

My Master 1711

Chapter 1711:

"This..." Cao Zhen felt a bit of a headache, even somewhat unwilling to face this issue.

"What do you mean 'this' and 'that'." Elder Copper Plate didn't give Cao Zhen a chance to hesitate, directly asking, "You don't like Li Ke, and have no feelings for her?"

"No." Cao Zhen instinctively denied. He always had a good impression of Li Ke. After so many years, no matter what Li Ke did, she almost always did it with the people of Four Treasures Peak. How could he not have feelings for her?

Elder Copper Plate put on a stern face, exerting the authority of an elder, "Then what is there to hesitate about?"

"It's not hesitation, it's because..." Just as Cao Zhen wanted to speak, Elder Copper Plate's voice rang out again.

"It's because of Immortal Bi Yue, right. Alas, even I can feel Immortal Bi Yue's affection for you. It's not good to let down Immortal Bi Yue, but you also can't let down Li Ke, can you? In that case, why don't you simply marry both?"

Elder Copper Plate looked at Cao Zhen as if it was only natural, "In our cultivation world, indeed many people find a Dao companion, just one, but there are also some who find two or even more Dao companions."

"Uh..." Cao Zhen was at a loss for words. He actually had always been avoiding this problem.

Back in his original world, he had imagined that sort of situation.

But when he truly came to this world, when this matter really happened to him, asking him to find Li Ke and Bi Yue, and have them both as his Dao companions, he really couldn't bring himself to say it.

Moreover...

He sighed helplessly, "Uncle, things aren't as simple as you think. Bi Yue's identity is somewhat special, and she can't decide on this matter herself. It depends on her elders, and her elders haven't awakened yet. If I make Li Ke my Dao companion before they wake up, I'm afraid our Hundred Peaks Sect might really be in trouble."

Elder Copper Plate immediately frowned, "What do you mean? Are the people from the Dragon Chant Sect saying that you're not allowed to find another Dao companion, only Immortal Bi Yue? But, Li Ke is a good girl, you can't waste her like this."

"Bi Yue didn't say that, but she... In short, let's talk about everything once her elders wake up."

Bi Yue did talk about this matter with him, and although she didn't say it explicitly, she did imply that everything would be decided once her elders woke up.

"So, Uncle, if you want to see me hold a Dao companion ceremony, just take the pill first. Our Hundred Peaks Sect really isn't lacking in resources now."

Cao Zhen still gave the pill to Elder Copper Plate.

Although Elder Copper Plate could take the pill and break through directly.

What troubled him now, instead, were his parents.

Although he could contact his parents through China Cloud, he couldn't use China Cloud to send the pills directly to them.

Fortunately, his parents, by the standards of the cultivation world, were still considered young.

However, he had already instructed his parents to look for those spiritual medicines and immortal herbs on Earth to prepare in advance.

At the same time, he started teaching his parents how to refine pills.

Luckily, although his mother had no talent for alchemy, his father had an excellent talent for it. In his father's words, alchemy was like cooking, and controlling the pill fire was like controlling the heat in cooking.

Returning to Four Treasures Peak, he took out part of the resources that the Hundred Peaks Sect received after they divided the Soul Breaking Demonic Sect's resources, and began studying to refine a pirated version of the Immortal Slayer Flying Knife.

Meanwhile, without external pressure, the members of the Hundred Peaks Sect also began to venture out, many choosing to enter the Fourth Dangerous Terrain.

Not only the Hundred Peaks Sect, but the Earth Immortal Realm members of various Immortal Sects in the Eastern Wasteland also chose to venture into the dangerous terrain.

The Fourth Dangerous Terrain had appeared for some time, but in this short period, it was still not enough for people to thoroughly explore.

In Four Treasures Peak, Xiang Ziyu had been studying spells and hadn't entered the dangerous terrain, but other disciples had successively ventured in.

Especially that guy Wànrén Dí, who knew he wasn't good at fighting, yet loved adventure.

Upon learning that Xiang Ziyu didn't plan to venture out, he directly found Ling Xi and Ruo Yun, the two strongest fighters of Four Treasures Peak, and after convincing them for a long time, successfully got Ling Xi to go with him into the Fourth Dangerous Terrain.

As for Ruo Yun, she went to the mortal world to experience mortal life.

With Ling Xi there, it's unlikely that Wànrén Dí would encounter any danger. He's not like Linghu Gudu, who believes wealth must be sought amidst danger.

"The pirated version of the Immortal Slayer Flying Knife has also been refined, next is to wait for the emergence of the Immortal Path Domain, then we can complete the final step and use the Immortal Slayer Flying Knife."

Thousand Caves Door.

Ever since Star Lord Hao Yue participated in the Grand Martial Competition of the Immortals, his attitude towards the Thousand Caves Door had changed, paying more attention to them.

He even passed on some of his cultivation techniques and spells to the Thousand Caves Door.

Although the Eastern Wasteland was affected by the connection with the Eastern Province, and some geniuses who should have joined the Thousand Caves Door joined the Great Teachings of the Eastern Province, the Thousand Caves Door still developed rapidly.

Originally, in the Guardian Immortal Imperial Dynasty, the top-ranked Immortal Sect was the Divine Dao Sect.

Chapter 1712:

After the rise of the Hundred Peaks Sect, it even became a Great Teaching, which naturally isn't something they can compare to.

But now, the Thousand Caves Door has vaguely begun to overshadow the Divine Dao Sect.

In the Conference Hall of the Thousand Caves Door, within the Guardian Immortal Imperial Dynasty, various sects have gathered here.

"Star Lord Hao Yue, if you have called us here in a hurry, what is the urgent matter?"

Everyone looked at Star Lord Hao Yue, the host, each filled with doubt. What could the people of Thousand Caves Door want by summoning them all?

Star Lord Hao Yue's gaze swept across everyone's face and finally spoke slowly: "The reason for inviting you is to discuss a matter that could affect the future of every sect.

For some time, our Eastern Wasteland has been connected to the Eastern Province, and you all must have felt the influence, especially as more experts from the Eastern Province awaken, the impact will grow.

Many talents from our Eastern Wasteland, knowing of the Great Teachings in the Eastern Province, have chosen to join them. Besides, there is the Fourth Dangerous Terrain; have you all sent people there?

Yet the disciples and practitioners you've sent might have perished in the Fourth Dangerous Terrain, some due to its inherent dangers, but many were killed by Eastern Province cultivators.

Even if not killed by them, your disciples at Immortal Sects must have encountered situations where they could have gained opportunities or treasures but were driven away by the other party.

If this continues, we will continuously be suppressed by those Great Teachings of the Eastern Province."

"So what then?" an elder from the Divine Occurrence Sect asked, "Does Star Lord Hao Yue have a solution?"

They are naturally heavily influenced by the Eastern Province Grand Sects and wish to change that, but their strength is far too inferior to make a difference.

"There is only one way!" Star Lord Hao Yue declared, extending a hand, "And that is for all our sects to unite."

Upon hearing this, everyone's face immediately showed disappointment. They knew Star Lord Hao Yue was a reincarnated Great Ability and expected some unique method, yet it was the same old rhetoric.

Many even shook their heads.

"Star Lord Hao Yue, we have already formed an alliance since the Minor Era of Inversion of Heaven and Earth was not yet over."

"How else shall we unite? Our disciples, upon seeing each other, are already helping one another."

Star Lord Hao Yue waited until the voices subsided, then spoke slowly: "The union I speak of is not the loose alliance you're thinking of."

As he spoke, he extended a hand, making a fist before everyone: "I mean turning all sects within our Guardian Immortal Imperial Dynasty into a single force, only then can we fully consolidate our power."

"What? All sects becoming one force?"

"Impossible!"

"In that case, would our sects even remain?"

"Star Lord Hao Yue, if this is all you have to say, I think there's no point in continuing this discussion."

"Considering our previous mutual help, I don't want to disrupt the cooperation among our Guardian Immortal Dynasty's many Immortal Sects, so this time, I'll pretend I didn't hear you, and this meeting never happened. But I hope there's no next time!"

Upon hearing Star Lord Hao Yue's words, many became furious, some even turning to leave.

Star Lord Hao Yue looked at the departing figures and calmly stated: "I am talking about one force, not merging into one sect."

"If all our sects together could become a Great Teaching, would you still choose to leave?"

"A Great Teaching!"

"What did you say!"

Everyone around was in disbelief at Star Lord Hao Yue's words.

Those who had turned away looked back at Star Lord Hao Yue.

"Become a Great Teaching? It's impossible, the Divine Dao Sect, with the longest history among us, still has several hundred thousand years before it could become a Great Teaching."

Suddenly, someone realized and shouted: "How could we... wait, you don't mean..."

"That's right." Star Lord Hao Yue nodded sharply, revealing a golden light in his hand and said, "I entered the Fourth Dangerous Terrain once before, and there I discovered an Unknown Immortal Demon Bead. After opening it, I obtained the Instant Millennium Pearl!"

He is a reincarnated Great Ability!

In his past life, he had reached the True Immortal Realm!

Reaching the True Immortal Realm requires exceptional talent and good fortune.

Since his reincarnation, his fortune seemed not so well.

Until this time entering the Fourth Dangerous Terrain, he managed to obtain the Instant Millennium Pearl!

Everyone stared at the golden light, their hearts racing uncontrollably. The Hundred Peaks Sect became a Great Teaching precisely because of the Instant Millennium Pearl.

Now, Star Lord Hao Yue holds the Instant Millennium Pearl, giving him a chance to become a Great Teaching!

Star Lord Hao Yue, looking at everyone, said: "You must all know the effect of the Instant Millennium Pearl, although everything else is negotiable, there's one point.

Chapter 1713:

After becoming a Great Teaching, it will face the Sect Tribulation, and among all the sects in the Eastern Province, aside from the Hundred Peaks Sect, there is none with the strength to withstand the Sect Tribulation alone, not even our Thousand Caves Door.

The only way to successfully resist the Sect Tribulation is for all our sects to join forces.

That is why I invited you all here.

The crowd, upon hearing Star Lord Hao Yue's explanation, gradually calmed down from the excitement of seeing the Instant Millennium Pearl, as this pearl was ultimately the treasure of the Thousand Caves Door, not theirs.

Moreover, Star Lord Hao Yue gathered everyone and invited them to the Thousand Caves Door, holding the Instant Millennium Pearl in his hand. The implication was clear.

"Star Lord Hao Yue, do you want all our sects to merge into your Thousand Caves Door? If so, I'm sorry, but our Sun and Moon Sect intends to continue its legacy."

"Our Divine Dao Sect will not merge with another sect either, even if it means becoming a Great Teaching!"

"If we have to merge with a Great Teaching, we've already chosen to join the Hundred Peaks Sect."

"Star Lord Hao Yue..."

The crowd still shook their heads.

Star Lord Hao Yue also shook his head along with them and said, "I have stayed in the Guardian Immortal Imperial Dynasty for a long time, and I know you well. You would never just watch your sect disappear.

So, I don't mean for your sects to merge into our Thousand Caves Door, but rather, for all of our sects to unite as one to form a new sect.

Then, after the Sect Tribulation is over, we will become a Great Teaching. And all of our sects can continue to exist."

"Form a new sect?"

"But doesn't that mean our current sects will no longer exist?"

"Yes, isn't that the same thing?"

Many people still shook their heads in refusal when they heard this, though not all of the sects rejected the idea this time, as some remained silent.

"It's different, naturally different." Star Lord Hao Yue pointed to the ground beneath him and said, "We can be like our Thousand Caves Door, or like the Hundred Peaks Sect.

Once we become a Great Teaching, we can have countless peaks. For example, Sun and Moon Sect, you can become Sun Moon Peak, and Divine Dao Sect will be Divine Path Peak. Our legacy will continue, it's not the extinction of our sects."

Star Lord Hao Yue spoke, paused slightly, waiting for the crowd to mock his words. After waiting for a moment, he spoke again persuasively: "Everyone, this is not a normal time.

The experts of the Grand Sects in the Eastern Province have not awakened yet, but after some time, when the experts of the Immortal Path Domain awaken, the gap between us and the Grand Sects of the Eastern Province will become more apparent.

Even when those in the Immortality Regainment Realm awaken, there won't be any experts in that realm among your Grand Sects, right?

If, at that time, the Grand Sects of the Eastern Province continue to suppress us in the Eastern Wasteland, or even come to annihilate our sects, how could we stop them?

The only way is to unite our forces and become a Great Teaching. After becoming a Great Teaching, the Heavenly Dao will bestow a wealth of resources, allowing us to develop more rapidly.

At the same time, after becoming a Great Teaching, our fortune will be different.

Previously, when the Eastern Wasteland was not connected to the Eastern Province, it was fine, and even if we didn't become a Great Teaching, it didn't matter. But now that we are connected, if we don't become a Great Teaching, all our sects might be eradicated!"

"Star Lord Hao Yue, you certainly make sense, but saying all our sects will be wiped out sounds a bit alarmist." Among the crowd, a master from the Divine Occurrence Sect said sternly, "In the Eastern Province, not all powers are Grand Sects; there are sects too, and they haven't all been eradicated.

Why should the sects of the Eastern Wasteland be annihilated?"

"Because we are the Eastern Wasteland, and they are the Eastern Province!" said Star Lord Hao Yue with a solemn expression. "They naturally see us as outsiders, and besides, although those sects have not been wiped out, most sects in the Eastern Province are backed by Grand Sects.

They must seek protection by regularly paying tribute to a Grand Teaching. But for us, in the Eastern Wasteland, there is only one Great Teaching: the Hundred Peaks Sect.

But you also know the situation of the Hundred Peaks Sect. Even though it is powerful now, it's because of a special period.

Because of Cao Zhen's methods, because they have a bunch of top experts in the Hundred Peaks Sect.

But when the stronger experts of the Immortal Path Domain awaken, and even stronger experts in the Immortality Regainment Realm and True Immortal Realm awaken, can the Hundred Peaks Sect remain so powerful?

Even with all his means, Cao Zhen cannot ensure that, as new periods arrive, a group of geniuses within the Hundred Peaks reach the peak of these new times.

At that time, the Hundred Peaks Sect can only protect itself, so how can they still care for us?

So, everything must depend on ourselves.

Besides, haven't you noticed that the Eastern Wasteland has a very high occurrence of geniuses?

With the same population density, for example, out of 100,000 people, the Eastern Wasteland can produce twenty individuals suitable for Immortal Cultivation, whereas in the Eastern Province, it's unlikely to find even ten in 100,000 suitable for Immortal Cultivation.

Moreover, the odds of top-level Immortal Bodies appearing in the Eastern Wasteland are higher than in the Eastern Province!

Chapter 1714

In such a situation, how could the people of the Eastern Province possibly let us of the Eastern Wasteland off? If they have the capability, they will definitely come to annihilate the sects of the Eastern Wasteland.

Let those disciples join their Great Teachings."

As soon as Star Lord Hao Yue finished speaking, many people around immediately fell into contemplation.

"Hearing it like this, I find it seems to be the truth."

“No wonder those people from the Great Teachings, despite their vast and populous Eastern Province, always come to the Eastern Wasteland to recruit disciples.”

“It is precisely because of the large population in the Eastern Province that we overlooked this issue. But under the same population, indeed, there are more people suitable for immortal cultivation in our Eastern Wasteland!”

“Disciples are the future of a sect, a Great Teaching. If it’s for the sake of those disciples, they might indeed attack the sects of the Eastern Wasteland.”

“However, establishing a new sect actually still means giving up our respective sects. At least we can no longer call it the Sun and Moon Sect, the Divine Occurrence Sect, or the Divine Dao Sect...”

“Even so, that’s better than cutting off our legacy. At least our legacy can still exist!”

There was much discussion among the crowd, with two differing opinions: some agreed to establish a new sect in the city, but more were still hesitant.

“Star Lord Hao Yue, we’re after all only interim sect leaders, not the true sect leaders of each of our sects. Should we perhaps wait a little longer, until our sect leaders wake up, and let them make the decision?”

“Yes, we are only interim sect leaders. Moreover, our sect has the graves of the seniors’ living tombs. If we merge and establish a new sect now, what will happen to the living tombs of our seniors? We can’t possibly move the living tombs of the seniors, can we?”

“Regarding the living tombs, everyone need not worry. Since I proposed this method, I naturally considered the issue of the living tombs.”

Star Lord Hao Yue looked at the crowd and said: “In my hand, I have a treasure that can directly relocate the earth. When the time comes, I can move all the important buildings and mountains of your sects to our new sect.

And another problem. We can't afford to wait any longer.

By the time your sect leaders all wake up, the Immortal Path Domain will have arrived. By then, where would we find so many people from the Immortal Path Domain?

Breaking through from the Longevity Period to the Indestructible Period is easy, but breaking through from the Indestructible Period to enter the Immortal Path Domain is ten, a hundred times harder.

Moreover, if we choose to break through in the Indestructible Period and undergo Heavenly Tribulation, we can still seek help from the Hundred Peaks Sect, and even go to Cao Zhen to refine pills for us.

But what about the Immortal Path Domain? By that time, the Hundred Peaks Sect is unlikely to have so many Peak Immortal Path Domain experts, and Cao Zhen might not be able to refine pills to help people advance.

After all, the breakthrough of the Immortal Path Domain does not rely on pills but personal enlightenment.

At that time, when our experts dwindle, we might indeed be unable to survive the Sect Tribulation. Therefore, we must quickly, as soon as possible, establish a new sect and then bring about the Sect Tribulation without delay!

Of course, I know that everyone needs time to think.

Three days, I give you all three days to consider. After three days, those who agree to establish a new sect can follow me to the Hundred Peaks Sect. Those who do not agree, I naturally will not force."

If he could, he wouldn't go to those sects.

He would directly make the Thousand Caves Door a Great Teaching, wouldn't that be better.

But the problem is, relying solely on the power of the Thousand Caves Door, there isn't the slightest possibility to survive the Sect Tribulation. He can only seek out the major sects again.

Cao Zhen finally completely relaxed. As for what to do when the Indestructible Period ends, refining pills to be consumed during the Immortal Path Domain period?

The Immortal Path Domain is truly special. Although the Immortal Path Domain likewise increases the cultivation base, it requires insight to comprehend.

Relying solely on pills to enhance the cultivation base can only increase the height of the Immortal Mountain, but the Immortal Path Domain remains unchanged.

The Immortal Path Domain is more about enhancing one's own domain.

Even, as one's own domain enhances, the Immortal Mountain will naturally rise in height along with it.

Therefore, for the Immortal Path Domain, what is needed is not to refine pills, but some special treasures that can allow people to gain enlightenment, preferably immediate enlightenment, like the Formation Map he once refined for Ai Yunqi.

"It's still early, and when I refined the Formation Map for Ai Yunqi back then, it even endured the strikes of a Heavenly Tribulation, let alone now that I'm going to refine stronger Formation Maps, and so many copies at once.

It'll be timely once all the disciples return and I begin to refine the Formation Maps."

Cao Zhen said to himself, swaying on the hammock, but after just two swings, Linghu Gudu's voice came over.

Previously, anything concerning the Four Treasures Peak was notified by Wan Ren Di. Now that Wan Ren Di isn't here, naturally it has become the little disciple Linghu Gudu.

“Master, Star Lord Hao Yue from the Thousand Caves Door, people from the Divine Dao Sect, Sun and Moon Sect, Four Extremes Sect, and all ten Immortal Sects of the Guardian Immortal Imperial Dynasty have all come, and they’ve been welcomed into the reception hall by the disciples.”

“Hmm?” Cao Zhen flew down from his hammock. Except for their Hundred Peaks Sect, all the remaining ten Immortal Sects of the Guardian Immortal Imperial Dynasty have come. Has something major occurred?

“Notify Nie Jie and the others.”

After leaving a word, Cao Zhen quickly flew into the reception hall.

The Guardian Immortal Imperial Dynasty always had the name of ten Immortal Sects, but since the Hundred Peaks Sect became a Great Teaching, the ten Immortal Sects naturally became nine, and the ten Immortal Sects were conferred by the Grand Preceptor, who is now asleep and unable to appoint another Immortal Sect.

When Cao Zhen walked into the reception hall, he found that not only the ten Immortal Sects were present, sects like the Sword Sect, Clearfall Sect, and other relatively large sects within the Guardian Immortal Imperial Dynasty were also there.

“What important matters have brought you all together to our Hundred Peaks Sect?”

He became increasingly curious looking at everyone, as far as he knew, nothing significant was happening in the Guardian Immortal Imperial Dynasty recently.

“Sect Leader Cao,” Star Lord Hao Yue stood up and saluted Cao Zhen, “We have come to find Sect Leader Cao to ask for assistance in refining some pills?”

“Hmm?” Cao Zhen’s expression grew increasingly puzzled. To ask him to refine pills, did they need to bring so many people to the Hundred Peaks Sect?

“We wish to have the kind of pills that can make someone at the early Indestructible Stage directly reach the Peak of the Indestructible Period, and as many of these pills as possible!”

Star Lord Hao Yue looked at Cao Zhen with a serious face. Although he is a reincarnated Great Ability, his cultivation still requires time. For now, he is only in the early Indestructible Stage.

Chapter 1715

Although Cao Zhen didn't explicitly state that he could directly elevate someone from the Early Indestructible Period to the Peak of the Indestructible Period through alchemy,

everyone in their Hundred Peaks Sect, including him and his disciples, had so many people who were only in the Longevity Period before, suddenly achieve the Peak of the Indestructible Period, this was definitely his handiwork.

And the greatest possibility was the pills he had refined, as everyone in the Guardian Immortal Imperial Dynasty knew he excelled in pill refining.

But the problem was, these guys were too ruthless; they started by asking him to refine as many pills as he possibly could.

“What happened? Why do you want me to help refine so many pills?” Cao Zhen couldn't believe that they would come to him to refine pills for no reason.

“Because we have obtained the Instant Millennium Pearl, our sects coming here today will form a new sect, ultimately becoming a great teaching.

By then, we'll have to face a Sect Tribulation, so we must quickly elevate our cultivation base, the only way is to seek your help.”

Star Lord Hao Yue had no intention of hiding anything from Cao Zhen.

“What? You’ve also obtained the Instant Millennium Pearl and are planning to establish a new sect.” Cao Zhen’s eyes widened in surprise, looking at Star Lord Hao Yue and the others; the amount of information was a bit overwhelming.

The Instant Millennium Pearl is exceedingly rare, yet Star Lord Hao Yue managed to get one; that was truly fortunate.

Of course, that’s not the critical point; the critical point is these sects are going to form a new sect.

Such a union of sects to overcome the Sect Tribulation really isn’t implausible, meaning the Guardian Immortal Imperial Dynasty might see the birth of a second great teaching!

For him, this was nothing less than excellent news.

Joy quickly lit up Cao Zhen’s face, when the Hundred Peaks Sect had become a great teaching, it greatly boosted his influence.

With another great teaching, his influence would grow even stronger.

He would be more than happy to see more great teachings emerge in the Guardian Immortal Imperial Dynasty, preferably as many as possible, ideally, all sects could become great teachings.

Except for those pills.

Cao Zhen looked at Star Lord Hao Yue and the others and said, “It’s not that the pills can’t be refined, but the required herbs are too numerous and extensive, I’m afraid even if you gather all your sects together, you won’t be able to gather all those herbs.”

He wanted to see more great teachings in the Guardian Immortal Imperial Dynasty and wanted Star Lord Hao Yue’s new sect to survive the Sect Tribulation, naturally, he could help refine the pills, but the issue was the herbs.

Star Lord Hao Yue frowned and asked, "Do you know what herbs are needed?"

"I need..." Cao Zhen glanced around and straightforwardly listed all the required herbs.

Then silence, prolonged silence.

Everyone knew that for the pills that could allow an Early Indestructible Stage breakthrough to the Peak of the Indestructible Period, the required herbs must be vast, but they really hadn't expected it to be to this extent, even including a large amount of sixth-grade Immortal Herbs.

"Everyone, let's see what herbs our sects have, let's pool them together," Star Lord Hao Yue was the first to speak, "Our Thousand Caves Door has..."

As Star Lord Hao Yue began speaking, people started listing the herbs they had in their Immortal Sects.

The other herbs were all well and good, but the sixth-grade Immortal Herbs...

"Our Immortal Sect only has one sixth-grade Immortal Herb, the Bitter Bone Flower, usable ones are found only with difficulty, other than that, we genuinely have no more in our sect."

"Our Divine Occurrence Sect, although we have sixth-grade Immortal Herbs, the specific ones Sect Leader Cao mentioned, we truly don't have."

"Neither do we, don't look at us like that, we've already agreed to join in forming the new sect with everyone, of course, we'll contribute, if we had those Immortal Herbs in our sects, we would surely provide them."

"Our sect does have two types of Immortal Herbs."

"Sixth-grade Immortal Herbs, even if we go out to buy, we can't get them."

Present are the strongest sects in the Guardian Immortal Imperial Dynasty, but after their discussion, they realized they just couldn't gather enough herbs.

Star Lord Hao Yue had no choice but to look at Cao Zhen and ask, "Sect Leader Cao, can you produce enough herbs?"

Of course, we know that by asking you to refine pills and then asking you for herbs, we naturally need to offer compensation."

They were aware that the Hundred Peaks Sect teamed up with the Dragon Chant Sect and the Yin Yang Sect to annihilate the Soul Breaking Demonic Sect, that was a genuine great teaching, the Hundred Peaks Sect must've gained a lot of resources.

Cao Zhen nodded slightly, they indeed gained a lot of resources, and they hadn't asked much for Treasures, instead specifically wanted resources, especially various herb resources.

After all, when it comes to Treasures, it's not that he can't forge them.

When he forges Treasures, they are customized, more suitable for himself, and can enhance his forging level, so why would he want Treasures!

As for herbs, even though the Dragon Chant Sect and the Yin Yang Sect also needed herbs, they knew that Cao Zhen was an alchemy master.

These three great teachings were in a honeymoon period, if they really needed to make any pills, they could ask Cao Zhen for help, and Cao Zhen surely wouldn't refuse them.

Moreover, in terms of Earth Level Treasures, the Hundred Peaks Sect had already compromised, so they agreed to give most of the herbs to the Hundred Peaks Sect.

The Soul Breaking Demonic Sect was a great teaching, the accumulated resources in the sect weren't few, he could really gather enough herbs for pill refining.

Seeing Cao Zhen nod, Star Lord Hao Yue hesitated slightly, seemingly contemplating what to offer to impress Cao Zhen, after a moment, he said, "I can offer a part of my inheritance to your Hundred Peaks Sect."

Chapter 1716:

"Inheritance?" Cao Zhen heard the words and gently shook his head, saying, "Indeed, our Hundred Peaks Sect had little inheritance before, but after we became a Great Teaching, we have gained a lot of Divine Thought. Moreover, it is now known throughout the entire Eastern Province that we merged with the Ten Thousand Immortals Sect.

The Ten Thousand Immortals Sect is also a mixed sect, and we obtained a lot of inheritance from it. Plus, I personally have some inheritance, so our Hundred Peaks Sect is not lacking in inheritance now."

What a joke, the inheritance of Star Lord Hao Yue still needs to be taught? He has connected with Star Lord Hao Yue through the China Cloud, and if he wishes, he can gain the inheritance of Star Lord Hao Yue at any time.

The brows of Star Lord Hao Yue immediately furrowed: "Then, I wonder, Sect Leader Cao, what kind of remuneration do you require?"

"With the herbs I have, along with yours, I can refine six pills for you that will help six people advance from the early Indestructible Stage to the Peak of the Indestructible Period. How to choose these six people depends on you." Cao Zhen pondered slightly and said, "As for the herbs provided by our Hundred Peaks Sect, when you succeed in crossing the tribulation, the Heavenly Dao will descend with rewards.

We will have the priority to select these rewards. Of course, rest assured, for the six-quality immortal herbs we provide, we will also choose corresponding things in selection, such as six-quality immortal mines or other six-quality immortal herbs."

Star Lord Hao Yue thought for a moment and agreed directly: "No problem."

Around, the temporary sect masters of the other major sects also nodded one after another, as Cao Zhen's request was not excessive. Although Cao Zhen and his sect would definitely choose the more valuable immortal herbs or mines first.

After all, there is also a difference in the value of six-quality immortal herbs and six-quality immortal herbs.

But this request is really not excessive. Bai Feng Sect provides the immortal herbs first, so it is only fair that they gain something.

Cao Zhen, seeing the other party agree, paused slightly before continuing, "As for the remuneration for me personally to refine pills for you..."

After you have used the Instant Millennium Pearl, and your sect is full of immortal energy, I hope you will allow the disciples of our Hundred Peaks Sect to enter your sect for cultivation."

He did not specify the number of disciples from the Hundred Peaks Sect.

Meaning that as long as they desire, the disciples of the Hundred Peaks Sect could enter the other sects for cultivation.

This time, Star Lord Hao Yue did not directly agree to Cao Zhen but turned to look at the temporary sect masters of the other sects.

This new sect was jointly established by all the major sects. Cao Zhen's previous conditions were very reasonable, and he could directly agree. But now, these conditions were not something he could decide alone.

"We at the Sun and Moon Sect agree to Sect Leader Cao's conditions. Sect Leader Cao has helped our Guardian Immortal Imperial Dynasty's major sects a lot and even taught us spells. Now, being able to help the Hundred Peaks Sect, we naturally agree."

"We at the Divine Dao Sect also agree. Sect Leader Cao also helped our Divine Dao Sect."

"We agree as well. We are all people of the Guardian Immortal Imperial Dynasty, and the stronger the Hundred Peaks Sect, the more beneficial it is for us."

"The disciples from the Hundred Peaks Sect entering our sect for cultivation does not affect us much either, we also agree."

Seeing everyone nod in agreement, Star Lord Hao Yue then looked back at Cao Zhen and nodded, "Sect Leader Cao has heard, we all agree. In addition, when we are crossing tribulations, we hope Sect Leader Cao can dispatch ten experts to help us! Of course, after the Sect Tribulation, the people who went to help will be free to choose treasures after we have selected thirty pieces."

During a Sect Tribulation, a Great Teaching can invite experts to help with the tribulation, and they have given all these slots to the Hundred Peaks Sect.

After all, they are unfamiliar with other Great Teachings, inviting others might help because of rewards, but it would be hard to trust them.

However, there's no problem with the Hundred Peaks Sect, and they have enough experts with experience in crossing tribulations.

"Alright, no problem, although, by then, we might only need eight people, or nine, as the Grand Preceptor's disciple will probably help."

They in the Hundred Peaks Sect crossed tribulation during the Longevity Period, and at that time, the Grand Preceptor's disciple, Shi Shoujiang, helped with the tribulation.

The Grand Preceptor has four Earth Immortal Realm disciples, and likely, each period, the Grand Preceptor will arrange for a disciple to awaken.

It's just that he doesn't know how many disciples of the Grand Preceptor will awake in the Indestructible Period.

Cao Zhen casually asked: "By the way, have you decided what name to give the new sect you've established?"

"Eastern Wilderness Sect."

Since it is a jointly established sect, using any of the sect names would be inappropriate.

The name they initially considered was Ten Gates Sect, symbolizing a sect formed by the union of ten Immortal Sects.

But apart from the ten Immortal Sects, there were also sects like the Sword Sect and Scholar Dao Sect that joined, so simply calling it Ten Gates Sect wasn't appropriate.

They came from the Guardian Immortal Dynasty, so being named Guardian Immortal Sect would have been nice.

However, upon hearing this name, the other Immortal Sects in Eastern Province would surely come knocking, which was also unsuitable, hence they finally thought of the name Eastern Wilderness Sect, since they all came from the Eastern Wasteland.

"This name is quite nice." Cao Zhen slightly nodded. His Prosperous Age Picture Record initially covered only the Hundred Peaks Sect, then expanded to the Guardian Immortal Imperial Dynasty, and he wondered if it would eventually cover the entire Eastern Wasteland.

Chapter 1717: The Secret of the Immortal's Tomb (Part 3)

It seems that achieving the Earth Immortal Realm is impossible, it should wait until the Immortality Regainment Realm.

Speaking of which, the current Guardian Immortal Imperial Dynasty is still decent, but in other parts of the Eastern Wasteland, those Immortal Sects are also deeply affected by the connection to the Eastern Province, and some places have become somewhat dilapidated.

Wait, if there is time, I can go to other places in the Eastern Wasteland to offer some help.

That way, once my prosperous times extend to the Eastern Wasteland, my prosperous era will be strong enough. As for now, I have just relaxed a little, and I have to start alchemy again.

At this moment, Star Lord Hao Yue and others began to search for a suitable mountain gate.

A mountain gate is not something that can be chosen casually. After all, when choosing a mountain gate, the primary consideration is the abundance of spiritual energy.

Without abundant spiritual energy, everyone's cultivation will be ineffective, which is certainly not acceptable.

Although the spiritual energy throughout the Eastern Wasteland became more abundant after it connected to the Eastern Province, there are still places where spiritual energy is abundant, and places where it is still sparse.

Generally speaking, the places with the most abundant spiritual energy are occupied by various sects.

However, there was indeed a place that originally didn't have much spiritual energy, but because the Eastern Wasteland was connected to the Eastern Province, this place became filled with spiritual energy.

All the major sects have existed for hundreds of thousands of years, and the spiritual energy within their mountain gates is abundant enough, so naturally, they wouldn't change their mountain gates on a whim because of this reason.

Therefore, this area hasn't had anyone build a new mountain gate.

Star Lord Hao Yue, along with experts from various Immortal Sects, came to this mountain range to inspect the situation here, feeling more satisfied the more they looked.

"The spiritual energy here is indeed abundant, I even feel that the spiritual energy here is more abundant than in our sect."

"That's right, the location is also good. Although the Hundred Peaks Sect is not our enemy, once we also become a Great Teaching, our Guardian Immortal Imperial Dynasty will have two Great Teachings. If we two Great Teachings are next to each other, how will we recruit disciples?"

But if we choose here, we will be far enough from the Hundred Peaks Sect, and then we and the Hundred Peaks Sect will be able to cover the entire Guardian Immortal Imperial Dynasty."

"This place, whether in terms of location or spiritual energy, is the best choice."

"However, I am a bit puzzled, our Ten Great Immortal Sects have existed for many years, it's impossible for us to casually change our mountain gates.

But those small sects and small factions that haven't been established for long, their mountain gate's spiritual energy shouldn't be as abundant as here, right? Why don't they establish a mountain gate here?"

"Indeed, I also find it strange. A place like this, someone should have established a mountain gate."

The more they said, the more they felt it was strange. They knew before that such a place had appeared in their Guardian Immortal Imperial Dynasty, but they hadn't had the energy to pay too much attention here.

After all, after the Eastern Wasteland connected to the Eastern Province, their own sects were affected, and they barely had time to take care of their own sects, let alone pay attention to other things.

"Gentlemen, this should be our mountain gate in the future, let's inspect it thoroughly first."

"Alright, let's inspect it!"

Very soon, everyone moved to inspect the surroundings.

Deep in the mountain range, inside a cave, there was a hidden world. This cave appeared small from the outside, but inside it was vast, with an underground river.

At the end of the dark river lay a tomb.

Waves of death energy gathered around, making the originally dim cave even more eerie and terrifying.

At this time, four Corpse Generals guarded the vicinity of this living tomb.

"Damn, how did those Immortal Sect people suddenly find this place?"

"So many people, are they going to investigate this mountain range?"

"Have all soldiers return, do not go outside!"

Currently, of their group of Corpse Generals, only four remain. Previously, it wasn't that no sects had wanted to establish a mountain gate here.

But those who wanted to establish a mountain gate were all slaughtered by them.

Because their king's, the Wu Immortal's, living tomb is here!

During the Minor Era of Inversion of Heaven and Earth, the Wu Immortal had built his living tomb here, and it was hidden enough that no one would find it.

But who could have thought that with the connection of the Eastern Wasteland and the Eastern Province, the spiritual energy in various parts of the Eastern Wasteland would change, and the spiritual energy here suddenly became so abundant.

For a time, many Immortal Sects came here wanting to establish mountain gates. If someone established a mountain gate here, they would be discovered sooner or later.

They could only use all kinds of methods to exterminate those who wanted to establish a mountain gate.

Fortunately, those wanting to establish a mountain gate, or the forces relocating their mountain gates, were not very strong, and they were easily dealt with.

But now, with these people arriving, what should they do?

If their king awakened, they would naturally be able to slaughter the intruders.

The problem is, their king hasn't awakened yet!

Now, they could only hope fervently that the explorers wouldn't discover their place.

Gradually, they began to hear commotion.

"Such a dense death energy..." Star Lord Hao Yue sensed the waves of death energy and advanced quickly, soon arriving in front of a cave.

"There are obvious signs of activity here, even traces of concealing the death energy. Is this death energy from those Zombie Soldiers or Corpse Generals?"

Star Lord Hao Yue glanced at the cave, not notifying others, and flew directly inside. As a reincarnated one with Great Ability, he need not fear those Zombie Soldiers or Corpse Generals.

Chapter 1718:

He's also heard of the legend of Martial Immortal, but no matter how strong the Martial Immortal is, he's still just a mortal. He's also heard that the Martial Immortal once defeated a disciple of the Grandmaster Earthly Immortal Realm.

But so what?

Perhaps the Martial Immortal merely beat an ordinary Earth Immortal in the Longevity Period.

As soon as he entered the cave, a strong sense of death surged towards him, evidently emanating from deep within the cave.

"This cave is truly a hidden world. It even has an underground river, which makes it suitable to be transformed into a Cave Mansion. Once we build our sect here, I can transform this place into my sect."

Star Lord Hao Yue, walking forward while pondering where they should establish their Thousand Caves Door after forming the new sect.

Everyone is searching here now, also with ideas of deciding the location for their own sect.

After all, when the time comes, everyone's sect will still be there, each must choose a place, and these places need to be decided ahead of time, as choosing a place afterwards might lead to dissatisfaction and conflicts.

Star Lord Hao Yue moving forward, quickly realized that the deeper along the underground river, the denser the sense of death.

Deep within the underground river, four Corpse Generals feel the aura of the living nearing, each of their expressions becoming extremely serious.

"Someone's coming in."

"Their aura is strong, it must be an existence of the Indestructible Period!"

"What should we do?"

"Charge out, no matter what, we can't let him enter here to discover the King's Tomb!"

With the lead of the four Corpse Generals, the remaining soldiers quickly charge towards the exit of the cave, causing a chaotic sound of footsteps to echo inside the cave.

Soon after, the figure of a group of Zombie Soldiers appeared before Star Lord Hao Yue.

"So it's those Zombie Soldiers. Previously, Cao Zhen mentioned that these Zombie Soldiers and Corpse Generals were almost completely taken care of, leaving only a final force, which must be these Zombie Soldiers and Corpse Generals. Good, exterminating them serves as a small gift for Cao Zhen, who as the State Preceptor of the Guardian Immortal Imperial Dynasty, has always wanted to eliminate these Zombie Soldiers and Corpse Generals."

Star Lord Hao Yue feels the waves of death emanating from these soldiers, an Immortal Mountain emerging behind him, and a curved moon appearing at the top of the Immortal Mountain. The already dark cave grows even darker, as if suddenly changed from day to night, and the only light source is that crescent moon on Star Lord Hao Yue's Immortal Mountain.

The next moment, moonlight fell down, soft moonlight showering upon the soldiers who then exploded with a roar.

He is now an existence in the Early Indestructible Stage, while these Zombie Soldiers are merely Golden Core Stage, some not even reaching Golden Core Stage—is it possible for them to withstand him?

The next moment, however, a Corpse General suddenly leaps from the side, wielding a massive horse-cutting blade and slashes at Star Lord Hao Yue.

"Hmm?"

Seeing the falling blade, Star Lord Hao Yue's eyes show a trace of surprise; this Corpse General's aura is nearing the Golden Core Period Limit.

A Corpse General capable of reaching this level is indeed rare.

However, close to the Golden Core Period Limit or even at the Golden Core Period Limit is not much in his eyes; what is truly surprising is this blade.

The ordinary blade falls, yet within this blade there seems to be a feeling filled with variations.

This sword technique ranks top in the Earth Immortal Realm. Within the Thousand Caves Door where he resides, many people cultivate sword technique, but when it comes to sheer sword technique, within the Thousand Caves Door, it's unlikely to find three people whose sword technique is even more exquisite than this Corpse General's.

Facing this blade, Star Lord Hao Yue even bent his fingers, pointing at the Corpse General before him.

Instantly, a black silver light flickered.

The flying Corpse General almost reached Star Lord Hao Yue when the silver light landed on him, producing a muffled sound.

The entire body of the Corpse General exploded with a roar.

The difference in cultivation realm is too vast.

Almost immediately as the Corpse General exploded, three additional Corpse Generals rushed out.

Three Corpse Generals, all equivalent to beings of the Longevity Period.

Star Lord Hao Yue feels the aura of the three Corpse Generals, filled with doubt. These three obviously have neither Immortal Mountain nor Demonic Mountain, yet they emit power equivalent to the Earth Immortal Realm?

Staring at the three Corpse Generals before him, he waved his hand again, in a moment, consecutively pointing thrice towards them.

Immediately, three silver rays shot out, charging straight at three different Corpse Generals.

Yet these Corpse Generals, faced with his attack, did not evade but simultaneously brandished the weapons in their hands.

Instantly, a black aura emerged from the long spear, long staff, and sharp sword in the hands of the Corpse Generals.

The next moment, the black aura shot out, colliding with the silver rays released by Star Lord Hao Yue.

Suddenly, a crisp explosion sound echoed in the underground cave, the booming sound even triggered waves of echo.

Star Lord Hao Yue's eyes showed a clear astonishment; his attack was blocked by the opponents?

Though he hadn't used his full strength earlier, the attack he released was a spell attack, powered by immortal energy!

Chapter 1719: The Mortal Immortal

Moreover, he could feel that the power condensed from the weapons of these three Corpse Generals... was neither Demonic Qi nor immortal energy, but another unique power.

Is this the True Qi of the mortal world? It's truly miraculous, capable of even blocking Indestructible Period power!

Star Lord Hao Yue looked at the three Corpse Generals, who had blocked his attack and yet continued to charge toward him rapidly. His whole aura suddenly surged, sending waves of cold breath rushing out in all directions.

In an instant, the underground river that had been flowing nearby solidified, freezing into a block of frost.

In the void, snowflakes appeared, and large patches of frost emerged on the cave walls.

At that moment, it seemed as if the entire space within the cave was frozen.

A layer of frost appeared on the bodies of the three Corpse Generals, even on their weapons. Their advancing movements slowed accordingly.

In the next moment, the crescent moon on Star Lord Hao Yue's Immortal Mountain suddenly shot out, transforming into a crescent blade that seemed to emerge from the moon in the void.

The crescent blade sliced through, instantly cutting the entire space open, with tears in the air revealing distinct black cracks. The blade's light passed over the three Corpse Generals, causing their heads to successively fly off and fall to the ground.

Star Lord Hao Yue gazed at the three dead individuals, a faint smile of interest appearing on his face.

"Interesting, truly interesting. Clearly, they lack immortal energy and Demonic Qi, yet they can reach such a level. It seems that their weapons are merely Divine Weapons and cannot utilize Treasures due to the absence of immortal or Demonic Qi.

They are like this, so the Martial Immortal of the past must have been even stronger.

Without Treasures, they suffer significant disadvantages when facing other Earth Immortal Realms, and earlier, when I cast a spell, they were also affected and momentarily froze.

So, they don't have many ways to deal with spells either.

Yet, according to legend, the Martial Immortal was able to defeat the Grand Preceptor's Disciple back then. How did he achieve that with so many disadvantages?

To what extent did he have to cultivate his True Qi?"

Star Lord Hao Yue completely ignored the three corpses on the ground and continued to move forward, sensing an even denser Death Aura and death energy ahead.

He proceeded along the dark river, and gradually, a tomb appeared before his eyes. The rich death energy and Death Aura emanated from this living tomb.

"A living tomb? Could it be the legendary living tomb of the Martial Immortal? Has the Martial Immortal not awakened yet? This means that his power at least reached the last layer of the Earth Immortal Realm, the level of the Immortal Path Domain.

But the Immortal Path Domain is formed by consolidating one's immortal power or Demonic Qi into a domain. Can True Qi also form a domain?"

Star Lord Hao Yue raised his hand and struck the living tomb before him with immense power, causing it to shatter explosively.

The next moment, a voice filled with countless savagery, brutality, and dominance echoed from the living tomb.

"Who is it? Who dares to open my living tomb before this king awakens, die!"

As the final word "die" sounded, a disheveled figure appeared in his sight, holding a Sharp Sword and thrusting it towards him.

Almost at the same time, a pressure suddenly descended in the void, filled with a noble and inviolable aura.

Heavenly Dao Pressure!

Even though the Martial Immortal had not cultivated immortality, nor was he a Demonic Cultivator, since his power reached the level of the Immortal Path Domain, he was subjected to the suppression of the Heavenly Dao when he emerged from the living tomb.

Star Lord Hao Yue watched the descending sword before him, his pupils constricting uncontrollably. Having been a Great Ability in a past life and now, a True Immortal existence, he had seen many masters and too much Swordsmanship.

But this sword before him, just Swordsmanship, gave him the illusion that this was the most exquisite sword he had seen in his past and present lives.

This sword looked ordinary, just a simple thrust, yet it gave him an illusion that it contained endless variations.

It also made him feel that, no matter how he dodged, he could not evade this sword.

This sword further gave him the illusion of being one with that space, with all things under Heaven.

It seemed that all Swordsmanship in the world ought to be performed in this way!

In an instant, the sword had reached his front.

Startled, Star Lord Hao Yue suddenly swung a crescent blade from his hand to block the descending sword.

In the next moment, his eyes suddenly widened. His blade was clearly in the path of the opponent's descending Longsword.

The opponent, after all, was influenced by the Heavenly Dao and couldn't be faster than him, now in the Early Indestructible Period.

But for some reason, just as his blade was about to meet the opponent's Sharp Sword, he felt no sensation of weapons clashing on his crescent blade.

The opponent's sword seemed to veer slightly, or perhaps phased through his crescent blade, aiming towards his chest.

What kind of Swordsmanship is this!

The immortal power within Star Lord Hao Yue surged to the extreme, and he rapidly retreated backward. Simultaneously, a sound of thunder echoed in the void, with a golden thunderbolt crashing down heavily on the Martial Immortal before him.

Chapter 1720:

In an instant, a thunderous explosion erupted, and the entire body of the Martial Immortal shattered at this moment.

He was obliterated by the Heavenly Dao!

Star Lord Hao Yue gazed at the shattered corpse before him and looked down at his own chest. A bloody hole had seemingly appeared there at some unknown time, with crimson blood flowing out.

"Just now, I was stabbed? I clearly dodged that sword strike of his, so how did I still get hit?"

He recalled the sword that the Martial Immortal had thrust out moments ago, and his heart was filled with dread.

This was the swordsmanship unleashed under the Heavenly Dao's suppression. If the Martial Immortal had not been suppressed by the Heavenly Dao, then what?

Moreover, if the Heavenly Penalty Thunderbolt had descended a bit slower, what would have happened?

Now, he finally understood why the Grand Preceptor had to intervene to defeat the Martial Immortal back then!

"Such talent is truly astonishing. Even without practicing Immortal Cultivation, he managed to reach this level. If he had cultivated immortality and trained in such swordsmanship, to what heights could he have reached?

Perhaps, if he had cultivated immortality, the title of the Eastern Wasteland's greatest expert would not belong to the Grand Preceptor but to him instead!"

Star Lord Hao Yue glanced at the burial grounds and stepped into them. Whether a cultivator or a demonic cultivator, they would lay down formations in their burial grounds and leave behind the treasures they commonly used.

However, this Martial Immortal was neither a cultivator nor a demonic cultivator. He was somewhat curious about what the Martial Immortal's burial grounds might contain.

Compared to normal burial grounds, this one had no formations, nor were there any treasures inside. All that was there were a variety of sharp swords.

There were short swords, longswords, broadswords, and even fine swords, some of which were broken. In short, there were many kinds of swords.

Each sword was embedded into the ground.

Apart from the swords, the only other item in the burial grounds was a book.

"Is this his martial path? But how much can be recorded in a book?"

Star Lord Hao Yue gently shook his head. In the early stages of immortal cultivation, divine skills and some cultivation techniques were still recorded in books.

However, once reaching the Earth Immortal Realm, books could no longer adequately record the content of cultivation techniques, let alone spells; only the Divine Thought of an adept could preserve them.

One book, he really looked down on it.

However, curiosity got the better of him, and he opened the book, soon immersing himself deeply in it.

Unknown of how long had passed, it was only when a voice called out that he woke up.

"I wonder which Dao Companion is inside?"

Star Lord Hao Yue heard footsteps and quickly stowed the book away before flying out of the burial grounds. In front of him, a few Earth Immortals from the Divine Occurrence Sect had already descended.

"Oh? So it's Star Lord Hao Yue." Upon casting a glance at Star Lord Hao Yue, their gazes immediately landed on the burial grounds, curiosity aroused: "Just..."

"This is the Martial Immortal's burial ground. You all should have heard of the Martial Immortal. Unexpectedly, his burial ground is established here."

While speaking, Star Lord Hao Yue swept his eyes around, then raised his hand to gather up the remains destroyed by Heavenly Dao thunderbolts, sending them into the burial grounds.

He held no grudge against the Martial Immortal, nor was he interested in judging his character or thoughts, but he admired the Martial Immortal's strength, respected his talent!

Never did he imagine that a mere mortal could reach such a realm, especially after perusing the Martial Immortal's martial arts book, increasing his respect for the Martial Immortal exponentially.

He was a reincarnated great ability, and after reincarnation, he only admired one and a half people.

One of them was Cao Zhen.

It was suspected that he was a stronger reincarnated great ability, and he even wondered if Cao Zhen's previous incarnation was the legendary Golden Immortal!

And the other half was the Grand Preceptor.

Now, however, he had a third person to admire—the Martial Immortal.

It was out of respect that, even though the Martial Immortal was struck down by the Heavenly Dao, he still laid him to rest in the burial grounds.

Besides, he obtained the martial arts book of the Martial Immortal, although he practiced the sword technique and not swordsmanship.

Yet within the Martial Immortal's book was his very understanding of the martial way, which was a completely different interpretation from the cultivators of the immortal and demonic paths.

Or rather, cultivators and demonic cultivators mainly focused on researching spells, and even with sword techniques and swordsmanship, they leaned towards the direction of spells.

The Martial Immortal's martial arts, however, were purely martial arts.

This understanding, regardless of whether one was training in sword techniques, swordsmanship, or even spear techniques and others, was highly beneficial.

"Martial Immortal? Helian Baitian?"

"His burial ground is here. No wonder the spiritual energy here is so abundant, yet no Immortal Sect has been established in this place.

It seems not that no one wanted to establish a sect here, but anyone who tried was slain by the Martial Immortal's zombie soldiers and corpse generals."

"He died? Killed by the Heavenly Dao? It is unexpected that such a figure would ultimately fall at the hands of the Heavenly Dao."

The people from the Divine Occurrence Sect instantly understood, observing as Star Lord Hao Yue put the Martial Immortal's body into the burial grounds, yet did not ask why he did so.

Nor did they enter the burial grounds either, since Star Lord Hao Yue had just flown out of it, evidently having taken some treasure left by the Martial Immortal in his burial grounds.

There was no need for anyone to voluntarily disclose what treasures they had obtained.

After checking out the area briefly, they quickly left and each returned to their respective sects, waiting for Cao Zhen to refine pills and construct new sects afterward.

After returning, Star Lord Hao Yue engaged in the continuous study of the Martial Immortal's martial arts book.

On Four Treasures Peak, Yi Sheng sat by his master's side, assisting him in refining Pills, while his master, already immersed in meditation.

"Star Lord Hao Yue has finally accomplished something worthwhile."

Through the China Cloud, Cao Zhen observed Star Lord Hao Yue, focusing on the martial arts book in front of him!

Long ago, through China Cloud, he had connected to Star Lord Hao Yue, and apart from their initial encounter at the grand martial arts tournament among the immortals, defeating Star Lord Hao Yue, there was nothing significant he benefited from.

Finally, the opportunity to gain benefit effortlessly had arrived.
