

Maxing MT 581

Chapter 581: Twenty Years, Return!

As Li Yueming disappeared for a longer period of time, the confidence of the people in the northwest was constantly disappearing.

In Year 7832 of the Great Zhou Dynasty, the Great Qin, Great Qi, and Great Zhou Kingdoms, which had been at war with each other, suddenly changed sides. The three Kingdoms gathered nearly two million soldiers and surrounded Northern Ice River Town from all directions.

It was obvious that these three countries had colluded long ago and were prepared to pull out the front teeth of the Star Moon Army when the war was nearing its end.

After all, the Six Nations had fought to the death for more than 20 years before they finally obtained the strategic benefits they sought. How could they allow the Star Moon Army, which had not paid anything in this war, to take advantage of them?

Great Qin had sent 800,000 elites to defend the West Garrison Fortress, preventing the hundreds of thousands of soldiers from coming out to help Northern Ice River Town.

As the main combat force of the alliance army, the Great Zhou and Great Qi also put down their hatred for each other, which was rare. They sent troops from the northeast and southeast to attack North Binghe Town.

When this news spread, the whole world was in an uproar.

Countless people were paying attention to this battle that had been predicted a long time ago.

From the time Li Yueming was assassinated more than 20 years ago, although the Star Moon Army still had one of the best military forces in the world, the development of Northern Glacier Town had slowed down year by year.

It was also because of this that the various countries were able to sit back and watch Northern Ice River Town continue to develop.

After all, because Li Ruyue was in charge of North Ice River Town, even if Li Yueming, the leader, was still unknown, the Star Moon Army did not become chaotic.

However, Li Ruyue could not be Li Yueming.

It was already amazing enough for a mere woman to turn the tide for a moment. Could she turn the tide for the rest of her life?

Knowing that Northern Glacier Town's rule was bound to decline, it was unwise for the Six Nations to deal with a town that was still united against a common enemy.

Now that the war between the Six Nations had come to a temporary end, the Star Moon Troops, which had been thriving a few years ago, had begun to split up because of some hidden dangers that had been buried in advance.

If the allied forces of the three countries didn't take advantage of the situation, then they would really be stupid.

After receiving the news that the allied forces of the three countries were attacking the two northwestern regions, the entire Northern Glacier Town instantly fell silent.

The Starmoon Troop was quickly mobilizing horses and provisions. Although the smoke of war had yet to reach this place, the various signs had already made many people feel that a great disaster was imminent.

One had to know that the three kingdoms alliance army was not some random army.

Instead, they were a group of elite warriors who had experienced the war of the six countries!!!

They had just retreated from the battlefield of the Six Nations, which was as bloody and brutal as a meat grinder. Any one of the three troops was enough for the Starmoon Troop to face a great enemy.

And now, there were three of them. One could imagine how determined they were to eliminate the Starmoon Troop.

At the end of August of the same year, the autumn wind blew, and the entire northwest region was in a somber mood.

The Star and Moon Army had gathered 500,000 troops to meet the enemy at the passes in the northeast and southeast.

The mighty allied army of the three countries surged forward. Fortunately, the Star and Moon Troop had awakened their military spirit, and their fighting capacity was completely different from before. Therefore, although the battlefield was covered in blood and gore in a short time, the Star and Moon Troop did not show any obvious signs of decline.

Li Ruyue might not be able to balance the internal conflicts of the Star Moon Army.

Because she could not do anything to the people who had been reincarnated, nor was she willing to change the direction that Li Yueming had set before he left.

However, this did not mean that she could not even resist external aggression.

The allied army of the three countries seemed terrifying, but in reality, it was only ferocious on the surface. The people of the various countries had long since withered. Whether it was money, food, or the hearts of the people, they were no longer able to support them in a long-term battle.

Thus, the Starmoon Troop only needed to withstand the pressure and not let the alliance army take advantage of the situation.

The entire war was basically still under control.

The worst-case scenario was that the allied forces of the three countries would have to pay a certain price in exchange for the Star-Moon Army and Northern Glacier Town to weaken at the same time, so that the post-war order would not be disrupted by the Star-Moon Army.

However, just as the war that affected the entire northwest was in full swing...

In the extremely cold snow mountain in the north, Li Yueming had already woken up from his deep cultivation.

After obtaining the Earth Vein Divine Spring, he stayed in the Su Clan for a while.

Not only did he heal his injuries, he also flipped through some of the Su Clan's remaining ancient books and obtained many ancient legends that were not circulated in the outside world.

In the second year, Li Yueming, who already knew many secrets of the Su Clan, was ready to leave.

Su Haotian hesitated for a long time and finally decided to let Su Xuan follow him to the civilized world to see the situation.

For many years, the Su Clan's main sect had never had any thoughts of leaving the world.

However, Su Fengtian's betrayal had a huge impact on Su Haotian. Under the circumstances where almost all of the Su Clan's branches had been destroyed, Su Haotian began to think if it was inappropriate for the entire Su Clan to hide in this wilderness.

After all, the Su Clan had a glorious history since the era of the Great Qian Dynasty.

It should have been a very large tribe.

But in the end, due to some indescribable twists and turns in history, the entire clan was reduced to only a few thousand people..

Chapter 582: 20 Years, Return!

If the Su Clan was still stuck in their old ways and kept all their eggs in one basket in the depths of the Hundred Thousand Mountains...

He did not know if he would be caught in one fell swoop if he encountered any twists and turns.

After comprehensive consideration, Su Fengtian decided to let Su Xuan conceal her identity and split from the main sect to re-connect with the civilized world. This was to plan for the continuation of the Su bloodline.

So, when Li Yueming left, Suxuan took the initiative to walk with him. At the same time, the Su Clan also gave her a branch family of 300 blood relatives to ensure that she would suffer a great setback when she returned to the civilized world.

Naturally, Li Yueming did not refuse.

Therefore, twenty years ago, he had already brought Su Xuan and the three hundred Su Clan warriors out of the Hundred Thousand Mountains. They had made a detour all the way to the outskirts of the extremely cold snow mountain to meet up with the little fox.

Of course, in order not to be detected by the Six Nations, they sent assassins to assassinate him again.

After Li Yueming returned to the extremely cold snow mountain, he only asked the little fox to help him inquire about the situation in the outside world. After discovering that everything was temporarily stable, he did not reveal his traces to anyone.

At this moment, not to mention Li Ruxing and the others.

Even the spirit beasts of the Extreme Cold Snow Mountain did not know that Li Yueming was in the valley where the little fox lived.

Over the years, apart from inquiring about the situation in North Glacier Town every once in a while, Li Yueming had put almost all his energy into cultivation.

Twenty years ago, Li Yueming was already a Spatial Tempering Stage cultivator.

Now that he had been living in seclusion in the extremely cold snow mountain for so long, Li Yueming's realm naturally rose rapidly. After ascending to the 12th tribulation, Li Yueming had already stepped into the threshold of the 9th tribulation divine aperture.

Of course, this was not what excited Li Yueming the most.

What excited Li Yueming the most was the breakthrough in his body's treasure.

Ever since the opening of the Kamitani treasure trove, Li Yueming had not had any clue about the next human treasure trove for a long time.

It was only after lying in the underground spring for half a day that he sensed the existence of the next human treasure and triggered a chain reaction.

For twenty years.

At least 70% of Li Yueming's energy was focused on developing this new human body treasure.

After putting in so much effort, the rewards were naturally incomparably huge.

Li Yueming called the fifth human body treasure Essence.

After activating this human body treasure, the side effects of Li Yueming's potential being squeezed out were basically washed away.

If a cultivator who specialized in the human body saw Li Yueming now, he would be able to see how terrifying Li Yueming was.

The endless human essence was running amok in Li Yueming's body, providing him with an almost endless supply of energy!!!

In other words, before Li Yueming died.

The essence in his body was almost limitless!!!

If it was in a game, it would be like having unlimited mana.

The activation of such a crucial treasure had greatly strengthened Li Yueming.

After all, Li Yueming's physical fitness was already strong enough. Now, with the addition of this unlimited mana bar, the increase in combat power was not just a superficial concept of one plus one equals two.

Although Li Yueming was only at the Divine Aperture Realm, he was still a cultivator.

However, in terms of combat ability, he was already on par with a Qi Refiner in the Heavenly Tribulation Realm after possessing five human body treasures.

As for the Nirvana and Ascension realms above the heavenly tribulation.

That kind of existence was too extraordinary. Li Yueming still did not have a

clear concept of them.

When he heard that the three countries had gathered their allied forces to attack North Glacier Town, Li Yueming, who had not shown any emotional fluctuations for a long time, finally opened his eyes from his deep cultivation.

Li Yueming looked at the yawning little fox and Su Xuan, who was combing the little fox's fur, and said, "The Six Nations are already at the end of their rope, yet they still dare to launch such a war. I think they don't know how to write the word 'death'!"

Hearing this, the little fox also opened her eyes and glanced at Li

Yueming. "When you have something to do, you only know to come to this king. When you have nothing to do, you just throw this king aside. I've seen through you. There's indeed no good thing in humans, hmph..."

Regarding the little fox's background, Li Yueming had actually tried to beat around the bush over the years.

However, the little fox did not seem to care about anything else, but it was especially tight-lipped about its parents.

No matter what method Li Yueming used to ask, he was either silenced or rolled his eyes.

She was really tired of asking. After the little fox was annoyed, the little fox said that if Li Yueming could stay in this extremely cold snow mountain to accompany her, she would tell him about her background.

Li Yueming naturally couldn't agree to her conditions for the time being.

In the end, this matter could only be left unsettled.

But the little fox was obviously angry.

Ever since then, he had been mocking Li Yueming.

Avoiding the little fox's complicated gaze, Li Yueming stood up and said to Su Xuan, "Suxuan, have you learned something about the civilized world over the years?"

Suxuan nodded.

Over the years, Li Yueming had been constantly cultivating, and most of her energy was spent on connecting with the civilized world.

After all, the Su Clan had lived in seclusion in the Hundred Thousand Mountains for thousands of years and had long been separated from the civilized world.

Now that he wanted to reintegrate into it, how could it be smooth without putting in some effort?

However, over the years, as he learned more and more about the civilized world.

On the contrary, Suxuan could feel the cruelty of the civilized world more and more.

Originally, in her imagination, the civilized world should be a paradise.

However, reality had given her a heavy hammer.

In the civilized world, there was no such thing as self-reliance, nor did there exist any family ties.

There were only white bones, blood, and tears everywhere.

Just as Li Yueming had once said, the real civilized world was more like hell than hell...

Seeing her nod, Li Yueming's eyes revealed traces of sharpness. "In that case, our agreement ends here. You're a very smart person. I don't need to pay attention to what you do next!"

Hearing this, Suxuan's expression became complicated.

The so-called agreement was that Li Yueming had promised to bring her into the civilized world.

Now that Li Yueming had fulfilled this agreement, the bond between the two sides ended here.

However, Suxuan was obviously unwilling to stop here. After thinking for a while, she boldly said, "Aren't we friends now? If you want to restore your country, perhaps I can help you!"

Li Yueming looked at her strangely.

Su Xuan's face was slightly red, but she continued, "What's wrong? Now that the world was in chaos, it would be very risky for Concubine Su to go anywhere, right? Only the northwest region where you are can accept us..."

"In order to successfully take root in the northwest, it's normal to be bound to you at a deeper level, isn't it?"

Her face was very red and her words were very messy.

Li Yueming naturally understood the true emotions hidden beneath the surface.

He repeatedly savored it for a long time before saying, "It's naturally not a problem for your Su Clan to take root in the Northwest, but let me tell you first, I already have a wife. Are you sure you still want to follow me?" Hearing this.

Suxuan was stunned for a moment, and her expression darkened for a moment.

However, Li Yueming had indeed mentioned this to her a long time ago.

Now that she heard it again, although she felt a little depressed, she was still mentally prepared. She lowered her head and pondered for a long time. In the end, she gritted her teeth and raised her head. "I've thought it through!"

Li Yue Ming did not say anything. After a while, he nodded and said, "In that case, gather the troops and prepare to set off with me... After so many years, I wonder if anyone in this world still remembers me, Li Yueming?"

"Second Sister, just hold on for a while more. I will make everyone who dares to hurt you when I am not around pay the price in blood! "

Chapter 583: The Three Kingdoms Alliance Army, Li Yueming!_1

When the allied forces of the three countries attacked Northern Ice River Town, they wanted to crush the morale of Northern Ice River Town before the war ended. They didn't want Northern Ice River Town to take advantage of the rest time after the Six Nations Chaotic War to develop.

After these few major countries stopped fighting, the other countries that did not join the coalition forces quickly went silent.

The flames of war that had been burning for more than twenty years finally came to an end with the retreat of the armies of the few countries. After a short rest, almost the entire world's attention was focused on the allied forces of the three countries and Northern Glacier Town.

The outcome of the battle between the three countries and Northern Ice River would determine the future of the entire world.

If Northern Glacier Town's combat power was average and was eventually defeated by the allied forces of the three countries, then the current world order would have been completely stabilized.

After each country defeated North Glacier, the cake of this free-for-all battle would be distributed according to the size of their fists.

If the Northern Ice River Town's combat strength was not enough, or was far inferior to the three countries' allied forces.

Then, the allied forces of the three countries, who already had ulterior motives, would definitely not let this matter rest.

At the very least, Big Qi and Big Zhou would definitely think of ways to take a bite out of Northern Ice River Town.

Putting aside Great Qi for now, let's talk about Great Zhou.

In this war that lasted for decades, the Great Zhou had suffered heavy losses. Not only had they consumed more than half of their financial resources, material resources, and food, but they had also lost the impregnable pass in the northwest.

If he wanted to rebuild Dragon Subdue Pass, Tiger Subdue Pass, and Futian Pass, it would take at least a few decades.

During this period of rebuilding the northwest defense line, the Great Zhou, which had lost the protection of Futian Pass, Tiger Subdue Pass, and Dragon Subdue Pass, had almost all the gates to the northwest region open.

It could be said that he was extremely passive.

If the Great Zhou wanted to obtain enough autonomy, then they could only think of all ways to recover the northwest. This was because only by taking back the northwest could the Great Zhou continue to send soldiers to form a strategic defense line along the many passes in the northwest.

On the contrary, if the allied forces of the three countries were unable to deal a

heavy blow to Northern Ice River Town and the Star-Moon Army, then the Great Zhou, which had its doors wide open, would undoubtedly be one of the most nervous countries.

After all, the current strength of Beibing River could not be underestimated, and the successive years of war had long caused the Great Zhou to lose its former glory.

Under this situation, the Great Zhou might need to spend an unknown amount of effort to guard against the invasion of Northern Ice River Town.

As for Daqi.

He did not gain much from the war with the Great Zhou.

Other than investing a lot of money, they only plundered some wilderness in the northeast of the Great Zhou Dynasty. Not only was this kind of land worthless in the short term, but it was also a loss.

Big Qi, who had suffered heavy losses, was naturally unwilling to accept the fact that they had spent so much money but did not get the returns they deserved.

Now, they had formed an alliance army with the Great Zhou.

Their real purpose was to eliminate the possible threats of the Starmoon Army.

They wanted to gain some benefits from the Northwest, where the Starmoon Troop was located. At the very least, they wouldn't lose money in this war.

In this situation, only Great Qin's soldiers were slightly lacking.

After all, Great Qin had already been the undisputed victor of the six countries 'war, and it had obtained many benefits.

Now, the reason why the three countries 'allied forces were gradually attacking the Star Moon Army.

Their goal was to force the Star-Moon Army to open up the path to the Hundred Thousand Mountains.

As long as they could take down the Star Moon Army and open up the path to the Hundred Thousand Mountains, Great Qin could bypass the West Garrison Pass and invade the Great Zhou Empire. If they went southeast, they could also plunder the weak Great Song Empire.

If he started from these two aspects, it would only take a little time for Great Qin to unify the world.

Just like that, the allied army formed by three countries with different intentions attacked Northern Glacier Town.

In the vicinity of the Twelve Northern Cities, the war was almost on the verge of breaking out.

The three countries had the absolute advantage in numbers.

In terms of combat strength, although these were not the most elite troops of the various countries, they were still quite powerful troops that had experienced hundreds of battles.

After all, the Six Nations had been fighting each other for more than twenty years. The armies that had survived until now were not idiots.

However, after more than a month of repeated probing by the allied forces of the three countries, they discovered that the strength of Northern Ice River Town and the Star-Moon Army was even more terrifying than they had imagined!!!

After the armies of the three kingdoms entered the Twelve Northern Cities, they found themselves trapped in an invisible net. As far as the eye could see, all the villages and towns in the north looked at them with distrust.

This feeling made the armies of the three countries very uncomfortable.

They had a large army, and it was difficult for them to hide their strength in public. Now, almost all the people in the northwest were traitors. Without discovering the spies of the Star Moon Army, Northern Ice River Town was able to see through the deployment of the allied forces of the three countries. One could imagine how powerful Northern Glacier Town was in the northwest.

After discovering this, he was shocked.

The allied army of the three countries already had a bad feeling.

In the beginning, they might have had all kinds of thoughts. For example, if Northern Ice River Town could not withstand a single blow, they could even annex the entire northwest of the Great Zhou Dynasty and then further annex the Great Zhou Dynasty.

For example, if the Star Moon Army became incredibly powerful, they would think of ways to make Great Qin fight against the Star Moon Army and destroy

Great Qin's forces..

Chapter 584: The Three Kingdoms Alliance Army, Li Yueming!_2

But now, the alliance army had yet to clash with the Star Moon Army.

The deployment of the entire army had already been infiltrated by Northern Glacier Town.

If they did not pay attention in the upcoming war, their millions of troops might suffer heavy losses because they underestimated the enemy.

After discovering this possibility.

The allied army of the three countries finally became serious. Although they still seemed united on the surface, they were no longer dragging each other down like they did in the beginning.

Perhaps even the commanders of the allied forces of the three countries did not expect that this little bit of caution would reduce their losses in the following war.

They tested each other for a month. The Star Moon Army showed that although their combat strength was also very strong, they did not exceed the expectations of the three countries.

However, after the test ended, the Star Moon Troop suddenly displayed a strong fighting strength.

Not only did it possess extremely powerful combat strength, but it also possessed an extremely condensed military soul! !!

In just half a month, the allied forces of the three countries had paid the price of hundreds of thousands of soldiers.

If it wasn't for the fact that they had prepared even more powerful soul troops, the damage to the allied forces of the three countries would have been even more terrifying.

This battle had awakened the entire allied army of the three countries.

It had also woken up all the Six Nations.

The Star Moon Troop was a newly awakened troop.

Moreover, this army was not a small-scale army, but a behemoth with tens of millions of troops.

Its strength was so strong that it had even exceeded the expectations of the various countries!

After feeling the immense pressure, the allied forces of the three kingdoms finally stopped hiding their strength and started to fight the Star Moon Army with their swords and spears.

Just the location of the Twelve Northern Cities alone was enough for the two sides to start a fierce fight.

The allied army of the three countries had finally taken over a city.

The Star Moon Army would basically snatch it back before long.

The two sides fought repeatedly, and in just a few months, they suffered heavy losses.

It was also during this period of time.

The Starmoon Troop's fearless fighting style and their accurate military accomplishments spread throughout the world.

Everyone's horizons were once again broadened.

He had thought that the war between the six dynasties was already tragic and intense enough.

He didn't expect the battle at Northern Glacier Town to be even more intense than the war between the Six Nations.

It was simply flabbergasted.

The allied allied forces of the three countries also knew that they had found a tough nut to crack.

If they had known that the Starmoon Troop would be so difficult to deal with before the war started, then the allied forces of the three countries would definitely have seriously considered whether they should start a conflict with Northern Glacier Town.

But now, the war had already begun.

The allied forces of the three countries would never retreat.

Therefore, the various countries began to make their final mobilization, especially the Great Zhou, which was closest to Northern Glacier Town. They sent out almost all of their elite troops.

At this moment, no matter how stupid the emperor and the Great Zhou monarch and minister were, they would not be able to do anything.

He also knew that he had to use the time when the allied forces of the three countries were still around to weaken the power of Northern Ice River Town.

Otherwise, if they lost the support of the allied forces of the three countries.

It probably wouldn't be long before the Great Zhou was suppressed by the Star Moon Army.

Just like that, the war continued for more than two months.

Under the all-out attack of the three countries, the Starmoon Troop finally showed signs of decline.

After all, no matter how prosperous Northern Glacier Town was, it was only the strength of two places.

They used the strength of two places to contend against three countries, and they did not give in for a few months.

The existence of the Starmoon Troop could be considered a miracle in the history of war!

The balance of the battle had already been tilting towards the allied forces of the three countries. In the end, Great Qin had even sent out nearly one million elite soldiers to attack the Western Garrison Fortress.

As a result, the West Garrison Fortress was caught off guard and almost fell.

In the end, the Starmoon Troop had to divert some of their energy to maintain the stability of the situation.

However, this was the last straw that broke the camel's back.

Northern Glacier Town was at a complete disadvantage in this war, and the Twelve Northern Cities had all changed hands within a few months.

The allied army of the three countries had occupied the Twelve Cities.

They began to attack the Star Moon Army's headquarters, North Glacier Town, which was located deeper in the city.

A small troop of unknown origins suddenly appeared on the border between Great Qi and Great Zhou.

This strange troop was active on the grain routes of Great Qi, crazily attacking the boardwalk and nodes that Great Qi used to transport grain.

In just half a month's time, dozens of grain routes in Great Qi were cut off.

The originally aggressive allied army of the three countries suddenly became sluggish.

It was known that the allied forces of the three countries were currently jointly advancing the defense line of North Glacier Town, and there were no other countries on the border between Great Qi and Great Zhou. Where did this strange army come from?

It couldn't be that the Star Moon Army had sent a troop thousands of miles away to cut off Da Qi's rations, right?

Although it was not impossible.

However, no matter how one looked at it, the probability of this happening was very small.

Then where did this army come from?

Why did they only cut off the grain routes of Great Qi and not Great Zhou?

Was it because the Star Moon Troop was retreating and the allied army of the three countries had won many battles? Did the Great Zhou want to monopolize this victory, so they specially sent people to secretly cut off the grain route of the Great Qi?

The more the higher-ups of Great Qi thought about it, the more they felt that it was possible.

Therefore, they began to subconsciously conserve their strength and immediately sent many experts to the border to see what the problem was.

When the Great Zhou saw this situation, they were even more puzzled.

Why did the supply line of Da Qi suddenly have a problem? Besides the two countries, there was no other third party on the border!

Now, although the Great Zhou had not made a move, an unknown force had attacked the Great Qi's grain route...

Could it be that Great Qi was directing and acting so that they could naturally retain their strength, or simply turn the tables and slander Great Zhou?

After thinking of this possibility, the Great Zhou was naturally filled with distrust towards the Great Qi.

After all, the two countries were still sharpening their swords on the battlefield a year or two ago.

Because of Great Qin's relationship and the benefits that both sides had to offer, they had temporarily put aside their life-and-death battle and started working together.

However, it was naturally impossible to say that there was any trust between the two sides. Otherwise, they would not have suspected each other over such a small matter.

Because of this matter, the allied army of the three kingdoms, which was originally united because of the Star-Moon Army's strength, began to become suspicious.

Seeing this situation, Great Qin could only curse at his stupid teammates.

Then, she gritted her teeth and rushed to the front.

After all, the existence of the Star Moon Army was like a fishbone stuck in Great Qin's throat.

If they did not take this opportunity to get rid of the Star Moon Army, which was becoming more and more powerful, Great Qin might need another 100 to 200 years to unify the world.

Because of the issue of the grain route, and the Star Moon Army showing signs of decline.

The relationship between the allied forces of the three countries was no longer as close as it had been in the beginning.

However, under Great Qin's powerful attacks, the balance of the battle was not affected.

After all, no matter how high the quality of the Star Moon Troops was, they would be helpless if they were surrounded by several times the number of enemies and several times the amount of rations.

However, the storm at the border between Great Qi and Great Zhou was far from over.

After discovering that Great Qi had changed the grain transportation route.

The unknown force at the border was extremely daring. They had actually rushed all the way to a granary in Da Qi and burned half of the granary's rations.

This loss made the eyes of the higher-ups of Da Qi turn red.

One had to know that it was chaotic times now, and the price of food was almost comparable to gold.

Moreover, Great Qi was still at war.

Under such circumstances, burning a warehouse of rations was even more painful than burning a warehouse of gold.

When the emperor heard the news, he was so angry that his lungs exploded. He pointed at the emperor and cursed, "Although our Great Qi is unwilling to let the Star Moon Army go with the flow, we are not really afraid of the Star Moon

Army."

"If we let the Star Moon Army continue to develop, the one who will suffer the most is not our Great Qi, but your Great Zhou!"

"You go back on your word, you short-sighted fellow. Northern Ice River Town hasn't been completely wiped out yet, and you're already targeting Great Qi, right?"

Chapter 585: Blood Debts Must Be Repaid in Blood!

The autumn wind blew and the autumn leaves fell.

The chilling autumn wind could not cover up the smoke that was constantly drifting in the northwest.

Li Yueming stood on the roof and looked into the distance quietly.

About ten minutes later.

At the end of his line of sight, more than ten men in black appeared in his line of sight.

They saw Li Yue Ming standing on the roof, as if he had been waiting for them for a long time. The men in black were all shocked. They asked in bewilderment, "Who are you? How did you know our whereabouts?"

Under normal circumstances, as the most honorable group of Heaven-rank Honored Guests under the Emperor, not only were their identities extremely sensitive, but their tracks in the outside world should also be kept secret.

Other than the emperor, no one else should know why they had gone to this godforsaken place to investigate the reason why the grain route had been cut off.

But now, when they were tracking this bandit leader who had suddenly appeared at the border of Great Qi and Great Zhou to cause destruction, this bandit leader unexpectedly knew that they would appear here in advance.

They had been waiting for a long time.

In other words, the identity of this so-called bandit leader was very likely not simple.

Seeing that they were all here, Li Yueming stood up from the eaves. His gaze, which was still looking into the distance, fell on them. He said casually, "Does it matter if I know you guys are coming? In any case, they were just a group of people who were about to die."

When they realized that Li Yueming was so calm that he even dared to mock them, the men in black were not angry. Instead, they became more cautious.

As the saying goes, there must be something fishy going on. As the top batch of Aura Refining practitioners in this world, the men in black had walked on the edge of life and death countless times.

If he didn't even have this bit of caution, he would have died countless times when he was traveling the world.

The leader of the guest elders closed his eyes and used his five senses to observe the surroundings, wanting to make sure that there was no ambush around.

Seeing this, the mockery in Li Yueming's eyes intensified.

Under the full moon of the Mid-Autumn Festival, he looked down at everyone and said, "There's no need to search. There's no ambush here, because I alone am enough to deal with you!"

Hearing Li Yueming's shameless words and his extremely arrogant and despotic attitude...

This time, no matter how good-tempered the guest masters were, they couldn't help it.

After confirming that there were no traces of being tampered with, the black-robed elder who was the leader of the guest group waved his hand and said, "Arrogant brat, do you know who is standing in front of you?"

He didn't know how Li Yueming had detected their presence.

However, none of this was important anymore. Seeing how Li Yueming was so arrogant, he probably didn't know who they were.

The guest group was the name of the consecrators under the emperor, and the heaven-grade guest group was the core and highest level of power among the consecrators.

In the group of heaven-rank guest elders, even the weakest Qi Practitioner would definitely not be lower than the peak of the Void Refinement Realm.

The highest ranking guest elders had even reached the Divine Aperture Realm.

In this era where Heavenly Tribulation Qi Refiners ruled the world while Nirvana Qi Refiners remained hidden. The Divine Aperture Realm guest elder brought along a group of Void Refinement Realm and Origin Returning Realm elders.

Basically, it was an invincible power.

As long as they were not ambushed, it would be easy for them to deal with a young man like Li Yueming, who was less than a hundred years old from the signs of his life.

Normally, such a small matter shouldn't have mobilized such a powerful force.

However, because the emperor had sent several batches of people but did not find any results, he was later pointed at by the emperor and scolded.

The furious emperor had nowhere to vent his anger, so he sent out a group of heaven-level guests to lead them.

He just wanted to know who exactly was this guy who provoked the relationship between the two countries and caused him to be criticized. Was it Big Qi who directed and acted out this disgusting drama?

Thus, as long as they were sure that Great Qi did not set up an ambush here, the Foreign Elders would have a rough idea.

Now that they were fighting in anger, their auras were truly terrifying.

A slightly plump man in black in the crowd punched out. The spiritual energy that was like an ocean condensed into a huge fist in the blink of an eye. Even the roof of the house behind Li Yueming was blown away.

The black-robed man's control of spiritual energy had clearly reached a certain level.

With just a gentle wave of his hand, the giant fist in the void was like a ray of light that broke through the night, smashing fiercely towards Li Yueming who was already standing in the air.

The fist light hadn't even gotten close.

The house where Li Yueming had stopped earlier had been destroyed by the sharp force.

Under the pressure of this force, Li Yueming took a step back.

However, before he could do anything, several other men in black appeared from behind him. They quickly, accurately, and ruthlessly sealed off his escape space. No matter where he wanted to dodge, he would be immediately blocked.

Seeing that Li Yueming had become a turtle in a jar in the blink of an eye, someone sneered, "Ignorant brat, I hope you can open your eyes properly in your next life. How can you provoke our existence?"

A group of men in black pounced over and surrounded them from all directions..

Chapter 586: A Blood Deed Must Be Repaid in Blood!(2)

Not only did Li Yueming not show any signs of nervousness or fear, but he even showed a bit of eagerness. He smiled and said, "Since I dare to wait for you here, I have naturally decided to send all of you to Hell...After all, the blood debt between me and the Great Zhou must be repaid with blood!"

The reason why he had said so much nonsense to the guest group earlier.

It was to eliminate their wariness and let them get closer so that they could eliminate the weeds and leave no survivors.

Now that this goal had been achieved.

Li Yueming no longer hid his strength.

He extended his left hand and blocked the meteor-like punch like an iron pincer. Before the others could react, he extended his right hand and pushed, sending a Foreign Elder who was about to attack him flying.

How strong was Li Yueming's physical fitness after developing five human body treasures?

The answer was that even Li Yueming himself didn't know.

In any case, this palm landed squarely on the Foreign Elder.

The Foreign Elder was sent flying hundreds of meters away and exploded into a cloud of blood mist!!!

Even so, other than the elder in the Divine Aperture Realm, the other Foreign Elders had not fully recovered from their shock. One could imagine how fast Li Yueming's speed was.

With a flash of his figure, Li Yueming attacked again. He killed the few Foreign Elders closest to him on the spot with lightning speed.

It was only at this moment that the group of Foreign Elders who had not been attacked smelled the blood and came to their senses.

When they looked at Li Yueming, their eyes could not help but reveal a look of horror!!!

As a cultivator of the Divine Aperture Realm, the black-robed elder who was the leader of the guest group was the first to recover. He took a few steps back and said in a hoarse voice, "You... You, who exactly are you? Could it be a recluse in the Heavenly Tribulation Realm? No, no, no. No, the Heavenly Tribulation realm doesn't allow you to interfere with the affairs of the world at will. Aren't you afraid of being attacked by the masses if you violate the agreement?"

Li Yueming's eyes revealed a hint of disdain. "The so-called agreement can only be written if one is willing to abide by it. I have never established myself in the martial arts of this world, so why should I be afraid?"

At this point, an inexplicable smile appeared on his face.

He stared at the guest elder who was scared out of his wits and said, "Also, why are you so sure that I've already broken through the Heavenly Tribulation

Realm? Do you think that you're very strong at the Divine Aperture Realm?" At this moment.

Although Li Yueming's smile was very warm, in the eyes of the group of Foreign Dignitaries, he was like a demon walking in the human world. He was filled with a cold aura that made people feel cold from head to toe.

Year 7832 of the Great Zhou Royal Calendar was another cold winter.

The war between the allied forces of the three countries and Northern Glacier Town was still ongoing. However, due to the heavy snow in the northwest for five to six months out of the twelve months of the year, the progress of the war was somewhat slow due to the extreme cold.

In addition, due to the repeated retreats of Northern Glacier Town and the

Star-Moon Army, the allied forces of the three countries, which had already seen one dawn or victory, began to have internal concerns due to the uneven distribution of the spoils.

As a result, North Ice River Town did not face a life-and-death crisis for the time being.

Under such circumstances, countless pairs of eyes from various countries were watching this heart-wrenching war.

However, just when everyone thought that there wouldn't be any big news in the Northwest this year, an inconspicuous piece of news caused an uproar in the world.

According to the information from the spies active in the Northwest.

For some reason, a violent conflict suddenly erupted between the Great Qi and Great Zhou in the alliance of the three countries.

Continuing to investigate further, the initial reason for this should be that there was some conflict between Da Qi and Da Zhou near the border, which led to the cutting of the grain road of Da Qi and the burning of a granary.

Compared to the raging war, this seemed to be a trivial matter.

However, the content that was revealed next shocked everyone!!!

At the end of autumn and the beginning of winter, the Great Zhou soldiers saw a series of heads in a city on the border.

In the beginning, this piece of news did not attract much attention.

After all, human lives were worth less than grass in this chaotic world. There were many people in the six states who went up the mountains to become bandits because they did not have enough to eat. It was very common to kill people in the way.

The only reason why it was noticed was that the person who did this was too arrogant.

He actually hung his head on the door of the Great Zhou Yamen. The hideous head and the blood all over the ground almost scared the county magistrate out of his wits.

This matter caused a commotion.

The county magistrate finally came back to his senses, but the more he thought about it, the angrier he became. He brought a large group of soldiers into the mountains in the middle of winter and wiped out several groups of bandits who were causing trouble on the nearby mountains in one go.

This matter was still considered normal.

Under normal circumstances, this would be the end of the bandit extermination.

However, what happened next was a bizarre beginning.

When the magistrate was about to dispose of the heads, he suddenly discovered that each head had a token stuffed into its mouth. Suppressing the discomfort, the county magistrate asked someone to pry open the head's mouth and take out the token from inside.

At this moment, he saw the token token.

The county magistrate was dumbfounded..

This was because he realized that the owners of these heads were actually the consecrators of the Great Zhou Guest Group.

Chapter 587: A Blood Deed Must Be Repaid in Blood!

After repeatedly confirming that he was not hallucinating, the county magistrate fainted on the spot.

These tokens were quickly taken away by the internal guards who had heard the news.

However, because this matter had attracted the attention of many local people from the beginning, there were too many people who knew about it. In addition, it was too bizarre and spread very quickly. The Great Zhou Dynasty was unable to suppress it. Soon, it swept through the entire Zhu Xia continent like a hurricane.

More than ten Sky-rank guest experts had died on the border with Great Qi.

When this news spread, most people thought that it was a joke.

However, as time passed, not only did this joke not disappear, it even became more interesting.

When the various countries noticed that something was wrong, they sent people to investigate in depth. In the end, they found that this matter was most likely true! !!

“The Great Zhou lost more than ten Sky-rank patrons? My god, is this trying to pierce through the sky?”

“This matter is a little strange no matter what. It seems that only the emperor of Great Zhou can mobilize the heaven-level guest elders of Great Zhou. Why would they suddenly appear on the border of Great Qi?”

“So who knows who did this? It’s so bright that my dog eyes are blinded!”

“Previously, there were rumors that the Great Zhou and Great Qi were at odds. Could it be that the conflict between the two sides has already reached such an irreconcilable level?”

“No matter how you look at it, the Great Zhou’s heaven-rank guest group was killed at that desolate border. Other than this time, I can’t think of any other force that can cross several countries to do such a thing!”

“That can’t be right. No matter how rational the Great Zhou and Great Qi are, they wouldn’t stab each other in the back in a war, right? Moreover, Great Qi still had an army fighting against the Star Moon Army in the Great Zhou Dynasty. Were they not afraid of being eaten by the Great Zhou Dynasty by stabbing them at this time?”

“The situation in this world...I really don't understand it anymore!”

After the news was confirmed, the whole of the world was frightened.

And this was because the elders of the Sky-rank Guest Group had died in the outside world.

If he knew that there was a guest elder in the group.

The entire world would probably be shaken three times.

The Great Zhou Heavenly Cycle Rank Guest Group was the strongest organization of Qi Practitioners that the Great Zhou Emperor could control under normal circumstances. But now, they had been wiped out at the border, leaving no survivors.

The information behind it was very terrifying.

The world had been in chaos for decades, and it was not easy for them to stop and take a breath.

Now that it had been stirred up like this, it was likely that a huge storm would appear out of thin air!!!

Then, here was the problem.

Who was the one who was stirring up trouble behind the scenes and treating all living beings in the world as chess pieces on the chessboard?

In the distant Northern Glacier Town.

After hearing about the earthquake that occurred at the border between the Great Zhou and the Great Qi.

Li Ruxing's face, which was already as cold as a glacier, showed a rare expression.

She finally calmed down. She looked at Ding Yi, who was not far away. He was wearing iron armor and his robe was stained with blood. She asked. “Who do

you think did this? Thirteen of the Great Heaven-level guest masters had died in one go. This was no small matter!”

“Big Qi?” Ding Yi thought for a moment and replied.”

Li Ruxing closed her eyes and shook her head.

Seeing her deny it, Ding Yi did not refute. However, his eyes revealed a rare glint as he said meaningfully, “You mean...” This time, Li Ruxing was silent.

He neither nodded nor shook his head.

Only her slightly furrowed eyebrows showed her fluctuating emotions.

After a long while, Li Ruxing opened his eyes. His eyes had already returned to their usual calm state. He said coldly, ““No matter what, this is good news for Northern Ice River Town! ”

At this point, she paused and changed the topic. “Is the warship ready? The allied forces of the three countries have eaten so much meat from us. If we let them go so easily, I won't be able to answer to General Li in the future!” Ding Yi nodded and looked at Li Ruxing with admiration.

If he had to say that he admired the number one in the indigenous people's list of people, it would be Li Yueming.

Then Li Yueming's second sister would definitely be in the top five.

Other than the fact that he lacked a bit of skill in political struggles.

In other aspects such as military, internal affairs, and intelligence, Li Ruxing was a monstrous existence.

She had truly used her actions to explain to him what it meant to be as intelligent as a demon.

As a reincarnator, he had gone through countless worlds and experienced countless storms. He thought that he was not the smartest among reincarnators, but he was definitely one of the best.

He was especially good at leading troops in battle and setting up formations.

But now, in front of Li Ruxing.

However, he now knew that there was always someone better.

Chapter 588: Shocking the World, Li Ruxing Retreats?_1

In the cold winter of Year 7832 of the Great Zhou Royal Calendar.

The conflict between the Great Zhou and the Great Qi was intense. Although the allied army of the three countries did not collapse, it had already existed in name only to a certain extent.

In the spring of the second year, the allied forces of the three countries launched their final attack.

However, the resistance of Northern Glacier Town was still tenacious and fierce.

After several attempts, he did not achieve the desired result.

The allied forces of the three countries finally stopped their attack on Northern Glacier Town and began to discuss a retreat plan.

It couldn't be helped. The wars over the years had been too cruel.

No matter which country it was, it had basically been baptized by the flames of war.

Right now, he really couldn't squeeze out any extra strength to carry out a long battle.

Since there were many internal conflicts, there was no way to break through the current situation externally.

The only option left for the allied forces was to retreat.

When this news spread out.

The whole world was in an uproar.

To be honest, many people had predicted the outcome of this war at the beginning.

However, no one had ever thought that it would develop into such a dramatic ending.

At the same time, conspiracy theories about the mysterious war on the border between Great Zhou and Great Qi also became more and more popular as this matter fermented.

Many people were curious about what had happened on that unknown night that caused dozens of Great Zhou's heaven-level guest elders to die on the spot. Not even a single one was left alive.

Of course, the Great Zhou did not disclose any information to the outside world.

Only the higher-ups of the various countries would be able to find out about this level of secret.

Ordinary people would never understand.

Other than rumors, no one could point out who did it.

After the conflict between Great Zhou and Great Qi became even more intense.

The already conflicted allied forces of the three countries soon lost all semblance of harmony.

After a short meeting, they began to lead their troops back to their countries.

In this process, because Great Qin had a strong army, it was not afraid of the other two countries playing any tricks.

However, the atmosphere between Great Qi and Great Zhou was always tense.

From the beginning of the border conflict between the two sides.

In the end, the group of heaven-level guest experts sent by the emperor were completely wiped out.

The trust between the two sides had been completely shattered.

The only reason why they had not fought yet was that both sides were temporarily unable to fight.

When retreating, in order to prevent the Great Zhou army from attacking.

The retreat route of the Da Qi army was along the Hundred Thousand Mountains.

Not only did the Great Zhou not gain any benefits from the Northern Ice River Town, but they had also lost a group of heaven-rank guest warriors in this war. Naturally, they would not let the Great Qi army go back so easily.

On the way back, the Great Zhou had sent troops to investigate the traces of the Great Qi army.

No one knew what he was up to.

The allied forces of the three countries, which had been harboring ulterior motives, had completely parted ways.

People's attention gradually shifted from the war to the retreat. As the main character of this war, the Starmoon Troop had a rare period of lack of attention.

The various countries had left many spies and hidden sentries in Northern Ice River Town.

However, since Northern Glacier Town knew about this, it was naturally impossible for them to be completely unprepared.

Until now, there were at least some special forces and a few newly established elite combat troops in the Star Moon Army that had not been exposed to the spies and secret sentries.

Therefore, the disappearance of 50,000 soldiers from the Star Moon Troop did not cause any commotion.

Just as the Great Qi army and the Great Zhou army were on guard against each other and did not trust each other.

The Star Moon Army that was moving down the river first used the flag of the Great Zhou to attack the army of the Great Qi, and then used the flag of the Great Qi to attack the army of the Great Zhou.

The already tense atmosphere was instantly ignited. Great Zhou and Great Qi fought fiercely on the way back.

Because the battlefield was in the territory of the Great Zhou, and the Great Qi army was already very tired, this encounter caused the Great Qi to suffer heavy losses.

The rest of the soldiers were physically and mentally exhausted. They had finally escaped back to the country, and their morale had almost collapsed.

The Great Qi and Great Zhou would probably not be able to reconcile for hundreds of years.

Although the relationship between the two parties was not particularly good.

When they heard this news, the countries that had not participated in the war fell silent.

Whether it was the allied forces of the three countries that easily destroyed North Ice River Town or North Ice River Town that easily defeated the allied forces of the three countries, it was not good news for them. The best outcome would be that both the allied forces and the Star-Moon Army would suffer heavy losses.

However, they did not expect the war to end faster than they had expected.

At the beginning, the three countries' alliance forces were in a good situation. Even if they couldn't annihilate Northern Ice River Town and the Star Moon Army, they would at least be unable to recover for 30 to 50 years.

However, with the current battle results, although the Star Moon Army had suffered a certain degree of damage, it was simply nonsense to say that their foundation had been injured.

If the allied forces of the three countries retreated just like that...

Perhaps in a few years, Northern Ice River Town would recover and make a comeback.

If Li Yueming was still in North Glacier Town.

It was estimated that at this moment, the Northern Ice River would become the common target of the Six Nations.

After all, everyone knew the difference between a Northern Ice River Town with Li Yueming and a Northern Ice River Town without him..

Chapter 589: Shocking the World, Li Ruxing Retreats? 2

North Glacier Town had Li Yueming.

Then, it would be the embryonic form of a new unified dynasty.

Northern Ice River Town had military strength that was not inferior to the other six states. It was only lacking more high-end Qi Practitioners, as well as more population and territory to become a true dynasty.

Under such circumstances.

Letting the Starmoon Troops recover and continue to grow would be disastrous for all countries.

Without Li Yueming to control North Glacier Town, no matter how powerful he was, he was still a headless fly. With Li Ruxing's experience and strength, he might be able to barely maintain his own stability.

However, if they were to take a step forward, Northern Glacier Town would collapse internally without the Six Nations even needing to do anything.

It was also for this reason.

That was why the other three countries did not participate in the war against Northern Glacier Town.

And now, the allied army of the three countries was collapsing from the inside. Not only did it not lose too much of its own wealth and manpower, but it also did not lose much of the core strength of Northern Ice River Town and the Starmoon Army.

The higher-ups of the other countries did not know whether to cry or laugh.

The good news was that Northern Ice River Town was still alive and kicking and had not been weakened by the three countries' alliance army. The Great Zhou, which was adjacent to Northern Ice River Town, would definitely be the first to suffer.

Great Qi and Great Qin had become mortal enemies for no reason.

Putting aside the fact that Great Qin had a strong army, the Great Zhou and Great Qi had already exhausted a lot of their forces in the Six Nations War. Before he could even catch his breath, he was dragged into the whirlpool of another war.

If he didn't use the rules outside the chessboard, it would be difficult to continue restricting the Starmoon Army.

The three countries did not participate in the battle, nor did they connect with the territory of Northern Glacier Town. When the time came, they could use this opportunity to take a short breather.

As for what he was worried about, there was definitely something...

From the looks of it, the existence of the Starmoon Army had already violated the basic understanding of providence in various countries to a certain extent.

Ever since the Tiandu Dynasty disintegrated, the fate of the world had been divided into several equal parts.

The nine vassal states had inherited it together.

Without the support of Fate, Northern Ice River Town shouldn't have been able to develop.

Not to mention, the Star-Moon Army had even obtained the recognition of the world and awakened its soul.

At this moment, the Star and Moon Army's strength had reached a certain level.

After the awakening of the army soul, if the high-end combat strength of the Refinement Cultivators was not included, the Star Moon Army's strength alone was probably enough to be compared to a country.

This was especially so after the war between the six countries, where all the countries had fallen into a weakened state.

This should have been a very unreasonable thing to the Six Nations.

But now, it was right in front of them.

If something unexpected happened at this time, such as the sudden return of Li Yueming, who had been confirmed dead, Northern Glacier Town would be unified at lightning speed.

Perhaps the order of the entire world would be shaken violently because of this.

At that time, no one could guarantee what would happen...Perhaps the scene from the nightmare would happen again!

In order to prevent similar things from happening again.

Perhaps they had to consider more carefully how to deal with the heretic Northern Ice River Town.

However, no matter what.

After this war, there would be at least a few decades of peace in the future.

However, everyone knew that as long as the curse of the legendary 'great unification' and 'ascension' was not broken, the war between the six dynasties would never end.

In the foreseeable future, wars would only get more intense.

Until the appearance of the Renhuang of the Tiandu Clan, who unified the world, gathered the fate of the world and ascended to the upper realm.

The world is unstable, and the war will not stop.

.0.

Northern Ice River Town, Star Moon Army Headquarters.

Li Ruxing silently walked out of the tent and looked at the mess of Northern Ice River Town. A rare sadness appeared on his face.

As a genius.

As a chosen one.

Li Ruxing thought that her existence was already outstanding enough.

Even so, when faced with this dark world, he still felt an uncontrollable sense of powerlessness.

When she was very, very young, she had met her ancestor once.

Although this so-called meeting was not a real 'face-to-face' meeting, it was a scroll and secret about the family history left behind by the ancestor on the Seven Kill Token.

However, she still knew a lot of things that she shouldn't know.

The deepest darkness of this world, as well as the buried history of the past.

Li Ruxing was probably the only person in the entire Li family who knew about him.

This was also one of the biggest reasons why Li Ruxing had been lazy since she was young and was unwilling to think about it.

Because this world was too gloomy, the path that the ancestor had pointed out was too difficult.

She didn't even know where to start.

After thinking about it, the best way to face it seemed to be to run away.

-Nothing would happen if she pretended not to know what she was doing.

However, he did not know if it was fate or his own choice.

At this moment, she was shocked to find that she had finally stepped onto this path that was covered with thorns and could not see the way forward.

It was not to save the world, nor was it to continue some nonsense bloodline. It was just to protect the Kingdom of Heaven that his brother had painstakingly created.

However, after thinking about it carefully, compared to the meaningless goal of "being the savior of this world and humanity", protecting the Kingdom of Heaven that her brother had painstakingly created might be more worthy of her attention..

Chapter 590: Shocking the World, Li Ruxing Retreats?—3

Perhaps, probably...

Whether it was the beginning or the end of the war, Li Yueming did not send any news to Northern Glacier Town.

But even without any evidence, Li Ruxing had already sensed his existence through clues.

Li Yue Ming didn't die, also didn't die, also didn't die.

Li Ruxing was probably the only one in the entire Star Moon Army who believed in this. Just like when they were young, no matter how far apart they were, the two of them never needed to communicate much. They could understand each other's feelings with just a look.

Li Yueming didn't return to Northern Glacier Town, and there was no news of him being alive.

However, Li Ruxing could still clearly sense that he had returned. He was hiding in a place where no one would notice, waiting for the right opportunity like a hunter.

At the same time, she understood what she had to do.

Thinking of this, Li Ruxing finally stopped hesitating. All the gloominess and confusion on his face disappeared. He stood up and strode away.

Outside the tent, the Star Moon Army's higher-ups had been waiting for a long time.

Looking at their familiar yet unfamiliar faces, Li Ruxing felt extremely complicated.

Together with Li Yueming, they founded the Northern Glacier Town, a paradise on earth.

But in reality, they didn't even know what the enemy they were facing was. Therefore, how many people were willing to give up their lives for an existence as weak as a firefly?

But it didn't matter.

Since they had already come this far, there was no way out.

Whether it was advancing or retreating.

There was only a ten-thousand-foot-tall cliff left under his feet.

Li Ruxing's gaze was like a sword as he slowly glanced at everyone.

This time, she gathered all the reincarnators of the Star Moon Army and 90% of the upper echelons of the Star Moon Army. She even used some of the authority left behind by Li Yueming.

Logically speaking, such a huge commotion should mean that there was something extremely important to be announced.

However, for some reason, Li Ruxing looked more relaxed today than he had in the past twenty years. He said, "Everyone, follow me to the Northern Glacier Town Battle Conference Room. I have something to announce!"

Hearing this.

The higher-ups of Northern Ice River Town revealed a suspicious expression.

In the past, during the war with the allied forces of the three countries, Northern Ice River Town had never gathered so many high-level officials for a meeting.

And now, the three allied forces had already parted ways and fled.

What did Li Ruxing want to do by holding such a big meeting?

However, Li Ruxing obviously had no intention of explaining. After reading the news, he took the lead and went to the combat conference room.

Although the remaining group of people were full of doubts, they still followed

after Li Ruxing after thinking for a moment. They wanted to see what Li Ruxing wanted to do.

Ever since Li Yueming disappeared.

It had been many years since the war conference room had been so lively.

The hall of several hundred people was actually full today.

Li Ruxing sat at the head of the table, and beside her sat Ding Yi and Huang Li 'er.

The reason why the Star-Moon Army hadn't collapsed all these years and that North Ice River Town could still maintain its normal operations was largely due to the support of Ding Yi and Huang Li 'er, both openly and secretly.

Otherwise, Li Ruxing alone would be unable to support the normal operation of the Star Moon Army.

However, after everyone was seated.

Li Ruxing's first sentence made all the Star Moon Army's high-ranking officers, including their hardcore allies Huang Li 'er and Ding Yi, widen their eyes. They even suspected that there was something wrong with their ears.

It's been almost thirty years since General Li was assassinated. In these thirty years, I've been unwilling to admit the fact that General Li was dead. I've forcefully occupied a high position and enjoyed the power that shouldn't have belonged to me..."

She sat high up in the main seat, her voice calm as if she was talking about something very ordinary. "Now, I have already accepted the news of General

Li's death. Therefore, I have decided to resign from the position of the Lord of

Northern Ice River Town and the leader of the Star Moon Army."

"As for the specific arrangements for these two positions, they will be inherited according to the laws set by General Li. I will not interfere anymore!"

After saying that, she stood up and left the venue without waiting for anyone to respond.

The Starmoon Troop's higher-ups looked at each other in disbelief.

Before the news of Li Ruxing's retirement could be digested by the Star Moon Army, it had already spread to the entire world at lightning speed.

Everyone was dumbfounded and could not believe their ears. There was no other way. This matter was too unbelievable.
