

## Chapter 1928 You Said You Were Not A Bad Guy!

---

Jasmine did as Trevor told her and ordered the Klein team to rush to the biological pharmacy laboratory of the Craig family.

Just as Curtis was beingherded to the police car, he saw several military helicopters flying in the direction of the lab.

He stared at the helicopters in despair. Damn it! It was all over.

All the biopharmaceutical companies and related industries of the Craig family were sealed off, and all the people involved were taken away by Klein for investigation.

The incident attracted a lot of attention in Clouauro, and before long, everyone in the country knew what had happened.

Trevor was also able to successfully obtain the sample of the semi-finished product as well as the technical documents he needed.

Immediately, he sent the information as well as sample to the Scott family.

The sooner he could cure Luisa, the better.

Ever since Luisa discovered Curtis's ruse, she had been wary of everyone she came across. She had lost her memory, so she was insecure as well.

Even though she returned to the Archer family's house with Trevor, she was still very vigilant against him.

Right now, the one person she wanted to see more than any other was Cecelia.

Most of Luisa's memories were gone, but she still remembered snippets of her past. For example, she remembered that Cecelia was her best friend. And she also remembered that after the attack in the villa in Dreles, the Wright family protected her.

After a few moments of ponderingthe idea, she told Trevor about it.

"I want to go to Dreles to find Cecelia. Maybe she will be able to help me

There were several reasons why Trevor didn't want Luisa to go out. First of all, the Wright family was not safe at the moment, and the second reason was that he wanted to wait for the Scott family to finish the research on the semi-finished samples so that Luisa could get treatment as soon as possible.

However, Luisa was a woman with her own free will and Trevor would never dare to stop her from going wherever she desired. He could only explain the situation and hope that she agreed with him.

"The Wright family is under suspicion at the moment, and Cecelia's situation isn't really ideal. You showing up on her doorstep could put her in more danger, and even get the attention of the Mobius."

Trevor explained as much as possible about the threat the Mobius represented in the hope that he would be able to dissuade Luisa from going.

But Trevor's explanation only confused Luisa.

"What is Mobius?" she wondered.

Trevor patiently explained, "It's a very evil organization. They even have a hand in the existence of the drug that caused your memory loss. I suggest you get some rest. Once you have recovered, you can go and see Cecelia."

Luisa was still skeptical about everything Trevor told her, but she had no intention of going out at the moment, so she nodded in agreement.

After a bit of persuasion from Trevor, Luisa finally agreed to take the antidote Madison had sent to relieve her of dizziness.

Luisa was about to take the medicine when Lone Wolf called Trevor. Trevor moved a few paces away, but Luisa strained her ear and eavesdropped on his phone call as much as possible.

Lone Wolf ordered coldly, "The master of the Sanderson family and Ronald have returned to Zayden. The situation is very urgent! You have to tie Luisa, Trevor's fiancée, up to terrify all of them. I will be in Zayden soon. When I arrive, the two of us will meet with the Sanderson family to negotiate for Luisa's freedom."

Trevor listened to the order in confusion.

He wondered how Lone Wolf found out that Luisa was still alive. He also found it suspicious that Lone Wolf was ordering him to capture Luisa. It would seem that Lone Wolf didn't trust him at all. This was a test.

Trevor thought through the whole situation for several minutes, then he finally came to a conclusion and promised, "No problem. I will tie Luisa up."

Another side effect of the drug that Trevor wasn't aware of was that Luisa could hear exceptionally well, so she heard his conversation.

The moment he hung up the phone, Luisa rounded on him.

"You said you were not a bad guy! Your lies have been exposed!"
