

## Mana 1651

### Chapter 1651 Extracting the Bloodlines of Olden Emperors! II

Dreadful.

This was the only word that could explain the sequence of events in a certain enclosure of space that culminated in the attack that tore apart the natural laws of Reality for many light years as the tyrannical will of an Emperor controlling three bodies was imposed throughout!

Blank whiteness was spread throughout as amidst this torn space trying to weave its laws back together, the dazzling branches of an Infinite Willow Tree could be seen pulsing mesmerizingly while taking in the golden True Blood of three extremely powerful Olden Emperors that just had their wills extinguished!

Nobody had been the wiser about this beforehand, but the eyes of an extremely old existence locked onto these actions at this moment in time as she also looked at the improbable results of the battle before her.

A battle against truly powerful existences that was perilous to their lives, and it had ended in a few microseconds!

The actions of the one responsible were all under heavy watch from the pure White-furred Genevieve that denied the status of a mixed breed Disaster Remnant, her soul currently on very high alert when staring towards the anomaly of an existence that had just eradicated an Illusory Legend through unexplainable means!

She was on high alert only briefly as she pulled on the many concepts within her Origin and closely looked at her destiny before her eyes flashed with understanding...and her defenses lowered.

The multicolored rotating rulers of Reality wrapping around her and Beatrix faded as one could now clearly see her form with her solidified crown, the Flames of different races bowing and paying homage to her still rotating around her body.

"Hmm? The Empress trusts me so much to stop being on high alert?"

An authoritative voice filled with calmness rang out as the rainbow colored branches receded backwards and space healed, the Unnamed Kainos Emperor speaking out as he still held hoped Genevieve would forcefully harm herself by unlocking more of her potential!

He was able to theorize that for her to achieve her prior glory, she had to successively open up barriers and restrictions in their own times or means that if she forcefully broke them to achieve things like TABOO concepts that she didn't have the qualifications for now...she had to pay a high price.

He wanted her to continue paying this price as she achieved her former glory- akin to him fattening up a sheep for slaughter!

"Your attacks became progressively stronger after each one. If you were planning on going against me as well...you would have simply tried when those three fools perished!"

The mind of this past Olden Emperor was sharp as her figure floated forward fearlessly, going towards the center of the Transcendent Plant Kingdom where an enthroned Infinite Willow Tree could be seen bounded side by side with two more True Sanguine Clones in Samsara Cosmic Dao Origin True forms.

"Which leads me to believe that there is something that you want...Alexander King."

Her figure came to float beside him with cold and emotionless eyes as after she had ascertained Noah did not show killing intent towards her now, she grew truly bold!

SHAA!

Essence flashed as Noah's two other True Sanguine Clones stared at Genevieve coldly before disappearing, Noah's Infinite Willow Tree form also fading away into gorgeous multicolored lights as 10 dazzling Ascendancy Halos came back to rotate over his body and reveal his Cosmic humanoid form in all of its splendor- this same Cosmic humanoid form currently looking at Genevieve with a devilish smile.

He tapped on his throne as his consciousness was receiving wondrous loot prompts for the eradication of three Olden Emperors as well as the formation of three brand new Resplendent Treasure Caches that were due to his actions of utilizing all three remaining chances of this ability on these enemies!

He didn't even leave a single chance as if he could increase the number of times he could use it in a matter of days, he knew he would simply do it again one way or another as the allure of loot from A Legend's Visage was too dazzling.

There were these three gorgeous Treasure Chests that his main body would unlock, and there was also the infusion of golden True blood that was already collected and sent back to the main body as 60,000 Units of the Essence of Reality were utilized to begin the process of Hematopoietic Progenitor that would allow him to extract and obtain three more Olden Bloodlines!

While his main body oversaw all of this and the coming influx of hundreds of fairly high tier Quasi-TABOO Nomological Edicts...his enthroned True Sanguine Clone was focused on a certain Empress as it was time to decide her direction from here.

Noah's stellar eyes looked over her form curiously as he tapped on his throne while speaking calmly- as if he hadn't just wiped out two existences that were close to achieving the stage of Reality!

"Tell me...what do you think the result would be if we fought? You and this Clone of mine."

...!

His words felt grand and elevated as Genevieve's will reacted strongly against him, the surrounding space shaking as Noah only smiled further at this!

"Your non-answer tells me you understand how incredibly difficult it would be to extricate yourself, with my own destiny telling me that if I push you to the point of death...the last thing you unlock before death might also jeopardize this Clone of mine! That...is why we are still here."

"..."

A wrathful silence ensued as the healing space trembled from their clashing wills, anger as always bubbling with Genevieve as she actually had another existence talk to her in such a manner! Her! A Legend that was adorned and showered with respect in the past!

While controlling her boundless wrath at the current situation, her true form released rays of burning light as it faded, her Pure-Blooded Cardinal Royal Human form returning as she stroked the crimson gold skull of MADNESS before she asked once more against her very pride.

"What...do you want?"

BZZZT!

Noah's tyrannical will thrilled as it saw this ancient existence actually hold herself back as she knew if conflict broke, Noah would at most lose a Clone while there lay a possibility of her losing her life!

TAP!

"What I want..." Noah continued tapping on his throne as his eyes actually gazed away from Genevieve and into the remolding space behind her- his gaze looking at a certain direction that if they followed, they would reach a certain astounding Bloodline Domain.

"I want to get my hands on the Runic Ectrures of Modus Operandi under the Pure-Blooded Cardinal Royal Humans...and it just so happens that you are a Future Candidate that should be one of the few remaining alive after the assassinations by Enders. Getting your hands on such a thing...should not be too hard!"

...!

Noah's will was laid out as his future plans began to set themselves!

For the purposes of achieving the Realm of Reality and breaking past the shackles while forming the largest number of Reality Passages possible...this Clone would continue the journey into the lands of the Pure-Blooded Cardinal Royal Humans to fish amidst the chaos, a Modus Operandi or as he ascertained from the memories of the Royal Humans he killed- multiple scripts of Modus Operandi lying in the hands of this Bloodline!

Chapter 1652 Extracting the Bloodlines of OldenEmperors! III

As his True Sanguine Clone stared down against the ancient will of Genevieve, his main body was overseeing the coming boons from the deaths of the three Olden Emperors!

Bountiful prompts he could never get tired of rose over his eyes.

[+23,384,559 Cosmic Filament Cores obtained...] DING! The effects of Loot Multiplier are applied...[+ 23 Seeds of Reality are obtained.]

[+50,247,485 Runic Dao Line Enhancers obtained...] DING! The effects of Loot Multiplier are applied...[+ 50,247 Evolutionary Kainos Runic Lines of Ascendancy are obtained. ]

[+1155 Trillion Skill Points obtained...] DING! The effects of Loot Multiplier are applied...[+1155 Reality Resource Points obtained.]

[3,000 High Tier Reality Crystals have been obtained.]

The Origins of the three existences that had reached A Legend's Visage were similar in the number of their forged Cosmos as since they were fewer...Noah obtained fewer Seeds of Reality!

But the strength of their Souls and reserves of Essence of Reality were vastly different that he obtained more Reality Resource Points and Reality Crystals compared to the group of Enders.

Then...there were the concepts that these three Olden Emperors held, where just the three of them collectively had more Quasi-TABOO Nomological Edicts than all of the Ninth Firmament Enders combined as Noah was receiving an influx of hundreds that were first directed to the Soul Library while his soil adapted to them while it was being constantly strengthened!

<The effects of Absolute Looter are applied>

<The Flames and Bloodlines of the Quasi-TABOO Nomological Edicts of Nine Horned Reality Emperor, Dimensional Eye, Surpassing Gaze, Archaic Emperor...have been granted>

The flow of hundreds of Quasi-TABOO Nomological Edicts should have stolen the show for Noah, but it was actually something else entirely as one of the major gains before the opening of the Resplendent Treasure Caches was the extraction of the Olden Bloodlines that these existences held!

<Through Hematopoietic Progenitor, the Olden Bloodlines and authority of the Olden Emperor of Speculum, Olden Emperor of Pallidity, and the Olden Emperor of Advertent Tyranny have been obtained.>

BZZZT!

The blood of the Olden Emperors had coursed through his True Sanguine Clone and reached his main body as with the sacrifice of tens of thousands of Units of the Essence of Reality, the wondrous effects of three new Olden Bloodlines being achieved by him came to be!

And yet...this wasn't everything as wisps of vibrant information bloomed within Noah's mind.

<The Authority of Emperor Bloodlines are unique as when one defeats another, the authority is merely stolen and supplemented to their own. You have gone beyond that to attain their very Bloodline itself as new possibilities arise.>

OOOM!

His body and origin felt like they were burning as bountiful new sources of power bloomed.

<The Authority of Emperors and their collected Bloodlines can be permanently absorbed into the Unnamed Kainos Emperor Bloodline as their core abilities are retained while elevating the Kainos Bloodline further, with the possibility of elevation from Quasi-VENERABLE to a VENERABLE Kainos Bloodline being made an eventuality as you absorb more Authority and Bloodlines of Emperors...>

...!

A glorious path once more opened up before Noah as the choice was clear. Freewebnovel.com.

A collection of average Bloodlines of Emperors that even he had defeated, or the forging of a singular Bloodline that trumped over everything else?!

The choice didn't even have to take a microsecond!

"Assimilate the Olden Bloodlines of Speculum, Advertent Tyranny, and Pallidity."

HOONG!

Olden Bloodlines were extracted and made his own as before they could even settle...everything about them was taken to be assimilated under his Kainos Emperor Bloodline as at this moment, Noah's Origin began to bubble with unbound regality as an already ridiculous Bloodline began to be elevated even further!

—

Boundless strength flowed within his main body as he ascertained all the new gains and watched the assimilation of Olden Bloodlines, his three True Sanguine Clones in the Azure Forsaken Treasure Reality finally making great stretches of progress around this time as with them utilizing the authority of Ascendancy Halos and increased power, they swept through the Treasure Islands of this Reality with haste.

There were many dazzling floating islands with rainbow colored bridges connecting each of them, the serene sight of piles of gold freely lying everywhere being pleasing to the eyes as any Soul Crystals were dug up along with any loot that Noah came across.

Within each floating island, another unique Destiny Goblin or two could be found as after Noah swept across 11 Treasure Islands, 17 Seventh Firmament Destiny Goblins followed him obediently- making their sweeping of this Forsaken Treasure Reality even faster!

This was how they arrived into the last Treasure Island.

At the very depths of the glimmering floating landmass with golden vegetation etched throughout it, within the innermost cavernous space- Natalya and Noah followed by a party of Destiny Goblins stared at the figure of an enthroned creature that was far different from the others- this existence boasting powerful waves of power at the Eighth Firmament of Ascendancy as it wasn't as Noah expected!

It wasn't an upgrade from the Destiny Goblins to a Destiny Goblin King waiting for them, but a different creature entirely as they came face to face with an enormous golden slug-looking creature that had dazzling jewels and Crystals stemming off of its body.

Around this creature, a Destiny Domain Space surrounded it as two golden pages releasing an air of ancientness could be seen surrounded by Naturally Formed Primordial Treasures, Soul Crystals, and other unknown glimmering loot!

<Ultimate Amalgamation of Greed>:: A collective of fortune and greed into an existence at the Eighth Firmament of Ascendancy...

The identity of the creature was revealed as Noah looked at curiously, while Natalya had a somber expression at the heavy aura this existence revealed.

There were no Ascendancy Halos or anything emitted from it, its golden sluglike body filled with treasures merely lying on an old golden stone throne as it stared dangerously at the intruders.

"Master, this is the ultimate concentration of Greed and destiny within this Reality, with its sole purpose being the preservation of its domain space as it is a soulless creature..."

A leading Destiny Goblin behind them spoke out as Noah nodded lightly, Natalya seeming worried as she gazed at the two pages of the Azure Treasure Emperor's Runic Ecriture of Modus Operandi that they could not get their hands on unless they defeated this Eighth Firmament creature!

She...had no idea of the true extent of the being currently with her!

Chapter 1653 Azure Treasure Emperor's ModusOperandi!!

Noah's two other True Sanguine Clones were finished with the exploration of the other unexplored Treasure islands as Natalya had yet to see them, so she had no knowledge of just how ridiculously advanced Noah's level of power had become within this past day as she simply gripped the Heartsplitter Bow tighter while speaking to him.

"It cannot be too easy at the end as it is not a Destiny Goblin appearing that you can easily overcome, but this powerful creature. We might be capable of bringing it down with long distance attacks while the Destiny Goblins attract its attention, but it will still be extremely dangerous!"

She spoke seriously as even though she felt it was dangerous, she truly couldn't allow their exploration to stop here as two more pages that would complete a Modus Operandi were right there!

She vowed to get it even if she had to fight with her last breath as there was also another reason for her confidence...the dazzling stellar looking being whose very figure seemed to be made of Cosmos.

When he had abruptly taken this form a while back, Natalya did not probe as to her, it didn't matter what race this being was! They were each on this path because they were searching for something, and they were now this close to getting their hands on something that many Bloodlines would fight to death over.

She turned towards him to hear his thoughts and plans as she still saw him as carefree as ever, his face actually having a light smile as he spoke while raising his hand- the glimmer of Ascendancy Halos rising around him.

"No plans or ganging up on it will be necessary."

...!

Confusion swept over the Overseer's expression as before she could ask, her origin shuddered as her eyes were drawn to his finger!

Her very origin quaked as she felt a horrific ray of stellar light be released from the finger of this Peerless Forger before her, this ray being something that could make any existence in the Seventh Firmament of Ascendancy tremble!

<Ascendant Reality Sever>.

BZZZT!

A ray of vacillating Realities barreled out and cut apart space as it entirely superseded the innate defensive barrier around the slug like Ultimate Amalgamation of Greed, this creature's fat muscles barely rising before it exploded into a mass of golden flesh and light.

BOOOM!

"...!"

Natalya's heart trembled at such a scene while the Destiny Goblins behind her instantly fell to their knees at such a show of power- paying respects to Noah with fearful excitement at their Master's unfathomable power!

An Eighth Firmament Ultimate Amalgamation of Greed...destroyed with a single flashing ray of light!

"That...how did ...?!"

Natalya had been faced with many surprises while traveling with this being, but nothing was more dreadful than this as she confirmed once more with her awareness and soul that the being before her truly was still in the Seventh Firmament of Ascendancy.

She couldn't probe any Reality Passages or see any indications to say otherwise...so how were the sequence of events that this being undertook even possible?! Natalya locked onto him with any move he made as she sought answers.

Yet Noah wasn't even gazing at her as his eyes curiously looked at a prompt before him.

<The Ultimate Amalgamation of Greed has perished under your hand as your Destiny and Fortune is elevated greatly.>

<The Ultimate Passive Skill Destiny Domain Space has been granted. It allows its user to spread out a single domain space around a certain area as with the passage of time, unique treasures will naturally form in this domain. The more fortune and destiny an existence has, the faster and more abundant the treasures that form over the years are.>

...!

A ridiculous prompt rose over Noah's eyes as he now seemed surprised as well, Natalya having to look at him with even more incredulity as she wondered what the hell he could be surprised about!

'The passive formation of loot over time in a Domain? This is just...'

Noah shook his head at what seemed to be the ultimate present of this Forsaken Treasure Reality apart from the Azure Treasure Emperor's Runic Ecriture of Modus Operandi, observing his elevated destiny and fortune as he waved his right hand, his authority barreling out as it caused the two floating ancient pages and all the other loot in the domain space to flow towards him!

Natalya looked at this in a daze as she finally voiced her words out.

"How...are you capable of releasing power that can eradicate Eighth Firmament existences? Did you...have this when the Gazer was coming for us?"

Her eyes were filled with disbelief and skepticism as she began to question everything she knew about this existence- but her destiny didn't tell her anything about him being harmful to her as she was further confused!

Noah grasped the two golden pages in his hands as he smiled while speaking plainly.

"No, I held power at the first and third Firmament when you met me and as we moved. Over the past day, I've just had my first body make some progress by powering up a little bit...and I can do this much now."

"..."

Silence reigned in the surroundings after these words as even the Destiny Goblins stared at Noah blankly!

Yet he had a bright smile on his face as he got what he wanted as he didn't bother with this.

"Two more pages of the Modus Operandi...with this, it can be completed!"

His heart felt grand achievement for rapidly exploring this Reality and getting his hands on such a treasure, but Natalya was still lost as her confounded voice echoed out once more.

"Don't we still have a few more Treasure Islands to explore and obtain the other pages...?"

"Oh, my Clones took care of that."

...!

A voice rang out from the entrance of the cavernous space of this Treasure Island as another stellar form of Noah that looked exactly the same as the one Natalya had been traveling with appeared, another one following closely behind while followed by a few Destiny Goblins as each of them carried two pages of the Azure Treasure Emperor's Modus Operandi!

Natalya Rostova looked at this scene with utter daze as the Destiny Goblins scrambled to pay their respect, the Clones meeting up with all the loot of the Azure Forsaken Treasure Reality as with it...a complete Modus Operandi could be obtained!

Chapter 1654 Azure Treasure Emperor's ModusOperandi ! II

The figures of three stellar Clones met on the last Treasure Island as they held everything required to bring to fruition a unique treasure that always remained behind locked doors of all powerful Bloodlines.

Natalya stared at the scene before her in disbelief as from the three Noahs, a few ancient gold glimmering pages flew out until 12 shining points of light formed!

"The Azure Treasure Emperor's Runic Escripture of Modus Operandi...let's see what you have in store!"

BZZZT!

Noah's eyes released luminous light as he observed everything with great concentration, the 12 ancient pages having been pulling the moment they neared each other as in a chain reaction, strings of golden light shot from each as they connected to each other.

ZIP!

These strings then pulled the pages together as one by one...they were stacked on top of each other akin to archaic metal doors closing every microsecond!

Until in mere moments...

HOOONG!

Pristine light of authority and power spread out as when it dimmed ever so slightly, the hidden wonder within was revealed.

Surrounded by a natural golden Halo of light, a smooth golden scroll that had the Runic Ecritures meaning <AZURE TREASURE> could be seen floating silently!

It seemed like an entirely blank scroll with the only words being AZURE TREASURE, but Noah could feel this single scroll filled with such astounding waves of destiny that the entire Forsaken Treasure Reality could not even compare.

The Destiny Goblins were bowed down while paying obeisance, and the figure of Natalya stared at the glimmering golden scroll with complex eyes as it was everything she wanted!

A Runic Ecriture of Modus Operandi could not even be preserved in memories as to learn it, one had to come in direct contact with it.

This was how Noah had learned the Low Tier Defective Celestial Modus Operandi...and he now reached out to grasp onto the dazzling scroll that had been achieved with a decent amount of effort!

WAA!

His fingers reached out for it, but the page itself shockingly seemed alive as even before Noah fully unfurled his hand- the page floated over by itself!

"Oh?"

Such a scene could barely be thought of for long as in the next instant that Noah came in contact with it, boundless information surged into him as yet another method for one to break their shackles and begin rotating their Origin akin to a genuine Reality showed itself!

HIGH <Azure Treasure Emperor's Runic Ecriture of Modus Operandi> :: A unique understanding of the revolution of Reality that incorporates the weaving of destiny and fortune with the rotation of all stellar bodies. The immense focus on destiny and fortune with the revolution of Reality was studied by the Azure Treasure Emperor long after he had achieved Reality, this High Tier Runic Ecriture of Modus Operandi being a penultimate design he managed to forge after 1 billion years. The Destiny and Fortune of existences that open their Reality Passages with this Modus Operandi will experience an immense curve as the resultant Passages formed are termed <Destiny Reality Passages> that reinforce greater concentrations of Destiny, Fortune, and Essence of Reality. This Modus Operandi can guarantee up to 20 Destiny Reality Passages for the most talented existences with a bountiful foundation, with this number scaled upwards depending on the destiny and fortune of the existence breaking their shackles. The method of plucking destiny and fortune while rotating the stellar bodies is...

A wondrous Treasure landed in Noah's arms as after information about it flowed into his mind, something else also came as Noah heard a deep voice filled with age surge from the golden scroll towards him!

His eyes flashed with sharpness as he allowed it in after examining it, a booming voice ringing out in his mind.

<I forged this Modus Operandi to try and use destiny and fortune to guarantee the seat of Emperor, and I still failed. I hope the Destined existence to put all of its pages together in this little Treasure Reality has a greater destiny than mine to use this tool and achieve something special...>

An old voice filled with solemnity and sadness echoed out as it seemed to hold great attachments and regrets, causing Noah to gaze at the pristine golden scroll within his hands as he sighed!

It was a truly stupendous tool, but even the Emperor that forged it had perished.

It guaranteed 20 Reality Passages for the most talented of beings as when Noah read on the revolution of the stellar bodies within one's Origin, the same phenomenon that had occurred when he first grasped the Low Tier Defective Celestial Modus Operandi played out again as with his permission, his Cosmos rotated in a certain manner for just a microsecond before he stopped them- this mere moment of rotation causing a shocking illusion to flash behind the True Sanguine Clone in question as it nearly caused Natalya to drop the Heartsplitter Bow within her hands!

Behind Noah's figure- ever so briefly...30 dazzling illusory Mountainous-like Reality Passages formed.

"..."

Not 20 as the High Tier Modus Operandi stipulated- with Noah's destiny and fortune scaling this number up by 50%!

The Reality Passages didn't glow with the stellar color of purple blue similar to all the ones Noah had seen before- with the illusory Reality Passages appearing behind him being gold in color as they shone in a mesmerizing fashion!

If Noah chose to proceed and break his shackles at this moment, he could actually build 30 Reality Passages as this number must have increased due to his destiny and fortune- as well as his increasingly robust foundation as he broke all sorts of limitations.

"Destiny Reality Passages huh..."

Noah nodded his head after affirming this, his actions nearly causing those around him to go crazy as Natalya had an utterly defeated look of disbelief on her face.

"You...can break your shackles at any time and achieve such a feat?"

Her eyes flashed with longing as she asked, imagining the austere sight of golden Reality Passages as Noah's figure nodded, his eyes shining sharply as he began to float towards her.

"I can. But that is me, and you are you. I have other plans for myself, but you can go ahead and learn this Azure Treasure Emperor's Runic Ecriture of Modus Operandi in order to break your own shackles!"

WAA!

Chapter 1655 Azure Treasure Emperor's ModusOperandi ! III

Noah was straightforward as without Natalya, he would have not been led into this Forsaken Treasure Reality as he would not bully the being who had initially found it!

Natalya's gaze hardened as she gazed at Noah and then the glimmering gold scroll, her hands reaching towards it as an influx of information similar to Noah flowed into her- her eyes shining brightly an instant later.

"If your talent is stupendous, 20 Destiny Reality Passages are possible. How many Reality Passages does the Primordial Legend that you want to kill have?"

Noah voiced out freely as the golden scroll naturally floated back into his hands.

Natalya's eyes released a sharp luster at this question as she voiced out with confidence.

"Less than 10."

...!

"Mmm...and what do you think of your talent and foundation? Do you think you can forge more than 10?"

An important question that caused the burning light within the eyes of Natalya to dim.

Everyone knew themselves the most as Natalya understood her foundation and destiny best apart from anyone else, and she could give a confident answer at this moment as she stayed quiet!

Noah looked at such a scene as his eyes began to curve, a devilish smile coming onto his lips as he spoke calmly.

"I have a way that will guarantee you achieving at least 15 if not more Destiny Reality Passages."

WAA!

His words caused Natalya's eyes to flutter, locking onto him as her origin buzzed.

"How..."

With a devilish smile, a Tyrannical aura had already begun leaking from Noah as he spoke.

"As you've noticed, I'm a little exceptional in the things that I do as even now, not just Eighth Firmament existences...but even average Ninth Firmament existences cannot compare to me. Whatever revenge you have to take, whatever Legend you have to kill...I can confidently say that you can achieve this under me within a few months, if not weeks."

...!

Boastful words echoed out as they occupied the mind of Natalya Rostova entirely!

"Under you?"

"Yes. Be one of the many Generals under me that shall explore these expanses of Realities...and breaking your shackles to form more than 15 Reality Passages should be easy as your enemies shall become my enemies!"

A talented existence under him who had enough fortune to locate a Forsaken Treasure Reality and a possible enemy at the level of a Legend that could be a source of wondrous loot in the future...how could Noah let such a chance slip away!?

There was more to his intentions apart from this as for now, the will of the Tyrannical Emperor echoed out as the past Overseer of the Isles of the Gilded Forge received a bright prompt proposal before her very eyes that told her to pledge her Fealty to a single being.

"..."

Silence reigned in the surroundings as for those proficient in destiny, they would already know the choice to make in this shocking situation as the eyes of Natalya moved from Noah to gaze at the over a dozen Destiny Goblins skill kneeling towards his three bodies. Her own goals flashed before her eyes as when superimposed with all the things she had seen with him in their time...the choice was clear!

With a heavy heart driven only by revenge, the figure of Natalya Rostova bowed towards Noah while speaking out stellar words.

"I pledge Fealty to the Tyrannical Emperor."

BZZZT!

Waves of essence bloomed out as yet another Destined existence fell under Noah's banner.

Her eyes gradually expanded with more shock as with the pledging of Fealty, she felt the strengthening of her body and soul as well as the eruption of her seas of destiny just from being connected to this being!

Before she could express her shock though, she felt her surroundings glimmer with scintillating lights as Noah's voice echoed out.

"Good. Let's wrap things up here and I'll bring you to the base of operations. There, I'll give you a few Limit Breaking Tools and get you ready to break your shackles...I want to see the process of forging Reality Passages and a revolving Reality in a crystal clear fashion."

...!

Ridiculous words left his mouth while his body began to buzz with essence that began to permeate outwards- covering the cavernous space they were in and spreading even further outwards as Natalya held in her shock while asking.

"What...are you doing now?"

"Mmm, just forming a connection with this Forsaken Treasure Reality as when it's assimilated to my own Reality, I wonder what will come of it..."

OOOM!

Ridiculous words followed by vibrant Essence erupted out, the golden scroll floating near Noah shining with pulses of light as uniquely, it made the spreading of his essence and the connection to this Treasure Reality much easier than it would have been if Noah had tried this before!

While being gradually covered by a hazy golden light, the Azure Forsaken Treasure Reality began to fall under the Authority of a certain being as it would be pulled towards a stellar growing Reality!

—

In a region of space filled with dense vegetation.

The Transcendent Plant Kingdom glimmered with intensity and fervor as two Kainos Emperors gazed at each other wordlessly, waves of destiny surging around them both as they seemed to be having their own battles!

Off to the side, Beatrix had a heavy expression due to the silence after such a long period of time that her expression eased greatly when her Empress spoke in the next second.

"Very well. A Modus Operandi for you so long as you continue to use your 'astounding destiny' in a land where Legends live. Let's go to the Pure-Blooded Domains and see whether destiny will carry you against the eyes of Legends!"

WAA!

The dominating words of Empress Genevieve ended as the enthroned Noah smiled, the Transcendent Plant Kingdom beginning to fade around them along with his Throne of Unnamed Tyranny.

Beatrix sighed inside as she knew very well what the cold eyes of her Master were thinking as they gazed at the one they knew as Alexander!

She had far surpassed a level of intrigue and anger as at this moment, she wanted to rip apart this being's main body to pieces as quickly as possible no matter the price! But she couldn't yet locate him as she had begun to rush her awakening already by unlocking concepts her soul was not yet ready for, and Beatrix worried for what she might do next if this being before them continued to show anomalous capabilities that forced the Empress to continue unlocking concepts much too early.

'Let us not lose sight of the ultimate prize....Empress.'

Beatrix had this thought as she planned to talk to the only being she cared for when the time was right. Because now...the reigning will of an existence that had just wiped out too many Ninth Firmament existences still imposed down around them.

"If you've been evading the eyes of Legends this whole time, why can't I?"

A gaze of boundless confidence stared at the dark haired Genevieve, this Empress staring back in turn at the stellar cosmic being as she snapped her hand to bring back a cuboidal vessel they had been utilizing all this time!

"Oh, let me do the honors this time around."

BZZZT!

Noah's will surged out as above them and eclipsing everything, a transport type Quasi-TABOO Primordial Relic in the form of a dazzling Reality appeared as <Iridescent Reality> was called out.

Glorious in stature and putting everything else to shame, Noah's stellar figure floated to land atop the seemingly endless vessel that looked like a stable glass structure holding a Reality filled with countless Cosmos, a thin multicolored barrier surrounding it all around in a circular fashion as when he arrived, Noah called upon the feature of <Pocket Reality> of the Infinite Reality to begin erecting structures within this Quasi-TABOO vessel. Futuristic structures where one could find lodging, expansive high rise glass buildings with open roof pools, bubbling golden springs filled with hazy mist where one could go and relax, huge forges and grills to cook Primordial Beasts...everything that one could imagine for relaxation arose on top of the <Iridescent Reality> as its size alone was vaster than many Cosmos!

The figures of Genevieve and Beatrix arrived onto the Quasi-TABOO vessel as they looked at the paradisaical sight atop it, their eyes flashing coldly as they gazed at the Unnamed Kainos Emperor who at this time had erected a singular crystalline stellar throne at the very center of this vessel that he went to sit on, gazing towards them in a carefree manner as his voice echoed out.

"Make yourselves at home as we head out to our false home. Towards the Pure Blooded Domains where even Primordial Legends can be seen!"

...!

Towards the Pure Blooded Domains.

Towards the belly of the beast!

SHIING!

With dominating visage, the vessel of the Unnamed Kainos Emperor followed the memories of defeated enemies as he went towards one of the innermost domains of Primordials where occasionally, the Visage of genuine Legends could be seen!

Chapter 1656 Immense Gains! I

A sense of calmness and prosperity spread out over the Infinite Reality as this seemingly settled down.

Seas of different types of Essence were still constantly being forged throughout the stellar bodies of this expanding Reality, but the effects of the first Infinite Dream had ended as everything calmed.

A perilous battle that would have been lost if sufficient preparations weren't made was also won as the gains from this battle propelled Noah into a level of strength that only very unique existences at the Ninth Firmament of Ascendancy could display!

The gains from this battle had to be properly digested as there were truly too many things.

From the first five Resplendent Treasure Caches, Noah still had two Dimensional Essence Shards to utilize and allow for the Reality Altering nullification of resources for two abilities.

Many possibilities rose in Noah's mind as among them was , an ability that required 10,000 Units of the Essence of Reality in addition to trillions of Units of Mana to cast! If he nullified the resources for this ability, he could effectively refine his Origin and soul to achieve the Limit Breaking Extreme Mana

Physique that boasted a strong foundation to allow for even more Reality Passages to form during the time when he broke his shackles!

Yet he was also currently at the stage of having reserves of 100,000 Units of the Essence of Reality, and he had thousands of Ascendant Flasks of Life and Death that recovered all Resources entirely as if he consumed a single one. To completely refine the Limit Breaking Extreme Mana Physique, a bit less than 1 Million Units of the Essence of Reality were required in total as this amounted to the usage of 10 Ascendant Flasks of Life.

A measly number compared to what he had as due to his rapid pace of progression, even something like 1 million Units of the Essence of Reality was an achievable resource in a short period of time! Due to this, even though this ability required ten times the amount of essence compared to Sever- it wasn't chosen to utilize a Dimensional Essence Shard over.

But there was an ability similar to it in terms of how many units of the Essence of Reality it ate up- Noah's destiny strongly pointing towards it at this moment as it was RUINATION's feature, !

It required 10,000 Units of the Essence of Reality as it also wasn't a limited use ability like , with Noah needing to corrupt all of the new Quasi-TABOO Nomological Edicts he held as if one did the math, the required Units were in the millions.

Noah could even go further if he nullified the resource requirement for this ability as he could corrupt the thousands of INSUPERABLE Nomological Edicts he had gained from the Seventh, Eighth, and Ninth Firmament Enders, along with the few hundred from the followers of the Will of the Past Emperor!

Even though they placed Quasi-TABOO Nomological Edicts in their Halos, they had lived for too long as they also held many Insuperable and even Quasi-Insuperable Nomological Edicts. If Noah freely Corrupted even Insuperable Nomological concepts and then placed them in the Soul Library for his people...the amount of power he could raise with them was ridiculous as the ability of was at the very forefront for the utilization of Dimensional Essence Shard.

The mention of the followers of the Will of the Past Emperor caused Noah's expression to turn slightly somber as even at this moment, he continued to sift through the billions of years of memories of three existences who had their own stories- his soul relishing on arguably one of the most important loot out of all this!

Memories.

The memories of the Dimensional Archaic Devil Bird, Nine Reality Horned Unicorn, and the Eclipsing Celestial Void Eye....they were something that caused Noah to want to tread even more carefully in the future as they told off too many disastrous secrets and built a brutal and fantastical world that Noah was being given a glimpse of at this moment.

From the memories of these three beings, Noah learned of the Primordial Will Bearers- existences who were under the Authority of a Legend as they moved with their orders.

The three Will Bearers Noah had faced were under the Olden Emperor of the Golden Eye, with Noah finding something dreadful whenever memories of this being rose in the long history of the Dimensional Archaic Devil Bird and others!

The visage of this Legend...was clouded by a misty light whenever they appeared in the memories as Noah couldn't even discern who they were or what they looked like.

And this applied to all Legends that these three Primordial Will Bearers had been lucky enough to come across- everything about them was clouded even in the memories of others!

This...showed a mere glimpse of the power of Legends as Noah planned ahead for many contingencies and possibilities.

HOOONG!

Amidst his thoughts though, he was awoken to the appearance of the last Reality that was fusing into the Infinite Reality for the next few days until he initiated Infinite Dream once more.

Noah's will had spread over the Forsaken Treasure Dimension as what should have been an impossible task became easy whenever Noah grasped the golden scroll of the Azure Treasure Emperor's Runic Ecriture of Modus Operandi, this loot acting akin to a master key that made all connections flow as at this moment, Noah saw the unique sight of a dazzling river of Reality over ten times larger than even Prime Realities begin stacking up over his Infinite Reality and beginning to fuse with it!

BZZZT!

Arcs of golden light began to bloom as the Azure Forsaken Treasure Reality was pulled in to be assimilated into the Infinite Reality, its restrictions being broken apart as its Treasure Islands and Domains disappeared into fantastical light that all surged towards the core of this Reality.

Along with this, the brilliant luster of 20 True Stars of Conquest began to form as they caused Noah's eyes to smile dangerously! Others didn't see this as his people were stumped to see an even greater disruption at this moment when everything should have already been done.

A clone of Little Henry, Amelia Osmont, Adelaide, Barbatos, Halcyon, Athena, Emperor Penguin, Sword Emperor, Steel Mikhail...nearly all of Noah's closest women and most powerful generals could be seen within the Novus Universe as they watched this shockingly unfolding sensation once more with their vast consciousnesses, but they were on for a surprise at this point in time as Noah took the inhabitants of this new reality and teleported them into the Novus Universe after he felt the breaking apart of the spatial restrictions!

SHAA!

The dazzling figures of Destiny Goblins bloomed before everyone along with the return of Noah's Clone, the eyes of his people lighting up at his presence as many even shot towards him!

But they all came to a stop in the next instant as apart from the Destiny Goblins, they saw Noah's figure floating beside a curvaceous and utterly exquisite crimson golden haired Natalya Rostova who was clutching her Heartsplitter Bow tightly.

"..."

Silence reigned as Noah's people looked at this being with slight surprise, the reactions of others being more prominent as one could see Barbatos's figure shaking her head while voicing out prominently the moment they appeared.

"Ah...don't tell me it's another woman. Little Fish, don't you think you have enough?!"

...!

Barbatos showed a playful teasing expression as she acted dismayed, the gaze of Amelia Osmont becoming stern while the Little Henry she held in her arms looked at the scene of his father floating down with even more respect!

Barbatos's words nearly halted the introduction as Noah shook his head with a smile while floating forward.

"No such thing. I merely bring another general in our ranks....she will more than likely be the first in this Reality to break past her shackles and reach the Eighth Firmament of Ascendancy, so watch closely and gain something when this happens!"

WAA!

The past Overseer of the lands of the Primal Titans in the Isles of the Gilded Forge arrived into a new land filled with mystery, a fantastical Reality also being assimilated into the Infinite Reality at the same time as its results were bound to be astonishing!

Chapter 1657 Immense Gains! II

The Azure Forsaken Treasure Reality was quite different from Emerging or Prime Realities as what was assimilated from it more than anything was its unique authority.

20 resplendent True Stars of Conquest formed as each one was suffused with waves of milky white light, descending towards Noah's body and sinking into him freely!

Austere golden waves of destiny bloomed at the very center of the Infinite Reality as the changes due to this Forsaken Treasure Reality were displayed in Noah's mind.

<The feature of Treasure Destiny Domain Space has been added to the Infinite Reality.>

<The feature of Spatial Restriction has been added to the Infinite Reality.>

...!

The Assimilation of a Forsaken Treasure Reality actually granted two new features, Noah's soul beginning to peruse through them as he found <Spatial Restriction> to be unique in that it allowed Noah to impose restrictions similar to a Treasure Reality where the inhabitants could not freely teleport!

He could apply this towards the whole Reality or to specific sections, or even apply it to certain groups of people. It was something unique that Noah planned to play with later as the second feature to be gained was something similar to the ability Noah himself had gotten when he defeated the Ultimate Amalgamation of Greed.

<Treasure Destiny Domain Space>:: Three Destiny Domain Spaces can be enacted in the Infinite Reality as over time, the formation of Naturally Formed Primordial Treasures, Soul Crystals, Resource Crystals, Mana Stones...and many other unique types of loot shall take place.

More methods for him to attain loot and strengthen his Reality overall as when the Assimilation of the Forsaken Treasure Reality finished, one of Noah's Clones took the task of communicating with his family while also preparing to show them something very few would get to experience- the breaking of shackles from the Seventh Firmament to the Eighth!

The new entrant Natalya Rostova would be the subject of examination as Noah began giving her Limit Breaking Elixirs he could forge with ease at this moment to start the preparations.

This was just one of the numerous things Noah would be overseeing in the next few days.

He had many, many other things that he had to do...and this calm period of time after such a perilous battle was great to get them out of the way. Especially with the time delay of the Cosmic Holy Land, mere a day or two passing in the outside Realities would mean Noah achieving all that he wanted in the Cosmic Holy Land!

As for what had to be done?

"The deconstruction of all obtained Cosmic Daos into the maximum allowable Runic Dao Lines. Then their enhancement with Evolutionary Runic Kainos Lines of Ascendancy...and then proceeding with the Limit Breaking Extreme Mana Refinement that will change all Runic Lines into Runic Kainos Mana Lines of Ascendancy!"

These were just among the first set of actions Noah would take.

After this, there was the spreading of Shards of a Seed of Reality to quickly raise his strongest generals into Seventh and Eighth Firmament existences after Natalya- this being especially the case as his Reality now had a Runic Ecriture of Modus Operandi that its inhabitants could utilize!

In this coming closed off session for the next few days, Noah was planning to have his Clones take care of everything with his people while his main body focused on completing his Physiques, strengthening the soul through the Soul Crystals and extinguishing of unneeded Nomological Edicts, optimize his 600 slots of Flames of Edicts in his Ascendancy Halos to all be entirely Quasi-TABOO, then make all of these concepts into Ruined Concepts by corrupting them, utilize the remaining Affixes of Reality through RUINATION, refine Limit Breaking Elixirs and Pills, forge Relics, set up his own Destiny Domain Space...there were frankly too many things to be done as they would all be taken care of in this coming period of time in the Cosmic Holy Land!

Many choices like this went over Noah's mind as his main body was currently situated on the Throne of Arcadian Tyranny while he utterly burnt and desecrated Minor, Greater, and Quasi-Insuperable Nomological Edicts with the authority of this Olden Bloodline in order to strengthen his own soul!

His strongest Bloodline was also undergoing constant reforming and strengthening as three new Olden Bloodlines were becoming incorporated into the Unnamed Kainos Emperor Bloodline- this process taking time as Noah would find out the gains from it soon enough.

While this occurred, he stared at three glimmering Resplendent Treasure Caches he had yet to open as the biggest gains out of the last ones included three Blueprints of TABOO Relics.

<APEX>, <PIONEER>, and <FORTRESS>!

He had obtained the Blueprints of such terrific items as each had drastic material requirements, with Noah being blessed by having many of these materials through the very same Caches or having already obtained them from the Forsaken Treasure Reality!

Yet each Blueprint had a single or two items that Noah did not have on hand and nor could he get easily.

For two of the Blueprints of TABOO Relics- their last material even required Noah to delve into the Dream Dimension and the Mirror Dimension!

This was a task for the very near upcoming future as for now, Noah was curious about the loot in the three Resplendent Treasure Caches that came from beings far stronger than Ninth Firmament Enders.

"Now, what will you three hold?"

BZZZT!

Golden splendor shot out as three Resplendent Treasure Caches began to open, dazzling prompts rising before Noah's eyes as just the first few caused his mind to buzz!

<The Quasi-TABOO Relic <Gloves of the Starry King> has been obtained.>

<800 Olden Orbs of Transmogrification have been obtained.>

<5,000 High Tier Soul Crystals have been obtained.>

<The TABOO Relic <LETHE> has been obtained.>

HOOONG!

Everything came to a stop.

"..."

The other golden prompts of the Resplendent Treasure Cache faded as finally, something undeniably shocking had come up before Noah's eyes.

A TABOO Relic!

Chapter 1658 LETHE! I

Noah's Expansive Space was nearly endless in size as if anyone ever got their hands on it, they would die of greed just from the sheer number of ridiculous treasures and loot within this space.

From dazzling Orbs that allowed one to obtain Quasi-TABOO Nomological Edicts to mountains of Soul Crystals and Reality Crystals, to even an assortment of Quasi-TABOO Relics!

His Expansive Space contained a great deal of things as Treasure mountains rose everywhere, all of Noah's loot constantly being placed in this space if he gained it from enemies or when he opened his Treasure Caches.

This meant that when he received the prompt that spoke of a TABOO Relic, this Treasure appeared in his Expansive Space right away as it brought drastic changes even in this space!

HOOONG!

The nearby Quasi-TABOO Relics trembled as if they had wills, unconsciously being pushed aside as a mass of stellar obsidian darkness descended.

Orbs of Transmogrification, Naturally Formed Primordial Treasures, Soul Crystals...any other loot nearby was pushed aside for miles as the grandeur of the TABOO Relic ridiculously occupied an empty space as the other loot weren't even allowed to near!

BZZZT!

Whatever Relic was hidden in the stellar obsidian darkness released arcs of profound soul shaking light as it floated majestically, showing its glory amongst all other loot until a microsecond later- the glimmering will of the Unnamed Kainos Emperor called upon it.

"..."

Silence descended as this ridiculous Relic actually didn't answer the call of its new owner!

RUMBLE!

It was a shocking action for the Unnamed Kainos Emperor to not be able to even call upon his items in his own Expansive Space, his shocking will and authority barreling down with ferocity in the next moment.

"You cheeky little thing...you better come out now and be obedient before I collect a dozen more TABOO Relics in a few weeks and leave you to collect dust!"

...!

Words of shocking authority that carried a form of undeniable truth- a truth that told this domineering Relic these words would be adhered to if they didn't get what they wanted.

SHAA!

A microsecond later, the mass of stellar obsidian darkness disappeared as a TABOO Relic answered the call of its owner.

In the Cosmic Holy Land.

Noah's vibrant eyes gazed at the Relic that had actually snubbed him in the beginning as information began to flow in his mind while this TABOO Relic floated towards him.

LETHE!

This was the name of this TABOO Relic as such a word had the meaning of a state of forgetfulness or oblivion, such meaning only giving Noah an indication of what this Relic would hold as his eyes pierced across the stellar obsidian veil surrounding it and saw it with all of its glory!

His eyes were first met with the distinct light of 9 pulsing obsidian rivers of Reality- their illusory light actually free flowing across what seemed to be a shawl!

A shawl, or better known as a cloak or mantle!

An air of ancientness surrounded it as it seemed to be there and not there every other microsecond, Noah having to steel and focus his soul just to make sure that the TABOO Relic was still before his eyes.

What was most astounding was the fact that this stellar dark cloak with the light of 9 obsidian Realities had 10 spinning multicolored rings of light around it that constantly gave off a heart throbbing authority!

Multicolored rings of light that were very reminiscent of...Ascendancy Halos!

OOOM!

With haste, Noah's eyes released piercing rays of light as they took in all the information about this Relic and displayed it brilliantly in his mind.

[TABOO :: A tool of ultimate possibilities due its confounding nature and capability to alter the natural laws of Reality passively. It is a Relic at the level of TABOO as it required special authority to merely equip, the base of such authority being a TABOO concept. The activation of its abilities can only be done through essence or authority that stems from TABOO. It is a tool that grants its user the , a constantly adapting passive ability that shows others what the user wants them to see and hides what should remain forever unknown. This includes their Realm, Destiny, the strength of their Souls and Concepts, Bloodlines...any concepts of Reality that define an existence. Furthermore, the carries its Reality altering effects onto selected enemies as they begin to act carelessly and with heedlessness towards you, such actions of forgetfulness eventually leading them to their oblivion. This veil can withstand even the inquisitive glare of penetrative TABOO concepts when enough Mana and Essence of Reality are provided as LETHE also holds the unique authority of ten that can be commandeered by the user to act as their own additional authority once equipped, with these Malleable Ascendancy Halos mimicking the highest tier Halo currently achieved...]

[...Even though its uses are more auxiliary, LETHE also contains the ability of that can be enacted by 1 Quintillion Units of Mana and 100,000 Units of the Essence of Reality through the authority of TABOO, this ability granting a reality altering shield that can grant a base 100 True Reality Defense Values. Remaining features include , , , and . It is a Relic of extreme power as its utilization can allow one to better understand TABOO and even aid on their path to enact more of such concepts, with results varying depending on its utilization.]

"..."

Unbelievable details flowed over Noah's mind as if it was anyone else, they would be too awestruck to even continue on for the next moments!

Yet Noah's eyes released beams of light as while staring at the cloak that glimmered with 9 illusory obsidian releases and undulated with 10 Halos of multicolored light, his body erupted with oppressive pressure as 10 dazzling Black Ascendancy Halos bloomed.

This was because the ridiculous Relic before his eyes...was something that one couldn't even adorn and utilize to its full extent as the authority of TABOO had to be there for one to play around with this TABOO Relic!

Chapter 1659 LETHE! II

An authority of TABOO was required as wondrously, Noah had such an authority even though he didn't have a TABOO concept!

BZZZZT

Domineering arcs of light bellowed out as the TABOO Relic LETHE finally undulated with less light as Noah's authority bounded out, its glorious visage beginning to flow towards him as his hand beckoned towards it now with the authority of his Black Tier Ascendancy Halos that held the Authority of TABOO!

They were Halos that one could normally only achieve with the Flames of TABOO concepts, and Noah Infused his essence through them to command this Relic before his eyes as it moved behind him and went on to clasp onto his back!

—

Around this same moment in time.

Within a cluster of innumerable Realities.

The gaze of a LEGEND was a terrifying one to have directed at you, with it being silent most of the time as their concepts of TABOO acted in such a way to not cause a reaction with one's destiny!

This meant that a LEGEND could be tracking down an existence without their knowledge as when they were found and the Visage of a genuine LEGEND crashed down, they wouldn't even know how they died.

The only way to counter such a gaze was with your own protective TABOO concepts and authorities as normally, only LEGENDS could counter LEGENDS.

This was why at this moment, a terrifying will of the Olden Emperor of the Golden Eye had locked on to a particular existence as even though the culprit was masked around the authority of a Disaster Remnant that was naturally hard to grasp due to these beings' history, other lines of destiny were grasped from the Primordial Blacklist as from this- many things could be stipulated!

"Noah Osmont...your will is stipulated across multiple Realities as karma connects you to the Primal Titans. Seventh Firmament of Ascendancy? Rubbish..."

The shocking visage of the Golden Eye couldn't even be seen properly as this existence gazed at multiple golden strings that had begun to feed him information, with him manipulating their Origin as his goal was to eventually find out everything about the existence that had killed his Will Bearers and then locate them!

"Now...where can I find you- oh?"

BZZZT!

Heavy obsidian sparks erupted out as the golden lines that the Olden Emperor was pulling upon shattered and fizzled out.

"..."

Out of nowhere!

Just when the Olden Emperor of the Golden Eye was about to make some headway into the identity and position of an existence that was already hard to track due to unknown factors!

Yet now, everything about him faded as no feedback of information was coming across even though multiple TABOO authorities were active at this moment...but it felt like they were being stopped by an unshakable veil.

BZZZT!

An unshakable veil that even when the authority of the Golden Eye raged out with more intensity, it remained unshaken!

It was the Veil of Lethe.

"Curious...does he have a LEGEND protecting him, or...?"

The will of a terrifying existence was confounded as the Veil of Lethe had passively acted to confound its first target!

A LEGEND had lost a trace at an opportune time that would have caused some troubles to a certain existence unless his destiny had begun to quickly alert him while contending against the authority of TABOO...and such an occurrence had occurred more than once in the past where just as tremendous possible peril was about to descend, it was unconsciously evaded within a difference of seconds or even microseconds.

How could this be explained? Was it purely due to the unconscious augmentation of Destiny altering things naturally and steering events in such a way? Or was it something else entirely?!

—

was a passive ability that one received if they equipped LETHE, but it could draw upon Mana and Essence of Reality as required if an inquisitive TABOO authority was geared towards your direction!

HOOONG!

Noah shockingly felt such a pull the moment he utilized the authority of his Black Tier Ascendancy Halos to adorn the obsidian cloak onto his back, thousands of Units of the Essence of Reality instantly beginning to be drained from him along with trillions of Units of Mana.

"Oh?"

His eyes flashed with solemnity as while his body was erupting with untold grandeur due to adorning a TABOO Relic, the feedback from LETHE told him that the passive Veil of Lethe was now actively stopping the piercing gaze of an existence as if Noah didn't coincidentally happen to obtain this Relic and equip it...

"..."

Would a Clone of his have been found? Or would his main body and Infinite Reality be revealed? These questions caused Noah's excitement for the TABOO Relic to take a backseat briefly as he reevaluated everything, with his destiny having affirmed to him that through his TABOO authority of the Black Tier

Ascendancy Halos, he would be masked against even Legends so long as he didn't have them heavily focus their attention on him!

This was the only assurance that had allowed him to continue into the Pure Blooded Domains where one might run across a LEGEND.

But it seems like such a LEGEND had actually focused on him as Noah could only think of a single being that was connected to the Will Bearers that he had eradicated! And yet...the Veil of Lethe had cut off anything that this being had attached to as after a few microseconds, the usage of Essence of Reality was stopped as the veil calmed down.

The singular feature of this TABOO Relic had already shown its ridiculous usage as for any worries about Noah becoming entangled in the sights of LEGENDS...they could all be forgotten as the number of things he could mask now were too many!

For an example.

BZZZT!

A hazy dark Veil of authority wrapped around his body as it extended upwards at this time, going on to extend past the solidified crown of the Unnamed Kainos Emperor.

A crown and authority that showed itself clearly at all times as it disdained being hidden!

Noah couldn't change the reality of this solidified crown, but he could set the authority of LETHE to alter the perceptions of others when they stared at him as he commanded the authority of this TABOO Relic to not show what floated above him! That was all.

WAA!

If someone were to be looking at Noah at this moment, they would notice his dazzling solidified crown fading from sight in a wondrous fashion.

A Relic...that was capable of even silently hiding an authority that disdained being hidden!

This wasn't all as LETHE wasn't just a TABOO Relic.

It was also a Limit Breaking Tool!

Ten Malleable Ascendancy Halos came with this Relic as they were multicolored when the cloak was unequipped, but the moment Noah adorned it...

SHIING!

They turned a dangerous shade of black as horrifically, Noah's body erupted with an even more domineering authority as 20 Black Tier Ascendancy Halos began to undulate around him!

"..."

10 were blank and without any Flames of Edicts as 600 concepts had to be conjured up and placed within to fully complement its authority.

But the sheer possibility of this affirmed that on this day, Noah had broken past the limitation of the number of Ascendancy Halos that a Seventh Firmament existence could have as from 10, he currently wielded 20!

And all this...was just a single aspect of the TABOO Relic LETHE as more than all of this, there was the that if Noah cast while fused with just 10 of his Ascendancy Halos with the true form of a Samsara Cosmic Dao Origin, he could achieve 75,000 True Reality Defense Values from this shield alone without even placing any other modifiers in the picture!

And he...had many modifiers to think about as the actual True value was unknown due to the fact that he now held an additional 10 Black Tier Ascendancy Halos.

This was only half of what LETHE could do as apart from all this, there were still four features another hadn't even delved into yet!

---

Rendition of Noah powering up with the concept of Reality Passages!

Chapter 1660 LETHE! III

After the already shocking capabilities displayed by LETHE, there were still a few other features that remained!

<Character Selection>:: The holder of LETHE can design a specific identity and reality to present to others, with multiple differing identities with their own unique concepts being capable of being designed and chosen at will. A base Bloodline can be set for the Character to be designed as concepts are built around it, the result being something that cannot be differentiated by even existences with TABOO Nomological Edicts unless they know what they are looking for. Years' worth of history and destiny about a character can be designed that will be what others find if they decide to gaze towards your direction...

<Memory Alteration>:: Under the authority of LETHE, the memories of targets can be altered in unique and unknown ways as if they cannot defend themselves, an existence could be made to lose memories of those closest to them or believe you were their closest most trusted person...

<Oblivion>:: Through resonance with the Relic and the user, the Relic can fully fuse into your body as an increased authority of TABOO is granted. In the case of LETHE, the unique concept of Oblivion is applied to its authority as it grants all offensive abilities an additional base of 100 True Reality Damage Values. This ability requires 100,000 Units of the Essence of Reality and 1 Quintillion Units of Mana to cast, and then requires the same number of resources to keep active every 5 microseconds.

<Concept Edit>:: The concepts under the user of LETHE can be modified in different ways, with the cost always being varying Essence of Reality depending on the changes. The Ultimate Skills of Flames of Edicts can be altered, or even the core meaning of an Edict or Dao...

Wondrous new features that might seem ridiculous to some or average to others...and it was all due to how one used them!

Concept Edit and Memory Alteration had the potential to be ridiculous Reality altering skills if used in certain ways, with Memory Alteration even being something that could heavily affect the Destiny of many beings if used properly.

Then there was Character Selection that allowed Noah to design multiple characters with years worth of histories and destinies- such a thing being much needed as he couldn't just have Legends try to peer into him and find nothing. A detailed false history would cause others to glance at him once and look away while finding no history and information will only cause any passing LEGEND to focus on him!

Then, there was the <Shield of Oblivion> that granted 100 True Reality Defense Values and only needed to be cast once with its 100,000 Units of Essence of Reality Resource Cost, with this number needing to be paid again only if the Shield was broken so that it could be reenacted!

Lastly, there was <Oblivion> that granted 100 True Reality Damage Values to all Offensive Abilities and required 100,000 Units of the Essence of Reality to cast as to keep it active, this resource along with Mana had to be paid every 5 microseconds!

If Noah was fused with his 10 Halos, equipped the Dimensional War Beads, and then fused with LETHE through <Oblivion>- Ascendant Reality Fireball would actually be capable of releasing a base 120 Value that when multiplied by a 750 multiplier...90,000 True Reality Damage Values could be reached.

"..."

And this wasn't even accounting for what the additional 10 Ascendancy Halos from LETHE would grant once Noah's soul was strengthened enough from burning concepts and absorbing soul crystals!

The idea alone could make someone gaze at everything in disbelief as they countered the probable damage with Ascendant Reality Sever as well, and just what the mere concept of a tenth Chain of Sever that would bloom 10 Ascendant Reality Fireballs would mean.

Unheard of damage Values in the hands of an existence in the Seventh Firmament of Ascendancy as one wondered...when Noah eventually broke his shackles and ascended to the Eighth and Ninth Firmament, would he be capable of reaching Damage Values that were the norms for those who had an established Reality?!

WAA!

Grand ideas without an abundance of information!

Noah let such thoughts free as after affirming the ridiculous capabilities of LETHE, he adorned this cloak as he looked like a stellar Cosmic existence that had now placed a shawl glimmering with 9 black illusory Realities behind his back, 20 Black Tier Ascendancy Halos undulating over him up and down as it was enough to frighten any weak minded existences in the Firmaments of Ascendancy.

With this in place, the remaining Loot from the Resplendent Treasure Cache finally resumed after being pushed aside the past few microseconds.

<The Sui Generis Enlightened Primordial Relic <Belt of Endless Space> has been obtained.>

<6,000 Ascendant Breaths of Reality have been obtained.>

<The Sui Generis Enlightened Primordial Relic <Chainsaw> has been obtained.>

<The Quasi-TABOO Relic <Helm of the Warring Emperor> has been obtained.>

<50 Flasks of Liquified Realities have been obtained.>

<2,000 High Tier Naturally Formed Primordial Treasures have been obtained>

<1 Ascendant Dimensional Essence Shards has been obtained.>

<100 Dream Stones have been obtained.>

<The Blueprint of the TABOO Consumable Item <Kainos Orb of Transmogrification> has been obtained.>

There were multiple new things to rise before Noah's eyes, but he honed in on one of these new forms of loot that particularly caught his eye while controlling himself to not yet hone in a certain TABOO Blueprint, his eyes first landing on the Flasks of Liquified Realities!

<Flasks of Liquified Reality>(50):: A single Flask contained the broken and ground down Reality into the form of a glorious liquid that can only be enjoyed by existences capable of doing such an action. They have no restriction on the number of flasks that can be taken by a single person as drinking a single Flask of Liquified Reality increases one's Maximum Reserves of Mana by 1 Quintillion Units, Maximum Reserves of Essence of Reality by 1,000 Units, and the Maximum Reserves of Destiny and Fortune by 1 Trillion Units.

...!

A fantastical Limit Breaking Tool appeared as even the Limit Breaking Elixirs Noah had forged...one could only have a limited maximum amount before their usage ran out!

But not the Flasks of Liquified Reality. Freewebnovel.com.

Can one imagine that? Turning an entire Reality into a liquified mass that you then drink? How would that feel coursing down your tongue? How would your origin feel at the Cosmic Filament level as it is bathed by the liquid form of a genuine Reality?!

Ah!
