

## The Mans Decree Chapter 3256

### Chapter 3256 A Piece Of Cake

"I can protect him. Even if it means risking my life, I'll protect Cloud," Livya angrily huffed out.

"All right, stop arguing. We're all family, so there's no need for this. Since Livya's a bit lonely by herself, I'll stay with her," Cloud said, choosing to be with Livya.

However, Cloud did not make it sound final. After all, in terms of strength, he and Livya were no match for Yorath and Genya, not to mention that they had Jadiel with them.

Thus, Cloud's words were a temporary gesture to prevent any hostility from Yorath and Genya. If they decided to act against him and Livya in the ancestral land, it could become troublesome.

Genya wanted to say something, but she was stopped by Yorath. Yorath then smiled and said, "Cloud, you can choose to be with anyone. But if you encounter danger, make sure to call for us in time."

"Thank you, Yorath." Cloud nodded. Yorath and Genya left, and the others also dispersed to explore the place. With only three days in the ancestral land, no one dared to waste time.

"Cloud, let's go. Besides independent nascence, there are many other resources in this ancestral land. If we're lucky, we might find ancestral treasures like divine weapons left behind," Livya said to Cloud.

Cloud nodded and followed Livya into the ancestral land. Deep in the mountains, Kai was still desperately fighting against the nascence beasts.

With each nascence beast he slayed, Kai gradually gained a sense of enlightenment. He knew that he was not far from comprehending metal nascence. However, his body was now covered in numerous wounds.

Relying solely on his physical strength and fists to battle these nascence beasts was proving to be incredibly challenging.

After defeating another nascence beast, Kai collapsed on the ground, panting heavily. Even his clothes were in tatters. Some parts barely covered him. Miya walked up to Kai, her eyes filled with admiration.

“If you’re tired, take a break. The ancestral land will be open for several days; there’s no need to rush,” Miya advised.

“No, I have to comprehend metal nascence as soon as possible.” Kai shook his head and struggled to get up.

Only by comprehending metal nascence could Kai begin absorbing the unclaimed nascence aura. Moreover, his illusion nascence, lightning nascence, and fire nascence all required the replenishment of nascence aura.

Kai was determined to make the most of his time here and could not afford to waste even a moment. A place like this was a rare find, and opportunities like these did not come often.

Seeing Kai’s determination, Miya realized she could not stop him and could only follow along. At the same time, Yorath, Genya, and Jadiel walked into the mountain valley.

This valley had the highest concentration of nascence beasts, making it a place many Seizon family members avoided. After all, without activating their nascence space, entering would be futile. Yorath and Genya were there to accompany Jadiel.

“Mr. Jadiel, the majority of nascence beasts here are of metal nascence, so your chances of comprehending metal nascence will be significant,” Yorath explained to Jadiel.

“However, these nascence beasts require physical strength to be slain. You can’t rely on magecraft or divine weapons; only by using your physical body can you swiftly comprehend metal nascence,” Genya added. “But, doing so comes with risks. You must have a robust physique to withstand the attacks of these nascence beasts.”

“Haha! Perhaps the Behemothians’ magecraft can’t match others, but when it comes to physical strength, who can surpass us Behemothians?” Jadiel laughed. “We’ve been tempering our bodies since childhood. Even if I stand still now, ordinary weapons won’t be able to harm me in the slightest. This is a piece of cake for me.”

## The Mans Decree Chapter 3257

### Chapter 3257 Beware Of Ambushes

“Indeed. You’re a Behemothian, and your physical prowess is unparalleled,” Yorath praised. As they strolled and conversed, Jadiel suddenly froze, his gaze sweeping the surroundings.

“Mr. Jadiel, what’s the matter?” Genya asked.

“Yorath, has anyone trespassed on the Seizon family’s ancestral land prematurely?” Jadiel queried.

“It’s impossible. The ancestral land is guarded. How could anyone get in early? Did you discover something?” came Yorath’s question.

“I sense that there has been a skirmish here, and the lingering traces of battle are evident,” Jadiel pointed out, his brows furrowing.

“Battle traces?” Yorath extended his spiritual sense but shook his head. “I don’t sense any lingering traces of aura here.”

“The opponent relied on physical strength, not spiritual energy or magecraft, so you wouldn’t detect the residual aura. But for us Behemothians, such an aura doesn’t escape our scrutiny,” Jadiel explained.

“Who could have entered the ancestral land ahead of time? With Old Mr. Ozrell guarding the place, the entrance to the ancestral land should remain closed, and no one should be able to enter,” Yorath pondered, wearing a puzzled expression.

“Yorath, is it possible that it’s Miya? I didn’t see her in the team this time; maybe she came in early,” Genya suggested.

“It’s unlikely. Miya hasn’t activated her nascence space. What’s the point of her coming here to kill nascence beasts?”

Yorath shook his head.

“That’s strange. Who could it be?” Genya also looked perplexed.

“Regardless of who it is, stay vigilant, and be careful not to be ambushed,” Jadiel reminded them.

The Seizon family was currently in turmoil with internal conflicts. Even if an ambush were to happen within the ancestral land, no one outside would be aware of it.

Roar!

With a sudden mighty roar, a nascence beast appeared. Jadiel, excited at the sight, did not wait for Yorath to speak; he charged directly at it.

As Jadiel battled the nascence beast, Kai followed Miya and went deeper into the valley. The farther into the mountain range they went, the stronger the nascence beasts became.

Slaying powerful nascence beasts increased the chances of comprehending nascence, which was why Kai continued to venture deeper.

“Kai, if we continue deeper, we might encounter nascence beasts of unknown strength. I think we should reconsider going any further,” Miya said, appearing a bit nervous as Kai continued toward the depths of the mountain valley.

“Don’t worry. If we come across powerful nascence beasts, I can use techniques and weapons. It’ll be fine,” Kai replied with a faint smile.

However, just as Kai finished speaking, three nascence beasts appeared simultaneously. Coming in from three different directions, the three nascence beasts approached Kai and Miya.

Seeing this scene, Kai could not help but furrow his brows. Miya’s expression also changed slightly as she pulled on Kai’s sleeve.

“Why do these three nascence beasts look a bit different?” Miya asked.

“They do seem different. Nascence beasts are supposed to lack sentience, but these three, by surrounding us, seem to possess some level of intelligence,” Kai replied.

“What should we do?” Miya asked nervously.

“You hide off to the side. Perhaps, by defeating these three nascence beasts, I can finally gain insight into metal nascence,” Kai responded.

“Be careful. There are three nascence beasts. If needed, use your techniques and weapons,” Miya cautioned Kai.

After speaking, Miya found someplace to hide, silently watching Kai. The three nascence beasts paid no attention to Miya and continued to approach Kai step by step.
