

## Chapter 1932A Reminder From Esteban

---

Trevor was overjoyed by the news. He quickly rushed out and got the medicine. When he returned, he handed the medicine to Luisa excitedly.

"Luisa, try this. It can cure your dizziness and might also help you regain your memory."

Luisa hesitated for a moment, but ultimately chose to take the medicine. Now, she was fully convinced that Trevor would not hurt her.

Trevor watched her use the medicine. After several moments, he asked cautiously, "Luisa, how do you feel now? Have you regained your memory? Do you remember who I am?"

Luisa opened her eyes and studied Trevor's face carefully. After a few seconds of tense silence, she shook her head and said, "No. I don't think it had any effect. I still can't remember anything. But my head feels a lot better now. I don't feel dizzy anymore."

When Trevor realized that Luisa still didn't remember anything he tried to jog her memory by reminding her of their past. "Do you still remember Newmere Cosmetics? Do you remember what happened between us in Dreles? Do you remember what happened in Zayden?"

However, Luisa didn't recall any of those events. She frowned and said, "It suddenly occurred to me that when I was under the protection of the Wright family in Dreles, she was acting a little strangely at the time. And she was very suspicious then. I'm more worried about her."

Trevor felt helpless. It was apparent that it would take a while before she regained her memories.

There was nothing he could do but wait. He stared at Luisa and promised, "Let's wait a while. Then I will take you to the Wright family to investigate the situation."

Trevor spent a while comforting Luisa before leaving the room. Outside, he called Madison and asked, "Why did Luisa not regain her memories after taking the medicine? What effect will this semi-finished medicine have on her? When will Luisa regain her memory? Or is her memory lost

Trevor spent a while comforting Luisa before leaving the room. Outside, he called Madison and asked, "Why did Luisa not regain her memories after taking the medicine? What effect will this semi-finished medicine have on her? When will Luisa regain her memory? Or is her memory lost forever?"

Madison paused at the flurry of questions. When Trevor was done, she explained, "Well, I expected something like this to happen. It's not easy to regain something like a memory. Besides, the semi-finished drug is very strange. I think it contains some secret components that we are not aware of yet. I've studied it for so long, but I still don't fully understand it. The best I can conclude is that it has a magical power that can constantly stimulate the potential power of the human body.

Of course, such huge power will have side effects. One of those side effects is the loss of memory Luisa is dealing with now. But I believe that the antidote I have developed will stop Luisa from losing any more memories even if she doesn't recover the memories she already lost. Perhaps, she needs to be stimulated to remember everything!"

Trevor sighed and replied helplessly, "Well, it seems I can only wait and see what happens then. It's still a good thing to stabilize her condition."

Once the call was over, Trevor breathed a sigh of relief. He tried to compose himself before he went back to see Luisa.

He was about to turn around when he received an e-mail from Esteban.

Trevor frowned at the notification.

It occurred to him that Esteban sent him an email because Lone Wolf had done something.

He opened the email and read it quickly. Esteban sounded anxious in the short message.

It read, "Your identity has been exposed! Lone Wolf has already sent two
