

The Mightiest Little Peasant Chapter 2880

“This star Devourer beast is extremely old. There must be a rare treasure in its body. The chances of it producing immortal materials are very high!”

“If there are immortal materials, our great moon clan must get them, we can’t let Wu clan have them!”

On the Yue clan’s warship, there were many figures standing. Each of them was emitting a sun-like glow, and they were all at the ninth tribulation.

They looked into the depths of the Forbidden Zone and then looked up at the Wu clan’s warship in the distance.

Their gazes were filled with intense hostility.

Then, they continued to look at the other small forces.

These forces were the same as them, they were here for the immortal materials, their ancestors had to be here personally.

If an immortal material really appeared, there would be a shocking battle.

“Hurry up!”

An elder of the Yue clan looked into the depths of the Forbidden Zone and murmured, his expression a little anxious.

Because of the existence of the spiritual void realm, the news spread very fast. At this moment, all the forces in the celestial realm had learned about it and were all on their way. They had also arrived early because they were close and had some advantage in position.

If this dragged on, there would be more and more people.

At that time, the situation would be even more complicated.

It would be even worse if the forces of the nine magnates came.

“These auras are ...? Buzzzzzz! This is going to be interesting!”

Tang Hao was lying on a chair with his eyes half-closed, sensing the auras of the cultivators around him. Suddenly, he noticed a faint aura coming from the inside of one of the giant warships.

All of them were at the peak!

He mumbled in his heart and smiled playfully.

He really didn't expect that so many peak old monsters would come this time.

One had to know that these old monsters were very rare. There were probably only a hundred or so in the entire origin immortal domain, no more than two hundred.

But thinking about it, these old monsters had a very strong desire for immortal materials. Only with enough immortal materials could they advance further.

As long as there was the slightest possibility of immortal materials being produced, these old monsters would not let it go.

"Squeeze harder!"

He pondered for a moment and decided to play the role of a dandy.

If there really was an immortal material among the six peak old monsters, it wouldn't be easy for him to snatch it. He might as well play the role of a popinjay to numb these people, so it would be easier for him to snatch the treasure.

He didn't have a single immortal material, so he naturally wouldn't give it to anyone.

"Yes, young master!"

"Young master, is this comfortable?"

Ji Qiuci said.

"Right! This is the force!" Tang Hao said.

"You beast!"

Many people were still paying attention to this side. When they saw this scene, their eyes turned red again.

"He seems to have completely fallen asleep!"

After waiting for about half a day, someone in the front row whispered.

In an instant, everyone was excited.

Some people couldn't wait and wanted to rush in, but they were all stopped.

"Let's wait a little longer. If there's still no movement after four hours, then he's really asleep. We can only go in then. Otherwise, if we wake him up, no one can go in." Someone in the front row shouted in a deep voice.

"Wait, everyone, hide your aura. Don't let it leak out. Also, when you enter, your movements must be light and you must not fight. You Must Remember This."

That person also warned.

After waiting for about four hours, everyone looked again. The giant beast still didn't move, and they were relieved.

Everyone kept their ships and concealed their auras, and they swept in with muffled sounds.

"That's the star devouring beast?"

After more than an hour, an incomparably huge star appeared in front of them. It was a hundred times larger than the Azure meteor star. Moreover, it was completely black and shrouded in fog. From afar, they could feel the terrifying aura coming from it.

There was also a pungent smell.

"What a terrifying beast!"

When they got closer, many people looked around and their faces turned pale.

The beast in front of them was simply too huge. It was so huge that it was terrifying. Compared to it, they were not even comparable to an ant.

The difference in size almost made them suffocate.

Even Tang Hao was speechless.

This star-devouring beast was many times bigger than the one he had seen in the endless starry sky. Its aura was even more terrifying. Even a genuine immortal might not be able to take it down, let alone a great emperor.

After a closer look, he couldn't see this guy's true appearance because the rock layer outside was too thick and covered by the mist.

He didn't dare to use his divine eyes to check it out, for fear of disturbing it.

"Don't look around. Go this way. Remember, you must be careful."

At the front of the group, someone shouted in all directions, his voice a little low,

Tang Hao focused his gaze and saw a dark cave entrance. Someone was heading toward the entrance.

"This ..."

He grinned.

If he didn't remember wrongly, this was an anus!

He had done some research on the star Devourer.

“Forget it! It’s better than going in through my mouth!” Tang Hao laughed.

This star Devourer beast didn’t eat living creatures, but stars. It digested mostly things like gold, iron, and rocks. Even if it was excreting, it wouldn’t be too disgusting.

“Let’s go, follow me closely later!”

Tang Hao whispered to the three girls.

Then, he moved and followed the team to the entrance of the cave.

“Hurry up! Hurry up and go in!”

“I can’t fall behind the Yue clan!”

In front of them, the Wu clan’s group hurriedly entered the cave.

They had all concealed their auras, but Tang Hao could still tell which one of them was an old monster at the peak of his cultivation.

“So stinky!”

As they entered the cave, it was even darker and the stench was even stronger.

Everyone held their breaths and gushed in.

“This star Devourer beast is huge. It has many stomachs and intestines. It’s like a maze. You must remember the way in case you forget it and can’t get out!”

Tang Hao said in a low voice as he glided over.

“En!”

The three girls became even more nervous and followed him closely.

After travelling for a while, a fork appeared in the road. The crowd split up and went to the two sides.

After a while, they reached another fork.

“We’ll go this way!”

Tang Hao picked the path with the least number of people every time.

In this way, if he found a treasure, there would be fewer competitors. He did not dare to make a move in the giant beast’s body. If he woke up the giant beast, everyone would be trapped here.

Secondly, he knew that all of these intestines would lead to the largest stomach.

That place should be the place with the most treasures. It would be easier for them to travel there with the least people, so they could get there as quickly as possible.

“What a big cave!”

After traveling for a while, they entered a huge cave. It was one of the star Devourer beast’s many stomach organs.

The cave was filled with a blood-colored mist that was highly corrosive.

The four of them immediately activated their celestial core power and created a thin light screen to resist the blood-colored mist.

Then, they searched around and found many treasures.
