

Mana 1251

Chapter 1251 - Analyze And Copy! II

In a vast Primordial Sea, Noah watched as a terrifying 4 tusked Draconic-Elephant Primordial Beast with 5 pairs of wings opened its abyssal jaws to cast an ability that allowed a Universe to disappear in a flicker of light in the next second!

WAP!

The 5 Primordial Beasts that were carrying the Universes scattered away quickly, this beast turning its abyssal mouth from one Universe and into another as they all experienced the same shocking fracture and disappearance into the endless jaws.

Every time this beast did this, its aura shook and it rose ever higher, but Noah couldn't help himself from looking at the ability that his Primordial Eye had discerned when he looked at the actions of this beast!

<Esurient True Devouring> :: An ability that allows its user to fully devour the essence of genuine Universes and Cosmos born within a Reality,? these special objects being turned into numerical Units of energy called the Essence of Reality. With the Essence of Reality, many impossible things become possible. One of the many uses of the Essence of Reality includes the seamless fusion of laws and daos once a sufficient price is paid. The ability is restricted to Primordial Beasts as utilization of it by others will heavily reduce its effect and rewards.

...!

An ability common to Primordial Beasts- what these existences used to swallow entire Universes and Cosmos!

Noah's consciousness blazed as he saw the successful replication of this skill due to his Primordial Eye, and he could now shockingly utilize the ability of Primordial Beasts as its use was just...

'Capable of gaining the Essence of Reality that among its uses...is to allow for the easy fusion of laws and Daos!' Noah repeated such a thought to himself as he found it truly grand- and it also showed him just how powerful this Primordial Beasts could get as they continued to devour the vast numbers of Cosmos out there.

They were capable of gaining an essence of the very Reality itself as they were able to devour the very structures born from this Reality and then possibly form Edicts from such an action...among a myriad of other possibilities. Now, Noah could do the same thing because of the Primordial Eye!

'The question is whether I will actually be able to do it...'

Noah's thoughts calmed as he watched the shocking scenes playing before his eyes.

This fell into the lull of slow motion as he saw the terrific draconic-elephant creature bathed in golden white scaled lift its golden trunk as it utilized <Esurient True Devouring> over and over again to devour the Universes dragged by other Primordial Beasts before it.

He watched as this devastating scene happen as he didn't make any actions, knowing whatever action he took would still result in the destruction of the Universes before him!

There were too many powerful Primordial Beasts in the background- not to mention this Draconic-Elephant Primordial Beast that even though Noah could not see the Realm of or know its level...he knew it was a Cosmic Primordial Beast.

He had no confirmation of this as it felt like a mere feeling in his heart, but he knew deep in his soul that such a feeling wasn't a wrong one.

There was an Ender of Reality right before his eyes, and yet it occupied this position in the Primordial Sea like a king as Grand Primordial Beasts dragged Universes to it, many questions being raised by this scene as the answers were too profound or simply devastating to think about!

Why was a Cosmic Beast not freely moving about and even destroying something like the Primordial Empire? What was its level of strength and how was it comparable to Aegon who was in the Cosmic Realm?

'Why...'

Noah had many questions from this fantastical scene he came across, but he also had no answers to it as he then thought about the new ability he had gained.

For power, could he bring himself to begin Devouring genuine Universes and Cosmos?

"..."

The question lingered in his mind as he found no answer!

But...there was an answer for what he could do at this very moment. An answer that involved the vast array of Primordial Beasts all around him, and even the terrifying Draconic-Elephant Cosmic Primordial Beast before his eyes.

He had to know.

He had to know just how powerful such a creature was! But even this task would take second place as the main one would remain to be himself...and Loot.

Loot that would raise his power by another notch and get him closer to the Cosmic Realm as the more he looked around and understood the 'world' around him, he found that he still needed an immense level of strength to overpower everything.

It wasn't enough!

For this...for the sake of countless bundles of loot that he could use to forge thousands of Universes- he would make a dangerous move.

'Well, not too dangerous for me. But my clones...'

Noah's mind buzzed as he had already been making preparations!

—

In the Novus Universe.

Adelaide, Barbatos, Valentina...many of those around Noah were staring in a stupor at 15 bodies that looked exactly like him. It was 5 clones from each of his bodies as a total of 15 floated powerfully in the chaotic void of the Novus Universe!

All 15 were brimming with immense waves of power as currently, an illusory armor made of the profound Nomological Edict of Cessation was wrapping around each of their bodies- multiple layers of it in fact as such an action would take immense droves of mana just to keep active.

Yet Noah was wrapping the essence of Cessation in the form of an armor around all of his clones seamlessly as it showed he was preparing for something grand!

"What exactly are you about to do? This isn't the big final battle you said we would all have to fight right?" Adelaide's voice came out in a stupor as she spoke what was in the mind of all those currently watching this shocking scene.

They didn't think a grand battle where Noah would be fighting the strongest of their enemies would come so soon, and they didn't know what would cause him to armor and utilize all of his clones.

Just what exactly was he going up against!?

Chapter 1252 - Let Loose And Go Wild! I

Noah's clones all felt the raging essence of Cessation all around them as they all smiled and replied in unison towards Adelaide and the others.

"I found the Primordial Sea that is filled with Primordial Beasts...along with one so terrifying that I am not sure if I can even withstand a single strike from it!"

...!

"But...I still want to farm the large number of Primordial Beasts as it is simply too much loot to let go! The only problem is that all of these clones will more than likely be destroyed...with the core question being how long they can move and how much loot they can obtain before they are wiped out."

His clones spoke in unison as they released a terrifying air, the Emperor Penguin and a few others finding themselves shaking when they imagined the scene of something that could actually wipe not just a single one of Noah's bodies, but multiple of them at the same time!

Even Noah was surprised at his words, but he didn't find them to be lies even when he took into account everything he had with him. All of his boosts that had crossed the 1 billion percentage mark, and even the addition of the Primordial Eye and Eye of Ruination that after multiple tests- he found that his clones could replicate the abilities of the eyes at half the capacity as his original body.

Even with all of this...he still felt like he was somehow underestimating the Draconic-Elephant Primordial Beast as he simply could not measure its power.

His main body that was still in the form of Primordial Essence monitored the movements of the Primordial Beasts while his clones got ready, Noah's current focus being the third eye that was closed on the forehead of the Draconic-Elephant Primordial Beast.

It had to be a Primordial Eye- or something like it anyways as it made Noah pose even more questions that had no answer!

If Primordial Beasts were the same as Primordials and could eventually obtain the Primordial Eye, couldn't this beast see the vast rivers of Primordial Essence coming out of this pristine white sea and connecting to all the Cosmos in all directions?

Couldn't it easily locate all the Cosmos within this Reality as it would destroy them, with the Primordial Empire that the Champion of the Reality protected being the only thing left to defend as it truly became a Bastion of Reality? If a Beast that Noah believed to be a Cosmic Primordial Beast wasn't actively moving to follow what its core nature told it...just what exactly did this mean?

Questions and questions, but no answers!

'Well, at a certain point...you just have to act!'

WAA!

Since questions weren't getting him anywhere, he would simply prepare to make his move!

Apart from his clones becoming encased in armors of the Nomological Edict of Cessation, Noah had one last ability that was perfect for mass destruction and death- an ability in the form of a skill tree that at the Universal Filament level, it had become known as the Universal Lich Lord.

Not Arch Lich Ra'Zan or Galactic Nether Lich, but a simple Universal Lich Lord as every single Undead it summoned was at its same level- it truly was Universal!

The reason he called this skill tree perfect for mass destruction and death was of course for its [Unstable Necrotic Ring of Death] that caused a swirling storm of bones filled a mixture of Dao essences to swirl and rotate as a cloud of death around the formed Undead Legion, as well as the skill of [Endless Torment] that increased the damage and area of effect by 10% for each enemy that fell while caught within this swirling Ring of Death, with the upper limit of 1 million percent.

Now, take a second and think of the possibilities of this skill when Noah's new boosts in the hundreds of millions were applied. His AOE parameters that were enhanced by a few hundred million percent! His True Annihilatory Damage that he could now apply to his skills as unless one had an Edict or extremely strong defenses brought about in a unique manner...they couldn't help but fall!

With the hundreds of millions of percentages for the Area of Effect alone, the Unstable Necrotic Ring of Death could cover who knew how many Primordial Beasts and rip them to shreds before the strongest one even reacted.

Yes! Noah was trying to get as many kills as he could before the Draconic-Elephant Primordial Beast reacted, and even then he didn't know how successful he would be. AOE! This was the parameter that made Noah select the Universal Lich Lord skill even if he was unsure how everything would turn out.

But he had many assurances on being able to deal a stellar amount of damage as he could only imagine what an Unstable Necrotic Ring of Death filled with the Nomological Edict of Cessation would do. This wasn't even all as along with all this, he also now had the Resplendent Skill Points that could enhance all skills and skill trees from the cap of 5/5 to now make it 20/20!

And then of course there was the fact that after Noah raised the skill tree to the Universal Filament Realm, 4 new skills bloomed under the Universal Lich Lord.

When he thought about these, all 15 of Noah's clones that were getting ready couldn't help but smile devilishly!

Four new abilities under the Universal Lich Lord aptly named [Universe of Blood and Bones], [Universal Undead Legion], [Bombers of Nihilism], and [Will of the Crypt King]

Abilities that further elevated this pristine skill tree as for the purposes of the Area of Effect it carried...it couldn't be beaten by anything else. When he paired this with something like Endless Rays of Time?

THRUM!

His brilliant eyes could wait no longer as after accounting for everything, his clones began to shine with a glorious incandescent light of teleportation- where Noah planned to distribute them across the vast stretches of the Primordial Sea that he had crossed to cover the most distance!

His 15 clones looked at each other as they bellowed out in unison, their voices shocking the surrounding space and reverberating in the ears of his subordinates.

"FOR LOOT!"

A Unique Battlecry resounded out!

Chapter 1253 - Let Loose And Go Wild! II

Noah's resounding proclamation reverberated across the Novus Universe as the Armors of Cessation on the bodies of the 15 clones shone with glory.

Among the 15 clones, there were 3 leading ones that had already begun to circulate the mana in the way required to summon the Universal Lich Lord, with Noah planning on putting these three clones furthest from each other as a Necrotic Ring of Death would bloom at three different spots in the Primordial Sea!

Just like his three main bodies could each summon the maximum cap of 5 clones from the Blood Lord skill tree, each of the bodies of their clones could also call forth the Universal Lich Lord. This meant that he could call out a maximum of three Universal Lich Lords from the clones of Noah, Alexander, and the Universal Body.

Everything was accounted for. Now...he wanted to experience just how terrifying the terror of a Cosmic Primordial Beast would be.

"Let's go!"

Brilliance shone as his clones flashed away!

At the same time, his main body didn't want to be anywhere when everything went down as he had already pulled away by billions of light years, silently teleporting himself back into his Infinite Cosmos that was countless light years away.

The tides of destiny churned as an irrevocable decision was taken. The events to occur hereafter occurred in the span of mere seconds, but due to the strength and power of existences involved...to them, it was akin to something stretched out in minutes!

Time was perceived much differently for existences at this level!

Noah himself could compute countless millions of thoughts per second, and he could take many actions within this same second as with his hundreds of millions of percentages in Cast and Attack Speed, he knew that his clones would call forth the Universal Lich Lords and all other prepared skills before even a fraction of a millisecond.

That was one thousandth of a second!

FLASH.

His main body successfully returned to the Infinite Cosmos as he breathed a sigh of relief, his mind fully connected to all of his clones as at this moment...the time to let loose and spam countless amounts of skills had come.

The enemy was strong. Noah knew he had no chance of even scratching it! He had seen Aegon as he knew how he would face against him, and he had seen the Draconic-Elephant Primordial Beast that was most definitely a Cosmic Primordial Beast as the feeling this creature gave him...was even more oppressive than the very Champion of this Reality!

—

The 15 Clones moved in unison.

OONG!

There were waves of essence undulating over their armors of Cessation ever so slightly, Noah's immense consciousness moving his clones expertly as he instantly teleported them to 15 different locations across the Primordial Sea that were thousands of billions of light years apart from each other.

Uniquely when one looked at his clones, they would see them holding the demeanor and face of someone profound- his figure being that closely marching the image of a certain Great Conqueror!

Noah's clones held the exact same image of Aegon as they appeared in the pristine white sea of calm and vast Primordial Essence.

All around these clones that were stretched out for hundreds of billions of light years, Noah saw the same glorious scene.

Majestic and robust looking Beasts that seemed to be a combination of the strongest creatures, most of them looking like a mixture of magnificent dragons and Phoenixes that were swimming proudly within this sea!

Others looked like deep creatures of the sea with even larger bodies, each of these Primordial Beasts having their own variations as the one singular thing that remained the same was their golden white fur or scales that caused one to feel like they were sacred beings.

The vast majority of them were Lesser Primordial Beasts, with Grand ones walking around like kings as amidst all of this...Noah's clones appeared.

DING!

Not even one thousandth of a second had passed since they appeared, but from the 15 clones, three that represented the main body of Noah, Alexander, and the Universal Body all completed the casting of [Universal Lich Lord] as the base essence used to call this skill was Cessation!

Nearly instantaneously, a runic magic circle that called out a terrifying existence bloomed.

The size of the summoned creature alone spanned a few thousand light years in size, its body being adorned in an obsidian robe as the head was revealed to be a devilish skeleton enthroned with a crown of pristine white bones that held burning crimson flames at the very top.

Its eye sockets blazed with crimson flames of Cessation as within its hands, a bone staff made purely of the essence of Nomological Edict could be seen.

The appearance of such a creature played out three times in separate locations that were thousands of billions of light years apart, but their voices resonated the same as the moment when the vast array of Primordial Beasts felt the change around them and their intrusion was noticed, three voices overlapped across the Primordial Sea!

"Universal Undead Legion!"

BZZZT!

A shocking collection of essence raged out, the endless mana reserves of a certain being gushing out countless units of mana and exchanging them for the Nomological Edict of Cessation as all of the countless summoned Undead that would be called to form a Legion- a Legion that would instantly activate the swirling passive of death that was the Unstable Necrotic Ring of Death...all of them would have Cessation as their fuel as all the damage they dealt would be from this Edict!

"..."

In the Novus Universe of the Infinite Cosmos, Noah's main bodies watched these scenes in slow motion as in the Origin of the Universal Body that had reached over 10,000 Universes...100 of them began to burn.

Killing was about to begin, but no killing would be done without the activation of the Cosmic Dao of Loot!

Chapter 1254 - Let Loose And Go Wild! III

Noah felt the splendor of the color of gold spread through his Origin the moment 100 Splendiferous Universes began to burn.

This essence then stretched out to his two main Human bodies as it didn't just cover the 5 clones stemming from the Universal Body, but also the 10 from his two other bodies simultaneously!

All 15 clones in the Primordial Sea began to burn with the light of the Cosmic Dao of Loot on top of everything else as all deaths that stemmed from them and the skills they cast would fall under the effects of 1000% Increased Loot Quantity and 100% Increased Loot Rarity modifiers!

Such an action coincided simultaneously as the effects of the newly gained [Universal Undead Legion] played out.

The skill of [Universal Undead Legion] allowed the Universal Lich Lord to call forth 100 Abyssal Undead at the Universal Filament level and millions of Undead at the Universal Level!

They came forth like an erupting tide as the bone staff made from the Nomological Edict of Cessation shone in one instant and a millisecond later, 100 titanous varieties of Abyssal Undead and millions of Universal Undead bloomed pervasively, a crimson cloud of blood and bones beginning to form soon after as this cloud- this Necrotic Ring of Death...it managed to cover over 10 billion light years.

Such a vast space covered depended on the power of the Legion, and also the second skill that Noah had gained when this skill tree achieved the Universal Filament level! It was the [Universe of Blood and Bones] skill.

[Universe of Blood and Bones] :: The Unstable Necrotic Ring of Death is turned into a chaotic swirling universe of blood and bones that increases the AOE by 1,000,000% and every single death increases the Damage further by 50%.

Even more AOE boosts on top of what Noah already had. And this was before any kills occurred that would constantly expand the Unstable Necrotic Ring of Death!

Now, what mattered was how many Primordial Beasts he could cover within this vast space, and how many more would be reached as he was already starting to spam [Endless Rays of Time] to spread out all around him and churn for as many billions of light years as possible.

The reacting Primordial Beasts varied in size, but some were as large as a few thousand light years to a few hundred thousand as they reached the size of Galaxies, and the Grand Primordial Beasts even neared half or one fourth the sizes of Universes as the Draconic-Elephant Primordial Beast was ten times the size of an average Universe.

When Noah had three Universal Lich Lords summoned and they called forth their Undead Legions and caused the formation of three Necrotic Rings of Death, he saw that the initial coverage of 10 Billion Light years included over 20 Lesser Primordial Beasts and at least one or two Grand ones within it!

But apart from these three Universal Lich Lords and their Legions, there were 12 clones that had appeared in different parts of the Primordial Sea as their bodies had already begun to bloom with countless spammed skills.

[Endless Rays of Time], [Fireball], [Sword of Ruination], [Primordial Wheel of Extinction]...all of the attack skills he could spam.

Along with this, the essence of the Nomological Edict of Cessation was used by another Clone to activate the Absolute Skill of the Empowered Seven Deadly Sins as in another millisecond, seven terrifying figures thousands of light years large bloomed, roaring out madly as they flew out in different directions!

All the Clones also utilized the Wielder of Chronos Skill Tree as Temporal Halts were freely entrenched for billions of light years.

On top of countless Endless Rays of Time, Galactic balls of flames, Primordial Wheels, and a whole lot more stellar skills spreading out in a circular motion around all of Noah's clones, the final cast for them in this short period of time came as the hazy crimson right eye lit up brightly.

Even though it was half the efficacy, the clones could still borrow the power from Noah's Eye of Ruination as in the next instant...[True Annihilatory Flames of Ruination] churned from this eye madly!

They churned as they went on to cover billions of Light Years in diameter as they latched on to any Primordial Beasts they could find.

All of this...happened in about a few milliseconds.

RUUUMBLE!

As the attacks spread out, the Primordial Beasts finally reacted as it was too late, all of the Lesser Primordial Beasts feeling their defenses ripped apart by a ridiculous amount of skills and enormous Seven Deadly Sins ripping them apart, as well as their movements being further delayed by the essence of Chronos from the multiple Temporal Halts. But the most devastating attack was the swirling mass of death that had bloomed at three different spots!

The moment this swirling mass of death began to rotate, the wings and musculature of all Lesser Primordial Beasts were ripped apart as only the bodies of the Grand Primordial Beasts lit up with immense light, their eyes releasing a wrathful light towards the Undead Legions as they turned into blurs of light while thundering forward.

Grand Primordial Beasts! They were powerful in their own right as these beings were not instantly annihilated even with the raging essence of the Nomological Edict of Cessation raging around them!

The shocking battle fully unfolded as just a few milliseconds after it started, Noah counted over 110 Lesser Primordial Beasts being shredded into nothingness.

Ah!

110!

Just this mere number of dead Primordial Beasts was enough to make this whole venture worth it from the obscene amount of loot Noah could feel being placed in his Expansive Space already, but he was just getting started!

The moment the milliseconds that caused his attacks to bloom passed, the eyes of a certain creature tens of thousands of billions of light years away in the depths of the Primordial Sea blazed with light.

Noah had purposefully chosen to be as far away from this beast as possible, and yet its eyes opened the moment his attacks began as they simultaneously gazed at 15 different directions.

Not two eyes, but three of them as a ridiculously white gold eye on the forehead of the Draconic-Elephant Primordial Beast was opened wildly, the other two eyes below it releasing a brilliant golden radiance as in an instant, a white light flashed over the body of this majestic creature!

Its body shook as a moment later, 14 figures of exact size and ferocity that showed the same Draconic-Elephant Primordial Beast appeared, each of their eyes flashing coldly as they turned into streaks of light that shot towards different directions.

Simultaneously towards the 15 Clones that Noah had spread out!

The terror of a Cosmic Primordial Beast- an Ender of Reality....it was now about to be experienced by Noah first hand as he waited for it expectantly!

Chapter 1255 - Utterly Horrific! I

It was hard to say if there were many existences in the vast Parallel Realities who had as many cards to play as Noah did.

He thought so himself as he had so many things in his arsenal that he could choose to do things in many different ways! For this raid in the Primordial Sea for example. He had deployed many things, but he still had not even initiated [Plot Armor].

He hadn't yet called upon this unique ability under the Protagonist Trait to grant him an hour of invincibility as he had to first find out just how much he would fare against this Cosmic Primordial Beast with the strength of his Clones alone.

He wanted to see if he could stand this beast for even a few milliseconds if not a few seconds, where even the death of his clones was welcome as such a thing didn't matter to him! He could forge a Clone whenever one died, and he could replenish any of those killed in an instant!

After he ascertained what he wanted, the next stage of Loot collection would commence where he would send out his clones once more...but now they would just be invincible.

It was a very balanced state of Reality that Noah couldn't wait to see unfold!

But before this, there was experiencing the power of the Cosmic Primordial Beast.

And experience it he did as the moment he cast the first wave of attacks, the Draconic-Elephant Primordial Beast moved.

It instantly split to become 15 Beasts as their bodies released majestic auras of ancientness, the enormous bodies of this Primordial Beast that were 1000 Billion Light years long flashing and disappearing!

An instant later, the terrific Draconic-Elephant Primordial Beast appeared grandly above all of the bodies of Noah's clones, time seemingly coming to a stop.

'Holy shit...' These were the two thoughts that came into Noah's mind. It was fine to gaze upon this creature from afar, but when it stood right above you and rained down its oppressive pressure...one truly felt its power and terror!

Noah had enhanced and elevated himself so much that he had rarely if ever faced a feeling of oppression, and yet he felt it at this moment as his clones raised their eyes to meet the glorious gaze of the three eyes of the Draconic-Elephant Primordial Beast.

Two shining wondrously gold and filled with cold light, and the third one that was situated on its forehead...it was utterly pristine as Noah saw its structure was different from the Primordial Eye he knew of.

Mostly white gold in color, the third eye was shockingly inscribed with the symbols of countless golden swords etched in a circular formation around the iris, these endless golden swords seemingly drawing Noah in and releasing a dangerous hum as he shockingly found just from gazing at it...his armor of Cessation fluctuated as it actually became badly damaged!

Just from the humming of the immeasurable swords etched into the third eye of the Draconic-Elephant Primordial Beast as due to its sheer size of 1000 Billion light Years, this eye was nearly as large as a Universe as Noah could see its details very clearly.

'What kind of an Eye is that? It seems like a Primordial Eye...but almost like it's a different version of it?'

THUMP!

Noah's heart shook as even amidst this shocking intrusion of the Draconic-Elephant Primordial Beast, his mind could still think with clarity as he could think millions of thousands in less than a millisecond- and his main bodies analyzed everything he saw as if they were watching a film that was slowly playing out in real time.

Noah's focus at this moment became this glorious looking eye that held countless swirling golden swords etched within as a fantastical thought arose in his mind!

'Could there actually be different kinds of Primordial Eyes? Is the one I have managed to obtain a base version of it? Is...'

His mind bloomed with questions as he studied the 15 Draconic-Elephant Primordial Beasts appearing before all his clones not with fear, but with wild interest as he wanted to know more about it.

BZZZT!

His Armor of Cessation truly kept fluctuating and fluttering like a weak thin film of paper just from the humming of the unique Primordial Eye on this beast, and that was before it made a move! A millisecond later, it did just that as its 15 different bodies all conducted different actions.

In one corner of the Primordial Sea, The Draconic-Elephant Primordial Beast used the pure force of its body as one of its flat-shaped elephantine limbs rained down towards him as it was akin to something the size of a Universe crashing down!

Its eyes held utter coldness and regality as this strike came at a speed Noah had yet to experience from any enemy.

The space around this clone slowed down.

His body flashed with multicolored light as his Movement Speed boosts by the hundreds of millions did their work.

SHAA!

Turning into a multicolored flash of light that even those that had glimpsed Edicts couldn't follow, his clone instantly flashed outside of the range of this golden scaled elephantine limb as he traversed the distance of a Universe in but an instant!

Or...he should have.

WAAA!

His eyes opened wide as even though he should have utterly evaded the limb smashing down towards him as he even saw the edges of it, he somehow found it to still be chasing him as it shockingly...it was now a mere inch away from his eyes.

THUMP!

The beat of his heart resounded throughout his body as Noah watched in wonder and great interest the speed of this beast easily surpassing his, where he faced the treatment that the Daolords of the House of Stormdust felt as before he could react, he just found himself to still be in the center of attack of the universal sized limb of the Draconic-Elephant Primordial Beast.

It was a mere blur of utter power as it smashed onto him whether he liked it or not.

The impact...was indescribable!

Chapter 1256 - Utterly Horrific! II

BOOOM...BZZZT!

The elephantine limb smashed with such utter ferocity and power that the armor of Cessation- the armor of a Nomological Edict that erased anything it came across from the Annihilatory True Damage it could deal...this armor faded away by 95% at the point of impact!

Even though he should have been protected, an unknown energy seemed to have somehow crossed through the defenses of the armor, Noah finding his body mangled and nearly torn into a meat paste a millisecond later.

But his percentages in the Health Regeneration churned.

WAA!

Torn limbs and muscles regrew constantly...as they were torn down a millisecond later from the continuing pressure of the limb descending down. The nearly shattered armor of Cessation received an influx of mana as it was constantly replenished, only to have it reduced and nearly broken in another millisecond!

Cessation truly was not erasing away the body or essence of this creature that wrapped around its limbs, and the essence of this edict was instead being reduced constantly as it gave Noah abundant information for what type of power this creature had.

Either an Edict or multiple Edicts that it had gained from fusing together Daos and laws forcefully from the Essence of Reality it obtained from devouring countless Cosmos, or an even more unique power that could withstand True Annihilatory Damage!

OOM!

But Noah's analysis would have to come to an end an instant later as the third eye filled with countless ancient golden swords from the Draconic-Elephant Primordial Beast released a bright light of utter arrogance.

The moment it shone, white flames bloomed at the point of impact between his Clone and the elephantine limb, these flames latching onto the Armor of Cessation in fervor as Noah gloriously observed them to actually consume the essence that was capable of erasing anything!

The moment the armor of Cessation entirely faded around Noah...the golden scales of the Draconic-Elephant Primordial Beast touched his fair skin.

His fantastical percentages of Health Regeneration, the vast number of percentages in All Parameters and defenses...none of them could withstand the might of this single strike from an Ender of Reality as Noah's senses watched on as the Clone was quite literally disinterested in the next millisecond.

"..."

A fraction of a second as if there was a Daolord Nearby watching, they wouldn't have even seen the brief struggle that Noah's Edict of Cessation put up and his body fully regenerating his health from waves of destructive energies from the Draconic-Elephant Primordial Beast- to them, they would have just seen the golden scaled limbs of the powerful Beast smashing down as Noah's Clone was disintegrated right after!

ROAAAAAAR!

Its golden trunk bellowed upwards thereafter, its 4 glimmering white-gold tusks shining dangerously as they released waves of undulating white light that covered the [Endless Rays of Time] and the [True Annihilatory Flames of Ruination] that this Clone had cast- rays and crimson flames that were hitting the scales of this beast and showing no effect whatsoever.

The undulations of white light released from its 4 tusks wondrously engulfed the Endless Rays of Time and the Crimson flames that had an effect of True Annihilatory Damage and caused them to disappear as if they never existed, this area of the Primordial Sea becoming calm after less than half a second.

Dozens of Lesser Primordial Beasts had died from this Clone that had appeared in this area, and the Clone had perished just as quickly!

2 Grand Primordial Beast suffered heavy injuries as they had yet to fall, their heads bowing down in fervor towards the Cosmic Beast that had appeared above them.

The eyes of this Draconic-Elephant Primordial Beast flashed coldly as it disappeared soon after.

"..."

"Interesting!" Far from the battle, the eyes of Noah's Universal Body blazed with interest as he wanted to see more. After getting the first test of the creature's terrifying power, Noah's thoughts began to move rapidly as his two other bodies made a move.

While his Universal Body focused on the scene currently occurring throughout the Primordial Sea, the bodies of Alexander and Noah were in the Ruination Realm as their job was to study the effects of the percentage boosts, Daos, Edicts, and skill effects as they would theorize how to better move!

"Let's upgrade a few things now and see if we can make any changes against this beast's power..."

Once more, the thing to remember was that time was moving in the span of milliseconds currently, and for Noah's two bodies in the Ruination Realm that had the time ratio of 1:1000- 1 millisecond outside was 1,000 milliseconds for them!

They could do many things in this period of time as Noah's thoughts moved fast, his eyes resting on a particular section of his Status Panel.

[Resplendent Skill Points] :: The user is able to open up multiple paths of evolution for their skills and abilities through using Skill Points. This is the unique quantified essence in the form of skill points that has been further elevated into Resplendent Skill Points, allowing the user to enhance skill and skill trees to the maximum cap of 20 instead of 5. The Cost of Skill Creation is reduced with Resplendent Skill Points as the abilities born from it are even more unique. Abilities enhanced by Resplendent Skill Points will also have their own unique changes depending on their nature. Current Resplendent Skill Points: 830 Billion

He had yet to view what unique changes these new types of skill points would bring, and he would look at the now first hand as in the next moment, he gave the command add the Resplendent Skill Points to the [Universal Lich Lord] skill tree, [Cosmic Dao Integration and Combinations], [Wielder of Chronos], [Blood Lord], and even [Versatile Farmer] while at it!

OOM!

A golden light blessed the section that outlined his skill trees in his status panel.

Skill trees and all their attached skills that used to shine with blue light now had their names shining in glorious gold.

Noah's two bodies quickly perused the new versions of the skills that had increased their cap to 20/20, their eyes shining brilliantly as they saw some skills simply changed to vastly boost what they initially did, and other skills that changed entirely and gained shocking effects!

For example, take the recently introduced [Universal Undead Legion] and [Universe of Blood and Bones]

[Universal Undead Legion](5/5) allowed the Universal Lich Lord to call forth 100 Abyssal Undead at the Universal Filament level and millions of Undead at the Universal Level while the effects of [Universe of Blood and Bones] were as followed.

[Universe of Blood and Bones](5/5) :: Unstable Necrotic Ring of Death is turned into a chaotic swirling universe of blood and bones that increases the AOE by 1,000,000% and every single death increases the Damage further by 50%.

Now after the addition of Resplendent Skill Points and their enhancements to the cap of 20/20, the difference was akin to night and day!

[Universal Undead Legion] (20/20) :: The first 1,000 Undead under the banner of the Universal Lich Lord will be at the same level, with all who follow being a level below it. The Undead Legion is utterly faithful to the Universal Lich Lord as all of their Parameters are increased by 1,000,000%. All Summoned Undead also gain the Inherent Ability of || Resplendence ||, granting them double their power at all times as they give off the constant effects of [Unusual Beauty] and [Majesty].

[Universe of Blood and Bones](20/20) :: The Unstable Necrotic Ring of Death is turned into a chaotic swirling universe of blood and bones that increases the AOE by 10,000,000%, and every single death increases the Damage further by 100%. There is no cap to how far the Universe of Blood and Bones can spread nor how much damage can be obtained, with the stacks of AOE and Damage having a time limit of 30 seconds.

From the loot obtained through the Cosmic Dao of Loot, even more surprises were waiting for Noah!

Chapter 1257 - [Bonus] Utterly Horrific! III

The skills elevated by the Resplendent Skill Points were very unique, with some like the [Universe of Blood and Bones] gaining a ten times increase in a parameter, and then you had others like the [Universal Undead Legion] that gained its own unique effects!

This uniqueness this time was the supposed gain of an Inherent Ability of || Resplendence || that granted all summoned undead the constant effects of [Unusual Beauty] and [Majesty] on top of doubling their power.

When Noah's two bodies in the Ruination Realm looked at all the skills, they saw that multiple of them from differing skill trees had gained || Resplendence || randomly!

One of these stemmed from the Blood Lord Skill Tree- an ability among the 4 that came when Noah elevated this skill tree to the Universal Filament level.

[Universal Blood Clones](20/20) :: The number of summonable Blood Clones has doubled as the user can call upon 10 at the same time. All Universal Blood Clones are capable of displaying 150% of the power of the main body as at their point of death, they release an explosive force equivalent to 100 shattering Universes. All Universal Blood Clones also gain the Inherent Ability of || Resplendence ||, granting them double their power at all times as they give off the constant effects of [Unusual Beauty] and [Majesty].

It was a skill of pure wonder as not only were Noah's clones enhanced from being able to display 120% of his power to 150%, but under the unique || Resplendence || Inherent Ability, they could further display double their power.

"Beautiful."

It truly was! So utterly beautiful that Noah's two main bodies shone brightly as their essence churned, calling forth 5 more clones each, the body of Alexander calling out an extra sixth after the clone that was just killed by a single limb from the Draconic-Elephant Primordial Beast as all of these clones began to blaze with armors of Cessation.

At the same time, Noah couldn't help but look at another skill that had gained the || Resplendence || Inherent Ability even though it didn't at all pertain to the current battle. It was the ability of [Five Star Chef] from the Versatile Farmer skill tree!

[Five Star Chef](20/20) :: A farmer is nothing without the skill of a great chef. Any meal prepared by the user will have the splendor and taste of pure happiness while enhancing the essence contained in the ingredients by more than twenty times. All prepared meals temporarily grant +100,000% to Realm Progression, +100,000% to Laws and Dao Comprehension and Assimilation, and +100,000% to All Parameters for the next 24 hours. All meals gain the unique taste of | | Resplendence | |, being capable of tasting so good that even those at the Cosmic Realm can be brought to tears as they are temporarily reminded of their happiest memories.

"..."

It was unique to say the least as Noah only gave it a millisecond read through before he left it for later, where he told himself he had to try whatever he made next first before anyone else.

But back to the stellar battle...Noah's Universal Body also glimmered as 5 more Universal Blood Clones budded from him, bringing the total number of clones he could utilize to 30!

They wouldn't be able to make any more extra casts of [Universal Lich Lord] as it would simply unsummon one of the old ones to call forth a new one, but they could still use all of Noah's skill trees that included the ones Noah had enhanced with Resplendent Skill Points and those he was continuing to enhance now.

Noah's eyes shone with the light of ingenuity as he spoke out.

"Go forth."

The 16 newly budding clones were fully encased in new armors of Cessation that shone with an even brighter glint than the first 15 Noah had sent out, their bodies being wrapped with a spatial essence as Noah teleported them to other regions within the Primordial Sea that he had crossed!

This...would be his second wave of attacks before the first one even ended as these clones had battle power close to three times as powerful if not more!

It took Noah mere milliseconds in the Ruination Realm to enhance and analyze the use of Resplendent Skill Points as in the outside 'world', barely any time had even passed. The newly called upon 16 Universal Blood Clones faded away as they would appear in multiple other parts of the Primordial Sea surrounded by terrifying Primordial Beasts, but shocking scenes were currently playing out for the other 14 clones as they faced differing attacks from the stupendous Draconic Elephant Primordial Beast!

An exact replica of the Draconic-Elephant Primordial Beast had appeared above one of the Clones that had called forth the Universal Lich Lord.

The Eye on its forehead etched with countless golden swords took in everything across the billions of light years as it gazed at the propagating Necrotic Ring of Death that was constantly expanding by a few billion light years every single millisecond. At such a scene, the third eye of the Draconic-Elephant Primordial Beast flashed once more.

The etched swords within this eye rotated as if they were rows of circles moving, lighting up brightly as in the next instant, Noah and the Universal Lich Lord beside him saw the appearance of countless ancient golden swords that covered over a thousand billion light years- as these endless swords that had the essence of a golden Edict that was different from the white flames of another Edict that had killed

Noah's first clone went on to cover everything in their sight...and they uncontrollably pierced everything an instant later!

Pierced everything as Noah's consciousness that was connected to this clone and Universal Lich Lord was shredded apart into blackness the moment the ancient golden sword descended at a speed far faster than even how fast he could move with his Movement and Attack Speed.

The White Flames that were born from its elephantine limb showed the essence of a terrifying Edict. Now, countless golden swords called forth by its horrifically beautiful eye carried the essence of yet another Edict.

Only a few milliseconds had passed...and Noah had already discerned this Primordial Beast to have two Edicts under its belt as this was just the tip of the iceberg!

Chapter 1258 - An Unstoppable Force! I

As Noah carried out actions that would carry irrevocable consequences, the tides of destiny continued to flow around the Primordial Empire.

Within the Havenbreaker Cosmos.

The figure of Havenbreaker herself was situated upon her throne as before her, multiple Primal Crystals sending out and receiving a myriad of commands rotated.

Her expression was that of concentration that she didn't even notice when a silent flash of spatial essence flashed into the throne room, but this had more to do with the person who teleported in than herself!

"You all are competing again."

WAA!

The resounding voice of a man with utterly black hair and a regal deposition resounded out, his wide and built figure making one think of a peak human figure as Havenbreaker turned her eyes with surprise towards the calm figure of Aegon!

He strolled in while glancing at the Primal Crystals before Havenbreaker, the eyes of this golden haired woman rising as she replied coolly.

"Springforge began flaming the competitive spirit when she began attacking Stormdust. I'm just striking the iron while it's hot and taking a bite myself. It follows the rules of our vast Empire, does it not?"

Her eyes were raised as she spoke of the Writs of Challenges that covered 100 Cosmos as taking a mere bite, and it was truly so as the benefits of controlling this many Cosmos were extremely vast!

Primordial Hearts were limited, the only one who seemingly had an endless amount of them being Aegon. For others, they had to fully rely on the tens of billions of Marks of Antiquity they obtained daily in a passive fashion from their influence over multiple Cosmos.

The Primordial Empire had constantly expanded over the years, with Aegon always being capable of finding new Cosmos and bringing them over as from the Rulers of three different houses being able to

gain enough Marks of Antiquity to form a Universe every week, now they managed to do such a thing daily!

Every single day, they could passively form a Splendiferous Universe in the few recent years as when one took into account how many years these existences could live, a million days meant 1 million Splendiferous Universes.

So of course they had to fight for more Cosmos to put under them...or fight the Primordial Beasts that were 'rare' to find!

Aegon appeared beside her calmly as he nodded.

"No, not against the rules." His voice was distant as he seemed to be thinking of something from too long ago. "But...I always hoped we could all go back to being how we were in the past. Now, it is just a mere dream."

His words caught Havenbreaker by surprise as she seemed to be taken back to a long time ago! A time when she, Springforge, Stormdust, and Aegon at the lead all left their Cosmos to explore what lay out there!

They were filled with a sense of adventure and life as they thought the whole Ruination Sea was theirs to conquer.

They were....

'Mere memories of the past!' Havenbreaker thought so as she never became angry, but she was taken out of her stupor when Aegon reached out his hand.

"No matter. Come with me, I have a little surprise for you."

While dripping with power and elegance, even Havenbreaker couldn't help but unconsciously grasp onto his hand, the two of them becoming wrapped in a spatial light as they disappeared!

SHAA!

Their figures re-materialized not too far away from the Primordial Empire, Havenbreaker finding herself standing before the scene of a glimmering Cosmos floating alone in the Ruination Sea.

"I wanted to apologize for before, so I got you this gift."

...!

Aegon's voice resounded out calmly as he spoke such shocking words! This being truly went ahead and brought over a Cosmos, offering it as a gift to his woman as he put many men to shame!

Who could say they had given their significant other something so grand?!

Havenbreaker looked at this Cosmos as she smiled, jumping into the strong chest of Aegon as she spoke with a barely audible voice.

"You didn't have to do that..." She held the smile of a maiden in love, her eyes raising to meet the endless eyes of Aegon that one could get lost in if they stared for too long.

She knew he wasn't the type to freely express his emotions, so just this gesture alone showed her that he was truly thinking about her!

So she buried her head deeper into his chest as she nearly forgot about everything.

About the fact that she nearly killed her daughter just for information. About the fact that she let another man apart from the one she was tightly holding on to cross boundaries he shouldn't have crossed!

About the fact of forming alliances others wouldn't even dare imagine.

None of these things could be seen here- only the scene of a man gifting his woman a Cosmos for a gift as the tides of destiny continued to churn.

Back in the vibrant Primordial Sea where barely a few milliseconds had passed since a battle began.

When Noah's second Clone was killed, the eyes of the Draconic-Elephant Primordial Beast flashed as it wondrously sensed the appearance of Noah's 16 newly advanced Universal Blood Clones appearing through other regions of the Primordial Sea.

The actions that Noah was taking were so extremely fast paced due to all boosts he had that we have to currently rely on the measurement of time in milliseconds more than seconds, and yet the Draconic-Elephant Primordial Beast could keep up and even exceed them with ease as whatever development occurred, it very quickly reacted to it!

Its eyes were impassive as a millisecond after it sensed the intrusion of 16 new existences, its 15 Bodies terrifyingly flashed with a white light as they ridiculously budded forth another 15 Draconic-Elephant Primordial Beasts, 16 of them flashing towards the direction of the auras of the newly appearing 16 Universal Blood Clones.

This flash of light....was yet another Edict!

Chapter 1259 - An Unstoppable Force! II

Noah saw the scene of the Cosmic Primordial Beast splitting its bodies apart with ease from the 13 Clones that had yet to perish but were each facing a Draconic-Elephant Primordial Beast, and he saw this flash of white light that shockingly represented another Edict as that made it 3 so far!

'The hell kind of Edict is that? Does it allow you to clone yourself indefinitely?' Noah's heart wasn't frightened in the least bit as he became even more excited, wanting to know all the possibilities out there as he wanted to form many of his own edicts!

So far, three of his clones had perished as this wasn't happening in an order, this was just being described in such a manner! But truthfully, all of the 15 initial clones were being attacked simultaneously as with little variation...the timing of their impact with the Draconic-Elephant Primordial Beast was at the same time.

Another Clone had this Cosmic Beast appear above it as from its trunk, the same white flames that had appeared on its elephantine limb to shatter the armor of Cessation on the first Clone- these same flames shot out from its golden white trunk as they scorched the very Primordial Sea.

Before they could even reach Noah, his Clone already felt the heat as this time around, the Clone was fast enough as he gazed up and used the Eye of Ruination!

One of the many features of this eye allowed one to absorb the attacks sent towards them as they could even reflect them against their enemy with even higher percentages of True Annihilatory Damage.

VOOOM!

Gloriously, Noah's right eye undulated with crimson light as its many rings rose to illuminate the white sea, the raging white flames sundered down from the trunk of the Draconic-Elephant Primordial Beast being sucked towards it in a stellar fashion.

But...

'Now that's just ridiculous...' Noah found himself stupefied at the sheer power of these white flames as they seemed to contain even more grand percentages of True Annihilatory Damage, the Eye of Ruination that could be used at half efficiency by his clones drawing in the flames but before they could even redirect them...

CRACK!

The crimson rings within the Eye of Ruination began to shatter.

Before the Clone could even fully absorb the coming attack and redirect it, they couldn't contain it as the Eye of Ruination fractured and in the next millisecond...the entire body of the Clone became engulfed in white flames as he disappeared!

"Beautiful..."

In the Infinite Cosmos, Noah's Universal Body found his actual Eye of Ruination bleeding red, the unique connection and power of the Eye actually causing a portion of this damage- no matter how minuscule, to somehow travel to him.

It showed just how terrifying the Edict that made the white flames the Draconic-Elephant Primordial Beast shoot out were!

But this was the experience Noah had with the first 15 Initial Clones he sent out. Within a few milliseconds of each other...they perished in one way or another from the Cosmic Primordial Beast that appeared above them.

After the initial deaths of 110 Primordial Beasts from the surprise attack, Noah also saw that the attacks of the Clones and especially the Unstable Necrotic Rings of Death that stemmed from the three Universal Lich Lords before they were decimated along with his clones...another 55 Primordial Beasts fell, this number actually including 2 Grand ones!

Grand Primordial Beasts were extremely hard to kill, with Noah finding some of them entirely shrugging off the swirling Universe of blood and bones caused by the Unstable Necrotic Ring of Death, with a few others being affected.

It showed a range in the strength of Grand Primordial Beasts as from his calculations, the more powerful ones that could shrug off an attack with the Edict of Cessation should have ridiculously obtained an Edict of their own or have another unique power!

But from among the weaker Grand Primordial Beasts that didn't have any such power, Noah's two Clones and their Universal Lich Lords were able to work together to layer True Annihilatory Flames of Ruination and spamming attacks filled with the Edict of Cessation along with the constantly swirling Necrotic Ring of Death to actually rip apart a Grand Primordial Beast each before they were wiped out by the Draconic-Elephant Primordial Beast.

This made it a grand total of 163 Lesser Primordial Beasts and 2 Grand Primordial Beasts that had fallen under Noah's hands! The loot for all of these creatures were already within Noah's Expansive Space due to the [Loot Collector] passive, such a skill being truly useful right now as if this Loot was just laying outside in the Primordial Sea when the Beasts were wiped out...he probably would not be able to get them.

'But the results so far are astounding...' even amidst this situation where Noah was absolutely getting stomped on for the first time in a while, he held a brilliant smile because the gains were already so much and he lost nothing!

Now, he wanted to go above that as after he found out the shocking truth that he could actually not even withstand the might of an Ender of Reality for even a few milliseconds...it was time for the next stage.

THRUM!

Essence waved madly around his Universal Body and his other two bodies had already produced other clones after the loss of 14 in a matter of milliseconds, Noah's vast consciousness observing coolly as figures of the Draconic-Elephant Primordial Beast appeared relentlessly above the 16 clones he just sent as his eyes flashed...and he spoke out calmly.

"Plot Armor."

...!

A ridiculous skill of invincibility for a whole hour!

When the Primordial was called onto the past Primordial Cosmos that was undergoing the invasion of the Great Usurper, she had called the effects of Deus Ex Machina an ability that could induce changes in reality.

This was what drew her interest with Noah, but she had only given him a used up Primordial Heart that barely gave him a few Splendiferous Universes.

Now, Noah had cast another reality bending ability from the Trait of Protagonist that would cause one to question what was his strongest Trait, [Plot Armor] spreading out to cover the 16 Clones about to

face disastrous attacks from the Draconic-Elephant Primordial Beast as 14 new clones had already been formed and were teleporting into this same Battlefield.

'Now...how will Invincibility be dealt with?!' Noah's eyes watched on with excitement as he wanted to dig more secrets out from this creature....and he would now have an hour to do so!

Chapter 1260 - How Do You Beat Invincibility? I

An hour of Plot Armor! An hour of Invincibility!

In the glimmering white Primordial Sea, Noah's 16 Universal Blood Clones became wrapped in a unique energy as from three of them, the call towards the Universal Lich Lord reverberated out.

From the very sea itself, dark Runic magic circles bloomed as the terrifying Lich erupted out, this Lich smashing down his Death Staff made of The Nomological Edict of Cessation as an Undead Legion sprouted out and began to rage with a terrifying Necrotic Ring of Death.

The Undead Legion had a seemingly different feel to them as most of them held regal bone crowns and showed off a hint of majesty, the effects of || Resplendence || showing themselves clearly!

The goal as always remained to get the most loot possible, and Noah's Clones and summoned Universal Lich Lords did just this as since it took milliseconds to bring them up and have their terrifying skills spammed out, it was enough to take down another 70 Lesser Primordial Beasts before the Draconic-Elephant Primordial Beast reached them.

From 165, the total number of Primordial Beasts he had managed to kill now jumped to 235! From this number, 2 were Grand Primordial Beasts!

The Loot from them was shocking to imagine, but the speed of the Cosmic Primordial Beast was even faster as in the next instant, its clones made contact with Noah's 16 Universal Blood Clones.

As if in astounding sequence and in a manner of a cockroach that could not be killed, 14 more Universal Blood Clones also reappeared in different portions of the Primordial Sea as they repeated Noah's same spamming session once more.

And yet..there were plenty of bodies of the Cosmic Primordial Beast as within milliseconds, these clones would also come in contact with the Draconic-Elephant Primordial Beast.

But...now Plot Armor was active!

The vibrant Cosmic Primordial Beast was as ruthless as ever, all of his 30 bodies sending out simultaneous attacks towards Noah that ranged purely from its physical body or while it utilized what Noah counted to be three Edicts so far.

Its four golden tusks and outstretched trunk palpating with the essence of multiple Edicts would be enough to terrify anyone, but Noah's heart was expectant as the attacks landed on him!

He wanted to know what would happen when this unstoppable force met an immovable object! What would happen against an ability that could bend reality and grant him invincibility!

He...was not disappointed.

A Draconic-Elephant Primordial Beast was throwing down its elephantine limb as it was bathed in the white flames of an Edict that Noah could not see through even with his Primordial Eye. This time around, Noah only continued to constantly cast Endless Rays of Time and Fireballs as against the terrifying strike thundering down, he actually only raised his head to meet it!

BZZZZT!

The two sides met. The impact that would have normally shattered Noah's armor of Cessation and then gone on to overcome his hundreds of millions in percentages of Health Regeneration came...but it could get to his body.

Even the armor of Cessation was untouched as instead of Noah being vaporized as usual, the brief impact caused the Primordial Sea to erupt wildly before the figure of the Clone shot out like a cannon ball in the opposite direction!

"Ah...!" A bright smile appeared over Noah's Universal Body.

This Clone had felt no damage, and nor had any of the clones that the Draconic-Elephant Primordial Beast copies went to deal with!

Whether it was a physical attack or one from the shimmering and unique Primordial Eye that was filled with golden swords, they either bounced off of him or caused his figure to be sent out from the pure force alone.

Pure force...but no damage!

Ah!

How balanced!

How fair!

Even a Cosmic Primordial Beast could not pass the effects of the Protagonist Trait that even a Primordial called reality bending.

Even an Ender of Reality could not do so!

But...one must recall that she also said Noah was beginning to dabble on such abilities. This caused her to gain an interest in him, but one had to ask themselves- who else drew her interest and attention in this Reality?

Also, if such an ability from Noah merely interested her, what could she herself be capable of doing?!

There were many questions to ponder on but no answers!

At this moment, the figure of the Draconic-Elephant Primordial Beast also found itself questioning for the first time as the one to knock back the Clone like a cannon ball and not instantly vaporize it instantly teleported beside the still shooting out figure, its limb once more shooting out in punch and smashing into the Clone as it was once more shot out in another direction.

BOOM!

But...the Draconic-Elephant Primordial Beast was relentless as before the clones could get too far away, the body of this enormous beast always appeared and threw down another punch as a shocking scene began to play out!

The Clone could be seen laughing with jow as he was thrown around like a ball, Noah's entire sight covered by illusory figures of the Cosmic Primordial Beast just smashing punches into him from all angles as he was thrown around like a ragdoll...and yet do damage was dealt.

"..."

It played out in the same manner against all other clones as when this Reality was established, Noah's focus returned to spamming countless skills towards the Primordial Beasts he could still see as he had to increase his quota of Loot!

The Draconic-Elephant Primordial Beast held an impassive expression as it still tried a myriad of attacks on Noah, but after a genuine half a second passed with no result, it came to a stop.

WAA!

Its glorious figure that was over 1000 Billion light years long truly came to a stop as with its scaled skin and elephantine body glistening wondrously gold and white, its three eyes stared calmly at Noah.

"..."
