Chapter 1011: Sky-High Price for a Naming Right

The next day, Fang Qiu flew to the capital early in the morning. After getting off the plane, he immediately called Li Huawen.

“Hello?” Li Huawen answered the phone.

“Director Li, I’ve arrived in the capital,” said Fang Qiu.

“I’ve just booked a room for you. I’m now supervising the site decoration of the merchant fair at Shenghua Hotel, so I won’t have someone pick you up. I ordered dishes in the hotel. As soon as you arrive, let’s have a few drinks,” Li Huawen said.

“Okay,” Fang Qiu answered. Then Fang Qiu took out his mobile phone and booked a taxi to Shenghua Hotel.

When he arrived at Shenghua Hotel, Fang Qiu did see a lot of acquaintances of the TV program, in and out in front of the hotel. Some staff members were busy carrying things into the hotel. Director Li Huawen stood at the gate of the hotel, wearing a cap and sunglasses.

“Director Li.” As soon as Fang Qiu got out of the car, he waved at Li Huawen and said hello.

“Boy, you’ve finally arrived, ha-ha,” Director Li laughed and came forward to welcome Fang Qiu into the hotel.

“That’s the restaurant. I specially booked a private room, and the food is almost served.” Li Huawen led the way and said, “Let’s go while it’s still warm.”

“Okay.” Fang Qiu didn’t stand on ceremony and followed Li Huawen to the private room.

As expected, there was a table full of dishes that were freshly served and still warm.

“Come on, let’s have a drink first!” Director Li Huawen immediately poured a glass of wine for Fang Qiu after sitting down at the table.

“Let me do it for you.” Fang Qiu quickly stood up, grabbed the bottle from Director Li’s hand, and said, “I’m not used to you being so polite to me.”

“Can I be rude to you?” Director Li said with a smile, “You’re a big star now. You’re the top celebrity with a huge fan base. Our program is counting on you.”

“Director Li, just don’t make fun of me.” Fang Qiu gave a wry smile.

After that, he poured a glass of wine for Director Li Huawen and himself respectively.

“Cheers.” The two clinked their glasses and drank it up.

“By the way, this is your room key.” Li Huawen took out an induction-type key and handed it to Fang Qiu, saying, “We only reserve this room for several distinguished guests. Don’t think that everyone has it.”

“I know.” Fang Qiu put away the key with a smile and said, “Thank you.”

“Don’t mention it.” Li Huawen shook his head and then asked curiously, “By the way, what are the big things that you are preparing? Are you going to take advantage of the Young Chinese Medicine Doctor Season 2?”

“Director Li, don’t ask about this matter.” Fang Qiu gave a wry smile and said, “I can only tell you that I’m making a big move and I’m in need of money now. Would you like to donate some?”

“No.” Director Li immediately shook his head and waved his hand, saying, “You’re so rich. The amount of money you lack must be very large. I’m a poor man who relies on the country.”

Fang Qiu gave a wry smile. After breakfast, Fang Qiu followed Director Li to the venue to have a look. After making some suggestions, he took his room card and went to rest.

The next day, at eight o’clock in the morning, Fang Qiu was woken up by Director Li for breakfast.

Everyone was not in a hurry because the fair was held at 12 o’clock at noon. They just dealt with some trifles and a few hours passed quickly.

At 12 o’clock at noon, the fair officially began. According to Director Li’s arrangement, Fang Qiu sat in the first row of guest seats, as well as several contestants of the first season and leaders of the Central Television program crew.

At the beginning of the fair, a host from Central Television came to the stage. “Hello, all the guests present. Thank you for attending the fair for the Young Chinese Medicine Doctor Season 2.” The host started. “Everyone has seen the achievement of the Young Chinese Medicine Doctor Season 1. Even an ace show with an old brand can’t reach that level. And it’s just the first season. Now the selection of the second season has officially begun, with primary election and reelection. Just like the first one, our show will officially start filming after a series of nationwide selections.”

“Before this, many celebrities who like the Young Chinese Medicine Doctor and Chinese Medicine have recorded short videos for us. Let’s look together.”

After that, on the stage, the background screen composed of LED screens began to play the congratulation videos from the stars. Fang Qiu even saw two acquaintances, Song Yaqi and Liu Qingshi.

After all, both of them took part in the New Year’s Gala so they should show up to support Director Li. Moreover, the show was related to Fang Qiu.

After they saw the videos of all the stars, the host walked back to the stage center and said, “Of course, in addition to our stars, we have also invited physicians who had good performances in the first season. They are now sitting in the guest seats under the stage. Let me introduce them to you.

“First of all, welcome Fang Qiu, the champion of the first season of the Young Chinese Medicine Doctor.” The host pointed at Fang Qiu.

At the moment, all the cameras, media reporters, and businessmen who did not participate in the merchant fair immediately turned to Fang Qiu.

Fang Qiu stood up with a smile and nodded to everyone on the spot. Then he clapped his hands with all the people present.

After that, the host continued to introduce the other contestants of the first season, and then the leaders of the crew.

After introducing, the host said, “Next, let’s invite the chief creators of the Young Chinese Medicine Doctor Season 2 to tell everyone about the core values and their expectations of the show!”

As soon as he finished speaking, Director Li and other chief creators came onstage.

Next, he was full of praise for his own show and promoted positively of the core values. In the end, he anticipated the future of the second season and even dragged Fang Qiu into it.

He said that with the participation of Fang Qiu, the champion of the first season, the ratings of the show would definitely rise steadily, and it would definitely rank first among the national variety shows at the same time.

Everyone clearly knew that this was actually a way of attracting sponsors.

Although the sponsors were all here, the program crew had to show their advantages to increase their business value. For example, the various ratings of the previous season, the number of loyal audiences, and so on.

Soon, this part was almost done. The host announced directly, “The merchant fair starts now!”

“First is a total of 15 places for sponsors.” The host said, “It’s an auction.”

After a short pause, “The starting price of the first slot is 50 million.”

Later, the representative sponsors of various companies began to bid one after another like it was an auction.

Although the competition was fierce, the price they offered was not very high because this was the second season. After all, Fang Qiu did not participate in the recording of the whole show. Without Fang Qiu, the ratings would decrease a lot. However, these sponsors were not sure whether the second season would cultivate another Fang Qiu. Therefore, everyone competed conservatively.

Knowing this, the program crew had gathered so many stars’ videos and all kinds of data of the first season before the official auction. The reason why they deliberately prepared these was to raise the value of the program in the sponsors’ eyes.

However, although the price was not very high, the final result was not bad.

At last, the show received 1.5 billion in total in sponsorship, including that from all kinds of sponsored s. There were commercials that contained one line and ones that contained three lines. Some brand logos would not appear, while some would be shown in the show. Some brands wouldn’t be mentioned and some would be mentioned in every episode.

The result satisfied Li Huawen and the leaders of the show. This was already a very high price.

Of course, they also knew that the reason why they could get such a high price was also related to Fang Qiu. If Fang Qiu hadn’t been on the spot, they believed that they wouldn’t have sold it at such a high price.

Of course, the most important thing was that there was also an exclusive naming right.

After all the sponsors' bidding, the competition for the exclusive naming right began. The competition this time was much fiercer than before. After all, the advertising effect of the exclusive naming right was really the strongest!

Originally, everyone thought that the sponsors who had bid before would not participate in the bidding for the exclusive official rights. Unexpectedly, these sponsors also joined in the fierce battle.

In the end, the exclusive naming right was bought by the company whose logo was displayed in the whole show, and the price reached a shocking high of one billion!

This price shocked everyone. No one had expected that an exclusive naming right could be sold for such a high price. It was really shocking.

Finally, the host announced all the companies that sponsored and thanked them for their sponsorship on the stage. At the same time, he invited the chief creators to make a speech on the stage again. Li Huawen excitedly stood in the middle of the stage and thanked all the sponsors again.

Just when everyone thought that the fair was going to end, Director Li glanced at Fang Qiu below the stage.

At that moment, Fang Qiu stood up and walked straight to the stage.

This scene immediately attracted the attention of everyone present.

On the stage, all the main creators and the host stepped off the stage when Director Li motioned them to. Soon, only Fang Qiu remained onstage. "Sorry to hold you up for a few minutes. I want to make an announcement," said Fang Qiu.

Hearing that, everyone was stunned. They were all confused, not knowing what that would be.

Medical Master

Chapter 1012: Three Billion Yuan Plan Stunned Everyone!

What? People here all were particularly puzzled, including the sponsors, media reporters and all the hotel staff as well as the members and leaders of the Young Chinese Medicine Doctor.

This was the advertising investment conference of the second season of the “Young Chinese Medicine Doctor”. Why did Fang Qiu, who came to the platform specially, go to the stage to announce the news?

Was he trying to take over the main event? However, when they looked carefully, they found that the staff of the “Young Chinese Medicine Doctor” and the leaders of Central Television had already come off the stage to prepare to leave.

That was to say, the advertising investment conference of the second season of the “Young Chinese Medicine Doctor” had ended, and Fang Qiu just took advantage of this occasion.

Since the organizers didn’t care, why should anyone care?

But what news was Fang Qiu going to announce? And why did he choose to announce it at this time? Obviously, Fang Qiu chose this time on purpose.

Then, what was so important that Fang Qiu had to make a deliberate choice at this time?

Everyone kept their eyes on Fang Qiu full of doubt, waiting to see what he was going to say.

“I am sorry to have disturbed your time,” Fang Qiu said to everyone very earnestly. And then he said, “Today, I do have an important piece of news to announce, and this news has nothing to do with variety and entertainment programs, but it is related much to Chinese Medicine, so I do hope everyone can calm down and listen to what I will say.”

No one said a word, and they all were silent and waiting under the stage.

“The news I want to tell is actually a plan.” Fang Qiu said, “I named it the ‘Three Billion Yuan Plan’!”

All the people on site were shocked when he said that.

The Three Billion Yuan Plan? In other words, this plan had something to do with money.

Then, how did the huge figure of three billion come about? Did Fang Qiu want to make use of this plan to earn 3 billion yuan or did he want to take out 3 billion yuan himself to do something?

Did he have so much money? Not to mention the media reporters on the spot, even those representatives of the sponsors were extremely curious.

It was three billion yuan that was still a huge fortune even in the current business circle!

Fang Qiu was just an ordinary Chinese Medicine doctor and could barely be regarded as half a star for entertainment. Even if his commission for treating patients and participating in the show was very high, it was also simply impossible for him to take out 3 billion yuan at such a young age.

At this moment, Director Li Huawen was also confused. He still remembered that yesterday when he had breakfast with Fang Qiu, Fang Qiu said that he was short of money, but didn't mention the specific number.

Now he thought about it carefully, "This guy said he was short of money; was he referring to the 3 billion yuan?"

Looking at Fang Qiu on the stage, Li Huawen became more and more curious about what on earth this guy was going to do.

Fang Qiu began to speak on the stage when everyone was full of curiosity and doubts. "The specifics of this plan were that I planned to find 60,000 graduates of Chinese Medicine to go to the countryside for performing medical treatment! I had done some researches before this plan was officially formalized and the results showed that there was a great demand for doctors in the countryside now, and the medical graduates were afraid to go to the countryside for employment for various reasons, which had led to a scarcity of rural doctors across the country."

Speaking of this, Fang Qiu paused, and the figure of 60,000 was what he left after deducing.

According to the research materials obtained before, among the 600,000 people applying for the medical college each year, only about 100,000 graduates could get the Physician's Qualification Certificates per year after a series of eliminations.

However, among the 100,000 people, only about 60,000 would be left in the end apart from those who could not work as doctors for various reasons.

Fang Qiu decided to take half of it after careful calculation!

Although there were 600,000 people needed across the country, he still believed that the effect of these 60,000 people was comparable to that of 100,000 doctors when they really played a role!

"These 60,000 people must be those who have professional medical certificates!" Fang Qiu continued, "After these 60,000 people are confirmed, I will subsidize each of them with 50,000 yuan per year for 3 consecutive years. Moreover, I won't charge a penny for the income of these doctors who treat patients in the countryside!"

Everyone on the scene was stunned by these words!

"What the hell did I hear?"

"What the hell? Is Fang Qiu going to engage in charity?"

"Gosh, does Fang Qiu have so much money?"

"50,000 yuan per year doesn't sound like a lot of money, but if we multiplied it by 60,000, that would be 3 billion yuan a year. Is that where the Three Billion Plan comes from?"

"It's a public service, right? It's really a big deal and it's equivalent to giving money to the doctors for treating people in the countryside, but he doesn't get anything himself."

“Billion Fang is preparing to turn himself into Three Billion Fang, huh?”

“Shouldn’t this kind of thing be done by the state? This is a subsidy for the countryside. Is Fang Qiu really going to do this kind of thing with his own strength?”

As soon as he finished speaking, all the media on the scene were astounded. They knew very well what this news meant.

Of course, there were a lot of media reporters present, and some of them were even on the live broadcast because it was the investment conference of the second season of the “Young Chinese Medicine Doctor”.

As a result, the video of Fang Qiu announcing the plan was also broadcast live on the spot.

The media reporters who were not doing a live broadcast also rushed to spread this news out.

The news announced by Fang Qiu went viral on Weibo in just a few minutes.

It immediately attracted a lot of attention as soon as the news came out, because it appeared at the conference of the “Young Chinese Medicine Doctor” and the protagonist was Fang Qiu.

Countless people joined in the heated discussion one after another on Weibo.

“Oh my gosh, what is Fang Qiu doing here?”

“I see a lot of money!”

“That’s too awesome. 3 billion yuan per year, and for 3 consecutive years, that’s 9 billion yuan a year. Where did Fang Qiu get so much money?”

“9 billion. With the previous donation of one billion, Fang Qiu is going to be 10 Billion Fang.”

“Is Fang Qiu going to be the only person in Huaxia to donate 10 billion yuan?”

“Is this a donation?”

“How can it not be regarded as a donation? And this donation is much better than donating it directly to those foundations. At least, the donation will be distributed to everyone and the money will be used to actualize the practical help for the people in the countryside in the end. This is really much better than donating it to foundations.”

“This is too powerful, truly powerful.”

“9 billion yuan divided into each person is not too much. If I can get 1%, or even one-thousandth of it, I will be satisfied with that.”

All the netizens were in a state of profound shock online. It was shocking to hear that there was so much money.

In the heated discussion, of course, what everyone cared about most was whether Fang Qiu had so much money.

After all, except for filming a movie, Fang Qiu did not participate in any money-making activities in recent days. In addition, he chose a free clinic in a city every month; he could make little money now by curing diseases and saving people.

In this case, how could he earn 3 billion yuan a year?

In Beijing, He Xue was checking the purchase list of Allen International Medical Group and the sales of the two pills in the international market in the office when she suddenly saw a piece of hot news pop up at the right bottom of the computer screen.

Usually, He Xue would just glance at the headline of this sort of news and turn it off. But this time, she did not, because she saw three marked keywords on this hot news title, “Fang Qiu, donation, and 9 billion yuan in three years!”

He Xue was stunned after seeing these keywords, then her eyes widened, and she immediately clicked on the news to check.

She was completely stunned after reading it!

“This guy is really crazy!” With a cry of surprise, He Xue immediately took out her cell phone and called Fang Qiu.

Over here, in the conference hall of the Shenghua Hotel, the news had been announced. After thanking everyone on the stage, Fang Qiu stepped down the stage.

On the side, director Li Huawen hurriedly walked over.

The staff of the “Young Chinese Medicine Doctor” also walked up to them.

At first, they were obviously a little evasive, and afraid that Fang Qiu would again make big news that would have something to do with the “Young Chinese Medicine Doctor”, which would affect the ratings of the show.

But as they heard it now, it turned out that the big event Fang Qiu was going to do was a charity business, and he was ready to spend so much money on it! This was definitely a big piece of news, even top positive news.

In addition, what Fang Qiu had done was indeed related to Chinese Medicine. If these two things were linked together, not only would it not damage the reputation of the “Young Chinese Medicine Doctor”, but it would also involve “Young Chinese Medicine Doctor” in this hot topic that was bound to explode and, thus increase its ratings.

“Director Li, thank you so much.” Fang Qiu immediately nodded and thanked him when he saw Director Li Huawen and the others were coming over.

At this time, the members of the show also arrived and were about to say something.

“Beep” Fang Qiu’s cell phone in his trouser pocket rang. “Excuse me, guys, I have to take a call.”

Without waiting for the main creators of the “Young Chinese Medicine Doctor” to say something, Fang Qiu took out his cell phone, walked to the side, and pressed the answer button.

When he picked up the call, He Xue’s excited voice rang out. “Are you crazy?”

“I’m not crazy.” Fang Qiu shook his head and said, “Please continue to focus on what happens next.”

“3 billion yuan; how dare he do such a thing?” On the other side, at the University of Jiangjing Chinese Medicine, Chen Yinsheng, sitting in the office, also saw the news as soon as possible. He immediately exclaimed with great shock, “This boy is a Chinese Medicine practitioner!”

Xu Miaolin, one of the judges of the “Young Chinese Medicine Doctor” in the second season, was also shocked when he received the news.

“Where did this brat get so much money?”

“3 billion yuan a year, and that’ll be 9 billion yuan in 3 years; this money can’t be falling from the sky, can it?” Xu Miaolin couldn’t figure out where Fang Qiu got so much money.

At the same time, everyone in the Chinese Medicine industry, including Fang Qiu’s parents and other people from all walks of life, were incredibly confused about why Fang Qiu said something like that. Where did he get the money?

In this situation, Fang Qiu had no choice but to post a message on Weibo directly. “I’ll do a livestream in an hour and tell you where the money came from then!”

Medical Master

Chapter 1013: Livestream! Desert Cistanche Is Mine!

Undoubtedly, Fang Qiu's post immediately attracted a lot of attention on Weibo.

Whether it was Fang Qiu's fans or the ordinary people on the Internet, they all left comments below Fang Qiu's post on Weibo.

"Livestream? Which platform are you going to do livestream on?"

"Is Master Fang Qiu really going to do livestream?"

"What the fuck. I haven't seen Master Fang for a long time. Please tell me which platform you are going to do livestream on first. I'm ready to watch it."

"Why don't you announce which livestream platform it will be?"

"How long has it been since his last livestream? This day finally comes."

Netizens were in a heated discussion.

Of course, most of the people were talking about which platform Fang Qiu would do the livestream on.

Because everyone was impatient to watch Fang Qiu's livestream, they wanted to wait on the platform in advance. After all, the traffic brought by the name of Fang Qiu was enormous. People were afraid that they wouldn't be able to get into the livestream channel if it was too late.

However, just as everyone was asking, all the major livestream platforms entered Fang Qiu's Weibo and looked for his contact information, asking Fang Qiu to do the livestream on their own platforms.

However, after searching for a long while, they could only find a WeChat account on Fang Qiu's Weibo. As for the phone number, they had tried it before, but they couldn't get through at all. Hence no one would call this number.

Helplessly, people of all the major livestream platforms left messages on Fang Qiu's WeChat and invited him to do the livestream on their platforms. They even directly mentioned Fang Qiu on Weibo.

After the post was sent, Fang Qiu breathed a sigh of relief in the hotel room.

Originally, he wanted to find a random livestream platform to do it, but when he saw so many platforms sending him messages on WeChat and mentioning him on Weibo, Fang Qiu suddenly hesitated.

He mumbled, "It seems that I still have to select one properly."

Thinking of this, Fang Qiu immediately tapped on WeChat and looked at messages carefully one by one.

There was no doubt that the prices offered by each livestream platform were particularly tempting. For example, the competition between several major popular livestream platforms was particularly fierce.

One company offered that they would give Fang Qiu 60% of the profit while they got 40% themselves. Then the other company immediately offered to give Fang Qiu 70% of the profit while they got 30% themselves.

The largest livestream platform in the country that made an offer was the one where their streamer once secretly did livestream when Fang Qiu attended the medical conference. The platform offered Fang Qiu 90% of the profit while they got 10% themselves.

Seeing these conditions, Fang Qiu couldn't help laughing.

But in the end, he did not choose these large livestream platforms. Instead, he chose a livestream platform called "Livestreaming".

Livestreaming was a newly established livestream platform in Huaxia.

When Fang Qiu saw the price offered by this platform, he was immediately tempted.

Unlike the other platforms, the price offered by this livestream platform was 5 million!

It was not 5 million of the profits in this livestream. They didn't want any profit from it. Instead, they would give 5 million to Fang Qiu. Their purpose was to advertise for their platform!

While being tempted by this offer, Fang Qiu immediately searched for information about Livestreaming online.

Ultimately, he found that this platform was established by a group of people who just graduated. These college students all had rich families, but this livestream platform was their only career. That was to say, these college students completely focused on making this livestream platform. In addition, this platform combined various livestream categories which were the most popular ones at present. Meanwhile, it also had functions such as live interaction with the audience and guessing games.

After reading the information, Fang Qiu decided to use Livestreaming!

They got the best conditions and he could also show his support to college students who started their own businesses.

After they made a deal, the livestream platform directly transferred 5 million to Fang Qiu's bank account without any hesitation!

As Fang Qiu received the money, he immediately sent a post on Weibo.

"The livestream will be held on Livestreaming's platform. The channel number is 001."

As he sent a simple post on Weibo, it immediately caused a sensation in the livestream industry.

Netizens didn't hesitate. After seeing this post, those sitting in front of the computer immediately searched the home page of the livestream platform and entered it. Those who were not using computers took out their phones and downloaded the app of Livestreaming.

Livestreaming, whose download volume didn't exceed 10,000 originally, directly rose to the top of the download list!

In half an hour, the download volume exceeded 1 million and reached 1.06 million!

That was to say, the download volume increased by 1.05 million!

This data made the person in charge of Livestreaming ecstatic!

In the beginning, he still had doubts about whether spending 5 million in advertising was worth it. After all, 5 million was enough for them to do numerous things.

But now, after seeing the effect, the person in charge was pleasantly surprised.

This kind of growth was even worth 10 million, let alone 5 million.

More than 1 million was the real download volume. With the traffic of more than 1 million, this platform could easily earn back the advertising fees of 5 million after taking a few s at will!

Now the person in charge thought that the was truly worth it.

As people of this platform were surprised, countless people were waiting for the livestream in front of the computers and their phones.

The fact that Fang Qiu was about to do the livestream attracted the attention of various people.

Soon, it was time to start the livestream.

In order to ensure that Fang Qiu's livestream went smoothly, people of this livestream platform temporarily turned off two of its servers. Then, they connected these two servers to the port where Fang Qiu's livestream channel was located. Meanwhile, it transferred other livestream channels connected to this port to other servers.

To put it simply, Fang Qiu's livestream alone had three exclusive servers supporting it.

This level of livestream was unprecedented in the entire livestream industry. Even when someone secretly live-streamed Fang Qiu at the medical conference last time, he did not receive this kind of treatment.

Because of the increase in servers and all kinds of support of the livestream platform, Fang Qiu's livestream this time was exceptionally smooth.

Before Fang Qiu started the livestream, there were already more than a million viewers on the livestream channel.

When it was time, Fang Qiu immediately started the livestream with his cell phone.

As the livestream began, the number of viewers in the channel surged dramatically.

The most important thing was that the number of viewers displayed in the livestream channel was the actual number of people who were actually watching the livestream, which was not fake at all.

Under such circumstances, the livestream almost broke down even though there were three servers.

Ultimately, when Fang Qiu finally showed up, the number of viewers in the livestream channel officially exceeded 3 million. And the number was still rising, which was just not as fast as before.

As the livestream began, Fang Qiu greeted all the viewers through the camera.

As soon as he said that, all kinds of gifts flooded the livestream channel.

“Thank you, thank you for the gifts.” Seeing so many gifts, Fang Qiu expressed his gratitude at once.

All kinds of comments then popped up on the bullet screen. Fang Qiu read them for a while and spotted a question. “Why do you want to make the Three Billion Plan?”

He immediately said, “A person asked me why I came up with the Three Billion Plan. The reason why I made this plan is because of what I have seen and heard. You should know that I went to Lin Zhai to see patients, right? After I went to that place, I realized that many places were completely different from what we saw and thought.”

Then, Fang Qiu told people what he had seen with his own eyes, as well as the lack of doctors in the countryside and so on.

Hearing Fang Qiu’s words, almost all the viewers who were watching the livestream fell silent.

The comments on the bullet screen decreased a lot. Of course, many people doubted whether what Fang Qiu said was true and whether the environment there was truly so bad.

.

However, the netizens of Lin Zhai directly came out and confirmed it. Meanwhile, there were many other netizens from other places said that the environment they lived in was not better than that of Lin Zhai.

Only then did the netizens realize that they truly knew nothing about most parts of the world.

After telling the whole story, Fang Qiu said, “That’s why I came up with the Three Billion Plan after seeing and knowing these things.”

“Where did the money come from?”

“There’s so much money. Where did you get it?”

“Yes, where did you get so much money to do charity?”

Everyone started asking questions on the bullet screen.

“Where did the money come from?”

Seeing everyone’s questions, Fang Qiu immediately smiled and said, “You should all know that I’ve donated all the money I earned before.”

“Billion Fang!” As soon as he said that, the screen was immediately filled with the words “Billion Fang”, along with many laughing emojis.

As the comments surged on the bullet screen, the number of gifts that people didn’t stop sending rose sharply. The number of viewers in the livestream channel also began to soar enormously again. The rising speed was faster than when the livestream just started.

In the blink of an eye, the number of people watching the livestream reached 5 million!

“Where did three billion come from?” As everyone was questioning, Fang Qiu smiled and asked, “Do you remember Desert Cistanche, the main ingredient of Life-prolonging Earth Pill and Trillium Root-Securing Pill? I was the one who found the Desert Cistanche that has particularly good efficacy. And the Life-prolonging Earth Pill and Trillium Root-Securing Pill are developed by my team. The Desert Cistanche that these two drugs needed is also supplied by me!”

As soon as he said that, all the viewers in the livestream channel were shocked!

“It’s actually Fang Qiu?”

“Although I have been speculating that the two drugs are related to Fang Qiu, I was still very shocked when I heard the answer.”

“That’s right. I’m afraid that you’re the only one in this world who can produce such an effective medicinal herb.” People’s comments flooded the screen.

Fang Qiu said to everyone with a smile, “This is why I have the confidence to donate the money. I’m sorry for keeping it from you for so long!”

Of course, Fang Qiu didn’t say anything about the Holy Flowers Formula and the Renyi Group or something like that.

After all, he was an ordinary man who needed privacy.

Besides, if he said it, he was afraid that people would be intimidated.

After all, the identity of the chairman of Renyi Group was well-known not only in Huaxia but also in the international market.

Then, Fang Qiu talked about the problem of Chinese Medicine with the viewers, as well as the reason why the Chinese Medicine doctors in the countryside were lacking. He seized the opportunity to promote Chinese Medicine.

“I announce that all the profits brought by this livestream will be donated to this plan transparently!”

Medical Master

Chapter 1014: Heated Discussion

In the livestream channel, all kinds of comments and gifts on the bullet screen dazzled people.

Especially when they heard that Fang Qiu was going to donate all the profit of this livestream to the Three Billion Plan, they became even more enthusiastic about giving gifts because Fang Qiu said that the livestream platform would not take a penny of the profits of this livestream.

If people sent a gift worth 100 yuan, Fang Qiu would get 100 yuan. In fact, if people sent gifts, it would be equivalent to donating money!

It made many people who only watched the livestream without sending gifts break the rules for the first time. Some people sent gifts worth a few or dozens of yuan at least, while others sent gifts worth tens of thousands of yuan at most.

“Now, I announce. Three Billion Plan officially begins!” Looking at people sending gifts and leaving comments, Fang Qiu said with a determined look, “Welcome to sign up, all the doctors with professional medical certificates. I also hope that all the viewers who are watching the livestream can help me spread the word, make more people know this plan, and let more Chinese Medicine practitioners take part in it!

“Eventually, once again, thank you for participating in this livestream. I look forward to seeing you next time!”

After expressing his gratitude, the livestream was over.

In the livestream channel, there were still countless people leaving comments to ask him to stay.

However, the image of the livestream channel already turned dark.

However, people were still sending numerous gifts.

After a long time, the audience gradually left the livestream channel. Some of them moved to other livestream channels on this platform to watch other people’s livestream.

Ultimately, people of the livestream platform started to collect the data.

Fang Qiu only did the livestream for half an hour, but as they collected all the data, they found that he had received gifts worth more than 30 million in this half an hour!

This number shocked all the bosses of Livestreaming! That was more than 30 million!

Even the most popular online streamer these days might not get so much money from the gifts as Fang Qiu did in half an hour.

A livestream that lasted for half an hour actually gained so much profit. This was formidable in the entire livestream industry!

But as they thought about it again, Fang Qiu was a man who donated 3 billion a year. 30 million was merely a drop in the bucket.

Soon, there was also a buzz on Weibo.

“What the fuck. The highly effective herb, Desert Cistanche, which is used by Hua Yuan Pharmaceutical Corporation is actually supplied by Fang Qiu?”

“I thought that it was very likely that this was the case back then!”

“No wonder Fang Qiu dared to make such a big offer. With the current sales of Trillium Root-Securing Pill and Life-prolonging Earth Pill, he should be able to afford to give 3 billion a year!”

“Giving 3 billion a year should not be a problem for him.”

“I heard that there is a limited production of Desert Cistanche, and its price is very high.”

“Now Trillium Root-Securing Pill and Life-prolonging Earth Pill are sold at such a high price on the international market. Fang Qiu’s Desert Cistanche is the main ingredient of these two drugs. It should be fine for him to increase the price. It’s not too much since he can earn 3 billion a year, isn’t it?”

“Never would I have imagined that it would really be him.”

“As I expected, every major event in the Chinese Medicine industry must have something to do with Fang Qiu!”

“I remember that Fang Qiu seemed to have sent a post on Weibo publicizing Desert Cistanche before.”

“It’s about the 10 ancient magic herbs in Daoism, right? I remember at that time, Fang Qiu only said that he was studying a kind of herb, but he didn’t specify what kind of herb it was. I didn’t expect it to be the Desert Cistanche that everyone speculated at that time!”

There was a heated discussion on the Internet. In the real world, the news about Fang Qiu’s Three Billion Plan also spread quickly. Although it had not been spread to every corner of the city, almost all the Chinese Medicine doctors across the country heard this news in the first place.

The graduates of Chinese Medicine colleges and the people who had professional medical certificates were all tempted after hearing the news.

Everyone began to consider seriously whether they should go or not.

The allowance was not a small amount after all.

One person would have an allowance of 50,000 in one year. It would be 150,000 yuan in three years. The most important thing was that all the income after going to the countryside belonged to the doctors themselves. Even in the countryside, it was not too much when one got a salary of 3,000 to 5,000 for treating patients. If one opened a clinic on his or her own, he or she could earn 6,000 to 7,000 yuan a month. In this way, they would earn at least 150,000 yuan in three years. With the allowance given by Fang Qiu, it would be 300,000 yuan in three years.

And the most important thing was that the country’s latest policy was to give an allowance to people who went to the countryside to practice medicine. According to a village’s population, each person would get 25 yuan as an allowance per month. With the drug expense and other things, there would be at least 100,000 yuan in three years.

Taking everything into account, one could get at least 400,000 in three years if going to the countryside to work as a doctor! This was not a small figure.

Even in the city, an experienced doctor with a monthly salary of 10,000 needed to work for three and a half years to get this money. The most important thing was that they had to work from 9 a.m. to 5 p.m. a day in a big city. Every time they went to work, they were busy from morning to night.

When they went to the countryside, they wouldn't be so busy. And they could even live a slightly leisured life.

Taking these things into consideration, many medical colleges students from the countryside began to take action.

They all hurriedly called their families to discuss this matter, ready to fight for a spot in their hometown.

In Linxi County, Fang Qiu's parents, who had been following Fang Qiu's information, also watched Fang Qiu's livestream on time. After watching it, they found that their child was actually so rich. He was so rich that it completely exceeded their expectations.

If he showed all his money, they would be an exceptionally rich family!

"This kid has actually made so much money without us knowing. But he doesn't even send me some flowers. He has really grown up and is about to fly the nest," Fang Qiu's mother snorted after watching the livestream.

"Don't you have money to spend?" Fang Qiu's father rolled his eyes at his wife and said, "Isn't the money I give you every month enough for you to spend?"

"My money is never enough." Fang Qiu's mother curled her lips and said, "Of course, the more money I have, the better. I don't lack money now because I choose not to buy a lot of things. If I have more money, I will definitely have more things to buy."

"You" Fang Qiu's father merely found her logic absurd.

"All right, all right." Fang Qiu's mother rolled her eyes at Fang Qiu's father and said, "I know. This is the money that our son earned. I can also make money to support myself now. Although I'm greedy for money, I'm not so greedy that I can't distinguish right from wrong. Our son is someone who can do great things. Of course, he should be the one who decides how to use his money. No matter what decision he makes, I'll support him. Anyway, I know our kid better than you." As she spoke, she took out her cell phone to call Fang Qiu.

"Hello, Mom." After seeing that it was his mother's call, Fang Qiu didn't dare to hesitate and immediately answered the phone.

Fang Qiu's mother said, "Kid, why didn't you tell me that you have made so much money? You were afraid that I would spend your money, weren't you?"

"No," Fang Qiu quickly shook his head and said, "I'm just afraid of scaring you guys. The money I made is all yours. Just tell me how much you want. I'll transfer to you."

"Fine, at least you have a clear conscience," Fang Qiu's mother said with a snort.

"Honestly, if you guys are really short of money, I will transfer tens of millions of yuan to you right now. The reason why I didn't tell you is that you don't want it. Last time, my father rejected me when I wanted to give him one billion," said Fang Qiu.

Fang Qiu's father interrupted, "It's not that I don't want it. I just hope that you can spend this money in the right place and not be ruined by so much money. Do you understand?"

"Dad, I know." Fang Qiu grinned and said, "Don't worry. I won't let you down."

"That's good." Fang Qiu's father nodded with satisfaction.

Fang Qiu's mother ordered, "Well, Fang Qiu, you've grown up now. Your father and I will support whatever you do. But there's one thing that you have to remember. I don't care how you are going to spend the money you earn, but you have to save some money for your marriage. You'll get married in the future."

“Mom, don’t worry. I still have money.” Fang Qiu gave a wry smile and said, “I’ve kept the money that I need to use myself, as well as the money prepared for you and my dad. What’s more, I’m not the only one who will pay for the Three Billion Plan.”

“Emm. This kid did a good job this time.” In Jiang Miaoyu’s family, Jiang Miaoyu’s father who saw the news nodded with satisfaction. For the first time, he admired Fang Qiu.

Next to him, Jiang Miaoyu’s mother gently shook her head and chuckled.

“Good boy. I’m proud of this student.” In Jiangjing, Xu Miaolin was gratified. It truly made him feel pleased that his student could do so much for Chinese Medicine.

Meanwhile, when Zhou Xiaotian’s parents learned that Fang Qiu had so much money, they immediately thought of the bank card they snatched from Zhou Xiaotian. They thought carefully and recalled that Zhou Xiaotian and Fang Qiu seemed to be classmates and they seemed to be living in the same dormitory.

“Was there truly 500,000 yuan on that card?” At the thought of this, Zhou Xiaotian’s parents suddenly became excited. Their son was rich!

Meanwhile, Sun Hao’s and Zhu Benzhen’s parents were also quite surprised because when Sun Hao and Zhu Benzhen went home on holiday, they both told their parents that they were Fang Qiu’s classmates and roommates and even said that they were about to study and do some research with Fang Qiu.

Now it seemed that they would not have to worry about the rest of their lives as long as they followed Fang Qiu!

At the University of Jiangjing Chinese Medicine, people were also discussing.

“My God, the Desert Cistanche used to produce the Trillium Root-Securing Pill and Life-prolonging Earth Pill was actually developed by Fang Qiu!”

“He’s too amazing, right?”

“If I remember correctly, Fang Qiu is still a sophomore now. It’s really hard to accept the fact that he has become a billionaire when he’s still a college student.”

Not only the students but also all the teachers in the school were dumbfounded, especially those graduates who were about to leave school.

When they heard about the Three Billion Plan, they knew that it was they and also the reality that touched Fang Qiu. That was why Fang Qiu made such a big decision, took out so much money, and did such a good thing!

“Well, I, Chen Yinsheng, finally have such a student during my career. My life is worth it. Having such a student is the biggest achievement in my life.”

In the Vice President’s dormitory in the university, Chen Yinsheng who was watching the news was rather excited. He even drank too much because of it.

“He’s such a great student. How could he be Xu Miaolin’s student? What a waste!” In the northeast, Holy Doctor Chu sighed with emotion in front of his disciple, Luo Jie.

As for this, Luo Jie was helpless and could only give a wry smile.

Medical Master

Chapter 1015: Take Advantage of the Opportunity!

In the entertainment circle, all the celebrities who knew Fang Qiu were also shocked by his generosity.

“This bro really keeps his identity pretty well hidden.” Seeing such big news, Liu Qingshi could not help sighing with emotion, “No wonder he doesn’t like to get involved in the entertainment circle. It turns

out that he is so rich. He doesn't lack money at all. He just came to the entertainment circle for fun, didn't he?"

The other MCs also exclaimed. "He's that rich?" Song Yaqi was also shocked.

As she was the most popular diva at present, Song Yaqi's worth was top-notch in the entertainment circle, but even so, she could only make 100 million a year at most. In addition to salaries of the staff, sundry fees, commissions of the company, and her daily expenses, it was exceptional for her to earn tens of millions a year.

But Fang Qiu earned billions of yuan a year. There was a huge gap between them.

At this moment, she finally understood why Fang Qiu didn't want to be a singer when she first met him. It turned out that he didn't take the little money earned by singers seriously at all.

Even without being an A-list singer, he was no less famous than an A-list singer, and the money he earned was much more than that of an A-list singer.

"Fang Qiu, how powerful can you be?" Thinking of this, Song Yaqi couldn't help but chuckle.

Soon, Fang Qiu, who was already extremely famous, became a brilliant child that all parents wished they could have after the spread of this matter and the exaggeration of netizens.

He was only a sophomore, but he had assets of billions!

When the Three Billion Plan came to an end, Fang Qiu would be the first person to donate 10 billion yuan in Huaxia or even in the whole world. It would be remarkable as one thought of it.

"Incredible. He's truly incredible." In the office of the general manager of Hua Yuan Pharmaceutical Corporation in the capital, seeing the news on the Internet, Yang Ningyuan was also shocked. He had been shocked by Fang Qiu many times when it came to his donation, but this time, it was the most shocking one because Fang Qiu was going to donate an enormous amount of money!

“I have to admit that the young people in this era are remarkable,” Yang Ningyuan sighed with emotion, then paused for a moment and muttered, “However, since our own people have created such a big piece of news, our own company has to take advantage of this opportunity.” After that, he immediately called He Xue.

After talking to Yang Ningyuan, He Xue instantly called Fang Qiu.

In the hotel room, Fang Qiu answered He Xue’s call and asked, “What’s wrong?”

“I have something to report to you,” He Xue said, “With regard to your Three Billion Plan, I will personally donate 100 million, which can be deducted from my dividends. Besides, the company will donate 200 million. To take advantage of the opportunity created by you, we’ll promote our second product—All Nourishing Essence Pill.

“After your livestream, the sales of the Trillium Root-Securing Pill and Life-prolonging Earth Pill have doubled so far. Moreover, the main ingredient of All Nourishing Essence Pill also is Desert Cistanche. Therefore, if we use this opportunity and launch All Nourishing Essence Pill, it will definitely sell fast.”

“Okay.” Hearing that, Fang Qiu didn’t think too much and immediately nodded and said, “But you’d better announce it tomorrow. If you wait until the day after tomorrow, you’ll lose the opportunity.”

“What do you mean?” He Xue was stunned at first, but then she recalled that Fang Qiu wanted her to help gather the leaders of those pharmaceutical companies. She immediately asked curiously, “What do you want to do by gathering the leaders of those pharmaceutical companies?”

“Have you heard of the New Retail which is quite popular recently?” asked Fang Qiu with a smile.

He Xue asked, “I’ve heard of New Retail, but does that have anything to do with you?”

“I want to do New Retail of pharmaceuticals!” said Fang Qiu.

He Xue was stunned. Of course, she knew about New Retail.

New Retail was carried out by enterprises with the support of the Internet. Through advanced technical methods, such as big data and artificial intelligence, they upgraded and modified the product production, circulation, and sales process of the goods, and then reconstructed the industry's structure and ecosystem. It was a new retail pattern while they deeply integrated online service, offline experience, and modern logistics together.

Hearing Fang Qiu's words, He Xue, who was quite doubtful about what Fang Qiu was going to do in the beginning, unconsciously began to look forward to the meeting the day after tomorrow.

Fang Qiu hung up the phone and began to think about some things. Now, the first step of the Three Billion Plan was taken. It was time to take the second step!

What was the second step? Of course, it was to recruit doctors!

How could he recruit doctors who were willing to go to the countryside?

After pondering for a long time, Fang Qiu ultimately decided that he still had to cooperate with universities.

First of all, the most important requirement in this era for recruiting doctors was to prevent fake doctors. People with professional certificates might not necessarily be professionals in certain fields. There were many things that could be bought.

Therefore, Fang Qiu was worried that he would recruit those who had no strength but got the Physician's Qualification Certificates through pulling strings.

Such people would be of no help to the current situation where the doctors were lacking in the countryside. Instead, they made the situation worse!

Furthermore, there were many people who knew how to cheat the system and made every effort to get a benefit. Such large-scale charity would definitely cause such people to have ulterior motives.

To prevent these imposters from taking part in the plan, Fang Qiu had no choice but to cooperate with universities. After all, Fang Qiu was a college student himself, and this matter was also beneficial to Chinese Medicine and universities.

If the University of Jiangjing Chinese Medicine came out to help, it would also bring a lot of benefits to the school.

At the thought of this, Fang Qiu looked at the time on his cell phone and found that it was already past 11 o'clock in the evening. He didn't rush it but decided to take a rest for a night first. He would call Chen Yinsheng tomorrow morning to discuss this matter.

The next morning, after Fang Qiu finished exercising and estimated that Chen Yinsheng had already gone to work, he dialed Chen Yinsheng's phone number.

"Hello?" The phone was connected.

"Vice President Chen, it's me, Fang Qiu." Fang Qiu greeted him and then said, "I call you this time because I want to discuss the recruitment of doctors with you."

Chen Yinsheng asked, "Three Billion Plan?"

"Yes." Fang Qiu nodded and said, "If I do it myself, I'm afraid that I would attract a lot of fake and bad doctors because this plan is profitable. Therefore I want to cooperate with medical universities all over the country. As long as the school roll and academic performance of the people who graduate from these universities can be found, they can participate in this plan. They go back to their own schools to sign up."

"Well," Chen Yinsheng pondered for a moment and then said, "Okay, no problem. I can help you contact other medical universities, but I can't guarantee that they will agree."

"They will agree," Fang Qiu smiled and said, "Thank you, Mr. Chen."

“All right, you do it for Chinese Medicine, and so do I.” Chen Yinsheng answered, “It’s my honor to make contributions to Chinese Medicine. And it’s also my duty.”

After hanging up the phone, Chen Yinsheng made phone calls in the whole morning in the office, calling people from all the medical universities in the country. As Fang Qiu said, all the schools agreed to cooperate with him.

It was true that Fang Qiu’s plan was a good thing for all the medical universities.

Now, teachers of every medical university were rather distressed about the problems of their graduates’ work, because the graduates of medical universities didn’t have other places to work, except for being an intern in the hospital. However, there were so many university graduates every year that even the hospitals couldn’t take them all.

In this case, it was inevitable that many graduates couldn’t find a job. Fang Qiu’s plan not only helped the graduates find one more option but also helped all the medical schools solve a big problem. How could the leaders of the medical universities not agree with such a good thing?

Not only did they agree, but the leaders of these universities also praised Chen Yinsheng for educating such a good student.

After the whole day, not only did Chen Yinsheng not feel tired at all, but he also felt extremely pleasant. He even felt that this was the best day of his life. After all, it had been a long time before he heard such constant praise.

Soon, making joint efforts with Chen Yinsheng, medical universities from all over the country began to make preparation immediately.

Meanwhile, Fang Qiu also immediately sent a post on Weibo.

“#Three Billion Plan# is officially launched. In order to prevent imposters, we will strictly cooperate with all the major medical universities across the country in terms of the recruitment of doctors. All the physicians who have Physician’s Qualification Certificates and want to sign up can go back to their alma

mater and register for this event. People who can be selected will be decided by the schools and us after our assessments.”

As soon as this post came out, many people who were following this plan were excited.

Countless people hurriedly made phone calls to their alma mater to consult about this matter.

In the whole country, the phone calls of major medical universities didn’t stop on this day.

Just when everyone was discussing this matter heatedly, another piece of breaking news came out and caused a heated discussion among the netizens.

“#Three Billion Plan# Renyi Group announces that we will officially join Fang Qiu’s Three Billion Plan and donate 200 million! Our company will also launch a brand new product at the same time, Comprehensively Nourishing Pill, whose main ingredient is Desert Cistanche. The preorder of this new product will officially be available tonight. All the preorders will be delivered within ten days. As for the specific information about the Comprehensively Nourishing Pill, please check it on our official website!”

The name of All Nourishing Essence Pill was changed into the Comprehensively Nourishing Pill by He Xue.

It was directly changed to Comprehensively Nourishing Pill because the name “All Nourishing Essence Pill” would make people think that it mainly targeted men. In this way, both men and women would think they could use it.

As the post was sent on Weibo, there was no doubt that it immediately received countless netizens’ praise.

“How kind and righteous!”

“They are indeed kind and righteous!”

“Not bad. Renyi Group, an international huge group, did a good job.”

“It’s another medicine mainly made from Desert Cistanche, and its effect is definitely not worse than that of Trillium Root-Securing Pill and Life-prolonging Earth Pill. Moreover, the more this medicine is sold, the more money Fang Qiu will earn as the supplier of Desert Cistanche. I decide that no matter what, I will buy Comprehensively Nourishing Pill. It can also be regarded as a contribution to Fang Qiu’s Three Billion Plan.”

“I also want to buy it. Fang Qiu has already taken out three billion. We can’t just sit back.”

“I’m rooting for the domestic goods and Fang Qiu!”

Countless people focused on the new medicine, Comprehensively Nourishing Pill, waiting for the preorder to start. They wanted to place an order as soon as possible!.

Medical Master

Chapter 1016: Donate Money?

“Comprehensively Nourishing Pill?”

“Holy cow! Renyi Group is really good at producing medicines. The so-called Holy Flowers Formula was just on the market, and now there is Comprehensively Nourishing Pill?”

“It’s really the damn right time to seize the opportunity!”

“Is Renyi Group going to monopolize the pharmaceutical industry in Huaxia? After annexing Hua Yuan, they made Holy Flowers Formula public, and then promoted Trillium Root-Securing Pill and Life-prolonging Earth Pill to the international market at a high price. Now they developed Comprehensively Nourishing Pill. What the hell is going on? It’s like that they conspired these things step by step.”

“They made this move just when Fang Qiu announced the Three Billion Plan and admitted that he was the supplier that developed and provided Desert Cistanche. What a good plan!”

While all netizens were waiting for the presale of Comprehensively Nourishing Pill and were ready to purchase, those companies in Huaxia pharmaceutical industry all had mixed feelings because of this news.

In fact, a long time ago, when Hua Yuan Pharmaceutical Corporation announced that the main medicine Desert Cistanche they used was several times more effective than others on the market, these pharmaceutical companies had already attempted to find out the supplier of Desert Cistanche. They also wanted to buy the same kind and produce more effective medicines.

However, no matter how hard they tried, they couldn't find the source.

Now, they finally knew that it was Fang Qiu who had made the special Desert Cistanche. But they had no access to get in touch with Fang Qiu at the moment. Moreover, Fang Qiu must have already cooperated with Renyi Group. Otherwise, Renyi Group wouldn't have launched the new medicine—Comprehensively Nourishing Pill in such a short time!

Almost all the pharmaceutical companies in Huaxia were jealous of Renyi Group which got help from Fang Qiu.

They also wanted Fang Qiu's help.

However, Renyi Group had donated 200 million RMB immediately. If they really wanted help from Fang Qiu, it would be embarrassing if they donated too little. Moreover, if they couldn't get the special Desert Cistanche and couldn't develop special medicine after donation, they would lose a lot.

The most important thing was that they had no access to get in touch with Fang Qiu.

Even if they had intentions to donate money, they didn't have the chance to join in them because they even hadn't reached out to Fang Qiu.

Therefore, all the domestic pharmaceutical companies were depressed and helpless.

At this moment, two pieces of news came out on Weibo.

Following Renyi Group, companies under Yang Ningyuan and Li Qihua—the two cooperative sides of Huayuan Pharmaceutical Corporation—respectively announced to donate 100 million yuan to Fang Qiu's Three Billion Plan!

Another 200 million yuan!

On Weibo, netizens came to find these two business giants' accounts and praised them.

"No wonder they are the big shots in the business! Their money is counted in hundreds of millions."

"This should be counted as Fang Qiu's credit. After all, Fang Qiu once saved Yang Ningyuan's life, and now he is a business partner of Yang Ningyuan and Li Qihua."

"I have to say that Fang Qiu's interpersonal relationships are very good. Just like the time he published his new books, lots of people responded and supported him."

"Not bad, not bad. Yang Ningyuan and Li Qihua are both good people. These two companies are very good."

"They are indeed good friends through thick and thin. As soon as Fang Qiu announced his plan, they quickly supported him."

That night, Comprehensively Nourishing Pill was officially on presale.

Countless people sat in front of their computers, waiting to buy this medicine.

Because the official Weibo account of Renyi Group had advertised the medicine in advance, everyone already knew the effect of Comprehensively Nourishing Pills. It could be applied to both men and women. This medicine which was suitable for everyone was just what everyone needed.

Besides, with the former medicines like Trillium Root-Securing Pill, Life-prolonging Earth Pill, and Holy Flowers Formula, everyone believed in the medicines produced by Renyi Group and they believed more in the Desert Cistanche with special effect supplied by Fang Qiu.

Therefore, no one was worried or suspicious. They knew it would be worth it as long as they could buy it.

The way of presale was the same as before.

Everyone could purchase directly from the official website.

But this time the difference was that the number of Comprehensively Nourishing Pill was not that small. Before, the number of other medicines' presales was very small. But this time, the number was beyond everyone's expectations.

200,000 boxes!

There are a total of 200,000 boxes.

This was four times the number of the first presale of Holy Flowers Formula!

Seeing this number, the netizens were immediately excited.

"It's awesome this time. There are 200,000 boxes for presale?"

"This is the largest number that Renyi Group has prepared for presale."

"How great would it be if Holy Flowers Formula could also have such a good stock every time for presale?"

“Renyi Group, why don’t you be more benevolent? How about increasing the presale of Holy Flowers Formula to 200,000 boxes?”

“I hope that not only the number of the presale of Holy Flowers Formula, but also of all the new products of Renyi Group in the future can increase. 200,000 boxes are not enough. The number should exceed 200,000 boxes!”

When the presale began, the selling price of Comprehensively Nourishing Pill was announced. It was 1,500 yuan for a box.

This price was within everyone’s expectations. After all, the price of the medicines produced by Renyi Company had never been low. The most important thing was that these medicines were worth the price.

Everyone purchased on time!

This time, the time of the presale did not increase because of the large number of Comprehensively Nourishing Pill.

On the contrary, just like the previous medicines, 200,000 boxes of Comprehensively Nourishing Pill were all sold out in just 30 seconds.

In 30 seconds, the sales reached 300 million yuan!

This number had set another new record for Renyi Group.

Of course, there were still many people who failed in buying the medicine.

However, because they had read the introduction of Comprehensively Nourishing Pill in advance, they knew that this medicine had a similar effect with Trillium Root-Securing Pill and Life-prolonging Earth Pill. It was just a little better than those two medicines. Therefore, they were not that disappointed and turned to buy Trillium Root-securing Pill and Life-prolonging Earth Pill instead.

When people bought these medicines back, they could take them at any time and wouldn't waste them. More importantly, buying these medicines could also make contributions to Fang Qiu's Three Billion Plan.

According to the official account of Renyi Group on Weibo, it achieved a sale of 500 million yuan online alone in just one night.

When this figure came out, all the pharmaceutical companies in Huaxia were shocked!

This 500 million yuan was not achieved through a whole day, but only through a night. This could almost be compared to a "robbery".

Even in the pharmaceutical industry, there were still a lot of companies that owned assets less than 500 million yuan. Renyi Group's one night's sale was equivalent to a year's or even three to five years' net profit of a middle-level pharmaceutical company.

Having seen that Renyi Group had such a strong capability of making money, all the bosses of the pharmaceutical companies in Huaxia immediately thought of the text message that He Xue sent to them. Meanwhile, they had a higher expectation for the so-called "benefits" in the text message!

The next day, it was nine o'clock in the morning. In a small conference room in Shenghua Hotel, "creak", the door opened and He Xue, who dressed in a business suit and high heels, walked in.

"What's the situation now?" Asked Fang Qiu, who sat on a wooden chair in the room.

"Only thirty pharmaceutical companies' bosses came," He Xue said. She raised her eyebrows and continued, "The number is a little small. It seems that we Renyi Group's appeal is not enough."

"Thirty companies are enough," Fang Qiu said and nodded with understanding.

"What do you really want to do?" He Xue became more and more confused. She couldn't figure out what Fang Qiu's real intention was.

“You’ll know it later.” Fang Qiu smiled and then asked, “Is everything ready in the venue?”

“Yes,” He Xue nodded and said, “they are waiting for you.”

“Okay,” Fang Qiu nodded with satisfaction and said, “let’s stick to the plan. Let’s go.”

They walked out of the conference room and headed for the hall.

In the conference hall, bosses of thirty pharmaceutical companies from all over the country were sitting on the sofa and chatting with each other.

Fang Qiu and He Xue went backstage.

He Xue first walked out and said, “Good morning, all the bosses.”

Standing in front of these bosses from thirty pharmaceutical companies, He Xue said with a smile, “Thank you for coming to this meeting for Renyi Group. In fact, this meeting was not held by Renyi Group. We were entrusted by Fang Qiu, so we boldly invited you here.”

Hearing this, thirty bosses frowned immediately and they were very curious.

“Fang Qiu?”

“Was this meeting entrusted by Fang Qiu?”

“I really didn’t think about it. It seems that the only one Fang Qiu can entrust to is Renyi Group.”

In the confusion and curiosity of all the bosses, He Xue said, “Fang Qiu is already here. Next, he’ll be in charge of this meeting.”

Then He Xue went straight to the auditorium and sat on a sofa in the first row.

Meanwhile, Fang Qiu walked out with a smile, nodded to these bosses and walked onto the conference stage.

Fang Qiu said after he got on the stage, "First of all, I'd like to express thanks to the help of Renyi Group. Additionally, I'd like to thank all the bosses here for participating in this activity."

Hearing this, everyone laughed.

"An activity?"

"Is this a damn activity?"

"Yes, you didn't hear it wrong. This is an activity."

Fang Qiu seemed to see the doubts of the bosses and said, "I believe that you have heard of my Three Billion Plan, right?"

Thirty bosses nodded their heads.

This plan was known to all now. As the bosses of the pharmaceutical industry, how could they not know it?

"Your guesses are right. Today's activity is to make a donation!" Fang Qiu said.

As soon as he said that, all the bosses in the hall frowned immediately.

"Make a donation?"

“Damn it! Do you think of us as fools?”

“Didn’t you say that there would be benefits? It turned out that you’ve cheated us and wanted us to donate money? Where are the benefits you promised?”

“Does this mean that there are no benefits, and we need to give more?”

There were heated discussions.

It was no doubt that what Fang Qiu said had irritated these bosses. They were originally here to seek benefits. However, now they not only had no benefits, but also needed to donate?

Although they also intended to donate money, they felt very uncomfortable about Fang Qiu’s behavior. Now it was as if they were forced to do so.

At this moment, their original thoughts of donating money were totally gone.

“It seems that you have misunderstood what I have said.” Fang Qiu smiled a little after seeing the expressions of these bosses. He then continued, “But don’t worry. Please be patient and let me finish my speech. You can decide whether to donate or not then.”

Medical Master

Chapter 1017: I Have the Final Say on This Market!

“Don’t you just want us to make donations? Is there any misunderstanding?”

“Exactly! I’m meant to donate a little money, but now that thought is gone.”

“It is coercion!”

Rumbles of discontent floated through the meeting hall.

“Ladies and gentlemen, would you please quiet down and listen to me for a while?” Standing on the stage, Fang Qiu was composed and not in a hurry at all.

Only when hearing the remark did the 30 executives present lower their voice and gaze at Fang Qiu. They wanted to see how Fang Qiu would persuade them to donate money.

“Since you’ve all heard of my Three Billion Plan, I’ll do accounts with you now.” Smiling slightly, Fang Qiu said, “I’m going to recruit 60,000 doctors. They’re all going to leave for the countryside, where clinics are in the most demand. In other words, the 60,000 doctors I will recruit are not going to work in the countryside, but going to start clinics there. Therefore, 60,000 doctors represent 60,000 clinics!

“The clinic must be centered on a small town or a large village. And the influence scope of a small town covers from three to five villages, together with the town’s population, so the corresponding population of a clinic reaches at least 2,000 people. Of course, these are all small towns in impoverished areas with less population. However, 2,000 people are already the minimum number. More than 99% of the town’s population exceeds 2,000, but here I only take 2,000 to make a calculation.

“A clinic serves 2,000 people, so clinics in 60,000 towns can serve 120 million people. What does that mean?

“This is a market!” Fang Qiu concluded leisurely.

What Fang Qiu had said made the 30 executives’ eyes light up.

“That’s right!”

“Why didn’t we think of this?”

“Fang Qiu’s sponsoring target is the doctors, but the doctors need to collect fees when seeing patients and prescribing medicine, don’t they?”

For the 30 pharmaceutical companies' executives, this was a completely blank market!

In remote mountain areas, almost nobody in the countryside bought medicine. Even if they did, they just only bought some specific drugs like cold medicine. They didn't have many choices. However, in the wake of the development of clinics in the countryside, this market was bound to open. Once it opened, the performance of the 30 companies would definitely step up a level.

This opportunity was the most crucial undoubtedly!

This was a valuable opportunity to open the blank market.

After all, they couldn't open this blank market no matter how much money they spent or how many s they made.

He Xue's eyes couldn't help brightening off the stage as well.

To begin with, she had thought that Fang Qiu donated three billion dollars not only to subsidize the doctors but also to assist patients in the countryside in easing the heavy burden. But now, it sounded like that donation was not to be spent on the patients.

Fang Qiu would definitely do something to patients with his kind temperament.

Could it be...

He Xue seemed to have thought of something and the corners of her lips curled into a smile.

Fang Qiu went on talking on the stage. "This is my Three Billion Plan, and the 60,000 doctors are who I am to recruit, so everybody here should understand a fact, that is, I have the final say on what kind of medicine these 60,000 doctors will purchase or won't purchase!"

As soon as the words came out, the 30 executives were stunned at once.

Indeed, they all took a fancy to this blank market.

However, the only key to this blank market was Fang Qiu!

At this moment, the 30 pharmaceutical companies' executives finally worked out why He Xue mentioned benefits in the message.

It was true that opening the blank market was very conducive to them.

But could they work on their own without Fang Qiu?

No!

The investment was too fucking much, and there was absolutely no way to make up for it!

In the meantime, He Xue also finally figured out what Fang Qiu meant by drugs' new retail.

Judging from what Fang Qiu had just talked about, she could know Fang Qiu's next step was to directly monopolize the whole market. By then, he would be responsible for the purchasing and sales of all drugs.

"I didn't expect that you played your cards well." Marveling, He Xue was no longer anxious.

She knew that Fang Qiu had already mapped everything out, and there was no need for her to fret at all.

Yet pondering it over, He Xue found out that if Fang Qiu had kept his mind on the development of his own company, Renyi Group would have probably been in a better situation than it was now.

But alas, Fang Qiu seemed to have paid less attention to the development of the group. For him, It would be fine as long as the group could make a profit.

Although it was a pity that Fang Qiu's talents couldn't be utilized for enterprise development as much as possible, it was enough for the group under her management!

"It is not a threat, but a cooperation." Standing on the stage and looking at the 30 pharmaceutical companies' executives, Fang Qiu said very seriously and sincerely, "First of all, every company that is willing to participate must donate at least 50 million in this plan.

"Secondly, I require you to reduce the prices of all your medicines to be less than 70% of the market price!"

"As expected." He Xue smiled again. She had known that Fang Qiu would never fail to do something for people in the mountain area. Unfortunately, the three billion dollars would not be dispensed to them in that there was no alternative. After all, doctors were in short supply there. No matter how much money was distributed to mountain people, it would just be a futile effort in case of a lack of doctors. Plus, if they donated money directly, everyone would just get a couple of dollars when 90 billion dollars was divided by 120 million people.

That was why Fang Qiu chose to carry out Three Billion Plan.

Now, what Fang Qiu required these executives to do was to seek the welfare of mountain people!

"What?"

"Less than 70%?"

"It's not a big deal that you want donations, but yet you want us to cut the price of drugs?"

"No way!"

"This is too black-hearted."

A surge of rage ran through the 30 executives.

30% of the original price was equivalent to losing 70% of the profits for them. How could they bear it?

“The donation is advantageous to everyone.” Fang Qiu looked very calm when confronted with the 30 executives’ fury as if he had already foreseen it. He explained, “It will be quite beneficial for your company’s reputation if you donate at this time.

“In addition, as for the price of the medicine—I will get goods directly from manufacturers, which means that there will be no middlemen, medical representatives, doctors, hospitals, and so on. Even though the price has been reduced by 70%, you will earn at least twice as much as before!”

The words were no sooner out of his mouth than the 30 executives fell into silence.

They did earn more than usual in compliance with Fang Qiu’s requirements.

However, they couldn’t quite fathom how Fang Qiu knew what they would encounter these problems in the process of selling medicines.

Everyone went silent.

Fang Qiu blurted without hesitation. “There is one option open to you now. If you want to work with us, we can go further on this topic. If not, you can leave at any time. You can take an entire day to think about it. If the answer is affirmative, please contact us Renyi Company!”

Fang Qiu smiled and added, “Lastly, thank you again for participating in this donation. Have a nice day.”

The moment Fang Qiu finished his words, he stepped off the stage and returned to the lounge.

Then in the meeting hall, all the 30 executives were frowning.

They had something against the attitude of Fang Qiu.

However, just as Fang Qiu pointed out, it was indeed a very large market.

As a large market was exactly what these people desired, they all sank into hesitation without uttering a word.

For a pharmaceutical company like theirs, 50 million dollars was not a large sum of money.

However, any well-run pharmaceutical company would like to compete in this market whose profits are worth billions of dollars!

These executives were quite aware that even if the drugs are priced at 30% of the market price, they would still make profits 3 times more than usual. Even if they would only share 30% of the whole profit, that would still be three billion dollars!

Every executive present would be able to bring home 100 million dollars of net profit every year!

That was quite a fortune.

As they thought of this, the 30 executives looked at each other, but none of them intended to leave.

No sooner had Fang Qiu returned to the lounge, He Xue followed.

"I didn't expect you to be so awesome." Looking at Fang Qiu, He Xue sighed with admiration.

"I have no choice." Fang Qiu's lip curled in a wry smile. "I was driven to corners."

He Xue took a seat beside Fang Qiu and said remarkably in earnest, "I see your mind at last. Despite that this market is not large, it is by no means a small market. Given that you don't have much to offer in Three Billion Plan, have you made up your mind to donate all those remaining 70% profits?"

"No," Fang Qiu shook his head and said, "I'll take 20%. 30% will go into the pockets of those doctors who serve in the countryside. The remaining 20% will be donated to the villagers."

"You're afraid?" He Xue asked, smiling.

"Of course I am." Fang Qiu forced a smile. "If I donate all the 70% profits to the villagers, the price of the medicine will fluctuate violently, disturbing the whole pharmaceutical market. What's more, some scalpers will easily trash the whole market when they get enrolled. Therefore, I figure, 70% is too much, 20% will be the limit."

"Huh." He Xue chuckled. "I pictured you as a saint in my mind. It turned out you take kickbacks as well."

Fang Qiu's smiled even more humorlessly.

For him, this project would take numerous people to operate, and even need to start a brand new company. He not only needed to employ workers, but also had to pay them wages, plus company operations, etc. All of these were a large expenditure, which he had to draw from 70% of the profits.

"I don't take money." With a wry smile, Fang Qiu spread out his hands and said, "This is multi-party profit. Not only can it create jobs, but it can also help pharmaceutical merchants earn higher profits. Doctors can obtain high profits. Meanwhile, patients will spend less money buying medicine as well."

"Genius!" Smiling, He Xue gave Fang Qiu a thumbs-up and sighed with praise, saying, "I'm also wondering how many people are ready to participate in the end."

"I'm also very curious, let alone you." Fang Qiu nodded in response. "Okay. Let's wait and see tomorrow."

"I don't think we need to wait until tomorrow." He Xue smiled.

"Is that so?" Fang Qiu also smiled.

“Beep...” At the right moment, He Xue’s phone rang.

“Is that coming?” Asked Fang Qiu.

“Yep.” Nodding her head, He Xue picked up the call. It was one of the 30 pharmaceutical companies’ executives sitting outside in the meeting hall.

Medical Master

Chapter 1018: You Dont Need to Take out a Penny!

As soon as the person called, the cooperation matter was directly finalized without further discussion.

He Xue then hung up the phone.

Her phone rang again before she could report to Fang Qiu.

She took one call after another. They all called to seek cooperation.

After answering three calls in front of Fang Qiu, He Xue curled her lips speechlessly when she saw the fourth call and said, “It seems that I’d better go back to the venue directly. Why should we talk on the phone since they’re right next door?”

After saying that, she went straight out of the room and returned to the venue.

Returning to the venue, He Xue swept across the whole place and noticed that not a single one of the thirty pharmaceutical companies’ executives had left.

He Xue smiled when she saw this.

The scene in front of them represented that all the thirty companies decided to cooperate, and no one withdrew from it!

He Xue went on stage and negotiated with the executives of the 30 companies. In the end, everyone chose to cooperate with them, and no one was willing to leave.

Moreover, the most important thing was that when these people confirmed that they would cooperate, there was a strong sense of competition among them.

While they competed with each other, all the 30 executives actually transferred 50 million they had to donate to the bank card that Fang Qiu specially prepared for the Three Billion Plan this time.

Each of the companies donated 50 million!

In just half an hour, Fang Qiu got 1.5 billion!

With the 100 million donated by He Xue before, 100 million donated by Yang Ningyuan and Li Qihua respectively, and 200 million donated by Renyi Group, there was a total of 2 billion!

That was to say, Fang Qiu only needed to take out one billion in the first year.

“Thank you, everyone.”

After receiving the donation, Fang Qiu immediately expressed her gratitude to the 30 executives and said, “I’ll mention your companies on Weibo to thank you. It can be regarded as an for you. I believe that this is of value.”

The 30 executives all laughed.

That was what they wanted.

They were well aware of Fang Qiu's influence on Weibo. One on his Weibo was definitely worth 50 million or more.

Although their medicine was not as effective as those of the Renyi Group, the medicine they produced was also must-have medicine for some common diseases. If Fang Qiu's was released, it might promote their sales.

Although they were a little annoyed by Fang Qiu's attitude at first, now when they thought about it, they felt that it was really worth it to come here this time!

(If you have problems with this website, please continue reading your novel on our new website myTHANKS!)

Everything was done.

Fang Qiu left the Shenghua Hotel directly and left the rest to He Xue.

The 30 executives also left one by one.

On the way back to the cultivation base, Fang Qiu directly logged into Weibo with his cell phone and sent a post to express his gratitude to the 30 companies.

"#Three Billion Plan# To support Three Billion Plan, each one of the 30 companies below donates 50 million yuan to participate in the project. Thank you for your help and donations."

Fang Qiu attached a picture to this post, which clearly listed the names of the 30 companies.

Undoubtedly, it immediately attracted the attention of countless people as soon as he sent this post.

This news caused an uproar among the netizens!

“What the fuck. 30 companies?”

“Master Fang is awesome.”

“He found sponsors so quickly and even got so many companies to sponsor it at a time?”

“Each one donated 50 million. That’s 1.5 billion!”

“Great! These 30 companies with a clear conscience are doing good for the people, and we will definitely keep that in mind.”

“The companies that are willing to donate are all good-hearted companies. They are all good pharmaceutical companies!”

“I think that when we need to buy medicine in the future, we should consider the medicine of these 30 pharmaceutical companies first.”

Netizens all praised them.

The passion shown by the netizens towards these 30 pharmaceutical companies was completely beyond the expectations of the executives of these companies.

Meanwhile, the leaders of the other pharmaceutical companies, who had received the invitation but did not participate in the event, were all dumbfounded.

“What does this mean?”

“Holy shit. Weren’t they invited by the Renyi Group? Why did they donate money after they went?”

“Each company donated 50 million. Did the Renyi Group drag them down with it?”

“Haha, I knew nothing good would happen. Fortunately, I didn’t go!”

While many of them were excited, some pharmaceutical companies’ executives thought of another thing.

“That’s not right. Leaders of these 30 pharmaceutical companies are not fools. It’s impossible for them to donate money so readily. Even if some companies really wanted to donate, it won’t be 30 of them donating together.”

“Did something happen at the meeting?”

“The text says there would be some benefits. Are there really benefits? Otherwise, how could those companies donate together willingly?”

As they thought of this, leaders of these pharmaceutical companies that did not attend the meeting all sent people to inquire about the actual situation of the meeting that day.

However, as they found out the truth, the leaders of these pharmaceutical companies were all dumbfounded!

“What? They signed a contract?”

“What contract did they sign?”

“What medicine procurement contract?”

“It’s the procurement contract of all the drugs that 60,000 doctors Fang Qiu has summoned need to use in three years. These 60,000 doctors need to open a clinic in the countryside. All the drugs that every clinic needs to use should be purchased from these 30 companies.”

Hearing the subordinate’s report, the leaders of these pharmaceutical companies were stunned!

As they thought about it carefully, they could clearly imagine how much profit it was related to.

There were 60,000 clinics in 60,000 towns!

This market was huge!

Undoubtedly, after learning the news, the leaders of these pharmaceutical companies, who hadn't attended the event, regretted it deeply!

Even if they had to donate 100 million, they would be willing to do it, not to mention 50 million.

Given that the pharmaceutical industry was so competitive and Renyi Group developed so many new products, it was really difficult for these pharmaceutical companies to survive.

It was not easy to find such a market, but now they had missed it.

This made them feel distressed.

But that was not the most important thing.

The most important thing was that the stock prices of the 30 pharmaceutical companies all soared in the afternoon while Fang Qiu only sent the post on Weibo at noon!

Although they didn't reach the raising limit, the stock prices of the 30 companies did skyrocket.

Seeing the dramatic rise in the stock prices, the leaders of these 30 pharmaceutical companies were ecstatic.

Putting everything aside, they knew that they had earned the 50 million they donated back from the rising market value when looking at the soaring stock prices. This was simply an unexpected surprise for them.

The stock prices of all the 30 pharmaceutical companies that made the donation all soared.

This never happened in the domestic pharmaceutical industry.

Those leaders of the pharmaceutical companies who didn't attend the meeting all regretted it profoundly. They all thought that if they had gone at that time and donated, the market value of their companies would definitely rise, and the stock prices would certainly soar!

Unfortunately, even if they wanted to make a donation now, it was already too late.

They truly lost a great deal!

In the evening, after settling the cooperation matters with the 30 companies, He Xue returned to the cultivation base with exhaustion.

"You're back." Seeing He Xue, Fang Qiu said with a smile.

"I'm about to die of exhaustion. Do you know what you are doing? You're simply giving an order. And as your subordinate, I need to work my ass off," complained He Xue.

"Thank you." Fang Qiu immediately got up and thanked her. "Thank you very much."

"All right. All right." He Xue pouted her lips. "There's nothing you can do about it. I'm a workaholic after all."

"Well, can you do me another favor then?" Fang Qiu chuckled and said, "I need to set up a company. You can help me recruit some people, and it's better if they are trustworthy."

“Okay.” He Xue rolled her eyes at Fang Qiu, sighed softly, and said, “It won’t be a problem to recruit people.”

“By the way,” Fang Qiu seemed to think of something and said, “leave one of the executive positions for me. I have a candidate.”

“Oh?” He Xue asked curiously when she heard that, “You have a candidate? Who is it?”

“His name is Wei Dong,” Fang Qiu said, “He’s a poor man and a great philanthropist. The first time I knew him, he was in the hospital. At that time, he suffered from so many diseases and was seriously ill. I treated him. He was a man who was released from prison. In the past, because he was young and immature, he was put in prison. After coming out of prison, he has been doing good deeds all the time. In order to make up for the mistake he made that year, he has been doing charity all these years and donated all the money he tried so hard to earn. He is not even willing to spend money to cure his serious illness. He’s a good man!”

“It does sound like he’s a good person.” He Xue nodded in agreement.

“Over the years, he has done a lot of things for me, including sending books to the children in mountainous areas, showing care and sending rice to the poor people in the slum area, and so on. He’s really conscientious.”

Speaking of this, Fang Qiu added, “I ordered 6 million books for the children in the mountain area before. I asked him to help me deliver them. He has been to many villages, and now he knows the situation there best. With him joining us, we can certainly get twice the result with half the effort!”

“Okay.” Nodding her head, He Xue replied, “I’ll leave the executive position for him.”

He Xue started to calculate something silently after saying that.

“Eh?” After the calculation, He Xue said, “I found that you didn’t lose anything in the first year of doing this project, and you only need to take out 4 billion in three years. It’s not 9 billion at all! What’s more, it isn’t necessary for you to take out 4 billion. You may not even pay a penny in the end.”

“How did you do the math?” asked Fang Qiu with a smile.

“If the profit of the countryside market is 10 billion. Let’s make a rough division. The pharmaceutical companies will get 3 billion. Doctors get 3 billion. And we give up part of the profits for patients, which is 2 billion. You can still earn 2 billion. If you take out 1 billion from it as the company’s annual expenses, you still have 1 billion left.”

“Don’t you make up for 1 billion you need to pay in the first year in this way?” He Xue smiled as she was calculating.

“In the second year, you will earn 2 billion. In the third year, you still earn 2 billion. If we deduct 1 billion from it a year, you still have 1 billion left. Originally, you need to pay 6 billion in two years. After deducting the 2 billion you earned in the next two years, you only need to pay 4 billion yourself, don’t you?”

“And you don’t necessarily have to pay 4 billion. If you integrate all the pharmaceutical markets of all the villages and towns, you can still make money, and it’s not a small amount. After all, the price of your medicine is lower than that of theirs. I believe that all the clinics in the current villages and towns will buy medicine from you. This market is very easy to integrate. If you don’t dominate this market, it might be easy for the 60,000 people to take over it!”

“In this way, you don’t even take out a penny!”

“Moreover, if you set up a charity fund now and call on everyone to donate to the Three Billion Plan, you will end up receiving more benefits and a good reputation!”

Speaking of this, He Xue stopped and stared at Fang Qiu.

Hearing He Xue’s analysis, Fang Qiu smiled.

Actually, this was his whole scheme except for the charity fund.

However, he didn’t calculate his gains and losses from the very beginning. He merely wanted to do this.

“That’s really what you think!” He Xue’s eyes lit up as she smiled. “You’ve fooled everyone.”

Fang Qiu shook his head. “I didn’t expect all the plans to work out at first. I was really going to take out 9 billion to do it.”

He Xue was stunned.

She didn’t expect that he was truly going to take out the money.

However, Fang Qiu said with a faint smile, “Why should I keep so much money?”

As soon as he said that, He Xue was at a loss for words.

In her opinion, this guy was indeed too rich, but he was a spendthrift. No matter what he did, he never considered it from the business perspective at all.

Medical Master

Chapter 1019: Poaching People to Found a New Company!

“What are you going to do next?” asked He Xue.

“Nothing.” Fang Qiu shrugged, spread his hands, and said, “Although this project is officially launched and we have got all the funds we need, the backbone of the whole thing has not come yet. Now we have to see the situation of the registration of the major universities.”

“The scrutiny will be a very tough problem,” said He Xue.

“Indeed.” Fang Qiu nodded and said, “The university’s scrutiny is not enough to make me trust these doctors. What I need are general practitioners with good conduct, medical skills, and character.”

Otherwise, there will be a lot of problems if a person who doesn't possess these qualities goes there. I can't even accept those who don't even know how to respect people."

"I can't help you with this." He Xue hurriedly tried to get rid of it and said, "Although as long as people sign up, we will definitely be able to find out all the information about them, it will be too troublesome to scrutinize them because there are too many people. I still have something to do in the company, so I don't have time to help you do it."

Fang Qiu chuckled and said, "You can do it. I don't need you to do it personally. You just need to gather all the employees of the company in three days. You can't do it, but it doesn't mean that they can't do it."

"Three days?" He Xue paused, then said, "That shouldn't be a problem as long as you're not too picky."

"As long as they meet my requirements, it's fine. I'm not picky at all," said Fang Qiu with a smile.

"All right, I see." Letting out a soft sigh, He Xue took out her laptop and immediately began to browse through the information on the popular recruitment websites on the Internet. She also released the recruitment requirements on the major recruitment websites in the first place.

Because Fang Qiu's new company didn't have high qualifications for employees, it was more convenient for her to recruit workers.

Fang Qiu also began to surf the Internet and followed the registration of the major universities' graduates.

After the University of Jiangjing Chinese Medicine came to an agreement with the major medical universities, the medical universities across the country began to prepare for the registration.

However, this time, the registration was not as simple as recording people's names.

The school needed to check the records of all the graduates who wanted to sign up to see if there was any stain on them and if their academic performance was qualified when they were at school and so on. All the students needed to be checked no matter when they graduated.

The reason why the major medical universities also set up a special group in a department was to review all the applicants' records. They selected the qualified applicants first so that it would be more convenient for Fang Qiu to continue screening.

Although this was a heavy workload for all the medical universities, it was also a competition between the universities.

After all, the selection this time was based on students' quality!

"The better the quality of students was, the more students in a school will be chosen."

Although this competition sounded a bit childish, for the major medical universities, it was not childish at all because it represented the reputation of the university.

If more students in a school got selected, it meant that the school educated them well.

Even in the future, these universities could also use similar slogans to attract college applicants to apply for their schools.

During these three days, the registration, scrutiny, and screening of major medical universities all over the country were in full swing.

Although Fang Qiu didn't set a time limit, Chen Yinsheng had already said that the time limit was three days when he contacted people in the major universities.

(If you have problems with this website, please continue reading your novel on our new website myTHANKS!)

As the Vice President of the University of Jiangjing Chinese Medicine, Chen Yinsheng looked at the college students graduating and leaving school generation after generation. He was fully aware that there would definitely be a great number of people signing up for Fang Qiu's plan.

If he gave too much time and too many people signed up, it would be very troublesome to review all of them. Hence he set a time limit of three days for Fang Qiu without asking him.

Three days passed.

As soon as the deadline arrived, Chen Yinsheng received data handed in by major medical universities all over the country.

He made a calculation.

As Chen Yinsheng expected, in only three days, more than 70,000 people from all over the country had signed up, and this was the result after the universities took the initiative to screen the applicants.

Among them, there were also numerous UJCM students signing up for it.

After receiving all the data, Chen Yinsheng immediately called Fang Qiu.

"Beep, beep, beep..." In the office of the cultivation base, Fang Qiu was investigating the situation in the poor mountainous areas on the Internet when his cell phone rang.

"Hello, Mr. Chen." Seeing that it was Chen Yinsheng, Fang Qiu immediately answered the phone.

Chen Yinsheng said, "Fang Qiu, the registration is done. I've received the registration data from all the major medical universities in the country. There are more than 70,000 people signing up in total. Shall I send this data directly to you or wait for you to return to school?"

"I'll send you my email. Please send it to my email," said Fang Qiu.

“Okay,” Chen Yinsheng nodded and said, “I’ll send it to you now.”

“Thank you, Vice President Chen.” Fang Qiu expressed his gratitude.

“I simply did it for Chinese Medicine.” Chen Yinsheng smiled and hung up the phone.

Soon, Chen Yinsheng sent the registration data to Fang Qiu’s e-mail.

Fang Qiu checked his e-mail in the office and took a look. Without hesitation, he immediately took out a flash drive and copied the information onto it.

Under Fang Qiu’s request, He Xue finished arranging the matters of the new company for Fang Qiu. Over the past three days, she recruited lots of people for every department of the company, which filled the entire company.

However, He Xue seemed to have changed her mind.

Originally, according to Fang Qiu’s moderate requirements, she only needed one day to recruit all the employees needed for a new company.

Perhaps she felt that it wasn’t challenging at all, or perhaps she had other plans.

He Xue increased recruitment requirements for ordinary employees online. Meanwhile, she even hired a headhunting company to get all the talents needed for the new company’s important positions within three days.

In this world, as long as she had money, she could manage to do whatever she wanted to do.

Anyway, Fang Qiu was the one who paid for everything in this new company. He Xue was not afraid of wasting money, so she directly paid a huge amount of money to pull it off.

However, as she did that, she did make quite a stir.

After receiving He Xue's requirements about the employees, those headhunting companies actually aimed at all the pharmaceutical companies except for the 30 pharmaceutical companies.

People of the headhunting companies were also fully aware that they couldn't do anything to the people of those 30 pharmaceutical companies.

After all, a large part of the funds of this new company came from the 30 pharmaceutical companies.

Since they couldn't get the employees of these 30 pharmaceutical companies, the talents from other pharmaceutical companies naturally became their targets.

They started to poach talents from different pharmaceutical companies.

The headhunting companies didn't show any mercy when it came to poaching talents.

They didn't hesitate to poach people once they thought the talents were qualified!

Three days later, under the temptation of the high salary and long-term professional development, the talents in these pharmaceutical companies were all poached successfully.

Leaders of these pharmaceutical companies where their people got poached were all stunned.

These people were doing a fine job in their companies, and they never treated these talents badly. How could these people just leave like that?

At first, there was one employee in the company that got poached, then two, then three.

When too many people left their companies, leaders of these pharmaceutical companies also noticed that something was wrong.

After some investigation, they found that a company asked headhunters to poach their talents under the name of Renyi Group.

As they did a further investigation, the company under the name of the Renyi Group turned out to be the executive company of Fang Qiu's Three Billion Plan.

Knowing this news, leaders of these pharmaceutical companies were all dumbfounded.

However, there was nothing they could do about it. After all, if the treatment of their companies was good enough, they couldn't be poached.

While these companies could do nothing to Renyi Group and Fang Qiu, the whole industry was filled with complaints!

As for people of the 30 pharmaceutical companies that had made donations, they were all beaming with joy when they heard the news.

Fang Qiu's conduct seemed to be helping them suppress their peers.

Of course, this was not Fang Qiu's intention.

With the people recruited from major pharmaceutical companies, the company that Fang Qiu needed was quickly established. The person in charge of the registration of this company was He Xue, and the company was indeed in Renyi Group's name.

There were two reasons why He Xue did this. Firstly, she knew that Fang Qiu was lazy and didn't like to manage a company. Secondly, she also wanted to protect Fang Qiu's reputation.

After all, if the company was in Fang Qiu's name, he would probably be accused by those pharmaceutical companies because of poaching their employees!

Poaching other companies' talents didn't sound nice after all.

After the establishment was completed, the company was set up in the capital.

Of course, it was not in a fancy office building. She simply rented a place for people to work.

At this moment, all the employees that He Xue helped recruit already started working.

Although she didn't want to interfere with this company's affairs, He Xue couldn't bear to see these people simply sit there and do nothing after she asked them to come to work. She directly gave them a task, asking them to familiarize themselves with a poor village every day.

However, Fang Qiu already came before they got to know the first town.

He handed the flash drive containing the information to He Xue. She then separated the data and sent them to each team of the newly established company to select suitable applicants. In the end, 60,000 people who met the requirements the most were selected.

Meanwhile, Fang Qiu also called Wei Dong.

After giving out the 6 million books last time, Wei Dong took the rest of the money to run around the poor mountainous areas of the country to assist the children who needed help under Fang Qiu's request.

"I arrived." As soon as the phone was connected, Wei Dong's voice was heard.

Three days ago, Fang Qiu had called him but didn't explain the reason. Fang Qiu merely asked him to go back to the capital.

Soon, Fang Qiu saw Wei Dong at the appointed place.

He was still the same. Even if Fang Qiu gave him a lot of money, he didn't spend it on himself.

In a noodle restaurant, while eating noodles with Wei Dong, Fang Qiu told Wei Dong about his plan and asked him to take charge of the company and make sure that the money he donated could be used in the right place.

"I, I really can't do that." Hearing that Fang Qiu was going to hand over such a great responsibility to him, Wei Dong shook his head repeatedly and said, "I don't know anything. I really can't do this!"

"It's enough if you have the heart to do it well."

Fang Qiu smiled and said, "Don't worry. There are still many professionals in the company who will help you. You only need to do what you are good at."

"Well, all right." Thinking that he would be able to help those poor patients in the countryside, Wei Dong finally agreed.

Medical Master

Chapter 1020: A Highly-skilled Doctor Who Excels in Both Chinese Medicine and Western Medicine!

After the discussion, Fang Qiu took Wei Dong to the new company and introduced him to all the employees.

At first, everyone was not very friendly to this outside executive.

After all, Wei Dong was not that kind of person who looked like an urban elite at first sight. Instead, he looked a little rustic. Even if he wore a suit, he wasn't like the person who came from a city.

Especially when knowing that Wei Dong was just a countryman and worked as a coolie for years, these talents recruited by He Xue from famous pharmaceutical companies were even more dissatisfied.

But when Fang Qiu brought Wei Dong here and introduced all his deeds in recent years, all the employees in the company were shocked.

What shocked them was not that Wei Dong suddenly became a good person, nor that this person could have great perseverance to do charity work, but was his determination!

Just think about it, a poor person got hundreds of thousands or even millions of RMB, but he was not tempted at all. He could still stick to his original intention and spend every penny on charity. What a good quality!

The employees in the company were all recruited from other companies. These people knew very well how rare this quality was in the business field.

If other people had such a large sum of money at their disposal and no one would calculate or investigate the money, they were highly to pocket the money!

Having heard what Wei Dong had done in recent years, the employees in the company gradually accepted him.

After helping Wei Dong get familiar with the company, Fang Qiu went straight back to Beijing.

That night, due to the efforts of the employees in the new company, more than 70,000 people who applied for Three Billion Plan were finally reviewed completely.

In the office of the cultivation base, Fang Qiu sat at his desk, listening to He Xue's finger tapping on the laptop next to him, and lost in thought.

"Beep, beep, beep..."

Suddenly, He Xue's phone rang.

"Hello?" He Xue stopped what she was doing and picked up the phone immediately.

A moment later, "Okay, I see." Hearing the report from the other side of the phone, He Xue nodded with understanding and then looked at Fang Qiu who was still pondering.

"You've got the review results?" Sensing He Xue's eyes on him, Fang Qiu asked.

"Yes." He Xue nodded and said, "According to the review criteria, among more than 70,000 applicants, there were 63718 physicians who have met the requirements."

"More than 10,000 people have been eliminated?" Fang Qiu was stunned. He did not feel relaxed because of the completion of the review. Instead, he became more nervous than before.

"This elimination rate is normal." He Xue nodded and said. Then she asked, "Shall we pick 60,000 physicians among these people and send the notice that they have successfully joined the plan?"

"No!" Fang Qiu immediately shook his head and said, "Not yet. These physicians must meet my requirements."

"Do you want to have another review?" He Xue asked.

(If you have problems with this website, please continue reading your novel on our new website myTHANKS!)

These more than 60,000 people had already been reviewed once according to the criteria. It would waste a lot of time to review again.

"Yes." Fang Qiu nodded with certainty and said, "Although these more than 60,000 people have met the written requirements, this is just the first step. What I need are 60,000 physicians who can cure diseases, not those who want to goof off. In order to ensure that these 60,000 physicians are competent, I must review them again."

"If we want to know everyone's exact medical skills, it is impossible for us to carry out such a detailed review just based on the information we have by now!" He Xue shook her head and then asked, "How do you want to review?"

"By tests," Fang Qiu smiled and said, "Just like a school tests the learning results of its students, let's prepare an exam for these physicians. This is responsible for everyone's donations, for patients, and for Three Billion Plan!"

He Xue nodded and said, "It's not impossible, but this is not some ordinary test-maker can do. Especially this is a test of medical skills."

She did think that Fang Qiu's method was feasible.

After all, this was a plan related to the health of a lot of people!

"Matters concerning Chinese medicine don't need to bother you. I'll do it myself." Fang Qiu stood up with a smile and walked out of the office.

He Xue shrugged and continued to work.

Fang Qiu left the cultivation base and went straight back to Jiangjing.

"Mr. Xu, are you in the library?" As soon as he went back to school, Fang Qiu called Xu Miaolin.

As to the test for these 60,000 physicians, the school and Xu Miaolin were the only things that came into Fang Qiu's mind.

Of course, the test in school was not enough for these physicians. Because they all had obtained physician qualifications, common questions were not enough to test their real medical ability.

Therefore, Fang Qiu thought of Xu Miaolin.

With Xu Miaolin's proficiency, it should not be difficult for him to create a test paper.

"I'm at home." Xu Miaolin's voice came from the other side of the phone. "What's the matter?"

"I am going to visit you now and we can talk in detail when I'm there," Fang Qiu replied.

"Okay," Xu Miaolin answered.

Soon, Fang Qiu arrived at Xu Miaolin's house.

"What brings you back?" Seeing Fang Qiu, Xu Miaolin asked in surprise, "Aren't you busy with your Three Billion Plan?"

"I specially came back to visit you," said Fang Qiu with a grin.

"To visit me?" Xu Miaolin looked at Fang Qiu suspiciously and said, "You can just cut to the point."

"Okay. I won't stand on ceremony." Fang Qiu grinned and said, "I need you to create a test paper for me."

"For what?" Xu Miaolin was stunned and asked.

"Here's the thing." Fang Qiu replied, "More than 60,000 physicians have been selected for Three Billion Plan, but the reason why these people have been chosen is that they have seemingly good resumes. But what I really need are physicians who can really cure diseases and save lives. So I want to hold an exam to test the real ability of these physicians and keep the qualified ones."

"That sounds good, but I am not able to do it," Xu Miaolin nodded but then shook his head and said.

"Hmm?" Fang Qiu was stunned.

“Although I’m proficient in all fields of Chinese medicine, I’m only limited to Chinese medicine. I don’t know much about Western medicine. The physicians you recruited this time will not only prescribe Chinese medicine and Chinese patent medicine but also Western medicine. These students have also studied both Chinese medicine and Western medicine. It’s rather unfair to test them with only Chinese medicine questions,” Xu Miaolin said.

“I’ve thought about that as well.” Fang Qiu nodded with understanding and said, “What I mean is to ask you to create a test paper, and then go to the affiliated hospital to find a highly-skilled doctor of Western medicine to help create another test paper. We will test Chinese medicine and Western medicine separately.”

“That’s too cumbersome.” Xu Miaolin shook his head and said, “I do have a person here. If you go to him, all these problems can be solved.”

“Who is it?” Fang Qiu got a little excited and asked.

“Xu Fei!” Xu Miaolin smiled and said, “He is very rare. He is a highly-skilled doctor who has combined Chinese medicine and Western medicine excellently. He has made great achievements in both Chinese medicine and Western medicine. Because he studied both, he seemed to have a deep hatred for Chinese medicine and Western medicine. When he meets someone who likes Western medicine, he thinks that this person looks down on Chinese medicine. But when he meets someone who likes Chinese medicine, he thinks that this person looks down on Western medicine. He...is very conflicted.”

“There is such a highly-skilled doctor?” Fang Qiu asked curiously.

He thought that only real Chinese medicine doctors could have the title of “Highly-skilled Doctor”. He didn’t expect that there were also doctors who excelled in both Chinese medicine and Western medicine.

Hearing Xu Miaolin’s words, Fang Qiu was also curious about Xu Fei.

“You’ll know when you see him.” Xu Miaolin smiled and said, “I’ll send his address to your phone. I’ll call him in advance. As for whether he’ll help you with the test or not, it depends on your performance.”

“Okay.” Fang Qiu nodded.

Soon, Xu Miaolin sent him the address. After saying goodbye to Xu Miaolin, Fang Qiu left hurriedly.

After reading the text message, Fang Qiu learned that Xu Fei was living in a not well-known second-tier city in Jiangjing Province, which was only an hour’s drive from Jiangjing.

Over an hour later, Fang Qiu came to a clinic.

This clinic was very special. It was different from other clinics. There was only a word on its plaque, saying “clinic”.

The clinic was not big, but it was divided into two different areas.

One was the Western medicine area equipped with scientific and technological instruments, and the other was the Chinese medicine area mainly about herbs and acupuncture.

It was strange that there were no patients in the clinic at the moment. There was only a middle-aged man lying on a rocking chair.

“Excuse me, are you Master Xu Fei?” Fang Qiu walked into the clinic and asked.

“Fang Qiu?” The middle-aged man on the rocking chair opened his eyes, glanced at Fang Qiu and asked, “I’ve read your books. They’re quite good.”

“Thank you.” Fang Qiu expressed his gratitude.

“I’ve already known why you’re here,” Xu Fei glanced at Fang Qiu and said, “but answer my question first.”

"Please." Fang Qiu nodded.

"Aren't you a Chinese medicine doctor?" Xu Fei stood up from the rocking chair, smiled, looked at Fang Qiu and asked, "Don't you distrust in Western medicine?"

"No!" Fang Qiu shook his head and said calmly, "I am a Chinese medicine doctor, but I also believe in Western medicine. They are just different treatment methods. But their ultimate goals are the same."

"In my opinion, both Chinese medicine and Western medicine have their own advantages. It matters that they can cure patients."

"I respect Chinese medicine because it has really discovered the operating law of life energy inside the human body. Moreover, modern Chinese medicine should not be in such a position where people despise and distrust!"

Hearing Fang Qiu's words, Xu Fei was a little shocked. He took a closer look at Fang Qiu and said, "I've heard a lot about you. What you said is right. In my opinion, you are indeed a good doctor."

"So, Master Xu, for the sake of thousands of patients, are you willing to create the test paper?" Fang Qiu asked with a smile.

"Sure I can create a test paper." Xu Fei did not hesitate and immediately nodded and said, "However, before that, I need you to do me a favor. I have studied Chinese medicine for so many years and I have never tried Insight."

"So, I want you to help me with Insight!"

"No problem." Fang Qiu nodded at once and said, "We can start now."

Then Xu Fei sat cross-legged, and Fang Qiu helped him with Insight.

Soon, Xu Fei successfully completed Insight.

As a highly-skilled doctor, Xu Fei was deeply shocked by the magical feeling of Insight!
