Chapter 1201 Send Off!

Constance's eyelids twitched, but she said, "Madam, I don't understand what you mean."

Lady Lauren's disappointment flickered in her eyes, and her gaze at Constance turned even colder. "No, you do."

Constance's heart suddenly thumped. "Madam--"

Lady Lauren looked at her meaningfully. "When someone is used to being the queen, they will naturally resort to any means to get rid of anyone who suddenly emerges and takes away their aura."

Constance was about to lost control.

This was completely different from what she had expected!

In her plan, it should have been Selena who was disliked, suspected, and condemned by everyone, not her, Constance!

Constance panicked, but at the same time, she became increasingly dissatisfied. Her voice became sharper, "Madam, I didn't do this. Did Selena tell you something?"

Her eyes turned red, and she shook her head, looking very wronged. "Please believe me, this has nothing to do with me..."

Lady Lauren smiled, "Miss Baxter, it's true that everyone has jealousy in their hearts, and everyone will be jealous of others from time to time. But once they lose their sense of proportion, cross the bottom line, and become evil, they can only blame themselves for arousing the disgust of others!"

"No man would like a woman who is not true to herself, vain and hypocritical, and has a wicked heart."

Shaw family needed the "Sacred Pearl" more than anyone else, so even if they wanted to kill Selena, they wouldn't be foolish enough to spread the news about the "Sacred Pearl" in H Country for everyone to know. At this critical moment, choosing to return to her home country, no one knew whether it was good or bad.

...

At the same time that the news of Selena's arrest caused a stir in the whole capital, Selena was in prison and saw the confiscated communicator that had been taken from her before.

At the same time, she received a call from Osvaldo.

"Miss Turner, given your special situation, the higher-ups have decided to temporarily preserve your communication rights. However, all your calls must be conducted in front of us!"

Selena looked at the phone screen that was showing the call in progress, and gave a sneering glance to the person who had brought her the phone.

At first, the person acted very calm, but as they met Selena's dark eyes, their face gradually became stiff.

"Miss Turner, your phone call!"

Selena changed to a more comfortable sitting posture, lowered her head, and played with her fingers out of boredom.

The other person's forehead broke out in a cold sweat, and finally softened their tone, "Sorry, Miss Turner, I misspoke earlier. I'll be waiting outside. When you finish your call, just return the phone to me!"

Only then did Selena lazily raise her head and take the phone.

By that time, three minutes had already passed.

Selena was stunned for a moment, then suddenly understood what the *man meant*.

He was telling her that she didn't need **to worry!**

Even if exposed, she was the owner of the "Sacred Pearl," the leader of Lab 717, and the existence that
should have already returned to dust... she didn't need to *be afraid*.

He would protect her.

A touch of emotion arose in Selena's heart, and then she heard the man say softly, "Don't be afraid, I'm

He had always been there.

So she wouldn't have to face her enemies alone.

What she should fear were not herself, but the jackals and tigers that had harmed **her!**

Selena's curled eyelashes trembled, and she smiled happily. "Honey, you're *so good*."

...

During the time Selena was on the phone with Osvaldo, Constance had just hung up the phone with **Lab

She sat on the sofa, thinking about what Lady Lauren had said *to her*.

Chapter 1203 Who is Dante?

Constance had thought that her status as a physics genius, combined with the prestige of Lab 717,
would be enough to turn the public opinion against Selena and bring her down. But she never expected
that instead of bringing Selena down, she would become the target of public condemnation herself.

Having just returned to the country, Constance was not aware that the tricks she was playing had
already been done by Leah several months ago. When it comes to using public opinion as a tool, ten
Constances could not compare to one Leah.

Furthermore, the Turner family's reputation and Selena's contributions to H country over the past six
months meant that the road of using public opinion to destroy Selena had long been closed off.

Having a high self-esteem, Constance was not used to being the subject of such widespread "cyber-
bullying", and she was so angry that her face turned pale. She tremblingly made a phone call, and before
she could even speak, tears were already streaming down her face. "Senior Brother..."

...

In the prison, Selena spent nearly an hour on the phone with Osvaldo, successfully convincing him to
give up the idea of returning immediately. She handed the phone back to the guard and, as he looked
into Selena's deep, dark eyes, the guard wisely walked away.

As soon as the guard was gone, Leia came over and recounted what Constance had done. Selena listened calmly and then smirked coldly. "Don't worry about it."

Leia was not happy and pouted, then heard Selena ask, "Is there any special connection between Miss Baxter and young master?"

Even at the beginning, when Constance said she wanted to enter 717, Osvaldo and Dante helped her get in.

Selena was somewhat surprised.

*Bipolar affective disorder is often referred to as "genius **disease**."*

Many genius artists, scientists, and even some patients with similar conditions can be found in Lab 717. Each of them has a unique mental world, and they rarely communicate with others unless it is necessary, and most even have communication *disorders*.

Selena sighed slightly. She now understood why Constance had the confidence to openly *oppose her*.

With the help of Osvaldo's friend and a life-saving favor, it was no wonder she was so **bold**.

After understanding the cause and effect, Selena smiled, "I see."

Leia looked at Selena with wide eyes, afraid that the mistress would get angry, and carefully said, "Madam Selena, don't be angry. Even if that woman dared to slander you, young master would not let her off, even if he can't kill *her*."

Selena smiled slightly, "I'm not angry."

Chapter 1204 Mysterious Education Background

Women really shouldn't be spoiled!

But Luke suddenly remembered that Selena had been spoiled by Osvaldo without any bottom line for so long, so why wasn't she spoiled rotten?

Osvaldo couldn't wait for his wife to go out and cause trouble for him.

Unfortunately, after all this time, Selena never let him have his way.

So, in the final analysis, it's not that women shouldn't be spoiled.

It depends on whether this woman is worth spoiling!

Just as Luke was thinking this, his phone suddenly vibrated.

He looked at the flashing number on the screen, a cold light flashing in his eyes, and pressed the answer button.

Constance's cold and choked voice came through, "Mr. Jordon, have you seen those rumors? It was clearly Miss Turner's fault, so why is everyone coming to scold me?!"

Luke laughed without warmth, "So what do you want me to do?"

"You help me clarify the situation!" Constance demanded as a matter of course. "Mr. Jordon, we grew up together as friends, and this is Miss Turner's fault. I have no obligation to take the blame for her!"

hour later, the official website of Lab 717 suddenly reposted Constance's Weibo, publicly announcing that in three days, a team from 717 would be dispatched to the research institute in H Country, hoping that Lady Selena would hand over the "Sacred Pearl" as

717 was a true deity-level existence, and their official website was rarely updated. Suddenly, such a message appeared, and it stirred the entire network in an instant, just when everyone was paying attention to **it**.

[My god, what does this mean?!]

[717 is confirming Constance's words?!]

[I don't believe it. Lady Selena wouldn't do something like *this!*]

As soon as this Weibo was posted, it was like publicly killing the charge of "leaking state secrets" **against Selena!**

For a moment, various shocked and skeptical voices hit the 717 official website, most of which were voices *defending Selena*.

717 is the highest physics hall in the world, and in the eyes of a group of physics elites, it is an inviolable existence. Many people dream of entering Lab 717.

Therefore, seeing so many people questioning 717 because of Selena immediately aroused dissatisfaction among physics enthusiasts *and elites*.

First among them were students *from Hogwarts*.

They are overseas and don't know much about Selena's **situation**.

It's just that Constance is a student at Hogwarts, and Lab 717 is technically their school's laboratory. Seeing that her schoolmates and dream hall were being questioned, she immediately went to argue.

Chapter 1205 A Joke

Selena's eyes suddenly turned cold and chilling.

Blake looked at Selena with a smile, waiting for this proud lady from a prestigious family to resist. As long as she dared to make a move, they would have a legitimate reason to shoot her on the spot!

Selena stared coldly at his eyes.

Leia's eyes were full of anger, and she was about to rush forward and beat someone, but Selena spoke first, "Leia."

Leia turned to look at Selena, "Madam Selena..."

Selena looked at Blake and smiled expressionlessly, "Usually those who try to insult me end up regretting it. I will mark this!"

Blake saw that Selena seemed to be prepared to endure it, and a look of disappointment flashed in his eyes. However, his expression quickly returned to normal and he waved, "Take her away!"

He naturally couldn't let go of the opportunity to humiliate the Turner family. Today, he was going to let this precious little phoenix, who was born with a silver spoon, taste what it was like to be trampled on and stepped on by others!

Just as the handcuffs, which symbolized humiliation, were about to fall on Selena's delicate wrists, a indifferent voice suddenly came from outside the door, "Blake, if you don't want those hands of yours anymore, give it a try!"

Blake's face turned pale at the sound of this familiar voice. He turned around abruptly and glared, "Oscar!"

Oscar sat calmly in his wheelchair, and Patrick pushed the wheelchair with a pale face. Behind the two of them stood several people.

Although he couldn't put handcuffs on Selena, she still had to face a military court *trial*.

Selena smiled coldly and walked towards the door, saying, "Leia, go to the Capital University laboratory and tell Black Crow that since Miss Baxter wants to know my education background so badly, then show her **my diplomas!**"

Blake heard this and thought Selena was struggling in her **last moments**.

Selena's education was high, but could it be higher than Constance's? After all, it was well known that Selena had just transferred to the medical department of Capital University six months ago from Creephia University, and her highest education level was only a degree from Capital **University**.

This kind of education was indeed outstanding in H Country, but compared to Constance, it was a **joke**.

Therefore, Blake didn't take her words **to heart**.

Leia glared fiercely at Blake and immediately turned to call her **master**.

In the Capital University laboratory, Selena's imprisonment made Black Crow and White Crow both in a bad mood, and they had no interest in *doing experiments*.

Black Crow sat on the sofa with a sour face. If it wasn't for Julian stopping him, he would have wanted to poison Miss Baxter and kill **her directly!**

Joanna sat opposite him, fanning herself with a fan, frowning, and her expression showed that she was somewhat convinced. Those people in the research institute really didn't stop until they were completely destroyed!

So the seal of Lab 717 could be faked after all?

Selena was once again locked up in the interrogation room, but this time there were more people questioning her than last time. Selena even saw many people from the research institute, including Constance. It was a grand sight.

When Selena walked in, everyone's gaze immediately focused on her. The Turner family had successfully taken over the research institute with Selena as the head of the science department, but in the blink of an eye, Selena had become a prisoner.

It just goes to show that anything can happen. Even the higher-ups in the research institute who didn't like Selena couldn't help but feel sad at the sight. But despite their regret, it didn't stop those who were hostile to the Turner family from feeling that this was a good thing.

The downfall of the Turner family's daughter meant that the family would once again lose control of the research institute. After all, they couldn't produce another Selena.

Constance looked at Selena with deep envy in her eyes. In her opinion, Selena should be panicking, afraid, and begging for mercy. But no, Selena's eyes and expressions were calm to the extreme.

Standing alone there, the elegance and nobility emanating from her did not diminish in the slightest. Instead, there was a sense of cold disdain.

sensing Constance's gaze, Selena suddenly turned to look at her. Constance met her cold, black eyes, and a hint of malice and smugness flashed across her

Constance was about to speak when she heard Patrick's voice behind her. "Miss Baxter, the Turner family remembers what you did to Selena, and we will definitely repay it twofold in the *future!*"

A faint smile crossed Constance's lips as she pressed them together. "I just stated the facts. If Miss Turner hasn't done anything wrong, why would she be **afraid?**"

Looking at the angry and cold eyes of the Turner family, Constance elegantly brushed her hair aside. "Mr. Turner, there's no need to look at me like that. We at 717 wouldn't lower ourselves to falsely accuse **Miss Turner.**"

"After all, while Miss Turner's mechanical talents are outstanding in H Country, she's just a nobody to us at **717.**"

Constance wasn't afraid of offending the Turner family. Not to mention that she was the daughter of the Baxter family, but just being a member of 717 was enough for her to act wild in the capital. As long as she was a member of Lab 717, these aristocratic families in the capital wouldn't dare **touch her.**

Everyone knew that 717 was the most protective of their own. Especially the owner of the "Sacred Pearl," who was someone no one dared to offend openly on a global scale. Before the Turner family moved against her, they had to weigh whether they would offend the owner of the "Sacred Pearl" **first!**

Apart from being afraid of angering Osvaldo, Constance was *completely fearless.*

Chapter 1207 Selena's Education

Selena didn't pay attention to Constance. Her dark eyes stared straight ahead at the crowd as she spoke in a soft voice, "The prerequisite for proving someone's guilt is having both witness and physical evidence."

"If you only want to accuse me of this crime based on a few words, then I have the right to accuse someone of deliberate framing."

Blake smiled slightly, "Miss Turner, you are underestimating us. Without substantial evidence, how dare we accuse you?"

His eyes passed over Oscar with ill intent, and then he reached out his hand. Someone behind him handed him a cell phone.

Blake turned on the phone and pressed the record button. A clear recording came out from inside.

"The people from Lab 717?"

"Yes."

"I have something to tell you."

"What is it?"

"I can tell you where the Sacred Pearl is, but the condition is that you and I both know about it, and you cannot tell anyone else."

"Okay!"

"The Sacred Pearl is currently at the capital research institute. I hope you can send someone to retrieve it."

Although the recording was short, anyone could hear that it was Selena's voice. The entire recording was concise, clear, and sharply targeted.

Constance's face was filled with a *smug smirk*.

How dare she make such a big deal without being **completely certain**?

Patrick's expression was unpleasant, and he was about to step forward when Oscar's deep gaze landed on Selena's face. He spoke up and stopped him, "*Wait longer.*"

Selena's easy admission of guilt made the interrogators feel uneasy.

Since entering the capital, everything the Turner family did caused a sensation. Even today, everyone knew that they were not easy to deal with.

It was strange to see her so easily brought down. However, this didn't stop them from convicting *Selena*.

After all, with Selena admitting her guilt, anyone opposing the Turner family would not miss such a good opportunity. In addition, even if the Anderson family's member returned, they would not be able to take any overt retaliatory action.

Blake laughed out loud, "According to the laws of H Country, anyone who leaks confidential information from the research institute will receive the death penalty!"

Constance's eyes lit up with joy.

The people of the Turner family **looked pale**.

Selena still stood quietly in her place, with her eyes downcast and her face showing **no change**.

Blake's gaze swept over Oscar's face heavily, but he didn't see any angry or resentful expression. He felt angry and resentful in his heart, and suddenly changed his tone, "However, because of the Turner family's meritorious service and Miss Turner's outstanding research abilities, Zone Two has decided to give her a **lenient sentence**."

"Miss Turner is sentenced to life imprisonment and must use her own abilities to make up for the losses of the *research institute!*"

Chapter 1208 A Plain Degree

Due to Constance and the official website of Lab 717 accusing Selena in a high-profile manner, a trend of flaunting diplomas and trophies emerged on the internet. Hogwarts students were the most enthusiastic about this trend.

Because they idolized Constance and Lab 717, they had no good feelings towards Selena. When they saw that she had been sentenced to life imprisonment, many of them joined in the chorus of condemning her.

This action successfully angered the young girls who were fans of Selena!

The fact that their beloved fairy was sentenced to life imprisonment already made the young girls very upset. When they saw these malicious comments, they could no longer control their anger and exploded.

Fortunately, Selena had previously asked A to help fix the Weibo system. So even though the gossip was explosive today, Weibo did not crash.

While the two sides were tearing each other apart under Selena's Weibo, a new post suddenly appeared on her Weibo.

At first, because Constance and the Hogwarts students had flaunted too many certificates, everyone was numb to it, and no one took this new post seriously.

But when they clicked on it with various emotions such as sadness, malice, or to simply mock it, and saw what was inside, everyone's emotions exploded.

"Oh my god! Let me catch my breath... It must be the way I opened Weibo today that's wrong! Otherwise, how could I see this..."

"I saw it too! I'm so scared that I might have read it wrong..."

In the interrogation room, after Blake's sentence was announced, Selena didn't say a word in defense and just turned and left.

Selena's decisive action made those who were prepared for her resistance feel **uncomfortable**.

Although Selena's attitude was somewhat strange, it didn't stop all the forces that were hostile to the Turner family from breathing a sigh of *relief*.

Finally, they brought down the difficult Miss **Turner!**

Constance looked at Selena being escorted out by two people and smiled faintly, "Miss Turner, I don't think we'll have a chance to meet again in the future, so I want to say thank you to you **right now.**"

Chapter 1209 This is Impossible!

"Constance, something's wrong with Selena... she..." Neve was too shocked and panicked to speak coherently.

Constance turned to Selena, giving her a contemptuous sneer and asked softly, "What's wrong with Miss Turner? Say it!"

She had already guessed that Selena wouldn't confess so easily. Sure enough, Selena had a backup plan!

However, Constance was confident that even if Selena had a trump card, she wouldn't have a chance to clear her name if she was accused of leaking confidential information from the research institute!

Due to the sudden turn of events, the Shaw family brothers and the group of people from the research institute who were still standing in place heard the commotion and looked over with suspicion.

In the silence, Neve's trembling voice rang clearly in the ears of everyone present. "She is a graduate of Lab 717..."

The sneer and contempt on Constance's face suddenly froze.

She was so shocked and caught off guard that she couldn't react for a moment and asked blankly, "What did you say?!"

Neve cried out in despair, "Selena is a graduate of Lab 717!"

Boom!

Constance felt as if a bolt of lightning had struck her head, causing her to almost lose her mind.

biggest confidence in facing Selena is that she is a member of Lab 717. As for Selena, although she is a mechanic, her academic qualifications in physics are too vague. Except for when she competed for the position of research department head and presented a few design drawings, no one has ever found any information about her academic qualifications or achievements

This directly magnifies the dissatisfaction in Constance's heart. She believes that the only reason Selena was able to defeat her was pure luck. Constance is a genius of Lab 717 and could not possibly lose to Selena, who has no academic qualifications or achievements in physics.

But suddenly someone told her that Selena was a graduate of Lab 717! She was one of the legends that the members of Lab 717 talked about and admired all the **time...**

Constance could not accept such a huge gap and blow, and her face lost all its color in an instant, becoming extremely pale. This sudden news not only shocked Constance, but also successfully caused the emotions of everyone present to *explode*.

Vivian stepped back in horror for several steps, staring at Selena like she had seen a ghost. "How is this possible?! This is impossible!"

Freddie held his heart in shock, staring at Selena with a fierce expression. The other researchers at the institute were also dumbfounded. Even the people in Zone Two couldn't help but gasp in shock, instantly understanding why Jonathan's abnormal behavior came out *of nowhere*.

Miss Turner is a graduate of Lab 717 and one of the two geniuses living in the legend of the physics world...

Such a legendary figure appeared in their country and joined the institute, becoming the head of the research department. And then... she was stripped of her position as head of the research department and sentenced to *life imprisonment!*

The faces of everyone who reacted to this fact twisted completely in an instant. If Selena was indeed a graduate of Lab 717, then she must have known the core figures within the laboratory. Would such a figure need to use such low-level means to eliminate dissidents?

Also, since Selena comes from 717, why didn't the supposed 717 personnel in the recording recognize her?!

Dead silence.

Selena seemed to not notice the shocked and stunned gazes, slightly tilted her head and looked at Patrick, "Cousin, take me to the *prison.*"

Blake's expression had become extremely unpleasant.

He knew that the Turner family was not to be messed with!

But he had never expected that the seemingly gentle and weak daughter of the Turner family would go to such lengths!

Everyone knew that if Selena didn't loosen her grip, those who had offended her would definitely not have an easy time.

In such a situation, is it possible to make Selena let go and pass over the matter lightly?

Watching Patrick leave with Selena, the people present were at a loss for words.

Cillian watched Selena leave and after a moment, a smile appeared on his face. "The girl looks like Callum."

Oscar's eyes flickered. "Do you think so too?"

"She looks like her mother, but her character is indeed like her father, especially..." Cillian didn't finish his sentence, but Oscar seemed to understand.

He lowered his eyelids and after a while, he spoke. "Thank you for your hard work. Please go back first."

Seeing that the girl was willing to talk, Patrick smiled and asked, "You were able to understand such profound things at the age of *eight*?"

It should be noted that not only did one need to be smart to enter Lab 717, but one had to be super *smart*.

Constance had entered Lab 717 when she was twenty-one years *old*.

Selena had entered thirteen years earlier than her.

The two were not even in the same league.

Selena held her chin with both hands and said softly, "I was very lonely when I was a child, and there was no one to accompany me, so I could only find books to read. As I read more and more, I began to *understand things*."

"Later, I inadvertently solved a physics problem for the principal of Lab 717 on a forum, and then he wouldn't leave me *alone*."

Selena seemed to recall some unpleasant memories and pouted her pink lips. "He was really annoying, and I couldn't stand him nagging me, so I had to agree to be his student."

"I was his student for seven years, but we didn't meet in person that often. Most of the time, he would only call me when he had questions he didn't understand," Patrick remembered Selena's childhood environment and felt heartbroken. He spoke softly, "So they don't know that Constance and someone from within 717 collaborated to frame you?"

Selena smiled, "The core members of 717 don't even have social media accounts. They are immersed in experiments every day, even if the world outside is turned upside down, they probably wouldn't notice. Those people are incredibly smart, but they are also incredibly dumb."
