

Maxing MT 171

Chapter 171: Nuclear Equipment, If You Can't Buy It, You'll Be Scammed!_3

[Additional reward of 10000 reincarnation points!]

He listened to the sound of the Reincarnation Mark.

Li Yueming's expression didn't change much.

According to his experience, it was usually easier to defy the heavens and change one's fate for the first time.

The more you go on, the harder it is to have a voice.

However, this was only the first time he had changed his fate.

Li Yueming already felt a little tired. The trouble waiting for him in the future would probably not be any less than before.

In this year.

Other than learning how to modify his body parts every day.

Li Yueming did not stop training and polishing his body either.

He grew very fast.

Now, his height was almost the same as Sun Ruo's.

His weight had already broken through the 90-pound mark.

The only unfortunate thing was...

The supernatural powers in this world were different from those in the past.

It was the same as how one had to cultivate cultivation techniques in order to become stronger in the world of martial dao.

In this technological world, one could only rely on their own body to train their body.

He wanted to regain control of his strength and return to his peak.

Li Yueming had to get a bottle of Extraordinary Potion.

On a certain day half a year later.

Old Lin went out to find his friends to drink while Li Yueming was repairing a damaged Level 1 Mechanical Artificial Eye.

At this moment.

A muscular man in his thirties suddenly appeared outside the door.

The man expressionlessly threw a huge Level 2 mechanical arm on the counter and said, ""Can this be repaired?"

Li Yueming slowly got up from his work desk and took a look.

It depended on the design style and the precision of the parts.

This should be a pure second-grade steam powered arm produced by Hurricane Technology.

However, at this moment.

The mechanical arm was severely damaged.

Not only did the parts fall, but even the core mechanical arm was irreparably damaged.

This color...It was even more exaggerated than the damaged version of the Iraq war.

Li Yueming glanced at it and said casually, ""The damage is too serious. I suggest you change it to a new model!"

The man ignored Li Yueming's noise.

He looked around and asked, "Has this shop changed owners?" Where's Old

Lin

' He's out. I'm Old Lin's disciple. If you have anything to say, you can tell me directly!"

Li Yueming said calmly."

The man sized up Li Yueming.

He licked his lips and said, "You're quite brave. You haven't even grown your hair yet. Tell me directly if you can fix it! ""

Li Yueming smiled." If you insist, you can fix it. But the cost of replacing the parts may be equivalent to buying a brand new one. Are you sure?"

The man's face instantly revealed a pained expression.

However, after hesitating for a moment, he still said,"Do you have a new one here?"

Li Yueming shook his head." This kind of Level 2 Bio Equipment is too expensive. The shop doesn't have it in stock. If you're sure you want it, you have to pay a deposit. Come back in a month to collect it! ""

Hearing this, the man's expression turned ugly."Can't you see that I'm in a hurry to use it now? If it wasn't for Old Lin, I would have killed you with a slap!"

He snorted coldly.

He put away his costume and turned around to leave.

Seeing this situation.

The smile on Li Yueming's face became even more harmless.

He took out a brand-new set of arms from an inconspicuous box on his back and said, ""This is a new type of reproductive equipment that our shop has launched. It is powered by nuclear energy and can carry up to 80000KG per arm. It also has both melee and long-range attack modes. The brand new factory discount price is only 200000 cloud leaf coins." Hearing this.

The man, who was about to turn around and leave, stopped.

“What did you say?”

Li Yueming picked out a few key words and repeated them again and again: “Nuclear Energy Drive, maximum weight of 80000KG per arm. There are two types of melee and ranged attacks. The price is only 200000 Ye coins!”

Looking at Li Yueming’s black and unremarkable arms, the man almost laughed when he heard that.””Kid, do you know what you’re saying?”

Li Yueming nodded with a harmless smile,””Of course, you can try it first. If it doesn’t work, you can get a refund!”

Half an hour later.

The mechanical arm in Li Yueming’s small box was replaced with two fixed real estate scrolls from the Cloud Sky Bank.

200,000 cloud leaf coins.

These were Li Yueming’s total gains from his work this year.

In this year.

Whenever he repaired or disassembled a Level 2 Bio Device, he would always get some parts.

The mechanical arm that he sold to the man was made from all kinds of messy parts.

Compared to the fancy mechanical devices on the market, the mechanical devices were much more expensive.

Li Yueming’s design philosophy was very simple.

First, it was sturdy and durable.

As for the other aspects, they just needed to deal as much damage as possible.

This design concept had obviously won over the first customer.

The man happily spent 200,000 cloud leaf coins.

After buying the Level 2 Mechanical Arm that Li Yueming had assembled with a bunch of broken parts, he left happily.

200,000 was already an astronomical figure for ordinary people.

However, it was far from enough for Li Yueming.

In the past few years.

The Yunxiao Group and the Andre Group had quite a conflict over the issue of the gene serum.

The price of a single super-drug in the black market had already reached millions.

Moreover, there was no market for it.

Under such circumstances, 200,000 yuan was not even a fraction.

However, if he only wanted to buy some military grade-3 parts...

It should be enough.

He silently closed the door of the repair shop.

Li Yueming drove an old pickup truck into the unmanned bank.

He exchanged the real estate that the man had given him for cash.

Then, he drove straight to the underground black market in the west of the city.

He spent 180,000.

Li Yueming bought two military grade-3 alloy arm parts, two grade-3 alloy leg parts, and one grade-3 military armor part.

After buying these things.

Li Yueming returned them to his residence and began to assemble and modify them.

What he wanted to do was very simple.

He could create a powerful next-energy mecha himself.

Then, he would use this opportunity to go to the black market to participate in the boxing championship.

As long as he could win 20 consecutive matches in the arena.

Li Yueming would be able to directly obtain a 'free' superpower potion from the organizer.

Chapter 172: Arena

Two months later.

Li Yueming was polishing his new generation of body parts through infinite deduction every day.

Of course.

He definitely wouldn't modify himself into a shitty robot.

After all, one would only know how terrifying the human body was if they had gone through personal martial arts.

Changing his body was like throwing away a watermelon to pick up sesame seeds.

Therefore, he had no choice.

What Li Yueming wanted to research was a nuclear mecha.

Not only could he avoid modifying himself, but he could also obtain superpowers through technology.

During this process.

Sun Ruo had also come to look for him a few times.

As a superpower, she was more agile than Li Yueming.

Therefore, he had no choice.

Naturally, the task of the information from the outside world fell on her.

According to the current information.

The exasperated Cloud Sky Corporation turned the outside upside down but could not find any traces of the two of them.

Currently, they were preparing to conduct a thorough search of N City and its neighboring cities.

Blind spots like the slums were the most important part of the search.

There was not much time left for Li Yueming.

Finally, half a year later.

Li Yueming's mecha finally completed the final inspection.

When he slowly got up from the ground in his mecha, Sun Ruo was dumbfounded.

He looked at the two-meter-tall giant metal monster in front of him.

"You fiddled with it for half a year, and you only made a metal lump?" she asked in disbelief.

Regarding this.

Li Yueming laughed coldly." How about it? Metal aptitude user, do you want to try out the power of this metal lump?

Sun Ruo looked him up and down.

Sensing the eagerness in his eyes, he could not help but shrink his neck and say,"Forget it. I'm afraid I'll accidentally break your metal lump! However, I can now understand why the Cloud Sky Corporation went crazy after knowing that you escaped. Sometimes, I even want to cut you open to see if there's a monster living inside."

To be honest.

When ordinary people were five years old, they were still competing to see who could pee further.

Li Yueming was able to build a mecha when he was five years old.

Probably only a freak from the laboratory could do it.

Seeing that she wasn't fooled.

Li Yueming couldn't help but lose interest.

Seeing him like this, Sun Ruo couldn't help but say,""I've been to the underground boxing arena before. There are boxers that are comparable to Class B superhumans there. Can you do it?"

Hearing this.

Li Yueming operated his mecha arm and made a strong gesture.""Men can't say no!"

The underground boxing club was located in a desolate and secluded stadium in the west of the city.

The area it occupied was very wide, and it could accommodate more than 100,000 people.

However, it was under such circumstances.

Every time the battle began, the entire arena would be filled to the brim.

Its huge influence in N City was evident.

The rules of underground boxing were very simple.

Extraordinaires and genetic warriors were not allowed to participate in the competition.

Other transformationists, including ordinary people who were not afraid of death, could go up to the stage to fight. The competition was held once every three days.

Five rounds at a time.

Those who wanted to participate in the underground boxing competition would sign a life and death contract in advance.

The winner wins everything.

Most of the losers died on the spot, and only a few lucky ones might survive.

This was the simplest rule of killing.

The winner would receive 100000 cloud leaf coins for every round they won.

If they won more than three times in a row, the prize money could be doubled.

Of course, once the winning streak was broken.

On the other hand, the winner would take away all the losers 'gains.

In other words, the higher the number of consecutive wins, the more prize money he accumulated, and the higher the probability of encountering a strong challenger.

As long as they were not afraid of death, they would be strong enough.

A few consecutive wins could earn a huge amount of wealth that ordinary people could not imagine in their lifetime.

It was truly a bloody fight.

It's because it's exciting enough

That was why so many spectators had gathered here like locusts.

There were all kinds of people who came here to watch the boxing match.

However, no matter what his status was in the real world.

As long as they entered the venue, everyone would wear a black mask to hide their identity.

If there was any place in the western part of the slums that was worthy of being missed by the nobles of N City, it would be a pity that the slums were so poor.

Then this place must be the most important place in their hearts.

Many high-ranking officials and dignitaries had ended their well-dressed and refined lives during the day.

Taking advantage of the night to put on a mask and come here to party all night!

Li Yueming and Sun Ruo paid two thousand cloud leaf coins for two admission tickets.

The air in the underground boxing arena was filled with the stench of sweat, body odor, and various secretions.

The mixture was very intoxicating.

Sun Ruogang covered her nose as soon as she came in.

His brows were furrowed into a knot.

If he wasn't afraid that she wouldn't be around, Li Yueming would have been beaten to death.

She would definitely not come to such a place to be snubbed.

Li Yueming was used to this and even spat on someone's head.

It could be said that their quality was extremely low.

In the arena not far away.

A man in a costume was fighting fiercely with another man.

One of the men on the left lifted a mechanical arm that looked very simple and crude.

Light blue nuclear flames shot out and smashed the head of the combatant into pieces.

Obviously, it was to pursue extreme power.

The transmigrator had even modified the outer shell of his brain into a mechanical body.

But even so.

Still, the parts that had been punched were scattered all over the ground. Even the brain juice inside the alloy bones had been scattered somewhere.

Seeing this situation.

Many people in the venue had different reactions.

Some people cry, some laugh, some cry and laugh..

Some people twisted their bodies and roared like angry bulls.

There were also people whose eyes were shining, and their veins were bulging. They were extremely agitated.

In just a few seconds, a hysterical and crazy atmosphere spread throughout the entire venue.

The cheers grew louder and louder, deafening everyone. Occasionally, it was mixed with a few extremely resentful words. "Right Arm War God is invincible, hahaha!"

"I lost another 30,000 cloud leaf coins. F * Ck you, refund the money!!!"

"I told you long ago, right? The God of War's Right Arm will definitely win this match. You don't believe it and want to get a high return!"

"Is there anyone who wants to mortgage their property? I want to play poker in the next round. I'm going to get rich in one move!"

Li Yueming stood on the stage and watched for a moment.

That so-called War God with the right arm was the one who had spent 200,000 cloud leaf coins to buy the mechanical arm.

Obviously, it had been more than half a year.

The man had already gotten used to Li Yueming's simple and carefree aesthetics of violence.

He listened to the discussions of the surrounding audience.

It was only for one night.

He had already won four matches in a row.

He was given the title of 'Right Arm God of War' by the fanatical crowd.

Regarding this.

Li Yueming just smiled and said to the nines'.

What the f * ck, War God of the Right Arm?

This trashy title sounded better when he changed his name to Wang Goudan.

The gamblers around them were discussing non-stop.

"Do you guys know where you bought the right arm of God of War? He felt that the reason why he could win these few matches was more than half due to that strange mechanical right hand!"

"I don't know. That arm looks tattered. It's too terrifying to fight! Not only could it fight in close combat, but it could also attack from a distance. Moreover, its power and endurance were extremely long. It was simply a freak in the world of artificial limbs!"

"In any case, the mainstream concentrated body on the market doesn't have so many complicated functions, but from the looks of it...It shouldn't be produced by a big factory. D * mn, is there a small workshop in N City that can manufacture its own reproductive arms?"

Obviously.

Many people were very interested in the man's mechanical reproductive arm.

Or maybe he was already interested.

It was pure greed.

After all, the increase in combat power that the man's prosthetic arm had given him was obvious to nearly 100 thousand people present.

It was only equipped with an arm.

It was enough to make a normal Growth-Cultivator who could only be considered average in combat strength achieve four consecutive victories in the underground boxing arena.

If I could equip a full set of my own,

Wouldn't that mean that he had a chance to challenge twenty consecutive wins and obtain the legendary Extraordinary Potion?

Of course.

It would probably shock countless people.

From all angles.

It was undoubtedly very dangerous for Li Yueming for a man to use the mechanical arm developed by Li Yueming to show off his skills in the underground boxing arena.

After all, his identity was rather sensitive.

Once it was exposed to the public.

In less than ten minutes, they would probably be completely blocked by the City Defense Army.

Fortunately, Li Yueming was prepared for this.

He had specially signed up for the fifth match of the day in order to completely nip the danger in the bud.

Therefore, no matter how she looked at him, he was more like a pure and innocent child.

It was fine that he had spent 200,000 cloud leaf coins to buy a second-grade product that he had made from discarded parts.

Now, he had just won four consecutive victories.

He was preparing to win five consecutive victories in one go and get a reward of one million cloud leaf coins.

He had to face Li Yueming, an unprecedented super opponent.

Ignoring the crowd that was still discussing, Li Yueming and Sun Ruo came to the edge of the venue.

There were already staff members waiting here for a long time.

A week ago, Li Yueming had already signed up for the competition.

Fortunately, he was mature enough.

No one would question a five-year-old who reported an imaginary age of sixteen.

He handed the contestant's entry card to the staff.

The staff member looked at Li Yueming with a strange expression and asked, "Are you sure you want to go on stage like this?" She couldn't be blamed for being unnecessary.

After all, there were all kinds of idiots in this day and age.

However, it was rare to see someone like Li Yueming who was rushing to reincarnate in his teens.

Li Yueming revealed a harmless smile and said, "Sister, will it be okay for me to wear this set of metal lumps? It can at least take a beating!"

The staff was speechless.

He looked at the harmless smile on Li Yueming's face.

For a moment, the staff member did not even know what expression he should use to face this.

In the underground boxing arena.

Including Li Yueming, Sun Ruo, and many other staff members, all of them wore black masks.

Li Yueming's 'sister' sounded quite comfortable.

It was a pity.

Such an obedient younger brother was about to go on stage and die.

"As long as you're not a supernatural being or a genetic warrior, there won't be a problem!"

During the conversation.

The halftime interval had passed.

Li Yueming didn't waste his breath.

He put on the armor that was tailored for him.

After adjusting everything.

Under the staffers' stares as if they were looking at a ghost.

Li Yueming slowly stepped onto the arena.

On the other side.

The man, who had just won four consecutive battles, went down to drink a few bottles of nutrient solution to replenish his strength. He also replaced some of the body parts that had been damaged in the previous battle and applied some grease.

Once again, he walked to the center of the arena with a condescending attitude.

Instantly.

The tens of thousands of people outside the arena erupted in cheers.

Countless red-eyed gamblers were shouting the nickname 'Right Arm God of War.'

Then, she focused her praise and gaze on the man.

On the other hand, Li Yueming's appearance was a bit more depressing.

Not only did no one cheer.

The entire stadium was filled with the sound of boos.

As for the specific reason...

Firstly, Li Yueming was a nameless newcomer, and he had not left any reputation in the arena.

The second was to follow the rules.

Both sides had to make an appearance declaration before they went on stage.

It was to boost morale and leave an impression on the spectators.

At this moment.

Under normal circumstances, the fiercer and more hot-blooded the declaration, the better the effect.

Li Yueming's entrance declaration was to punch Nanshan Elderly Home and kick Beihai kindergarten.

This kind of f * cking declaration caused a lot of boos.

Many of the gamblers who bet on God of War's Right Arm almost laughed out loud.

Of course.

When they saw the two-meter-tall giant mecha slowly appear on the stage.

Everyone's smiles froze on their faces.

Chapter 173: Shocked the entire stadium, saturated firepower coverage!_1

The arena was located at the center of the stadium.

Standing here and looking around, one could truly feel how terrifying the venue with nearly 100,000 people was.

Looking up, the surroundings were filled with a sea of people.

Countless people waved their fists hysterically, and their violent roars resounded through the world.

However...

The moment Li Yueming went on stage.

Everyone was stunned.

They had seen old men fighting on the stage because they could not afford to replace the mechanical parts.

He had also seen young people dressed strangely and acting ostentatiously.

However, it was the first time he had seen someone like Li Yueming who wore a metal mech that had no aesthetic appeal.

It wasn't like no one had ever passed through mechas before.

However, those were all genuine products purchased from technology companies.

It was shiny and majestic.

Although he was defeated in a very miserable manner, it was still easy for people to accept.

But what the hell was this guy wearing a broken piece of metal on stage?

Could it be that the organizers had invited a fake contestant?

For a moment.

Countless spectators couldn't help but boos.

"Where did this junk come from? Wasn't this kind of iron lump eliminated 200 years ago?"

"You don't know, right? Perhaps it was the Renaissance again after 10 or 200 years?"

"You want to fight with the Right Arm God of War in such a lousy mech? He would probably be beaten into scrap metal in a few moves, right?"

"Of course. If the organizers didn't ask for a leave of absence, I would lose if this iron lump could last more than a minute!"

"How f * cking unlucky. I can't earn much from betting on such a boring competition!"

Tens of thousands of spectators were still discussing.

At this moment, in the center of the arena.

Li Yueming and Right Arm War God had already signed the life and death contract!

Both sides made their final preparations.

Finally, the battle was about to begin.

He looked at the metal lump not far away.

A cruel smile appeared on War God's face. He licked his lips and said, "I hope you won't scream when you get blown up later!"

Half a year ago.

He saw an extremely simple mechanical arm in Old Lin's repair shop.

The brazen little doll wanted to sell it for 200,000 cloud leaf coins.

At that time, he thought that the other party was joking.

He was so angry that he almost laughed.

However, when he really put on the prosthetic arm and tried it out...

Only then did he realize that the other party wasn't joking at all!

Nuclear power, maximum load of 80000KG per arm. Both melee and ranged attack modes.

After the actual test.

Many of its functions had even exceeded his expectations.

Under such circumstances.

He gritted his teeth and spent a total of 200,000 cloud leaf coins to buy the mechanical arm. After practicing diligently for half a year, he finally adjusted his arm's proficiency and adaptability to above 80.

He didn't expect that he would be able to rely on this powerful mechanical arm.

He actually won four matches in a few short hours and earned nearly 500,000 cloud leaf coins!!!

As long as he could finish this win streak.

He would be able to get close to 700,000 cloud leaf coins to go home.

At this moment.

The man had already made up his mind.

After finishing the game, he immediately went back to Old Lin's shop to look for that little doll.

He would try to buy all the other parts of the body.

However, he didn't know that it was the name of the game.

The 'iron lump' in front of him that he didn't care about was actually his grave.

Under the constant clamor of the surrounding audience.

Not far away.

The man looked at the 'iron lump' who was pausing with every step. He did not say anything else and directly raised his right mechanical arm.

"Peng, peng, peng!"

Three sounds came from his right arm.

In the blink of an eye, three powerful small-scale armor-piercing bullets shot towards Li Yueming.

Regarding this.

It seemed like the iron lump was prepared for this.

He grabbed a small round shield with one hand as if he wanted to use it to block the armor-piercing bullet.

This action caused the War God of Right Arm, who was not far away, to let out a few disdainful laughs.

Obviously, in his opinion.

It was impossible to block the armor-piercing bullets with such a thin shield.

The best result would be that the shield would be pierced through and the mech would be hit directly.

However, in the next second.

Three crisp sounds broke everyone's imagination.

A series of sparks burst out from the shield in the metal lump's hand.

But even so.

The huge impact only made the iron lump's arm tremble slightly. Its entire body did not even take a step back. All of this happened in a flash.

But even so.

The originally crazy crowd on the stage still looked as if someone had suddenly grabbed their necks.

Everyone held their breath in an instant.

Armor-piercing bullets could penetrate alloy steel plates that were at least ten centimeters thick.

Logically speaking, even if a Level 2 Bio Equipment user were to face such a high-damage weapon, their first choice should be to dodge.

After all, they had personally seen the God of War's Right Arm shoot three armor-piercing bullets at a Level 2 Bio Equipment wielder who had three consecutive victories.

But now.

In front of the weirdly-shaped 'iron club', it seemed to have been replaced by three blank bullets.

With just three muffled sounds, it was easily blocked by the shield.

After a moment of silence.

The entire arena was in an uproar.

"D * mn, what's the quality of this shield? It can actually withstand three armor-piercing bullets!"

"No way, I just bet on Right Arm God of War to win.. This guy better not make an upset!"

Chapter 174: Shocked the entire stadium, saturated firepower coverage!_2

"Right Arm War God, hurry up and destroy this stupid thing!"

On the stage.

Seeing that the inconspicuous metal lump had forcefully resisted the attack, it was far beyond the man's expectations.

However, at this time, he clearly did not realize the seriousness of the matter.

He stood up and injected power into his legs.

He pounced towards Li Yueming like an arrow leaving the bow.

Moreover, between long-range attacks and close-range attacks, he was better at close-range attacks.

In addition, his right arm could inject 80 tons of force.

The man did not believe that the other party could withstand such a huge impact.

Seeing this situation.

Li Yueming stopped pretending.

As a weapon for his own use and control.

The mech that Li Yueming was wearing was like a father and son compared to the wronged man's tattered right arm.

Whether it was the core power or the number of weapons loaded, Li Yueming could completely crush the man who only had one right arm.

Under such circumstances.

He did not want to reveal too much of his strength.

Therefore, he had no choice.

He chose to use the simplest method to solve the problem.

Li Yueming soared into the sky.

The power assist device installed under his feet allowed him to fly freely in the sky.

The maximum height allowed in the underground arena was fifty meters.

Li Yueming stopped when he reached an altitude of about 40 meters.

He looked down with his naked eye.

The man below the arena was about the size of an ant.

Li Yueming activated the auxiliary aiming system.

He raised his left arm.

Instantly.

A series of explosions sounded.

Under everyone's astonished gazes.

The mech's left arm fired dozens of small howitzers consecutively! !!

The small howitzer had a diameter of about ten meters.

The effective killing range was only about eight meters.

It was the most powerful weapon allowed by the rules of the underground boxing arena.

After all, the firepower of the firearms they carried was too great.

The safety of the surrounding hundreds of thousands of spectators could not be guaranteed.

After several casualties caused by large-scale firearms, the two of them had been defeated.

The organizers became smarter.

Not only did they change the rules of the competition. hilt they also sent people to check the firearms carried by the warring parties every time they went on stage.

As long as the weapon's lethality exceeded the endurance limit of the arena.

They were all not allowed to be brought along.

Howitzers, on the other hand, were not very lethal.

Unless it was an accurate hit.

Otherwise, it would be very difficult to cause fatal injuries to a Level 2 Growth-user.

The weight of this thing was very considerable. If you brought too much, it would even affect the performance of the device.

Therefore, under normal circumstances.

Ordinary participants would at most carry three to five howitzers as long-range attacks.

Most of the time, when they entered the arena.

His attention was still focused on studying the body armor and physical combat techniques.

However...

Li Yueming's fighting style was different from what everyone expected.

He piloted the mecha alone and floated in midair.

The small grenade in the left cannon seemed to be free.

He actually fired more than 30 small howitzers in one go!!!

Such a large number of cannonballs were fired.

It was enough to cleanse the entire arena in an extremely violent manner.

Boom!!!!!!

A series of deafening explosions sounded.

It even drowned out the clamor of the hundreds of thousands of spectators.

The shockwave from the explosion of the small howitzer sent many spectators flying.

For a moment, the entire arena was filled with dust and chaos.

Countless spectators were covered in dust.

However, when he turned his head and looked at the figure floating in the air above the Arena
Arena...

All the spectators were deeply shocked.

A moment later.

Some of the spectators snapped out of their daze and cursed, "F * Ck your grandpa, is flying in the sky and bombing considered a dimensional attack?"

Hearing this.

Many of the audience members looked at each other.

For a moment, no one could answer this question.

"I don't know...However, if he only carried a howitzer, it didn't seem to violate the rules, right?"

“This is ridiculous. He carried so many howitzers. Isn’t he afraid that there will be problems with the power system?”

“It’s not a reproductive device, right? It should have more energy...” However, this kind of old mech’s operating efficiency was definitely slower than a body. Right Arm God of War should still have a high chance of winning as long as he could last through this round of artillery fire!”

“That’s right. As long as he gets close, the Right Arm War God can easily kill this kind of metal lump with inconvenient limbs!”

“However, I have to say that this mecha operator is quite capable. He knows how to open up an attack distance the moment he gets on stage!”

In the arena.

The man who had been hit by the bomb walked out of the smoke and dust.

At this moment.

There was a lot of dust on his costume.

There were also several parts that were damaged to varying degrees.

If he hadn’t dodged in time, he would have only been hit by the aftershock of the explosion.

Now, his physical combat strength was probably more seriously damaged.

He coughed a few times.

The man also flew up with his suit and said angrily, “”Damned fellow, I want to see what other tricks you have!”

That metal lump was carrying so many long-range howitzers. In terms of close combat, it would definitely be more difficult.

Hence, he decided to do it.

The man quickly gathered his thoughts.

He forcefully controlled his equipment and flew into the sky.

Besides the propulsion system, most of the energy supply was added to his right arm.

In the blink of an eye, the output power of the device had been loaded to the highest load..

Chapter 175: Shocked the entire stadium, saturated firepower coverage!_3

This punch had 80 tons of power.

As long as he could get close to that iron lump.

Then the opponent would definitely be smashed into pieces by the heavy punch.

Unfortunately, imagination was beautiful.

Reality was always cruel.

Li Yueming, who was floating in the sky, was still aloof and indifferent.

She saw the man approaching quickly.

Li Yueming couldn't help but sneer.

This guy.

How dare he?

Li Yueming's melee attacks were definitely stronger than ranged attacks.

Just the distance of tens of meters.

How did he dare to fly up so brazenly?

Wasn't he afraid of being washed by the cannon?

He put down his left arm without a word.

Then, under everyone's incredulous gazes, he raised his right arm.

“Rumble

Another deafening explosion sounded.

The entire underground boxing arena shook.

Dust fell from the sky.

Many of the spectators who had just gotten up and had yet to figure out what had happened were sent flying by the shockwave produced by the explosion.

“F * ck, how many howitzers does this piece of metal have? Are we still going to fight? How are we going to fight!”

Countless viewers were scared.

The entire venue was in an uproar.

Fortunately, they didn't have to look confused anymore.

Because after the dust and gunpowder smell dissipated slightly.

Li Yueming, who was originally floating in the sky, suddenly fell at lightning speed.

With the force of a thousand tons, he stepped on the chest of the Right Arm War God, who was in a sorry state after being blasted by the howitzer.

He kicked lightly with one leg.

The right arm of the God of War's chest was broken inch by inch. Li Yueming violently removed the right arm of the God of War's chest.

It was thrown onto the ground and crushed right arm wargod's head into pieces.

Compared to the other people's miserable deaths, the Right Arm War God died with more dignity.

At the very least, Li Yueming saw some liquid when he crushed his head.

After finishing all of this.

Li Yueming clapped his hands and looked around.

He seemed to be looking for something.

A moment later, he picked up a trembling referee from a corner of the arena.

He patted the referee's shoulder kindly.

He then pointed at the God of War's Right Arm, which was lying on the ground with only broken parts left.

The meaning was simple: I won!

The referee quickly scanned the arena.

Due to the violent explosion, the originally sturdy arena was now in a mess.

There were craters everywhere.

The smell of gunpowder filled his nose.

To be honest.

The referee had been in the arena for so many years.

He had seen dozens of fierce battles, but at least hundreds of them.

However, it was the first time that he had seen such a simple and fast attack like Li Yueming.

In the end.

The judge, whose face was covered in dust, announced Li Yueming's victory.

After hearing this information.

Countless gamblers cursed.

Fortunately, there were very few people who bet on Li Yueming winning. Therefore, the amount of money he had bet far exceeded the amount he needed to pay.

The organizers would collect a 5% processing fee and return the excess to the bettors.

It could only be said to be a blessing in disguise.

Thinking back to Li Yueming's unreasonable playstyle, to be honest, many of the audience felt their hair stand on end.

Half an hour later.

Li Yueming and Sun Ruo took the 700,000 cloud leaf coins reward for their five consecutive wins backstage.

In order to prevent being followed.

Sun Ruo was in charge of finishing up behind him.

As an Extraordinary.

Sun Ruo's combat ability was not on the same level as an ordinary person.

Even if it's a creator

If one's energy level had not reached B class or above, it would be difficult for them to resist in front of her.

After all, her metal-type talent was one of the most feared superpowers of all transformationists.

After eliminating a few of the little tails behind him.

The two of them drove the old jeep back to Li Yueming's residence. On the way.

Sun Ruo looked at the cloud leaf coins in the box and exclaimed, "So much money. Why don't we change cars?"

Li Yue glanced at her.

"Are you okay?" Hearing this.

Sun Ruo pouted.

"If you have money, you can buy a car and a house. Isn't that how it is in TV dramas? Can't you cooperate?"

Li Yueming thought for a while and replied, [Then ask again?]

Sun Ruo immediately became happy when she heard this and said, "So much money. Why don't we change to another car?"

"I'm not changing. I worked hard to earn this money. What does it have to do with you?" Li Yueming didn't hesitate.

Sun Ruo was speechless.

You won't have any friends like this, alright?

After earning the money.

Li Yueming did not hesitate. He first went to the black market to order a batch of special kinetic skeleton alloy.

Then, he ran to Old Man Sun's warehouse and rummaged through some materials.

He wanted to obtain the Extraordinary Potion.

Li Yueming had to win 20 consecutive victories.

Under such circumstances, modifying his mecha was the best option for him to increase his combat effectiveness.

In addition.

Yunxiao Technology Group's pursuit was also becoming more and more frenzied.

Recently, Li Yueming had even seen his portrait in the black market, looking at the bounty of five million cloud leaf coins.

To be honest, if it wasn't for Li Yueming's limited strength, he wouldn't have dared to mess around.

He even had the thought of reporting himself.

One could imagine how crazy the bounty hunters in the black market were.

Moreover, the number of times that the security regiment and the City Defense Army of N City appeared in the slums of the western part of the city was increasing.

Li Yueming knew that the other party must have grasped some of his tracks.

Now, they had gradually narrowed the search range to N City.

Under such circumstances.

Li Yueming had to speed up his pace and re-enter the ranks of supernatural beings before he was discovered by the pursuers.

As long as one stepped into the ranks of the supernatural, one could feel the supernatural energy.

With the help of absorbing so many nutrient fluids, he could not help but feel a little nervous.

Li Yueming only needed an extreme amount of time to grow to the extent that some people would feel fear.

Chapter 176: Storm, Waves Are Coming! 1

In less than a day.

Li Yueming's achievements in the underground boxing arena spread.

It didn't take long for the entire west of the city to hear about the appearance of a guy wearing a strange mech in the underground arena who liked to use firearms to attack.

After all, the underground arena was quite popular in N City.

The related industries were all over the city.

Under such circumstances, even the slightest movement in the underground boxing arena would become big news that the entire city paid attention to.

Even on the second day.

Li Yueming Ming was still assembling parts in the shop.

He had already heard Huang Xundong and a few apprentices discussing the news about the underground boxing arena in Old Lin's shop.

Seeing his strange expression.

A 16-year-old boy said, "Brother Li, have you heard about what happened in the underground arena?"

Hearing this.

Li Yueming's expression became even stranger.

But of course, he could not say that he knew.

"What underground arena?" I haven't heard of it..."

Hearing this.

The 16-year-old boy smiled.

“Those who can participate in the underground boxing competition are basically level two costume users. Each and every one of them is super awesome...” However, there was a huge upset last night. Do you want to hear some gossip?

At this moment, Li Yueming was busy working.

He was also a little bored, so he nodded and said, “Tell me about it. Let me broaden my horizons!”

Seeing this.

Not far away, the acolytes who were still moving things were all in high spirits. They jogged to Li Yueming’s side and told him about what happened last night.

Young people like excitement and excitement.

However, other than the repetitive work in their daily lives, other forms of entertainment were relatively lacking.

Under such circumstances.

The underground arena naturally became the paradise they yearned for the most.

Therefore, the few of them put in extra effort when they talked about it.

It was as if they were really standing in the center of the arena and fighting fiercely with their fierce opponents.

However, after listening to a certain segment.

Li Yueming felt that something was wrong.

He interrupted the young man who was still talking non-stop and said, “Wait a minute, what do you call that guy with the armor?”

His imagination was suddenly interrupted.

The young man frowned in confusion, but he still said patiently, ““Mecha

Warrior, what’s wrong?”

What the hell, Mecha Man,

Can’t you guys give me a cooler name?

This was too simple.

Seeing his constipated face, the youth said excitedly, ””You also like the name Mecha Man, right? We took it overnight, hahaha!”

Very good.

Mecha Man...

Thank you so much.

He resisted the urge to complain on the spot.

“It’s nothing. You guys can continue!” Li Yueming smiled.

The young man scratched his head.”

He was stunned for a long time but still couldn’t remember. “You said that Mecha Man flew into the sky and fired 49 missiles!””“

“Ah, yes, yes, this is the place!” He found his feeling.

The young man danced excitedly.

It was obvious that he was immersed in the bravery of the mecha warrior.

After they finished telling the story.

“Do you want to wear mechas to participate in underground boxing?” Li

Yueming asked.”

The youths all nodded vigorously.

“Yes, even in my dreams!” The youngsters looked around and after making sure that Old Lin was not around, two of them approached Li Yueming and whispered,”“Brother Li, we’ve saved up half a year’s salary to get the entrance fee to the underground arena. Do you want to come with us to take a look?” It seemed that she didn’t think it was tempting enough.

The young man continued to ‘patiently guide’ him, “”I heard that Mecha Man will likely appear in the underground boxing arena again in three days and continue to win ten consecutive victories! ”

Li Yueming glanced at them and said casually,”“In the future, I’ll give you a set of mecha. I guarantee that you’ll be invincible!”

The group of youths ‘eyes lit up when they heard this.

Obviously, he was fascinated by Li Yueming’s promise.

A moment later, someone lowered his head with a red face and said,”But we don’t have money.”

Li Yueming smiled but didn’t say anything.

He looked at Huang Xundong, who didn’t say anything.”“Come to my house tonight. I have something to tell you!”

The other movers didn’t know about Li Yueming’s other identity.

In their impression.

Li Yueming was just a disciple recruited by Old Lin.

Although he was quite talented, he had never given them any face.

Therefore, there was naturally no gap between them.

But Huang Xundong was different.

He didn’t know Li Yueming’s true identity either.

However, he was the only one among the group of youths who knew that Li Yueming was different. Hence, the two of them were in a daze.

While the others were describing the so-called Mecha Hero vividly.

He could only smile and not say anything.

Li Yueming asked him to go over at night.

Huang Xundong sat up straight and said, “Alright, I’ll go after I move my things tonight!!”

Li Yueming retracted his gaze.

Obviously.

Young people’s ideals were always pure and flawless.

Yearning for cool things, yearning for blood and glory.

It was like a piece of white paper that had never been smeared.

If he had the chance, he wouldn’t mind helping the youngsters fulfill their dreams.

However, these could only remain at the stage of imagination for the time being.

Right now, the most important thing for him was to obtain the Extraordinary Potion and successfully arm himself..

Chapter 177: Storm, Waves Are Coming! 2

Otherwise, in his current state.

Not to mention helping the young man build a mecha.

It was very possible that he would get himself into trouble if he was not careful.

He did not know how long he could hide in this small repair shop.

Before being discovered by the Cloud Sky Corporation.

He could only try his best to prevent the people around him from getting involved.

He put the repaired parts into his pocket.

Li Yueming smiled and replied,[You guys go take a look. I still have something to do for the time being!]

As he spoke.

He packed his things and left the repair shop alone.

She looked at his back.

The group of youths could not help but say, “Little Brother Li has been really mysterious recently...” Forget it, let’s hurry up and finish the work. In a few days, we can ask the stingy old man for an hour of leave!”

In the next three days.

Li Yueming used the 700,000 cloud leaf coins he earned to repair his mecha.

He had also installed a few military prosthetics that he had bought from the underground black market at a high price.

At the same time.

Sun Ruo, who had been looking around for news, brought a piece of bad news to Li Yueming.

In the Cloud Sky Corporation, Professor Cheng was waiting for a year of fruitless search.

He finally lost his patience.

He directly stopped all the experiments in his hands and personally brought a group of special experimental results to N City.

Currently, they had already locked onto N City and were conducting a thorough investigation.

Regarding this.

Li Yueming's expression flickered.

Obviously, if there were still people in this world who could not forget him.

Professor Cheng must be one of the most loyal bootlickers.

He probably wanted to capture Li Yueming and use him as research material.

Now, it was not surprising for him to come out to look for him personally.

However, it was obvious.

Sun Ruo's suggestion was to leave N City immediately.

However, Li Yueming knew that countless Yunxiao Technologies had already set up an inescapable net around N City.

If he didn't escape now, he might still be able to hide in the crowd for a few more days.

However, once he fled...

They would take the initiative to throw themselves into the big net that had already been woven.

Whether it was escaping or hiding.

Under the suppression of absolute power, there was no way out.

What Li Yueming needed to do now was to pull chestnuts out of the fire.

As long as he could obtain the Extraordinary Potion, everything would be fine.

Three days later.

The underground arena was open for business again.

This time, Li Yueming wrapped himself up even more tightly.

After entering the backstage and submitting the documents to verify his identity.

Li Yueming wore the latest generation of upgraded mecha and walked onto the stage.

Li Yueming had won five consecutive victories after he killed the right arm of the God of War.

It was Li Yueming's second time here.

The challenge was naturally the ten consecutive victories that were difficult to achieve.

Under such circumstances.

The reward for defeating Li Yueming was very tempting.

Therefore, he had no choice.

Quite a number of powerful transformationists enthusiastically signed up.

The person on stage was also a man.

His skin was a little dark, and he was tall and thin.

He was wearing a third-generation power suit produced by Hurricane Group. From the traces, it seemed that this suit had been modified several times.

He was considered one of the best among the many transformationists.

This time.

The referee had just announced the start of the match.

The tall black man rushed straight towards Li Ming.

Obviously.

He had seen Li Yueming's battle.

He also knew that Li Yueming's attack method was to first open up the attack distance.

Then, they released a large number of firearms in the sky to cover the area.

And this time.

He wanted to stop Li Moonlight before he took off.

Close combat on the ground.

Regarding this.

Li Yueming only smiled disdainfully, and the mechanical system under the mecha suddenly pushed forward.

He instantly shook off the man who rushed over to stop him.

After flying more than 40 meters into the sky, it was exactly as everyone had expected.

He unleashed his firepower again.

But unlike last time, Li Yueming released more than 60 grenades this time.

Two rounds of bombardment.

The arena that the organizer had just repaired was once again in a mess.

In the surroundings.

When the audience saw this scene, their eyes widened.

Damn it.

Last time, there were no howitzers at all.

How come there are more than 60 of them this time?

At this moment, the group of people noticed that the mech that Li Yueming wore this time seemed to be slightly different from the one he wore last time.

There were many new changes in the details.

Under normal circumstances, this kind of change would not be a big problem.

However, it was a big problem for underground boxing competitions.

At the very least, the tall black man below was in an extremely sorry state.

At the beginning, his first strategy was to intercept Li Yueming.

However, Li Yueming's speed was too fast.

Before he could get close, Li Yueming had already flown up.

After realizing that the interception had failed.

He immediately began to prepare to dodge the incoming saturated firepower.

At this point.

All of his reactions were standard reactions.

That's why.

The 30 grenades in front of Li Yueming didn't cause much damage to the tall black man.

However, what he did not expect was...

He thought Li Yueming's hot weapon attack was over.

He was just about to fly up and quickly close the distance between them.

Unexpectedly, the cannonball from above shot down again.

He was completely unprepared.

The tall black man managed to dodge more than ten grenades. However, it was still hit by the remaining grenades..

Chapter 178: Storm, Waves Are Coming!_3

After Li Yueming's suppression ended.

His entire body was about to smoke.

Li Yueming swooped down from the sky and stomped on the black man's chest.

He gestured to the referee and said, "Move him down. Next!"

At this moment.

Be it on or off the field.

Everyone was silent out of fear.

At the beginning, they thought that Li Yueming's mech was a piece of trash from the last century.

Nowadays, as long as one was not blind.

Everyone could feel the abnormality.

After all, Li Yueming's mecha did not look good.

Whether it was in terms of load, power, or body balance.

His performance was quite eye-catching.

Outside the arena, after a short period of silence.

Countless people began to cheer loudly.

In a sense, the masked men in this underground arena were no different from the wild beasts in the jungle.

They didn't care about Li Yueming's background.

As long as he could fight and win.

One match after another could bring them enough benefits.

They would cheer and applaud generously.

Or to put it another way.

On the stage at the center of the duel, the winner was not important.

As long as it was a standing victor, they would applaud and cheer for it.

Regarding this.

Li Yueming naturally wouldn't let his Vitality go to his head, so he waited for a while.

About ten minutes later.

The second battle started again.

Li Yueming's opponent was an extremely fat man.

The other party was wearing a very famous black eagle suit in the field of reproductive equipment, which had also been modified.

Whether it was in terms of power or destructive power, it was much stronger than the one on the tall black man's body.

At the start of the game.

The other party didn't try to get close to Li Yueming like the tall and thin man.

Seeing this situation.

Li Yueming did not fly into the sky.

Instead, he wanted to see what the other party was up to.

Not far away, small mechanical crawlers crawled out from the gaps under the opponent's mecha.

These reptiles were extremely fast.

It was also exceptionally agile.

Many of them could fly.

Hundreds of insects pounced on Li Yueming.

Regarding this.

Li Yueming finally became a little more serious.

The other party should be a hacker. In a sense, these bugs were his attack weapons.

Out of the hundreds of reptiles, only one of them managed to climb onto Li Yueming's mecha.

The hacker could then hack Li Yueming's neural connection through the virus that was carried on the bug.

Some of them were very good.

It could also allow the mecha to attack its master.

Regarding this.

Li Yueming's reaction was extremely fast.

The explosive weapon in his left arm was replaced by an overwhelming fire attack.

The flames that spewed out ignited half of the arena.

None of the mechanical crawlers sent by the other party could survive the flames.

Seeing this situation.

Fatty felt that something was wrong and quickly controlled his mechanical equipment to fire a few magnetic energy weapons at Li Yueming in an attempt to interfere with his attack.

However, Li Yueming's mech was designed to prevent attacks from metal-type Supers like Sun Ruo.

The key parts were all replaced with non-metallic materials.

Magnetic energy weapons had almost no effect on his core operating system.

In the next second.

Li Yueming fired more than 30 small short-range guided missiles from his back.

Following the sound of an explosion, smoke and dust rose.

Fatty was carried away.

The entire arena erupted with cheers that were dozens of times more enthusiastic than before.

Roars of excitement could be heard from all directions.

"Mecha Warrior! Mecha Warrior! Mecha Warrior!"

“Invincible and invincible, Mecha Man has won seven consecutive victories!”

“It seems that the ten consecutive wins this time should be guaranteed.

Fortunately, I bet on Mecha Man winning just now!”

Just as ne nau expecteu.

In the next two matches, Li Yueming won without any ripples.

After ten consecutive victories.

His prize pool had also reached one million cloud leaf coins.

But at the same time.

His reputation had also spread even more widely.

The more consecutive wins a winner had, the more attention they would attract.

At the same time.

The next round of challenges, the more challenges faced, the stronger.

There were many C-class and even B-class transformationists who weren’t interested in participating in such low-level competitions.

Of course, the organizer also forbade those with energy levels above C-to take the initiative to go into the sea to blow up the fish.

After all, the majority of the participants in the underground arena were low-level prosthetics.

If it wasn’t for the fact that C-grade and above high-grade transformationists were not prohibited from participating.

Then, it was very likely that it would evolve into a one-sided crushing.

In addition, 100,000 to 200,000 Cloud Leaf coins were not enough to attract C-grade and above high-grade equipment.

At their level.

The combat strength that erupted from it was already far from that of a normal Growth-user.

The reward for each mission was more than 100,000 to 200,000 cloud leaf coins.

Under such circumstances.

Joining a low-level activity like underground boxing would only lower their status.

Only when someone achieved a 10-point victory would the organizer allow a C-class transmigrator to participate.

For those who were C-grade and above, they would only be rewarded with one or two million cloud leaf coins.

That’s why I’m interested in killing the con.

After all, a reward of one or two million cloud leaf coins was not much to them.

However, this kind of assassination had low risk and high returns!

As long as they removed some of the more lethal weapons, they could still easily kill low-level transplants.

Therefore, he had no choice.

After the first ten consecutive wins.

Generally speaking, there wouldn't be any more low-level leaders who would continue to challenge.

After all, earning money was important.

However, most of the time, it was just a waste of time.

Ordinary F and D grade body cultivators who came here to fight to the death for 10 consecutive victories, in the end, they didn't want to be a part of those powerful C grade and above body cultivators.

However, ten consecutive wins were clearly not enough for Li Ming.

His initial goal here was to obtain the bottle of Extraordinary Potion that was rewarded for his twenty consecutive wins.

A few cloud leaf coins wouldn't be enough to get rid of him.

Therefore, he had no choice.

After three days of rest.

Li Yueming was in disbelief.

Once again, he stood on the arena stage.

When he went up on stage, the entire audience was in an uproar.

"F * ck, hasn't Mecha Man already won ten consecutive victories? Why are you here again?"

"Ten consecutive victories should already be worth more than one million cloud leaf coins, right? The mecha warrior is still not satisfied. Could it be that he wants the supernatural drug for twenty consecutive victories?"

"Last time, the one who had the idea of using the Extraordinary Potion was killed by a C-grade Growth-user after just 12 consecutive victories. The grass on his grave is probably almost 30 feet tall now, right?"

"Is the Mecha Warrior crazy? No one had ever obtained the Extraordinary Potion of 20 consecutive victories in the underground underground boxing competition. Where did he get the courage to do that?"

"I don't know. Maybe it's because he easily won ten consecutive victories that he became arrogant. He doesn't even know his own weight."

“If I had as much money as him, I would have been lying on a woman’s belly and attacking her to my heart’s content. How could I die like this?”

In the underground arena.

Countless spectators whispered to each other.

In fact, from their perspective, although Mecha Warriors were very strong, their performance so far had only been slightly eye-catching.

After all, the underground arena opened once every three days.

They had seen too many stories of people becoming rich overnight.

It was rare to see a challenger with ten consecutive victories.

But every month, there would always be one or two lucky ones.

Li Yueming was among them. Other than the strange mech he was wearing, there was also a strange feeling in his heart.

In other aspects, he didn’t show too many eye-catching aspects.

But now.

This ordinary existence in their eyes was vainly attempting to challenge the 20 -win streak that had never been achieved by anyone in the 20 years since the establishment of the underground boxing arena. This was a little too arrogant in the eyes of the audience.

Therefore, he had no choice.

Now, they were all curious about which challenge Li Yueming would die in.

Chapter 179: Awakened Extraordinary Power, Special Gold Talent! 1

In the darkness.

A brand-new Cloud Sky helicopter was parked on top of the government building in N City.

Amidst the roaring of the engine.

Professor Cheng, who was wearing a black leather jacket, walked out of the cabin with a silver suitcase under the escort of four expressionless men and women.

At this moment, thousands of soldiers from N City’s government and the main forces sent by the Cloud Sky Group were gathered below the government building.

He saw Professor Cheng get off the plane.

A middle-aged bald man who had been waiting on the side of the airport jogged over.

Hello, Doctor. My name is Han Longfei. I’m currently the head of N City’s government building. Nice to meet you!

Dr. Cheng didn’t say anything. He didn’t even pay attention to him.

Only the four men and women beside him stared at the so-called government leader' of N City with intense aggression.

The sharpness in his eyes could make people feel cold from head to toe.

The smile on Han Longfei's face stiffened.

She shrunk her neck and didn't dare to get closer to Professor Cheng, but she still rubbed her hands and said,""Dr. Cheng has come from afar. I've prepared a welcoming banquet for you. Please do me the honor..." When he heard the word 'gracious'.

The expression on Professor Cheng's face finally changed.

He glanced at the bald, greasy middle-aged man in front of him.

At this moment, the other party was so humble and stupid in his eyes.

It was to the extent that he might not be able to help but smash the other party's head into a watermelon if he said another word.

No wonder so many people had been busy around N City for so long without finding any trace of Experimental 0731.

With the cooperation of such rotten government personnel.

The army would be lucky if they didn't get confused.

But then again...

The other party could not be blamed for such a comical scene.

After all, this was the most direct consequence of the Cloud Sky Group's strategic plan.

The government organizations that once controlled a large amount of resources had already existed in name only as early as 300 years ago. The remaining government organizations were basically the scapegoats of the major corporations.

The smart and capable officials had long died silently.

Only the foolish puppets who had gone through many rounds of selection could dance on this narrow table.

Under such circumstances.

Relying on the local forces of the town to help search for the Experimentals was undoubtedly an act of shooting oneself in the foot.

Therefore, he had no choice.

Professor Cheng glanced at the bald man and said coldly,""If you don't want to get up the next day to eat your own farewell feast, then immediately take your bullshit City Defense Army and disappear from my sight!"

Han Longfei stopped smiling.

Fear, fear, fear, fear. This lowly one obeys!" As he spoke.

He didn't dare to be anxious with Dr. Cheng.

He shrunk his neck and left.

However, what no one saw was...

Just as they were about to leave.

Han Longfei's eyes flashed with a hint of coldness.

Soon, the government's city defense forces all retreated.

There were only a thousand or so members of the Cloud Sky Corporation headquarters left who could be mobilized at any time.

He looked at the nearly 1,000 uniformed soldiers in front of him.

Among them were more than ten members of the inspector team sent by Ye
'Ilanzl.

The lowest aptitude user in a small team of monitors was a C-rank aptitude user.

A few of them could even unleash the power of a B-class supernatural being for a short period of time.

It was the most elite force that Professor Cheng could currently mobilize.

He glanced around.

Professor Cheng asked the person in charge of the pursuit team, ""What did you find out after spending a year investigating?"

"Professor, we have locked onto the escaping Experimentals in N City!" The person in charge of the pursuit team was covered in cold sweat. "Right now, the pursuit force has already mobilized their forces to surround the entire N City. Not even a fly can escape! "

Professor Cheng narrowed his eyes and continued, ""Since we've already confirmed that he's here, why hasn't he been captured for so long?"

To be honest.

Professor Cheng felt that he had given enough attention.

When Li Yueming had just escaped from the laboratory, he had already sent troops to pursue him.

He thought that he would be able to bring it back to the laboratory in a few days at most.

However, he did not expect that almost a year had passed.

The Experimentals were still nowhere to be seen.

The leader of the hunting team broke out in cold sweat.

After all, anyone could easily feel the anger in Professor Cheng's words as long as they were not short-circuited.

He could only bite the bullet and say, "Reporting to the doctor, the Experimentals are very cunning. They did not leave any obvious evidence or flaws during their escape." Moreover, N City is a little

special. The slums here are too large, and the government's city defense forces are only dawdling. It's a little difficult for thousands of us to search the slums with millions of people!"

Dr. Cheng's expression did not change much.

If Li Yueming was in the wilderness...

Then, it didn't matter if he had three heads or six arms.

Even the Cloud Sky Corporation could easily find him.

However, once they were integrated into the urban slums, where there were more than a million illegal households. It was indeed difficult to find out.

However...

Since he came here this time.

Naturally, he had the capital to take it down.

Professor Cheng took out a green potion from the silver suitcase in his hand.

He waved his hand.

A woman obediently walked up from behind him.

Dr. Cheng expressionlessly inserted the drug into the woman's carotid artery.

In the next second.

The woman's limbs began to twitch..

Chapter 180: Awakened Extraordinary Power, Special Gold Talent! 2

The blood vessels under his skin crawled up to his skin like centipedes.

It looked extremely terrifying. Many of the Cloud Sky Group soldiers could not help but take a few steps back when they saw this situation.

Obviously, they were extremely fearful of the gene serum that Professor Cheng had mastered, which was beyond the scope of human understanding.

A moment later.

Thick black hair grew out of the pores on the woman's body.

His entire body was crawling on the ground, and his four limbs were lying on the ground in an extremely strange posture.

Professor Cheng reached out and dripped a drop of blood into the mouth of the woman who had become no different from a dog. He said expressionlessly, "Lead the way!"

The woman lay on the ground and sniffed the air.

Using his hands and feet in a hair-raising manner, he began to crawl toward the west of the city.

On the other side.

Li Yueming had already obtained nineteen consecutive victories.

During this period of time, the City Defense Army's inspections became more and more frequent, and the atmosphere in the city became more and more tense.

Many people were discussing the examination.

However, no matter what was happening outside, it did not affect the heat waves in the underground arena.

Obviously.

The underground boxing arena had developed to such a large scale in N City.

The organizer behind it was definitely an existence with a powerful background in this city.

Hence, the two of them were in a daze.

It was normal for the City Defense Army to turn a blind eye to the black boxing arena during the inspection.

After all, most of the time, the human brain would subconsciously choose to believe something.

For example, fugitives would be cautious and hide.

For example, it was impossible for a wanted criminal to appear on a stage where everyone was watching.

Under such circumstances.

Li Yueming became more and more unrestrained.

In just a few days, the rumors about him had spread.

At the beginning, all the spectators thought that Li Yueming's 20-win streak was an idiot.

But now...

The spectators looked at Li Yueming as if he was a real lunatic.

Within six days.

Li Yueming had swept away four C-grade Growers, three C grade Growers, and two C+ grade Growers.

Successfully won 19 consecutive wins in the white line.

Everyone in N City was talking about his incredible mech and the man who looked like a crazy demon under it.

For this reason.

The organizers had no choice but to stop the bidding.

Because every time the bets were opened, the bets on Li Yueming's victory would explode.

At this moment.

Li Yueming stood in the arena and looked at the maniacal body builder not far away.

The other party's entire body was privately modified.

However, under such circumstances, his strength had already reached B-grade.

If the organizers hadn't taken away all the powerful firearms on him, he would have died.

The current Li Yueming had almost no power to fight back in front of such an existence.

But now.

The other party had lost the weapon that they were so proud of.

If it was just based on battle experience and the strength of the equipment.

Li Yueming could basically hang the other party up and hammer him.

The entire battle lasted for more than half an hour.

In the end, Li Yueming pulled out the alloy sword on the back of his mech and stomped the head of the B-grade Growth-user.

In the blink of an eye.

The entire arena was filled with thunderous cheers.

The hundreds of thousands of viewers said in unison, ""Invincible Mecha God! Invincible Mecha God! Invincible Mecha God!"

The cheers that resounded through the clouds could still be heard clearly even if they traveled thousands of meters.

The spectators looked at the mystical mecha on the stage.

All of them were blushing

Once upon a time.

They had witnessed countless miracles here.

However, this was the first time he had seen a miracle like Li Yueming who could kill a Growth Equipment user of a higher level.

In the backstage of the organizer.

A fat man wearing a top hat appeared on the built-in spectator stand.

Behind him, a director who was responsible for the normal operation of the underground boxing ring stood carefully.

After seeing that Li Yueming had really won.

"Sir, the Extraordinary Potion rewarded for winning a streak..." the director could not help but probe.

The fat man's entire face was hidden behind the mask.

"Give him the potion in front of the audience! Also, help me ask him if he's willing to sit down and talk!"

The director's eyes revealed a strange look when he heard that.

However, he still nodded respectfully and said, "This subordinate will obey!"

The current market price of the extraordinary medicine was more than a few million cloud leaf coins.

Moreover, it was the kind that had a price but no market.

However, Li Yueming had won 20 consecutive victories in front of everyone.

As long as there was nothing wrong with the head of a gangster, he would not refuse to give a reward in public.

After all, the reason why the underground boxing was so popular was because of this.

Its greatest characteristic was its realism.

The organizers never played with fancy tricks. As long as you won, they would really dare to give it to you.

It was precisely because of this.

The underground underground boxing pipe had created one batch after another of miracles of overnight riches.

Under such circumstances, it had gradually turned from a small, unknown boxing competition into a huge competition with hundreds of thousands of people gathered together.

Now.

They only took commission from the bets and sold tickets at different prices.

The underground arena could earn millions of cloud leaf coins every time.

Holding such a big plate and smashing the bowl for an egg was clearly an act of losing his mind.

Hence, the two of them were in a daze.

The boss will naturally not renege on the account.

In the arena.

The emcee announced in front of the audience that Li Yueming had completed the 20-win challenge.

After about ten minutes.

A staff member carefully carried a tray covered with a red cloth to the center of the arena..
