

Married At First Sight

Chapter 3153

[Married At First Sight Chapter 3153](#)

Serenity said, “That’s it, Sonny; don’t listen to what your eldest aunt says, and don’t listen to what your grandparents say. If your father says bad things about your mother and Uncle Lewis, don’t listen either. They are just jealous.”

Sonny said, “Auntie, I know, they think I’m young and don’t understand anything, but I understand everything.”

Sonny’s heart was like a bright mirror; he knew who was really good to him, and he also knew who was hypocritical.

It’s just that he was still young and couldn’t express many things.

Serenity touched Sonny’s head.

She really needed to tell Liberty to keep Sonny away from the Brown family.

That family consisted entirely of dogs who were unable to alter their eating habits.

Serenity once rescued Chelsea’s youngest son, hoping that Chelsea would change as a result.

Before Liberty was with Duncan, Chelsea’s attitude towards the two sisters was much better, and she even treated Jessica in return.

Now, Chelsea is still the same Chelsea as before.

After entering the elevator, Zachary put Sonny down.

Sonny held Serenity's hand while holding Zachary's hand.

He felt that his parents were not with him, but he has an uncle Zack and an aunt Serenity, and he was very happy.

There was no feeling of leaving children behind at all.

"How's Tatum doing? Has he applied for the job?" Serenity asked Zachary.

Zachary said, "Not yet. It means that the re-examination will not take place until tomorrow afternoon. It is just to recruit a chef. The array the Ormond family has set up is like recruiting a prince-in-law.

People who are picky pay more attention to chefs. People also have the conditions to choose."

Serenity smiled and said, "Has he met Miss Ormond? Has he secretly taken photos? I only saw that he posted his dormitory in the group. He lives in a one-bedroom, one-living house, which is about seventy square meters. I think it's great."

The Ormond family's financial resources were obviously strong.

Zachary said, "He hasn't seen her. Elora is now the head of the Ormond family, and she is busy."

Serenity understood.

Zachary was also very busy. After marrying Serenity, in order to take into account her mood and accompany her, he reduced his social activities and returned early in the evening.

When Serenity first met Zachary, he came home late at night every day. Every minute and second was money for him.

Not only did he have to take care of the company's affairs, but he also occasionally had to take care of his younger brothers.

Fortunately, both his biological brother and cousin respect him very much as his eldest brother.

With such a good brother, it's worth it for Zachary, the head of the family, to be a little tired.

"That dormitory is very big for ordinary people. Tatum is used to living in big houses."

Zachary didn't say any more. Whether the younger brother was used to it or not, it was his business.

Tatum was mentally ready because he decided to work as a chef for Ormond's family.

After all, he was going to be a chef, not a young master.

"He can adapt too." After Zachary was silent for a while, he added.

Grandma threw them all onto a desert island for survival, and they managed to thrive in the most extreme conditions.

When working as a chef for the Ormond family, the living environment is much better than on a deserted island.

Don't say that he's the younger brother. Give him two days, and he'll get used to it.

Grandma often said that flowers never last forever. Who can guarantee that the York family will always be wealthy?

If they encounter a financial crisis, they may be in dire straits and lose their fortune if they aren't careful.

They have experience surviving in harsh environments. Even if the York family is truly bankrupt in the future, they can still survive with their own abilities and strong character. Only when people are alive can they have hope and make a comeback.

After Zachary took over the family business, he also understood his grandmother's painstaking efforts to train them.

He managed the company with great trepidation, fearing a defeat by the York Corporation.

Fortunately, the York Corporation was booming, and the York family's wealth had reached a new level.

He should not allow defeat in his hands.

The next generation...

After his eldest son was born and his grandma was still in good health, he gave his eldest son to his grandma to raise. He believed that his grandma could raise her great-grandson properly.
