely unaware that he has exposed a secret.

And when Sean heard Jerry say that there is an underground black market in the Forest of Gray Shadows, he was very surprised in his heart.

He didn't have any trouble here in the Forest of Gray Shadows, and he could even say that he knew the entire map, but he didn't know that there was an underground black market!

Shaun knows very well that the so-called underground black market in the demon hunter circle is actually a gathering place for demon hunters to sell stolen goods here. Whether it is other people's equipment or the materials of Warcraft, they can be traded and sold here, and occasionally there will be some Very good sale of rare items. If there is such an underground black market in the Grey Shadow Forest, then Sean doesn't need to risk finding so many materials in the Grey Shadow Forest. He can buy it in this underground black market, which can save him a lot of money. time.

However, this kind of underground black market for demon hunters naturally prohibits non-demon hunters from entering, and even their existence cannot be notified. Jerry didn't know that Sean was not a demon hunter. He purely believed that since Sean knew so much about demon hunters, he must be a demon hunter, so he accidentally said that this underground black market was coming. I didn't feel the slightest impropriety either.

As for Diances, that guy has been marked as dead by Sean.

Don't say that Diances himself will be retributed. If Sean killed his two younger brothers, he will definitely not let Sean go. It's said that in the game, Sean did have an account to do a good job with this Diane, but he was not an opponent of Diane if he was not strong enough. Later, when his strength became stronger, Diances also He had long become a guest secretary of a great nobleman in the fascist kingdom, so Sean would naturally have no chance of revenge.

Now, this Diances has not become a golden powerhouse, and has not been involved with aristocrats. When will he not kill at this time?

Chapter 316: .The Traces of the Sombra Demon Leopard

The forest of Gray Shadow Forest, some yin is cold and dark, most of the time, there is no way to see the sun. Only during the most violent one or two hours at noon can you see a piece of pale gold in this forest. The hazy brilliance. But because the humidity in the forest is too heavy, usually at this time some thin and light fog will appear in the whole forest. Against the background of these fog, the shadows of the trees in the whole forest will turn into gray. Zhuo Zhuo feels a little bit weird.

It is precisely because of this that this forest is called the Forest of Gray Shadows.

In most other times, even if there is no sunlight, the forest is not as dark as the one seen from standing outside the forest.

At this time, a team is moving forward in the forest.

The leader of the team is a middle-aged man. He is wearing a leather armor and a wide short knife hung on his back. This kind of knife has a wide range of uses. It can be used not only to attack but also to open a road. Many adventurers like it. Configure a short knife like this.

The road right now obviously does not need to be opened with a short knife, so the middle-aged man did not pull the knife out of the sheath.

He is walking in the forefront, and the speed is not fast, but if you look closely, you can find that his walking method is the inner eight round, and his body shape is slightly bowed, and his right hand has been kept at a position about a few centimeters away from the short knife.

Cautious and careful.

Obviously, this middle-aged man has lived in some more dangerous places for a long time, and his adventure experience is very rich.

Having such a person as the leader of an adventurous team can indeed increase the survival rate of the entire team a lot.

And not only that, besides this leader, there is another middle-aged man.

He was about the same age as the leader, and he didn't wear leather armor or other protective gear on his body, but he was carrying two large bags, packed full of stuff, and obviously contained a

lot of things. Although he has no weapons, he has a thick shield about half a person's height hung on his left hand. Apart from the height of this shield is not as high as the tower shield, the others are basically modeled on the scale of the tower shield.

Small tower shield.

This is the official scientific name of the shield held by the middle-aged man in front of him. The height of the small tower shield is similar to that of the half-length shield, but it is not a large shield. It is a heavy shield like the tower shield. However, this type of shield has smaller requirements for the user than the tower shield, so it can be worn. There are also more people using it. But the small tower shield also has many shortcomings: the defense surface is not as wide as the tower shield, and the weight is heavier than the half-length shield.

So the small tower shield can actually be regarded as a failure.

However, this only refers to military achievements. If it is in terms of adventure, the small tower shield is quite favored by some defenders.

Because they usually deal with monsters or hostile humans, the half-length shield is not thick enough to withstand the full blow of a level five or above monster. Although the tower shield can withstand it, it is too large in weight and area. It will cause a lack of speed, and it is often difficult to make a maneuvering change. Therefore, the birth of the small tower shield solves this problem.

But it can only be used in the ranks of adventurers.

These two people are Jerry and Bannock.

Sean did not expect that Bannock was still a defender. Originally, when he heard Jerry introduced Bannock that he was good at tracking, he thought he was a hunter-like profession.

Defenders, which are commonly known as tanks and meat shields in the game. Although this profession is not as rare as the magician, it can also be regarded as relatively rare on the Marvel Continent. It's not that this profession is difficult to form like a magician. On the contrary, the speed of forming a defender is very high. Generally, if it is cultivated with great effort, a defender can be cultivated in two or three years. It is just a defender. The cost is not much lower than training a magician.

The real reason for this is that the mortality rate of this profession is too high, especially when facing high-level monsters, whether it is attacking or retreating, the defender is always the frontline fighter. However, it is precisely because of this high mortality risk that the treatment of defenders has always been the highest in any team, especially those defenders who have experienced countless first-line wars and have more seniority and experience. Their reputation Almost not inferior to the head of any well-known mercenary group.

No matter whether Bannock is a real defender or not, even if it's just a guest appearance on the defender's deputy, even his potential has been fully exploited to the limit, but in Sean's eyes, his value is far more than that. Jerry.

Because Bannock has a lot of experience, this alone is enough to double his worth.

After all, only Anno under Xiao En's command can barely be regarded as a defender. But even if it is Anno, he is not a real defender. However, there are still many gaps between him and Bannock: The first point is that Anno currently only has lower silver, which is always a flaw; second, although Anno is smart, his experience is also obtained through countless actual battles. , He is far less experienced than Bannock.

And there is the most important point.

Anno is the chief of the barbarians in the North, and the head of the Iron Wing. Before finding a new successor, Anno cannot retreat from this position, which means that Anno cannot be the important defender. Position.

So after learning about Bannock's real career, Sean has changed his mind. If possible, he wants to recruit Bannock.

After all, as soon as the two-year appointment arrives, Beth and others will leave. Who will be responsible for William's safety at that time? In addition to William, Neal's safety is also a very headache for Sean. After all, if he wants to continue to develop his territory, the problem of Chiraff's collar is a barrier that cannot be circumvented, and Chirof leads the current chaotic situation. It is a natural assassination holy place.

If Bannock is really so valuable, it is not impossible for Sean to spend a little bit of effort to help him push the limit.

So this trip has been gone for two days, but Sean still has no complaints, but has been observing Bannock to see if he is really worth his investment.

It has been three days to observe this way.

In other words, Xiao En and others have been in the Forest of Gray Shadows for four days.

The team's position is Jerry in front, Bannock is in the left half of Jerry's position, behind Bannock is Cecilia, and Bannock's distant relative is in Cecilia About two steps ahead on the right, and Sean is at the back of the team.

This is an unusual tactical protection formation.

The game is dubbed by players as two security locks.

In the formation, although it seems that Bannock's distant relative is at the core, in fact this position is a secondary defensive position, so the pros who usually occupy this position are deputy t. But Shaun knew that this young man was not a deputy, he was a melee exporter. Putting such an exporter in this position was equivalent to letting the opponent use his life to protect the core player-in the game. The player can be resurrected at any time when he is dead, but in this real world, death is the real death.

When Jerry put the young man in this position, Sean could clearly see the young man's face changed slightly. Obviously he knew the importance of this position. And Bannock didn't object to this, so of course Sean also saw that the young man gritted his teeth and agreed after hesitating for a second. Originally, Sean thought that this young man would be passive, but he didn't expect to know it. It is very likely that he will end up in the future, but he has not slackened in the slightest.

As for the goal of his protection, of course it is Cecilia.

She is the heart of this "two safety locks".

Although it seems that Bannock is protecting Jerry, but in fact, if it is an attack towards Jerry, then Bannock will take at least one to two seconds of reaction time to block the damage for Jerry. But if it is an attack against Cecilia, then Bannock can react in an instant, because Cecilia's position is the real protection circle of Bannock.

In contrast to the original position of Jerry, Jerry wanted to give to Sean because it was the second safe position in the entire formation, but Sean refused.

He is in charge of the queen.

In fact, Sean's position is the most dangerous in the entire formation. Because to break the "two safety locks" is to launch an attack from the last person's position, so Sean's position needs to bear the greatest pressure.

But he has this confidence and strength.

Of course Jerry can't say anything about this, he can only walk in the forefront.

And through the observation of the past few days, Sean has discovered that Bannock may really be a pure defender, not a cameo. Because of the trip for several days, in addition to checking the terrain from time to time to determine the direction of the Sombra Leopard's escape, Bannock also maintained a high degree of attention to prevent possible surprise attacks. This is for Bannock. Ke's physical strength and Jingshen consumption are so great that it is by no means as simple as he looks on the surface.

At least, Sean is also an experienced adventurer.

But from this, Sean dared to judge that Bannock was indeed a veritable defender, and it should be a barrier Paladin system that is extremely rare among defenders.

The most important attribute of this professional system is endurance and will, while the weakest of the five attributes is agility.

The formation period of the Barrier Paladin is the seventh stage, that is, the lower gold stage. They can wear hundreds of kilograms of equipment and still move freely, and their natural high-willed genus also allows them to resist many spirit energy magic—of course. In the game, the magic resistance is extremely high, but in reality, a lot of magic is caused by physical damage, so unless magic is immune, no one dares to say that he can be safe under the bombardment of magic.

As one of the top five systems in the defender profession, the disadvantage of the Barrier Paladin is that it is slow to form, and this shortcoming will be magnified many times in reality.

Because the barrier Paladin is between the sixth and seventh steps, it can be said that there are two worlds.

cannot step into the seventh step, then it will never be a strong defender.

Bannock's potential, Sean is estimated to be almost drained like Jerry, so he will be stuck at the upper silver pinnacle, unable to become a real barrier Paladin. Moreover, the Paladin of the Bulwark is not as strong in reality as it is in the game. If he wants to resist magical damage, he also needs magical equipment to resist. That is to say, the dependence of this class on equipment is extremely high—in fact, any defense The reliance on equipment of the defender is extremely high, which is why the cost of training a defender is not much less than that of training a magician.

In addition, the Paladin of the Bulwark also has a flaw: low damage.

This profession has almost no output ability.

That's why Sean saw that Bannock didn't take any weapons at all. He just raised a shield, and then carried two huge backpacks.

In any case, it is a fact that Sean sees working at Knock, but he thinks of choosing between him and Alfred to invest in someone, which makes him a little embarrassed. From a personal emotional point of view, he certainly hopes to invest in Alfred, after all, this is the first veteran to follow him, and Alfred grows up is also very scary, even if he has now been changed by him. Direction, but the magic warrior has the nickname "Iron Man" in the game. Once this profession is formed, it is almost universal-by drawing different magic patterns on the equipment, you can easily change the various abilities and attributes of the magic warrior. xing.

The only flaw is that the drive of these magic patterns consumes the wrath of the wearer. Therefore, the more magic patterns to draw, the higher the carrying capacity for professionals.

In fact, Sean has a way to solve this problem, which is to keep collecting materials for Alfred to strengthen his body.

However, starting from the overall situation, investing in training Bannock is the right way.

Because of the barrier, after the Paladin got up, he was simply an undead Xiaoqiang, even in the face of death magic, he has a very high resistance. And the biggest advantage is that a low-level gold-strength bulwark paladin will never fall easily even if it is faced with the bombardment of three high-level gold powerhouses, and Sean's current territory, even if it's Xuefa It is impossible for Nio to face the combination of three high-level gold powerhouses at the same time.

At this moment, Sean had already regarded Bannock as his own, and he had not even considered that he had not sent an invitation to Bannock. Of course, even if Sean sends out the invitation, it is still unknown whether Bannock will accept it.

In this case, after another two days, a group of five people finally came to a place with a sea of blue and red flowers.

When he saw this place, Sean suddenly said: "Wait a minute."

In the past few days, Sean has never said anything, but has been silently following everyone behind him. Jerry and Bannock are almost about to regard Sean as a member of their team, rather than an outsider. Nobles, because they have never seen a noble physically so good, and they didn't even complain about it along the way. And compared to the special xing of the nobleman, Sean, the girl magician surprised them even more, because as a magician, her physical strength is not weak at all, although she is still in the whole team. The worst endurance, but that is also relative to their team.

The well-known weak physique of the magician does not seem to be reflected in her at all.

So, when Sean said to wait, Jerry and Bannock were both surprised. They were not surprised that Sean was finally going to talk about taking a break, because they knew it was impossible. Even if all of them were exhausted, Sean could still maintain a vigorous Jing power. This is the evidence of the past few days. .

But Jerry still immediately asked, "Master Shaun, what's the problem?"

"Small Crystal Demon Leopard really enters here?" Sean frowned, looking at the sea of flowers in front of him.

"Yes." Jerry and Bannock looked at each other, but Bannock was good at tracking, so it was him naturally who answered, "According to the current clues, we are getting closer and closer to the

Black Crystal Demon Leopard. It's close, and I have every reason to believe that the Sombra Demon Leopard must have been seriously injured.... When ordinary beasts are frightened or injured, they will return to their familiar area as soon as possible to evade and heal."

"I know what you are going to say next. Warcraft also evolved from beasts, so the same principle applies to Warcraft, right?"

"Yes." Although I don't know why Sean said that, Bannock nodded.

"Have you ever entered this sea of flowers?" Seeing Bannock nodding, Sean asked back.

"No." Everyone shook their heads.

"I have been in." Xiao En said in a deep voice, "This sea of flowers is a jing line of the Forest of Gray Shadows."

"Jing Ring Line?"

"We are at the outer edge of the Forest of Gray Shadows. The highest level of monsters encountered here is level 3. But this sea of flowers is different. In the depths of the sea of flowers in the Forest of Gray Shadows, there is a The small lake is where a group of level 5 monsters live, and entering with our strength is simply looking for death."

Five-level beast, that is already equivalent to the strength of the upper silver.

And if it is a more powerful or brutal level five monster, its combat power is almost comparable to the lower level of human gold. And the five-level gregarious beasts, regardless of their strength, their combat power absolutely surpasses the sixth-level beasts.

At this time, hearing Sean's words, including Bannock was stunned.

"This is impossible, the trace of the Black Crystal Demon Leopard is clearly pointing here."

Sean's **** se was a little yin uncertain, and his eyes looked at the sea of flowers full of hesitation.

Small Crystal Demon Leopard is a rare special beast. Although it is only a third-level beast in terms of assessment, its strength is comparable to a fourth-level beast, and once a black crystal is transformed, it will have a fighting power comparable to that of a fifth-level beast. But every time the Black Crystal Demon leopard turns into a black crystal, it is an action that burns vitality, so if there is no emergency situation, it is impossible to make such a self-harm action.

So it is normal for the Sombra Demon Leopard to be active in the area of the fourth-level Warcraft activity, Sean believes.

Even if it appears in the activity area of level five monsters, it is not impossible.

But there is one exception.

That is this sea of flowers.

In the Forest of Gray Shadows, the real overlord is not the only six-level beast, but those five-level beasts located in the depths of this sea of flowers.

Biped scorpion wolf.

This kind of beast, no matter how strong the combat effectiveness of the Black Crystal Demon Leopard, will definitely not be its opponent, because their saliva has a strong corrosive effect, which happens to be the nemesis of the Black Crystal Demon Leopard. However, Warcraft will have an instinctive resistance to natural enemies, so as long as it smells the scent of a bipedal scorpion wolf, it is absolutely impossible for the Black Crystal Demon Leopard to approach. Isn't it a very suspicious thing?

And Sean, who had killed many Sombra Leopards in the game at the beginning, so the level of understanding of Sombra Leopards, he is actually far above Bannock, and even with the assistance of True Eye, he is even more able to Easily find the traces left by the Black Crystal Demon Leopard.

The Eye of Truth can never deceive Sean, so he also knows that these traces are real.

In this way, of course, Sean also knew that the Black Crystal Demon Leopard had indeed escaped into the depths of the sea of flowers. So what kind of situation will force the Black Crystal Demon Leopard, who is afraid of the two-legged scorpion wolf, to hide in the sea of flowers?

The thought of just circulated in Sean's mind, and he immediately understood the reason.

The two-legged scorpion wolf is a monster that even Sean is not willing to provoke, so its power and fear are clear at a glance. The Black Crystal Demon Leopard can smell the scent of the bipedal scorpion wolf, so of course there are ways to avoid the bipedal scorpion wolf attack, but other people who try to chase the Black Crystal demon leopard don't know the terrible nature of this sea of flowers, nor will they know it. The two-legged scorpion wolves are terrible, so once they find the trace of the Black Crystal Demon Leopard, and the sea of flowers is in the outer edge of the Grey Shadow Forest, then they will definitely break in without hesitation.

In fact, it is true.

If it hadn't been for Sean to stop him, Bannock would have taken them into the sea of flowers long ago. Under such circumstances, maybe they didn't find the Sombra Demon Leopard, and they became the belly Chinese food of the biped scorpion wolf.

Warcraft all have a certain amount of wisdom, but Sean never thought that Warcraft could have such a cunning wisdom, and actually use the terrible xing of its natural enemies to solve the threats to him.

"What a cunning beast." After understanding Sombra's thoughts, Sean's face became even more ugly.

Undoubtedly, it was definitely a severely injured Sombra Demon Leopard. It is even possible that after escaping from someone else's siege that day, there must have been several waves of attackers on the road. It is almost impossible for people to misunderstand that it is the outer skin of physical immunity, and it is absolutely impossible to break into the range of activities of natural enemies.

But if Sean is to give up the Black Crystal Demon Leopard because of this, he is indeed very unwilling.

After all, there are two materials on the Black Crystal Demon Leopard that he needs very much at present. As long as they have these two materials, and then go to the underground black market of the Grey Shadow Forest, if luck is not too bad, then he may be able to go back this time. It is

possible to make two or three pieces of gold-level magical equipment, and even the strength of special effects, so that the increase in the combat power of the entire territory is extremely significant.

At this time, Xiao En did not speak, but Yin looked at the sea of flowers uncertainly. Although Bannock, Jerry and others did not know the situation, they did not say anything, just waited quietly. They are not fools. They are so scrupulous about Huahai when they see the powerful people like Sean, and they also said that there are five-level monsters that live in groups, how could they even enter it hastily.

"Master Shaun..." Jerry hesitated to test Xing.

"Huh." Xiao En exhaled a heavy breath, Shense regained his tranquility, "The depths of the sea of flowers are very dangerous, even I may not be able to survive.... But I still have to go in, because of the black crystal demon. Leopard is very important to me, what do you say?"

"This..." Bennock and Jerry looked at each other, and they didn't know what to say.

They really asked for Sean, hoping to work with Sean to solve the problem of Diances. But this premise is of course to survive. If it can't survive, then is it necessary to solve Diances? But now, they are very aware of the danger in the sea of flowers, and Sean will continue to go deeper, which is naturally against their original intention, so of course he is very hesitant.

Of course, Sean also knew the concerns of these people. If he had ignored them in normal times, what should he do, but now he wants to recruit Bannock, of course he can't be so casual, so he said after a moment of silence: "If you don't want to go in, then just wait for me here. It will only take a day to walk to the depths of the sea of flowers. If I haven't returned within five days, you will leave by yourself."

Bannock and Jerry hesitated slightly after hearing what Shaun said, but they nodded in agreement.

Just waited for five days, and it didn't take long to spend here. Anyway, the Black Crystal Demon Leopard couldn't continue hunting them, and it didn't matter.

"I will go in with you!" And Cecilia heard that Sean was about to enter the sea of flowers, although she was worried, but she still spoke immediately.

Looking at Cecilia with a serious face, Sean originally wanted to refuse, but when he thought of the purpose of coming with Cecilia on this trip, he didn't object anymore. The big deal is that if it doesn't work, then Give up on hunting the Black Crystal Demon Leopard.

Even if the Sombra Demon Leopard is no longer valuable, in Sean's mind, there is definitely no way to compare it with Cecilia.

And Sean also has enough strength and self-confidence: If he wants to go, there is no way to keep him with the two-legged wolves inside.

Chapter 317: .The spring pond deep in the sea of flowers

The sea of flowers where blue se and red se interact with each other is full of exotic fantasy beauty se.

These two kinds of flowers are actually the same plant, but Sean can't figure out why red se and blue se appear, but he guessed that the principle should be similar to the variation of roses and peonies.

These two kinds of flowers are not rare materials, at least for players like Sean, they are simply worthless. But in fact, these two kinds of flowers actually exude a scent that only beasts can smell. For some beasts who are hungry and cannot find food for a long time, this scent is very attractive, so they will follow. Find here with the fragrance, and then enter the spring pool in the depths of the sea of flowers.

The result is naturally conceivable, all have become the belly Chinese food of the biped scorpion wolf.

Sean is actually a bit unable to understand. In the game, these two-legged scorpions can't leave the spring pool, and can only hide in the depths of the sea of flowers to hunt by the fragrance of flowers. He can also explain that it is the data limiting factor that comes with the system. But now in the real world, these two-legged scorpions still haven't left this sea of flowers, dominating the entire Gray Shadow Forest, Sean really can't figure it out.

But at this moment, he is a little grateful for this restriction.

Take Cecilia to move forward in the sea of flowers, because this time forward has a very clear purpose, so there are no more stops along the way.

It was originally expected that it would take about 16 hours to reach the spring pond deep in the sea of flowers, but it took Sean and Cecilia less than ten hours to arrive, but because of the rush, the two did not. Sleeping consumes more or less physical strength and jingling. It's just that Cecilia's jing supernatural power is not necessarily a loss. As for Xiao En, who can already use data to show the results. His wastage is even lighter.

At this time, what appeared in front of Sean and Cecilia was a spring pond with mist.

This fountain is not one, but there are at least hundreds of continuous films.

The large spring pools are about ten meters in diameter, while the smaller ones are less than one meter in diameter. However, most of the spring pools are medium-sized with a diameter of five to eight meters. As for the depth of the fountain, it is impossible to tell with the naked eye, because there is a hazy mist floating on the fountain, so unless it is wading in, it is really impossible to judge the depth of the fountain.

And if you don't watch it carefully. This spring pool really looks like an inland lake, but if you look closely, you can still find that the locations of these spring pools are high or low, and they look like terraced fields.

"Don't go there." When Sean saw that Cecilia seemed to be going to look at the fountains, Sean immediately stopped. "Those spring pools are not as safe as they seem on the surface. The two-legged wolves hide in those spring pools."

"Biped scorpion wolf?" Cecilia asked with some confusion. "what is that?"

Shaun was taken aback for a moment. Then I understood.

The two-legged scorpion wolf looks like a special beast of the Gray Shadow Forest, just like the Black Crystal Demon Leopard and the wind-stripe black wolf in the Starfall Forest, they can only be encountered in a specific area environment.

Because of this, it is only possible to see the bipedal scorpion wolf here in the depths of the sea of flowers in the Grey Shadow Forest. But the two-legged scorpion wolf is very cruel, their attacks are extremely strong, and they still live in groups. It is easy to lead to a large group of biped wolves. Even if it is a high-ranking gold powerhouse, if it is trapped in the encirclement of the two-legged scorpion wolf, it is very likely to fall. So not many people know that bipedal wolves are not surprising.

Really know that the depths of the sea of flowers can be so dangerous, only those who have seen the terrible biped wolves and successfully escaped here.

But as far as Sean knows. I'm afraid he and Cecilia should be regarded as the first people in this world.

Of course, in Cecilia's eyes, Sean is the real first person.

"Now let's look for the traces of the black crystal demon leopard. After we solve this trouble, if there is time and opportunity, let you study the two-legged wolf." Sean saw Cecilia looking at it. There was a kind of fanatical ***** in the eyes of the spring pond. He immediately knew that Cecilia's pedant was a criminal, so he immediately stopped it. If Cecilia was really allowed to study these two-legged wolves, So if it is just to bring out one, it would be better to solve it, if the whole spring pond sao is moved, then they don't need to find the black crystal demon leopard, they can leave here directly.

Hearing Sean say this, and the tone and attitude were so determined, Cecilia could only hold back the trace of reluctance in her heart and left with Sean instead.

Following behind Sean, Cecilia's face quickly became a little surprised.

Because she discovered that Xiao En had always kept a distance of more than 50 meters from the spring pool when he was walking, there would only be more but no less. If there is really no way to approach the fountain at a distance of about fifty meters, Sean's footsteps will be very gentle, like a thief sneaking, and Cecilia also noticed one The details, that is, all the things that have weight on Sean's body that are not necessary, he has received the space ring, and reduces the weight of his body as much as possible.

This is the first time Cecilia has discovered that Sean is showing such a cautious ***** se, so her face se has gradually become serious, and the magic radiating from her body began to boil, and it surrounds Cecilia. The elements around Ya also gradually become active.

She has a heartfelt trust in Sean. Since even Sean has to be so cautious and careful, then of course she has to pay attention to God.

But Cecilia's magic power just surging, Sean's face changed slightly: "Stop, don't condense the magic power!"

Hearing Sean's words, although Cecilia was slightly taken aback, she immediately stopped the process of magical power gathering in an anti-she condition.

For the magician, maintaining a high degree of attention in the state of battle, while keeping the magic in a condensed state and the elements in an active state, this is already a common-sense combat action. Because only in this way, the magician can cast his magic in the first time when encountering an enemy-whether it is attack magic or defensive magic, this is a reaction process that requires a magic operation.

Only those rookie magicians who have just come out to experience adventure will be so unprepared. All magicians with a little adventure experience, as long as they enter the state of battle, will immediately mobilize the three of Jing God, magic power and elemental induction. The equipment can enter the fighting state in the shortest time.

So at this moment, when Sean asks Cecilia to release her state of warfare, it is actually equivalent to making a magician completely give up all guards. How can an ordinary magician listen to such an order? But Cecilia got rid of this state of battle in the first place, which shows how much trust he has in Sean.

But even so, the situation seems to have changed a bit.

Because of a spring pool close to Cecilia and Sean, the surface of the pool suddenly became boiling, and a large amount of water continuously emerged from the spring pool, and then continuously tumbling, like boiling water. And the mist that had originally floated on the surface of the pool, at this moment, seemed to be frightened, and quickly dissipated under the rolling water.

In an instant, except for the pool that was still boiling, the mist of Ru Baise was completely invisible.

Cecilia looked at the fountain with a bit of surprise. Although she didn't know what happened, she was sure that it must be related to her condensing magic power just now, and looking at Sean's ugly face, it was obviously not. Not a good thing.

In fact, this is really not a good thing for Sean.

At this moment, he was a little bit annoyed in his heart. Just now because he was too focused on the surrounding environment, he forgot to remind Cecilia not to gather magic power. Unexpectedly, the sensing abilities of these monsters were so sensitive that it had only been so short a moment that they had fully sensed that someone had entered their active area. However, although he was a little upset in his heart, Sean also knew that Cecilia could not be blamed for this kind of thing. Terrible and special.

Don't look at the abnormal boiling of the spring at this moment, it seems to be boiling at a high temperature, but in fact these springs are not temperatureless and not hot at all. And the mist floating on the spring pond is only because the environment of the Forest of Grey Shadows is too wet, coupled with the condensing factors of magic power, will form this layer of white mist—the biggest effect of these mists is that it is used to prevent other monsters or adventurers who enter here from observing this spring pool.

Under normal circumstances, if anyone sees spring water, the first reaction is definitely to investigate whether the spring water is drinkable. Naturally, you need to be close to these springs, so that you will be caught in the trap of these two-legged wolves.

But now, when Sean saw the signs of the surging of these springs being so strong, his inner anxiety was slightly relaxed.

The greater the boiling degree of the pool water, the higher the emergence of water waves, the more proof that the two-legged scorpion wolf in the spring pool has not moved for a long time, and the body has formed a protective film under the spring water. At this moment, these beasts are You need to tear off the protective film to be able to act. However, this process usually doesn't take long, so if you want to take this opportunity to escape, then it's a real way of seeking death, because for the bipedal wolves, if they run away with their backs, it means fear.

With the ingenuity of Warcraft, if the enemy is afraid, then this is completely linked to food.

"Wow!"

Only a sound of breaking water suddenly sounded, and then a scorpion-like hook tail burst out of the water and appeared in the sight of both Sean and Cecilia.

Chapter 318: .Biped Scorpion Wolf

This is a scorpion tail with bone joints.

The whole body is light gray se, and there is a layer of mucus that has just ruptured the membrane and has not completely dried out, nearly two meters long. At the top of the scorpion tail, it is not a common spur, but a flat triangular hard object. On this hard object, there is a pair of dark red sequins like elliptical long objects, at the corners. It is a pair of silver-white se hooks that cross each other, which looks like a pair of pliers.

At this time, after the scorpion tail emerged from the water, it began to swing slightly. The pair of pliers-like hooks splayed to the left and right to the extreme, and the whole tail trembled slightly, accompanied by a sound. The weird roar was like a demonstration.

At this time, Sean did not move anymore, he just carefully pulled Cecilia behind him, and the dead bones were already in his hand.

This scorpion tail wiggled a few times, and then began to turn around, looking towards Sean and Cecilia, the silver hook and sickle opened and closed constantly, and the tail was shaking up and down. But this kind of swing is not strong, on the contrary, the height is continuously lowered with the change of the movement, and in the end, the triangular hard object actually maintains the same height as Sean.

When Sean saw that the height of the tail was consistent with his own height, when even suddenly reached out and pushed Cecilia, he pushed her away from him, and at the same time, he leaped back a step backhand with a sword towards him. He slashed out from where he was originally standing in front of him.

The whole set of actions is very abrupt.

And almost at the moment when Sean started pushing Cecilia away, the water surface of the spring pool suddenly exploded, and a black shadow suddenly leapt out of the pool, and moved towards the location where Sean had just stood. Rushed over. Its movements were very swift and violent, and it

was almost in front of Sean as soon as it jumped out of the water. If it hadn't been for Sean's movement to advance, I am afraid that this black shadow would have completely fallen to the ground.

But at this moment, because of Sean's abrupt movements before, he was not thrown to the ground by the black shadow at this moment. Instead, it looked like the black shadow hitting Xiaoen's long sword to death.

The cold light flashes slightly.

only heard a small "pop", and there was no blood splashing or blood flashing as imagined, but a head was already chopped off by Sean with a sword.

The yellow and green viscous liquid scattered from the fractured parts of the head and body of this black shadow. As soon as these viscous liquids fell on the ground, a white foam appeared on the ground, making a sound similar to burning. , Bursts of sour smell began to fill the air. However, although the smell is unpleasant, but fortunately it does not make people feel dizzy or other symptoms, at least it can prove that these smells are non-toxic.

And this black shadow, even if it was killed by Sean, did not die. Instead, he walked on the spot for a few steps, followed by the peculiar tail like a scorpion tail. Falling down towards Sean fiercely. The hook and sickle that opened to the extreme was like a pair of pliers, as if to cut Sean at his waist, but it was obviously impossible for Sean to catch it. His figure was slightly on one side, staggered from this scorpion tail, in his hand. The change of the long sword is a cross cut, which cuts off the tail directly.

After that, the beast swayed from side to side for a few steps, then fell to the ground. After a few violent twitches, it finally stopped all movements.

Until then, Cecilia was finally able to see the true face of this monster.

also really understood the meaning of the name biped scorpion wolf.

"This is the bipedal scorpion wolf?" Cecilia looked at this obviously dead beast with a surprised look, and had some urges to go up and study it.

Xiao En looked back at the spring pool where the two-legged scorpion wolf rushed out just now. This spring pool seemed to have recovered its calmness, which made Xiao En slightly relieved: "Yes, this is the two-legged scorpion wolf, anyway. You have already encountered an attack. If you are more careful, you may have a few minutes to do some research for you."

Hearing that Sean allowed herself to study this kind of beast that she had never seen before, Cecilia could no longer restrain her curiosity and rushed forward immediately. Fortunately, she finally knew that the current situation was not so good, so her movements and steps were very cautious, and she did not condense any magic, but from her expression reaction, Sean could tell. , Cecilia disagrees with this kind of beast.

This makes Sean a little worried.

However, at this time, Cecilia had already begun to study this kind of beast.

This is a monster that looks like a wolf, but it only has two feet: the feet are still on both sides of the waist. The silhouette should be the hind legs, but they are larger than the hind legs of ordinary wolf monsters. It's more than twice as thick. Obviously, the jumping ability and explosive power of this monster is stronger. This is also the main reason why the jump can span more than 60 meters. The tail part behind the body is the articulated scorpion tail that is nearly two meters long. The top of the tail is not the scorpion tail spur, but the front pliers similar to the scorpion, but this pliers is more lethal. , Once caught, then it will definitely end in the middle.

The bipedal scorpion wolf has no fur on its body, but it does have a scorpion-like stratum corneum hard shell, which is light gray and covered with mucus at this time.

Cecilia stretched out her hand and touched it. There was a slippery touch, but although the slime looked very viscous, it was actually not sticky. As long as you flick it hard, all the slime will be thrown off. It will be clean again.

"It's a protective film." Cecilia quickly concluded, "It seems that this is the main reason why they can move underwater."

Just as soon as he heard Cecilia say this, when Sean turned her head, she saw that she had swept away a large piece of protective film, and then began to use tools to dismember the biped wolf and directly studied the internal organs. Seeing that Cecilia didn't have any fear on her face, but a serious look with relish, Cecilia at this moment gave people a very strange sense of fear.

Anyone who sees a very jingling beauty dismembering a corpse with relish, I'm afraid they won't feel so beautiful.

"Strange, why doesn't this kind of beast have eyes?" At this time, Cecilia had picked up the wolf's head and said with a look of confusion.

This is the head of a two-legged scorpion wolf that was cut down with a sword by Sean. It is no different from a normal wolf head, except that the position where the wolf's eyes should have been originally is still a piece of flesh, and there is no eye opening, and the teeth in the mouth It should also be sharper and sharper. There is a sac opening in the throat, and the venom with strong corrosion is sprayed from here, and the farthest distance can even be sprayed to 20 meters away.

"Does this kind of beast rely on vibrations like scorpions to sense?" Cecilia was a little puzzled.

"Heh." Xiao En chuckled, kicked the scorpion tail that he had cut off, and then poked the ruby's position with the tip of his sword. "These are their eyes."

"Huh?" After hearing Sean's words, Cecilia was a little surprised to pick up the scorpion tail and study it, but the weight of the scorpion tail was much heavier than she thought.

"Don't underestimate this kind of beast. Although it seems easy for me to deal with it, it is because I know this kind of beast very well." Sean is afraid that Cecilia's insufficient knowledge of this kind of beast will be dangerous. , So he started to explain, "The juvenile body of the bipedal scorpion wolf is almost the strength of the fourth-level monster Adults are even more terrifying...Have you heard of the water of death?"

Cecilia nodded.

The water of death is a kind of potion, it is no longer an ordinary potion or alchemy potion, and the name of this potion is so big that no one on this continent would not know it.

Back then, the water source of a small town was infected with an unknown toxin. Tens of thousands of people died overnight in the whole town. Later, under a joint investigation by the Peace Association, it was discovered that a necromancer of Deadthorn was doing a magic. The poison that the experiment gave, and this poison is called the "water of death". Later, with the disappearance of this magician, naturally no one could make this kind of potion. Although it is rumored that

Deadthorn still retains the formula of this kind of potion, the Peace Association has been looking for Deadthorn trouble, for a large part of the reason. Just go to this recipe.

But Sean knew that the formula of the water of death did exist, but it was not in the death thorns, and the necromancer who made the water of death was actually dead. But Sean doesn't know where this formula is now, because the player who got this formula did not say where he got it, but some of the main ingredients of this potion formula have been circulated. Come.

One of them is the venom sac of the juvenile biped scorpion wolf.

"Could it be that..." Cecilia suddenly reacted.

This time, it was Sean's turn to nod: "Although I don't know the formula of the water of death, I know that one of the main ingredients of this potion is the venom sac of the juvenile body of the biped scorpion wolf.... But it's true. The scary thing is not the juvenile bipedal wolf, but the bipedal wolf that has already shed its skin twice. Look at this bipedal wolf, its tail is light gray, that is, it has not been shed. It's just an ordinary adult body. After molting once, it will become black se, and after molting twice, it will become deep black se. At that time, the scorpion tail was at least three meters long, not counting the length of the scorpion tail. It will be more than two meters, and a full burst of jump can fly a distance of hundreds of meters."

Cecilia thought for a moment, and finally there was a hint of surprise in her eyes.

"So you should know now. If I didn't know enough about this kind of beast just now, I'm afraid I would have been overwhelmed by it in the first culling." Sean continued, "You can dissect it so easily now. This kind of beast is also dead. If it is not dead, the hardness of the skin of this kind of beast is not weaker than that of ordinary high-quality armor, and the two-legged scorpion wolf after molting twice is even a seventh-level beast. Its defense The ability is almost comparable to the legendary armor, at least equivalent to the armor of the angel of power that Rina has now."

But as soon as Sean said what he said, his brows wrinkled immediately.

Chapter 319: . Sean's doubts

The full-body bipedal scorpion wolf is the pinnacle of the seventh-level beasts. This level of warcraft is equivalent to the upper level gold, but considering the terrible xing of the bipedal

scorpion wolf, I am afraid that the average lower and middle sanctuary may not be able to kill. Death of such a beast, unless it is like Sean who fully knows its weakness.

However, Sean's question is here.

The overlord of Grey Shadow Forest is a Level 6 Altered Beast, Thunder and Fire Two-headed Lizard, and the strongest other Beasts are only Level 5 Beasts, even the two-legged scorpion wolves in the Flower Sea are Level 5 only. Sean seriously recalled what he had seen and heard in the game at the beginning. He had never seen a bipedal wolf with a black scorpion tail in the pool in the depths of the sea of flowers, so this metamorphosis Where did the news of evolution come from, and why did you say it so smoothly?

Sean suddenly couldn't remember.

He was certain that he had never heard of other news about the bipedal wolf in the game, because the only place where we could find the bipedal wolf was the spring pool of the sea of flowers in the Forest of Gray Shadows. I haven't found it anywhere else, at least not in Sean's memory. If there is, someone will definitely mention it in the forum. Although some players have once put forward a saying that the bottom of this sea of flowers must be connected to a certain place, where is the real lair of these two-legged wolves, but because of the refreshing of these two-legged wolves in the game The speed is very fast. At that time, the player's highest rank was only tenth, and only a handful of players reached this level.

and the tenth rank, it is only the strength of the middle sanctuary.

In the spring pool, the densely packed two-legged scorpion wolves besieged, let alone the middle sanctuary, I am afraid that the upper sanctuary will be hated, so the statement about whether this spring pool is connected to other places is really unable to confirm.

But this moment. Xiao En believed very much that this fountain must be connected to other places, otherwise there would be no seven-level biped scorpion wolves.

Similarly, now he is also beginning to wonder, after the real eye is upgraded, can he know more about the world? It seems that now, he will know the existence of the seventh-order biped scorpion wolf, because he just used the real eye.

If this is the case, then the advancement of the real eye will become the same as the domain mission. It is the ability that Sean needs to crack most urgently.

"What's the matter?" Seen Sean frowning, and there was no movement for a while, Cecilia asked a little nervously.

"It's nothing, I just remembered something suddenly." Sean shook his head slightly, then smiled. "Although the adult biped scorpion wolf is not as strong as its juvenile body, the venom extracted from its venom sac can be used as a substitute for many poisons. Moreover, the hook sickle of this tail thorn is also a natural weapon making material. With these ruby-like eyes, it is also a good magic material. The only pity is that the biped scorpion wolf does not have nuclear crystals, otherwise it would be more valuable. After all, it is a fifth-level monster."

While talking, Sean demonstrated to Cecilia how to dismember the two-legged scorpion wolf to obtain the poison sac, hook sickle, eyes and other materials. As for the materials of other parts, Sean did not extract them, and Cecilia naturally knew that these things were completely worthless.

Even if it was dismembering the monster to extract materials, but Sean's technique still made Cecilia amazed.

When this bipedal scorpion wolf died just now. Cecilia has already seen that its blood has a strong corrosive effect, so in the anatomy research, she adopted the method of putting serum in first. But even so, there will still be some blood remaining in the body, and there is no way to completely clean it, so Cecilia can only use the special methods used by magicians to deal with corrosion to solve these problems.

For example, touch of the wizard, elemental shelter, etc.

But Sean is not a magician. Of course, he does not have these special methods. He simply pierces the body of the bipedal scorpion with a simple sword, and then digs out a piece with the adult with a single stroke of the sword. Organ tissues about the size of the heart. This piece of organ tissue is different from the general internal organs of the bipedal scorpion wolf. Its surface is covered by a very thin film, and there are several roots that look like tentacles. Cecilia guessed that this should be a connection. Certain meridians in its body are used to control the spray of this corrosive venom.

This organ rolls on the ground, and the turquoise liquid inside will sway, looking like a water bag.

Immediately afterwards, Xiao En took out a set of tools, directly pierced into the venom sac, and began to extract the venom inside, filling them into clear glass bottles that had been prepared a long time ago.

is just a poison sac, but Sean has extracted nearly ten bottles of this toxin liquid.

Each bottle is about one hundred milliliters, and ten bottles are equivalent to one liter. Cecilia never thought that this poison sac can hold things like this, far more than she looks on the surface.

"These are actually venom Jinghua, which is concentrated venom." Seeing Cecilia's eyes with a trace of doubt, Sean replied, "Only in the venom sac can this concentration be maintained. This set of tools It's Jerry and the others. I modified it appropriately, so when extracting these liquids, the first dilution will be done. Then they will also need to do this when extracting the blood of the Black Crystal Demon Leopard. It has not been diluted. The blood of the Black Crystal Demon Leopard cannot be used. I have omitted some troublesome steps."

The blood of the Black Crystal Demon Leopard can be used to make many potions and alchemy potions. Cecilia obviously knows this, but after hearing Sean's words, the doubts in her eyes become even stronger: "Black Doesn't Crystal Demon Leopard's blood need to be purified before it can be used? If it's diluted, doesn't it reduce the effect? This is increasing the amount of purification work."

Xiao En was taken aback for a moment, and then asked: "Aren't the guys who make potions and alchemy potions purify them after diluting them?".

"Why?" Cecilia puzzled.

"I said why those potions and alchemy potions are so poorly effective. Almost all sold are sub-quality and low-quality potions, and there is not even a bottle of superior quality." Sean curled his lips in disdain, "Like a Warcraft Blood and some special venoms contain a lot of micro-element impurities. These impurities will affect the quality of the medicine if they are not disposed of first. Therefore, truly brilliant and experienced alchemists and magicians will first treat these liquid materials. Dilute, release these micro-element magazines, and then perform preliminary purification through sieving, isolation, etc., and finally the real purification and condensation. Only in this way can we produce superior or even super-quality potions and alchemy potions. ."

Speaking of this, Sean raised his eyebrows very deliberately: "However, these materials that I personally diluted do not need to undergo the first step of sieving and purification, they are directly purified and condensed, and the purity after purification can even reach With an absolute purity of

ninety-nine percent, if you can't make super-quality potions or alchemy potions using these materials, then I can only say that this person is definitely not suitable for being an alchemist."

Cecilia blushed a little embarrassed when she heard what Shaun said.

The absolute purity of 99% is the purity that all alchemists dream of. When she was studying in the academy, she secretly took a few bottles of her tutor and the purity was 99%. Purify medicine and practice hand. The best result was a potion of superior quality. Now that Sean said so, of course Cecilia would feel embarrassed. So she shut up silently without speaking. It's just that Sean's method still shocked her severely.

Even if she knew that Sean was omnipotent, Cecilia still felt a little weird even if he could even use this kind of magician method.

Of course, Sean didn't know what Cecilia was thinking. He thought she blushed just because she was a little ashamed because of her ignorance. This made Sean wonder if she was talking too much.

"Cough cough." Sean also gave a slightly embarrassed cough, and then took out two bottles of venom potions to Cecilia. "Although it has been diluted by me, the activeness of the magic xing inside is still very high. If you encounter a situation where it is too late to cast the magic, you can throw this at the enemy. It can definitely make the enemy corroded so that there is no bone dregs left. If you throw a bottle of this after you cast the wall of fire, it will produce a five-level magic acid rain poisonous cloud. You have to remember this clearly."

Fire Wall is only a third-level magic, while Acid Rain Poison Cloud is a fifth-level magic, and its coverage and effect are very strong.

Although I don't know the principle of its production, if it can transform a third-level magic into a fifth-level magician, this is a terrifying effect.

Even the venom sac in the bipedal scorpion wolf was so easily solved by Sean. When Sean used the violent means to remove the two oval ruby eyes and the pair of hooks, Cecilia felt that there was nothing. Nothing strange anymore.

However, after finishing all this, Sean pulled Cecilia back and walked for more than ten meters. It was not until after leaving the range of this spring pool that Cecilia saw Sean suddenly waved in vindictiveness. Throw all the remaining parts of this two-legged scorpion wolf into the fountain.

I saw that the entire fountain was silent for about a minute, and then the entire fountain burst into a burst of boiling, and the white mist above the entire fountain instantly disappeared without a trace. Looking around, I saw that this group of spring pools is actually thousands of meters wide. At this moment, these spring pools are constantly boiling, and countless water splashes are like active before the volcanic eruption, which is extremely shocking.

This continued for about half a minute, and there was a sudden sound of the water breaking open.

The scorpion tail that Sean and Cecilia had seen before burst out of the water.

In less than a second, it was the second sound of breaking the water surface, then the third and fourth sound, and finally it was a continuous film, like a billowing thunder.

This time, Cecilia's face became extremely pale.

In the entire spring pool group, densely packed scorpion tails stand upright, looking like a light gray stone forest, large and small, and there is a palpitation roar constantly echoing.

Originally, Sean didn't want to make such a movement, but he really wanted to know the situation of these two-legged wolves, to see if there were any two-legged wolves with black scorpion tail. However, it is obvious that there are no black-tailed scorpion wolves. All the two-legged scorpions have light gray tails, which proves that these two-legs are still at a level that he can handle.

But soon, Sean realized that he still underestimated the terrible ***** of these biped wolves.

Because at this moment, Cecilia suddenly felt a tingling scalp. If it weren't for Sean's hand, she would turn around and run out.

Shocking!

This is the aura of deterrence belonging to the beast. Only the truly powerful beasts can have such aura of deterrence, just like a dragon.

At this time, there is a shocking negative effect in the Xing panel of Xiao En's personal belongings.

It's just that this negative effect is not strong, it just deducts 10% of his xing, which is not too serious. But even this still makes Sean's face a little ugly, because this shocking effect is accompanied by a "fear" reaction. Although this effect is offset by the necklace of immunity to all conditions on his body, it is obvious, Cecilia The will of Ya Xing is not immune to this effect, so it has the illusion of wanting to escape.

But how high Cecilia's will is, but Sean is very clear, that is a full eighty-seven points!

Eighty-seven o'clock will not be exempted from this fear effect, so adventurers below the golden realm may be scared to walk in this place.

In other words, if Sean wants to pass this fountain channel, I am afraid it is not an easy task.

Chapter 320: .Unfortunate in Fortune

The riot in Spring Pond was really beyond Sean's expectations. He didn't expect these two-legged scorpion wolves to become so active.

Fortunately, as long as they are within 50 meters of the spring pool, they will not be attacked. After all, these two-legged scorpions can only jump 60 meters as far as they can. And Sean is more than a hundred meters away from these two-legged wolves. According to Sean's understanding of these two-legged wolves, their eyes will not be able to see them if they exceed one hundred meters. No matter how the scorpion wolf riots, Sean and Cecilia are safe.

Of course, this is only relative to these five-legged biped wolves.

Sean guessed that the vision and visibility of these two-legged wolves should be related to their own strength. In other words, if it is a two-legged scorpion wolves with a deep black scorpion tail of the seventh level, I am afraid that they will be safe only if they are two hundred meters away.

But even so, for Sean and Cecilia, it still makes the hunt for the Black Crystal Demon Leopard a little troublesome.

For three days in a row, they could only move a hundred meters away from the spring, which made their range of action naturally become much larger. Although the two-legged scorpion wolves will no longer appear on the water in the evening of the next day, the terrible breath of monsters is still in the air, so Sean knows that these two-legs scorpion wolves will definitely not in a short time. Entering a state of deep sleep, this also made him afraid to approach the fountain within 100 meters.

Unlike human beings, Warcraft will divide artificially into territories. They all rely on the intensity of their own aura to announce their activities. Generally, the active area of high-level monsters is fixed. Generally, high-level monsters will not enter the area of other high-level monsters at will. Otherwise, this will be regarded as a provocative behavior and will cause battles between high-level monsters.

However, the breath of high-level monsters can not be felt by all monsters, otherwise, there will be no low-level monsters in the area of high-level monsters. Of course, if the high-level monsters take the initiative to exude aura in front of the low-level monsters, the low-level monsters also cannot move, and can only obediently become abdominal Chinese food. At this moment, the aura emitted by the bipedal scorpion wolf at this moment is a kind of active emission during hunting. The coercive breath coming out.

If Sean hadn't had Thiels' lucky necklace, he wouldn't be much better than Cecilia at the moment, maybe even worse.

But now, with the help of Sean, Cecilia has managed to survive this terrible breath of monsters, and her Jing divine power is also growing at an astonishing speed, although her face is still a little pale, but The aura on his body also faintly began to become surging and powerful. Sean knew that Cecilia had broken through the growth limit of Jing divine power. As long as her magic power could keep up with the growth, then she could immediately become a gold-level magician.

For many magicians, it is not magic power that really limits their growth, but the divine power of Jing. And now that Cecilia's jing supernatural power has broken through, then this is equivalent to announcing that Cecilia has got the ticket to step into the golden realm. Originally, Sean thought that at least he would have to go through several hard fights or deaths. Only to escape, I didn't expect to just withstand the coercion of the two-legged scorpion wolf for three consecutive days. This was a bit beyond Sean's expectation.

Although it is a little different from the initial plan, in any case, the purpose of Cecilia's trip has been accomplished.

If Sean hadn't given up on the Black Crystal Demon Leopard, he would want to take Cecilia back. Because the most important thing now is to let Cecilia meditate at ease and enhance the growth of magic power. However, he had not found any new traces of the Black Crystal Demon Leopard for three consecutive days, and Sean was a little impatient. He decided that if he had not found it today, he would give up and go back to find Jerry and go directly to the underground black market.

He really doesn't have much time to spend in this forest of gray shadows.

And the facts turned out to be like the side that Sean didn't want to see the most. After exploring all day, he still found nothing. If you count the first day, he and Cecilia have stayed in the spring pool deep in the sea of flowers for at least four days, and there are only less than twenty hours left before the time limit agreed by him and Jerry. After hesitating again and again, Sean decided to give up hunting down the Black Crystal Demon Leopard and go back to Jerry.

Because if there is no Jerry, then he will not be able to find the underground black market of the Grey Shadow Forest, and Bannock is still planning to recruit, so after weighing the pros and cons, he found that the value of the Black Crystal Leopard is really not there. Bannock and the underground black market are high. .

"Forget it, it can only be considered bad luck." Sean shrugged helplessly, and smiled bitterly at Cecilia, "Go, let's go back to Jerry and the others, I hope the underground black market will not let me down. ."

As long as it is Sean's decision, Cecilia will not object, and she really doesn't like this spring pool. When the two-legged wolves watched Sean's easy beheading before, she still didn't feel much, but when she saw the densely packed two-legged wolves and the terrible aura exuded by the two-legged wolves, Cecily Ya knew it was wrong, and it was still very wrong.

Under the pressure of this kind of momentum, she might not even be able to display 10% of her strength, so she was frightened and turned around and fled. According to what Shaun said before, the moment she turned and escaped, she would also become a bipedal wolf's belly lunch.

So when Cecilia heard Sean say to leave, her heart was still a little relaxed.

Soon, the two began to walk in the direction where Jerry and Bannock were. Because of the markings before, there is no need to worry about getting lost in this forest of gray shadows.

But this time, the two people hadn't left for an hour, and when they were officially leaving the imposing range of the two-legged scorpion wolf, Sean and Cecilia heard a clear shout, and they were mixed in this call. There were low roars and roars in the voice. Obviously, the latter voice is not a human voice, but a voice belonging to monsters, although even Sean can't tell whether this voice belongs to the Black Crystal Demon Leopard, or is it attracted by the fragrance of the sea of flowers. But Xiao En decided to go and take a look, after all, listening to this voice is not too far away from them.

But this is not far away, and it is only relatively speaking.

Sean and Cecilia drove for nearly half an hour before finally seeing six people on the horizon at the other end of the Flower Sea playing against a monster.

When Sean saw the monster, his eyes suddenly lit up!

That is the Sombra Demon Leopard!

Originally, Sean was already ready to give up, but he didn't expect to meet the Black Crystal Demon Leopard here. He would start to thank the Goddess of Destiny for her favor.

However, since Sean and Cecilia have discovered the Sombra Leopard, the six opponents naturally also discovered the silhouettes of Sean and Cecilia. The six people immediately speeded up their shots. Obviously The plan was to completely kill the Black Crystal Demon Leopard before Sean and Cecilia arrived.

Sean just glanced from a distance, and immediately knew that these six people were demon hunters.

Because only the demon hunters can take such desperate actions when facing critical situations. After all, injuries and casualties are commonplace for them, but on the contrary, if they can successfully kill the black crystal demon leopard, then That payment has been a comfortable life for them for several years.

In this case, no one will be distracted.

"Huh!" Seeing these demon hunters' shots, Xiao En finally let out a cold snort, his body shape suddenly accelerated a lot.

Originally, he planned to negotiate with these six people. It doesn't matter if it is a little money, because the skeleton and blood of the Black Crystal Demon Leopard are indeed very important to him. However, after seeing these demon hunters' shots even more fierce, Sean paid a little attention to the situation of the Sombra Demon Leopard, and immediately discovered that this Sombra Demon Leopard had actually been seriously injured, and even a few areas of his body had been covered with fur. Dissolve, that is obviously a masterpiece of bipedal scorpion wolf.

In other words, the Sombra Leopard was indeed hiding near the spring pool, but when Sean caused the bipedal wolves to riot, the Sombra Leopard was caught off guard. His attack almost became the belly lunch of those two-legged scorpions, so he wanted to escape from the sea of flowers. Xiao En was a little upset at the moment, he hadn't thought of this earlier, otherwise, he wouldn't need to waste so many days at all, just come back on the road and guard the passage and wait for the Sombra Devil to throw himself into the net.

Because there are only two roads in the sea of flowers, if you bypass the spring and continue to go deep, it is the deep belly of the Gray Shadow Forest, which is the site of high-level monsters.

Although the Black Crystal Demon Leopard is not afraid of Level 4 monsters, it can't get any benefits when encountering Level 5 monsters, so it will definitely not choose to go deep, but go back. After all, this is a scorpion wolf who knows how to use two-legged wolves. Powerful to evade Jian Beast. Sean had never seen it before, and the IQ of the monsters had such a high level. Generally, the monsters who knew how to use the situation were at least level five or above.

But even so, Sean didn't know whether to say that these six people had good luck or bad luck.

It is rare to encounter a half-dead Sombra Demon Leopard. It is reasonable to say that it should be lucky.

But unfortunately, they met themselves.

But even at this moment, Sean has the idea of robbing the monster, but he still dare not start light body surgery and adrenal stimulation, because he has discovered that even if these six people are desperately attacking the black crystal demon leopard, three of them Most of his personal attention is still focused on himself. Two of these three are masters of the upper silver pinnacle. Although one of them is not the pinnacle, he is not far from the pinnacle.

He wasn't afraid of these people. What he was afraid of was that once he started to kill someone, the Black Crystal Demon Leopard would immediately break through and flee.

When the time comes, will he continue to stay and kill, or go after the Black Crystal Demon Leopard first?

However, because of the sudden mention of Sean's speed, the distance of 300 to 400 meters was quickly shortened by Sean by nearly half.

The Black Crystal Demon Leopard was also clever. It seemed that someone was disrupting the situation. After it had a glimmer of life, it no longer attacked desperately. Instead, it focused on defense. The change in this tactical method was not to say that the six people were shocked. Even Sean was a little dazed, this Sombra Demon Leopard was too enchanting.

And these six demon hunters knew that they would never kill the Sombra Demon Leopard before Sean arrived, so the six also slowed down their offensive and speed. It should be a slow-knife kill tactic, which not only can It reduces physical exertion and danger, and at the same time can prevent the black crystal demon leopard from escaping. Among the six, the two masters who were already at the top of the silver pinnacle also played from left to right at the same time, welcoming Xiao En.

Looking at the posture of these two people, Sean knew that if he wanted to forcefully break through, he would have to kill these two people. Then the other four people would definitely come to support him, and the Black Crystal Demon Leopard would naturally run away. Xiao En didn't want to take this risk, so when he approached about 100 meters, his speed slowed down, and he didn't really stop until about 50 meters, forming a confrontation with the two.
