

My Master 2031

Chapter 2031

The group furrowed their brows tightly. An Immortal Mountain at the Late Immortality Regainment Realm reaching a height of two thousand zhang is considered normal.

The problem is, their Sect Hierarch's Immortal Mountain is eighteen hundred zhang high, just as Linghu Gudu said, unless the Immortal Mountain surpasses their Sect Hierarch's by more than five hundred zhang, there's no possibility of defeating the Sect Hierarch.

The Sect Hierarch's Immortal Mountain is not just a simple mountain range, it's overwhelmingly majestic; there are numerous peaks!

Moreover, the Sect Hierarch has many techniques at his disposal.

Unfortunately, the Immortal might not be a match for the Sect Hierarch.

The Immortal looked at everyone and knew what they were thinking; she was helpless. She knew her Immortal Mountain, reaching a height of two thousand zhang, was not considered exceptionally talented.

Those geniuses could achieve a two thousand zhang Immortal Mountain by Mid Immortality Regainment Realm.

Yet, she was merely at a normal level. Who would have thought that one day, she would face someone with an Immortal Mountain smaller than hers, and yet, even without a confrontation, she felt she wasn't a match for the opponent.

"Actually, it's not without opportunity," someone suddenly spoke, "Although the Sect Hierarch's Immortal Mountain is terrifying, he is, after all, just an Early Immortality Regainment Realm. His Immortal Qi is still somewhat lacking, especially compared to the Late Immortality Regainment Realm; there's still a Mid Immortality Regainment Realm gap in between.

Therefore, the Immortal still has a chance to defeat the Sect Hierarch."

"Yes, indeed, the Immortal is at the Late Immortality Regainment Realm, her comprehension is also better... In short, the Immortal has a chance. I wonder if the Immortal would be willing to give it a try?"

The Immortality Regainment Realm is divided into four phases; each phase has higher quality Immortal Qi and deeper comprehension.

However, their Sect Hierarch, Cao Zhen, is a reincarnated Great Ability, so this comprehension is uncertain, but at the very least, the Immortal's Immortal Qi is definitely stronger.

The Immortal remained silent.

Suddenly, a voice echoed.

"No need to try, she won't be a match for Master." Without waiting for the Immortal to speak, Ruo Yun Immortal proactively asserted. She knew what others might not.

After she had just entered Mid Immortality Regainment Realm, she could defeat the Immortal. Hence, even though her master was in Early Immortality Regainment Realm, defeating the Immortal wouldn't be difficult.

Upon hearing this, the Immortal immediately nodded and said, "In that case, I won't attempt it." Why try?

Since Ruo Yun claimed she certainly wasn't a match, she definitely wasn't a match.

Everyone was truly helpless now; they had no solutions left.

After Cao Zhen departed, he did not immediately return to his Cave Mansion but sought out Absolute-Formation.

"In our previous discussion, you hadn't answered before being interrupted. Namely, regarding the nearby Great Teachings known for their proficiency in poison. This time, as we head to the Outer Heaven Battlefield, dealing with the Insect Clan is inevitable; certain Beast and Demon Clans also excel in poison, so I'm planning to make some preparations in advance.

However, the materials used for poison, aside from specialized poison Great Teachings, are not something ordinary Great Teachings possess, so I plan to exchange some materials."

With one month left, Absolute-Formation, being a True Immortal Realm entity, could easily make the journey if traveling at full speed.

"In the vicinity of the Eastern Wasteland, the Sacred Poison Sect in East Breeze is the only option. However, that Sacred Poison Sect is a Demonic Sect. Although the Demonic Sect is no longer in conflict with Grand Righteous Sect today, there's still a barrier between them.

Moreover, those Great Teachings specializing in poison need their poisons for use themselves. Their spells and cultivation techniques demand various highly toxic materials, and such materials are scarce compared to others, so they're in shortage.

Even if you wish to exchange resources with them, to them, those poison-making resources are the most precious. They're unlikely to exchange them with you."

"We still need to give it a try." Without sufficient resources, his Ten Thousand Poison Body would significantly suffer.

"In that case, if you plan to go, I'll accompany you." Their Extreme Formation Sect has almost decided on the group heading to the Outer Heaven Battlefield, and at the very least, she must go.

In the Outer Heaven Battlefield, there is no place for their formations, nor for others to obediently deliver themselves, making it difficult for Extreme Formation Sect members to leverage their advantages.

Being the only True Immortal Realm pursuing the path of Formation Map, she is least affected in the Outer Heaven Battlefield, hence she must be sent there. As for the other participant, they are still deliberating.

One month's time is still too brief for her; she even doubts whether the Supreme Elder and Sect Hierarch can gather the materials for refining the Seven Stars Seven Changes Formation.

Upon learning that Cao Zhen entrusted her with the Seven Stars Seven Changes Formation suitable for her Immortal Body type, the Sect Hierarch and Supreme Elder committed to gathering the necessary materials.

But some materials are beyond the reach of Extreme Formation Sect; they must seek exchanges with other Great Teachings using other resources.

This kind of exchange isn't particularly uncommon within the Great Teachings.

After all, each Great Teaching has limited materials, especially the precious ones.

So they must seek exchanges, and naturally, if you proactively approach others, you will inevitably need to bear some additional costs.

Chapter 2032

However, their Extreme Formation Sect is quite fortunate, as they specialize in refining formations. Many great sects have sought their help in creating formations, and they have formed quite a few alliances with major sects, many of whom owe them favors. At such times, those major sects, if they have resources the Extreme Formation Sect needs, would be embarrassed to make exorbitant demands.

But even if all the resources were gathered, it would be impossible for her to refine the Seven Stars Seven Changes Formation in such a short time.

What's more, not to mention she happened to have nothing to do, even if she had urgent business, if Cao Zhen was going out, she would have to escort him all the way.

She just felt that Sect Leader Cao was probably going to be disappointed this time. Besides the reasons she mentioned, there was another one: the people of the Sacred Poison Sect are very reclusive and extremely sinister. Although they are a Demonic Sect, they give no regard to many other Demonic Sects.

They don't even care about the Demonic Sects of the Central Continent, let alone the Hundred Peaks Sect from the Eastern Wasteland. So even if Cao Zhen is the Sect Leader, he is likely to make a futile trip.

Cao Zhen still remembered the time during the Minor Era of Inversion of Heaven and Earth when he wanted to enter places like East Coolland from the Eastern Wasteland, not knowing how much time it would cost.

But now, with Absolute-Formation leading him, he had entered East Coolland in just one day.

Counting it all, places like the Eastern Wasteland, Eastern Border, and East Coolland, the most desolate now is East Coolland. After all, when East Coolland attacked their Eastern Wasteland back then, it instead faced a counterattack from the Eastern Wasteland, and one sect after another in East Coolland suffered heavy losses.

They initially didn't recover, and then the Demon Sects of the Eastern Province entered East Coolland, and many of the Demon Sects that were originally attacking the Eastern Wasteland, after being expelled, also entered East Coolland. At that time, no one knew how many sects in East Coolland were extinguished.

Of course, for this reason, now within East Coolland, there are a lot more major sects and sects from the Central Continent compared to the Eastern Wasteland.

After all, those sects were extinguished, leaving sect entrances vacant, so those major sects and sects from the Central Continent, especially those great sects, directly chose a sect entrance.

Generally, these sect entrances are shared by two major sects or several sects.

But for the sect entrance where the Sacred Poison Sect is located, it's shared by one great teaching and one sect.

Under the guidance of Absolute-Formation, Cao Zhen quickly found the entrance to the Sacred Poison Sect, and soon, a great teaching appeared in his sight.

The sect entrances of ordinary great teachings are all built along mountains, and the site of the sect entrance is also surrounded by walls.

However, at the sect entrance of the Sacred Poison Sect, there were no walls at all but abysses, and within the abysses crawled scorpions, snakes, centipedes, and other poisonous creatures.

And on the ground above the abyss, various poisonous grasses grow, some glowing with a jade-blue light, some pitch-black, and others multicolored.

In the place where there should have been walls, there were huge trees that, unlike ordinary green trees, were utterly pitch-black.

From afar, before even flying to the Sacred Poison Sect's entrance, a stench was already emanating in the air.

Immortal Lord Jue Zhen raised her hand, waving it in front of her, and instantly, a golden halo appeared around her and Cao Zhen, isolating the outside air, and the stench instantly dissipated.

Immortal Lord Jue Zhen whispered to Cao Zhen, "Sect Leader, the Sacred Poison Sect, their sect entrance is arranged with various poisonous creatures and grasses, and within their great teaching, they also plant diverse poisonous plants and breed different poisonous creatures. When their disciples cultivate, they also produce various poisonous gases.

For this reason, other great teachings, whether a Demonic Sect or a Grand Righteous Sect, cannot bear sharing a sect entrance with the Sacred Poison Sect.

The only ones who can tolerate it are other poison sects and poison teachings, and it seems that nearby, there's only one great teaching like the Sacred Poison Sect, so the one sharing the sect entrance with them is another sect that uses poison, not a great teaching."

While speaking, Absolute-Formation brought Cao Zhen down in front of the Sacred Poison Sect's entrance, directly transmitting a message saying, "The Hundred Peaks Sect Leader and Immortal Lord Jue Zhen from the Extreme Formation Sect are here for a visit."

At the Sacred Poison Sect's entrance, the disciples responsible for guarding listened to these unfamiliar names, and for a moment, they were somewhat bewildered.

They naturally knew the Extreme Formation Sect, but the problem was they had no dealings with the Extreme Formation Sect, and the formations of their Sacred Poison Sect were all set up by themselves; they never sought the Extreme Formation Sect for help in any formation. So why would someone from the Extreme Formation Sect suddenly visit their Sacred Poison Sect?

As for the Hundred Peaks Sect?

They vaguely saw someone undergoing Heavenly Tribulation previously and knew that the person undergoing it was from the Hundred Peaks Sect, and it seemed that the other party was still the sect leader of the Hundred Peaks Sect.

Hundred Peaks Sect Leader...

Is it the person in front of us?

This person just finished undergoing the Heavenly Tribulation and then immediately rushed to their Sacred Poison Sect. Why?

What's more, given that the Thistle Sect has just issued a recruitment order, he, as the sect leader, shouldn't he be stationed within the Hundred Peaks Sect? Why is he running around at this moment?

Everyone was puzzled, but the person guarding the sect entrance still cupped his hands toward the opposite side and said, "Please wait, we will notify them."

Though their Sacred Poison Sect has no interactions with these great teachings and he didn't particularly want to deal with people from these major sects, since a sect leader and someone from the True Immortal Realm had come, he needed to be courteous.

Otherwise, if he rashly drove them away, it would be clear that they looked down on others, and if these two major sects sought trouble, the Thistle Sect would definitely side with them.

Chapter 2033 Grand Opening of the Mountain Gate

However, he was merely being polite. Most likely, it would be the Vice Sect Hierarch coming forward, claiming that the Sect Leader was in seclusion.

"Notify..."

He turned around, just about to say to find the Vice Sect Hierarch.

Suddenly, within their sect, a group of people flew over, and immediately, his eyes widened.

It was their Sect Leader!

The Sect Leader actually came in person!

Not only the Sect Leader, but even the Supreme Elder, who was said to have been in seclusion ever since they arrived at East Breeze and hadn't appeared in front of everyone, also flew over. Following them were several experts from their Sacred Poison Sect.

A total of seven people, all seven True Immortal Realm experts of their Sacred Poison Sect were present. What was happening!

Did the Sect Leader and the others sense the opponent's presence and fly over?

But even so, there was no need to give the opponent so much face, bringing everyone here, even the Supreme Elder was mobilized!

While he was still in shock, the voice of the Sect Leader rang out.

"What are you standing there for? Open the mountain gate wide!"

Open the mountain gate wide!

The disciple responsible for guarding the mountain gate acutely noticed that the Sect Leader instructed to open the mountain gate wide, not merely open it.

The mountain gate has many gates, and the largest one is only opened when their sect members go on an expedition, like a month later when they will set out for the Outer Heaven Battlefield. At that time, the mountain gate will definitely be opened wide.

Another occasion would be when a distinguished guest arrives.

A Family Head of a Great Teaching is indeed prestigious, but when other Sect Leaders visit, as long as the Sect Leader greets them, it suffices. There's no need to open the mountain gate wide.

Moreover, the opponent is merely from a minor Great Teaching in the Eastern Wasteland.

Although the disciples at the mountain gate of the Sacred Poison Sect were puzzled, they still followed the orders to open the mountain gate wide!

As the mountain gate opened wide, the Sect Leader of the Sacred Poison Sect also stepped forward, clasping hands toward Cao Zhen's direction, saying, "Greetings to the Hundred Peaks Sect Leader, Dao Companions, please come in."

"Greetings to the Sacred Poison Sect Leader." Cao Zhen also clasped his hands in return. At this moment, it was undoubtedly the voice of the other sect's leader. As he flew towards the mountain gate, he curiously glanced at Immortal Lord Jue Zhen beside him. Was this the so-called reclusive and eccentric Sacred Poison Sect?

The others even opened the mountain gate wide and came forth in numbers to greet them. This didn't seem eccentric at all!

Immortal Lord Jue Zhen sensed Cao Zhen's gaze and was equally puzzled, why were the Sacred Poison Sect people so polite?

Could it be...

That the Sacred Poison Sect also knew Sect Leader Cao was the reincarnation of a Daluo Golden Immortal?

Otherwise, there was no logical reason to explain why the Sacred Poison Sect people became so enthusiastic.

The Sect Leader of the Sacred Poison Sect, while flying towards the mountain gate, proactively asked, "Sect Leader Cao, may I know what brings you to our Sacred Poison Sect this time?"

"I indeed have some matters I wish to seek your assistance with." Since the other party had already spoken, he directly addressed it, "The recruitment order, I believe the Sacred Poison Sect Leader has seen it.

I have encountered those six great alien races, among which the Insect Clan, Demon Clan, and even some Beast Clan specialize in using poison. Our disciples of the Hundred Peaks Sect will also enter the Outer Heaven Battlefield, so I wish to prepare in advance and refine some pills.

Since this is targeted at poison pills, there are some herbs that our Hundred Peaks Sect does not possess. After much thought, your sect might have those resources, so I have come forward without formalities."

"I see. Sect Leader of the Hundred Peaks Sect, please feel free to mention any herbs you need." The Sacred Poison Sect Leader nodded courteously. He had also heard that the Sect Leader of the Hundred Peaks Sect excelled in alchemy. Understanding their interest in preparing some pills, he consented readily.

No matter what, this time, they were seeking help from the other party. For pills that could be completed within a month, not many materials would be used anyway, so he agreed without much thought.

Although their Sacred Poison Sect also lacked various poisons, the other party was certainly the reincarnation of a Daluo Golden Immortal. Getting a favor from a Daluo Golden Immortal was indeed a rare opportunity.

Initially, after their arrival at East Breeze, even though they seldom interacted with outsiders, they had heard of Sect Leader Cao Zhen of the Hundred Peaks Sect, knowing he was a great ability in reincarnation, yet they didn't care much.

What of a great ability in reincarnation? How would it concern them!

Until earlier, a True Immortal Realm from the Beast Taming Sect notified their Grand Elder of this news.

Though they rarely engage with others, it wasn't entirely so.

Their Grand Elder and a True Immortal Realm expert from the Beast Taming Sect were life-and-death acquaintances, yet very few were aware of this.

Then they discovered that Cao Zhen was indeed a reincarnation of a Daluo Golden Immortal. The message was confirmed to be accurate because Cao Zhen had shared many secrets and paths of the Grand Dao beyond the reach of True Immortal Realm. Even the Sect Guardian Beast of the Beast Taming Sect confirmed that Cao Zhen was truly a Daluo Golden Immortal reincarnate!

The reincarnation of a Daluo Golden Immortal is entirely different!

Their Sacred Poison Sect also produced Golden Immortal Realm experts, even two of them, one being among the strongest in the Golden Immortal Realm. Yet a Daluo Golden Immortal had never emerged from their Great Teaching.

And that immensely strong Golden Immortal Realm expert even specifically mentioned the terror and awe of a Daluo Golden Immortal in many of his notes.

Now, with a Daluo Golden Immortal standing right before him, how could he not give the other party face and not cherish this opportunity?

Moreover, from the information he gathered, the Hundred Peaks Sect Leader was also extremely skilled in alchemy.

Chapter 2034

Although the Way of Poison is different from the Way of Pill Refinery, there is still a slight similarity. The counterpart is a person without sectarian bias, and if he could hear something useful from the other person, he might be inspired.

In many great teachings, the strongest individuals are the Supreme Elders, as those able to become Supreme Elders are undoubtedly of higher seniority and have lived longer.

With longer cultivation time, being able to survive longer, and having a better cultivation base, there's nothing external worth considering in this.

However, in their Sacred Poison Sect, the strongest person is himself, not their Supreme Elder. It's not that their Supreme Elder isn't strong; their Supreme Elder is also at the peak of the True Immortal Realm.

But he, however, is the peak of the peak in the True Immortal Realm!

In the words of the Supreme Elder, his talent in the long history of their Sacred Poison Sect should rank in the top ten.

This is already a very high evaluation.

After all, their Sacred Poison Sect has a history of over 1.8 million years.

With such talent, and given his current age, he has reached the peak of the peak in the True Immortal Realm. He is bound to strive for the Golden Immortal Realm.

He feels he has vaguely touched upon the path to the Golden Immortal Realm, but always feels somewhat lacking in how to proceed.

Now, as long as there is any possibility that allows him to make a breakthrough, he would want to try it out.

Even this time's recruitment, their Sacred Poison Sect needed to send two strong individuals in the True Immortal Realm to the Outer Heaven Battlefield. He firmly insisted on personally going to find a path to the Golden Immortal Realm.

After all, among those six major alien races, there is a race that uses poison; perhaps they can give him some insight, or perhaps there will be some fortuitous encounter in the Outer Heaven Battlefield.

And inquiring about alchemy or poison pill techniques from Cao Zhen might also inspire him, which is why he is so courteous.

Immortal Lord Jue Zhen was dumbfounded at how enthusiastic the Sacred Poison Sect Leader was, realizing that his understanding of a Daluo Golden Immortal reincarnate was far from enough!

Cao Zhen originally wanted to exchange some resources for the resources he needed, but this Sacred Poison Sect Leader was so polite, directly saying not to worry about money, making him feel quite embarrassed.

Mainly, he thought, when he really says the herbs he needs, the Sacred Poison Sect Leader would not waive the charge.

"Well... Sacred Poison Sect Leader, I need quite a lot of materials this time. So, how about this: check if your great teaching has some poison that hasn't been refined successfully and encountered problems. I can help solve it first, and then we can discuss these herbs."

He needs so many herbs, but if he insists on exchanging with other resources, others may not value them, and he would feel troubled. The best method is to directly trade with the resource in his mind!

Now, his understanding of the Poison Path is at level ninety-eight, solving the Sacred Poison Sect's poison-related issues is not a big deal.

The Sacred Poison Sect Leader was puzzled, wondering if the Hundred Peaks Sect Leader had seen through the issues in his mind when he said this.

Around them, each Sacred Poison Sect expert was also puzzled. They knew Cao Zhen was a great ability in the reincarnation of a Daluo Golden Immortal, but even as a Daluo Golden Immortal, doesn't mean you would be skilled in the use of poison, right?

The use of poison, while having some similarities with alchemy, is only slightly similar. The idea that they could solve any problem in their great teaching was stated with great confidence!

If the other party hadn't been a sect leader of a great teaching and a reincarnate of a Daluo Golden Immortal, they would've laughed aloud instantly.

Among the few, a man with a pale complexion and a blue spot on his forehead suddenly raised his eyebrows and said, "The Hundred Peaks Sect Leader is actually skilled in using poison? That's unexpected, but speaking of which, our great teaching has indeed been researching a poison recently."

As he spoke, he pointed to another person among the six True Immortal Realm individuals present, a younger-looking middle-aged woman: "This is my senior sister, Immortal Lord Qian Zhu. She is researching a poison that combines thousands of poison spiders and then integrates the poisonous energy into her body.

However, no matter how my senior sister cultivates, she always fails. I wonder if Sect Leader Cao has any suggestions?"

"Oh? Thousands of poison spiders, you say? What kind of spiders?" Cao Zhen immediately turned to look at Immortal Lord Qian Zhu. In this cultivation world, there are indeed many types of spiders,

potentially numbering in the tens of thousands, and most spiders are poisonous; gathering a thousand types isn't difficult.

And these users of poison, they don't simply refine various poison powders and scatter them around as a method of using poison.

They blend the poisonous energy into their bodies, and when they deploy it, others release celestial or demonic qi.

Immortal Lord Qian Zhu gave her junior brother a somewhat reproachful glance. Now with their sect leader talking with the Hundred Peaks Sect Leader, is this the time for him to interject? Moreover, doesn't her junior's words seem somewhat doubtful of the Hundred Peaks Sect Leader?

Also, the Hundred Peaks Sect Leader has just boasted greatly; if he can't solve their problem, where would the Hundred Peaks Sect Leader save his face?

He is, after all, a reincarnate of a Daluo Golden Immortal, a sect leader of a great teaching.

If they offend him, the sect leader would surely be upset!

But now that the Hundred Peaks Sect Leader already asked, she had to respond.

She could only muster the courage and say, "I used Dust Skull Spider, Illusion Evil Poison Spider..."

Immortal Lord Qian Zhu explained all at once the combinations she had used, which amounted to nearly four thousand types of spiders, not just a thousand. After failing to refine, she must have replaced some poison bases, but now she almost replaced every type of poison spider, yet in the end, it still failed.

Listening to Immortal Lord Qian Zhu, Cao Zhen immediately shook his head: "The first two poison spiders you mentioned are incorrect. The poison from Dust Skull Spider and Illusion Evil Poison Spider seems similar; even these two spiders share an ancestor.

But consider why they, coming from the same ancestor, eventually became two different species!

It's because their ancestor, the Two-faced Poisonous Spider, had two conflicting poisons within its body. Aware of this, it gave birth to two different descendants. As its descendants evolved, they gradually eliminated the conflicting poison within their systems."

Chapter 2035

Cao Zhen discovered that the use of poisons in this world today, or rather by the Sacred Poison Sect, is really not up to much.

Take, for example, the Immortal Lord Qian Zhu in front of us. There are too many issues with the poisonous energy she cultivates; it's strange her poisons could succeed!

"Besides the problems I just mentioned, there's the Gale Poison Huge Spider, the Toad Spider... their poisonous energies will interact with each other.

The poison from the Gale Poison Huge Spider and the Toad Spider doesn't interact, but when they encounter other Poison Spiders, the toxins within them will indeed affect each other."

Surrounding them, a group of Sacred Poison Sect experts listened as Cao Zhen effortlessly explained how the toxins of numerous Poison Spiders interact, wearing expressions of stupor.

The Hundred Peaks Sect Leader actually knows poisons, and knows them incredibly well.

Among the thousand types of Poison Spiders, there are some that even they are not very clear about.

After all, there are simply too many toxic creatures in the world; they couldn't possibly know all of them. However, they understand some of them, and what they understood seemed perfectly reasonable.

Moreover, if they don't understand, they could look at Immortal Lord Qian Zhu, who is an expert in researching Poison Spiders within the True Immortal Realm.

And now, Immortal Lord Qian Zhu was sometimes frowning, sometimes pondering, sometimes showing a look of sudden realization.

The key is, Cao Zhen didn't just point out the issues with the thousand Poison Spiders of Immortal Lord Qian Zhu, but also highlighted problems with many other Poison Spiders.

Among them, there are many Poison Spiders that seem fine in pairs, but mixing three or four types together can create issues.

Moreover, the most terrifying aspect is, he didn't just point out existing issues, but also straightforwardly suggested how to replace them with other Poison Spiders.

The crowd found some things difficult to understand, yet Immortal Lord Qian Zhu seemed to grow brighter-eyed as she listened. Suddenly, she furrowed her brow and interrupted Cao Zhen's discourse.

"Hundred Peaks Sect Leader, please wait a moment. I want to know, why use the Undying Hell Spider and Eight-faced Wolf Spider? These two spiders are not toxic at all."

People around also nodded; they couldn't understand much else, but they knew these two spiders have no toxic characteristics.

Cao Zhen didn't hesitate at all, immediately replying: "They indeed have no toxicity, but when they encounter the Flying Sky Poison Spider, the Sky Catching Poison Spider, and the Eight-clawed Red Spider, they can produce a potent toxin. That's the reason for using these two Poison Spiders, to prevent the toxins from Gale Poison Huge Spider and Toad Spider from conflicting.

The myriad things in the world are not unchanging; many things that initially seem non-toxic or even greatly nourishing, when encountered with other nourishing materials, or entwined with poisons, can still be toxic.

Similarly, many toxins, when they meet other toxins, instead neutralize each other, becoming non-toxic.

Determining these intricacies demands prolonged research and experimentation."

Cao Zhen, like a teacher instructing students, looked around and said: "Therefore, whether in alchemy or cultivating poisonous energy, one should not rely solely on studying what predecessors have done, but also need to continuously research for themselves.

Only through constant research can progress be made."

Saying so, he quickly returned to discussing the Poison Spiders mentioned earlier: "Apart from these, the last five Poison Spiders exhibit similar properties; they appear non-toxic but under certain circumstances will release the toxins inside them, they are respectively..."

After Cao Zhen detailed each Poison Spider, he looked at Immortal Lord Qian Zhu and said: "This is merely my method, although it can succeed, it's not necessarily the most suitable for your Poison Spiders. Again, you need to continue experimenting, testing more combinations, and finding the combination most fitting for yourself, as each person's Immortal Body is different and everyone's cultivation technique is different."

"Understood, Qian Zhu is enlightened." Immortal Lord Qian Zhu said, bowing deeply to Cao Zhen; she genuinely didn't expect Cao Zhen to be so proficient in toxic arts.

Although she hadn't tried it yet, relying solely on the theory Cao Zhen presented, she felt there wasn't a single flaw in what he said.

Around them, everyone was similarly stunned; this Hundred Peaks Sect Leader genuinely understands poisons, even beyond comprehension.

The Poison Spiders discussed by the Hundred Peaks Sect Leader earlier add up to over four thousand types, and within them lie countless neutralizing and conflicting interactions; many will negate each other's toxicity, and there are Poison Spiders which might remain unaffected by pairing, but adding a third will have repercussions.

Some Poison Spiders seem to conflict, but adding another negates the conflict, yet adding another might impact the predetermined spiders.

These thousand Poison Spiders can't just be casually thrown together and cultivated or refined into poisonous energy.

Even if nine hundred ninety-nine Poison Spiders were assembled perfectly, adding the last one could affect countless others and require reassessment.

But the Hundred Peaks Sect Leader, upon hearing the poisonous energy Immortal Lord Qian Zhu wanted to refine, immediately offered a solution.

This truly is mastery of the toxic arts!

And this is just with Poison Spiders; might the Hundred Peaks Sect Leader be proficient with other poisons too?

The crowd, considering all this, quickly started to voice their own concerns, saying, "Hundred Peaks Sect Leader, I have a problem too; I'm cultivating a type of poisonous energy..."

Chapter 2036

"Sect Leader, when I circulate my poisonous energy, it never feels particularly smooth!"

"Hundred Peaks Sect Leader, I wonder if you could..."

In no time, everyone lost their True Immortal Realm composure, crowding around Cao Zhen, voicing their problems.

"Don't worry, one at a time, speak slowly. You first, you say your poisonous energy circulation is not smooth, correct? Then there are three possible causes: one is an issue with your cultivation technique, another could be a problem with your body, and the last possibility is that the poisonous energy you're studying has an issue.

We'll analyze these three possibilities one by one. So, your problem is an issue with your body; it conflicts with your poisonous energy. This issue can be resolved by refining a pill.

However, that pill will take some time, roughly around two years. I have a disciple who is exceptional at alchemy, her gift surpasses even mine. At that time, I can have my disciple refine it for you, but as for the medicinal ingredients needed, our Hundred Peaks Sect can't gather them."

"What is your problem? You are also refining a type of energy, but you feel the power isn't strong enough, correct? You could do it like this..."

Cao Zhen helped the experts of the Sacred Poison Sect one by one, solving the difficulties and problems they encountered.

The experts of the Sacred Poison Sect became increasingly surprised the more they listened. Some, like Immortal Lord Qian Zhu, had their problems already solved, but they didn't leave right away; they stayed to hear how Cao Zhen helped others solve their problems.

It's a rare opportunity, even if others' problems aren't their expertise or something they can't fully understand, the more they comprehend, the more they learn.

The crowd grew more astonished the more they listened, suspecting with their divine senses whether the Hundred Peaks Sect Leader before them had achieved the Daluo Golden Immortal through the Poison Path in a past life!

Primarily, because this Sect Leader Cao possesses an overwhelming amount of knowledge.

Even the shocking knowledge Cao Zhen reveals surpasses what any Golden Immortal Realm expert who has taken the Poison Path could grasp!

After all, the Sacred Poison Sect has also had Golden Immortal Realm beings, and the knowledge and cultivation techniques they left, along with methods for cultivating poisonous energy, are all preserved within the Sacred Poison Sect. Yet, even so, they've encountered so many problems; evidently, this Hundred Peaks Sect Leader is more terrifying in terms of poison mastery than those Golden Immortal Realm figures!

Only when everyone finished asking did the Leader of the Sacred Poison Sect speak up, "Hundred Peaks Sect Leader, I've heard you're a reincarnated great ability; I dare to ask, did you achieve the Daluo Golden Immortal through the Poison Path in your previous life?"

Upon hearing this, Cao Zhen instinctively shook his head. The Daluo Golden Immortal he fabricated was an old fellow named Lao Zhang, who wasn't someone who achieved with the Poison Path.

But he quickly recalled Qin Yuan, who had recently joined, and he was indeed a Daluo Golden Immortal who mastered the Poison Path, so saying he himself did would not be wrong.

Thinking of this, he nodded once more, his face mysterious as he said, "You could say so, and you could say not.

However, now, as the leader of the Hundred Peaks Sect, I am who I am, no longer my past self, so I prefer not to speak too much of my previous life."

Beside him, Immortal Lord Jue Zhen was visibly surprised upon hearing this. Their Extreme Formation Sect shares the same mountain gate with the Hundred Peaks Sect, making it unavoidable to discuss Sect Leader Cao, and they're most curious about what path Sect Leader Cao took in the past life.

Because the current life of Sect Leader Cao seems capable of everything, they've had many guesses. They speculated that Cao Zhen might have achieved via the Alchemy Dao, as many from Hundred Peaks Sect mentioned his greatest expertise was in alchemy.

Others speculated Cao Zhen didn't take the Alchemy Dao path but followed the traditional cultivation path instead.

Some even guessed whether Sect Leader Cao achieved through formations.

But they never thought Sect Leader Cao would have taken the Poison Path!

If he took the Poison Path, then Cao Zhen's greatest skill should be poison, yet in this life, before now, Cao Zhen never treaded the path of Poison Skill.

Is he avoiding ties with his past to walk a completely different path?

Or is it that Cao Zhen avoids using poison because it's too cruel?

Also, what does it mean when Sect Leader Cao says it could be through the Poison Path, and yet could not?

At one moment, Jue Zhen couldn't see through his pathfinder.

The Leader of the Holy Pill Sect was also puzzled; no one achieves the Dao through two paths, historically, it's always one path.

The Hundred Peaks Sect Leader's past must be no exception; it's just unclear how he achieved the Dao and why he says it could be either way.

But since the Hundred Peaks Sect Leader mentioned not wanting to discuss his past life extensively, he couldn't inquire further.

Instead, he pondered his own circumstances.

Now, others have already consulted the Hundred Peaks Sect Leader; what about himself?

Though as a leader of a great sect, asking another about cultivation is not quite fitting.

However, the other party is a reincarnated Daluo Golden Immortal and a master of the Poison Path, and himself being just a True Immortal Realm, consulting a Daluo Golden Immortal is certainly justified!

The key issue is whether the other party would be willing to help him.

After all, others ask about specific problems, but his question pertains to his path forward—a different matter altogether.

Chapter 2037:

In the realm of cultivation, there are many experts who enjoy instructing others. Without mentioning distant ones, the recently appeared San Cai Sword Lord, who announced to the world the formation of an alliance in the Eastern Province, although stern, is also willing to give guidance. He knew that there were two loose cultivators in the True Immortal Realm who had received pointers from the San Cai Sword Lord.

However, when they guide others, it's usually about a specific issue in cultivation, like a problem in swordsmanship. Generally, no one directly points out the great path for others.

After everyone from the Sacred Poison Sect had asked their questions, the Sacred Poison Sect Leader stepped forward, a bit apprehensive, and said, "Hundred Peaks Sect Leader, I also have a question for your guidance."

Cao Zhen looked at the Sacred Poison Sect Leader in surprise. It's one thing for others to ask questions, but you, as a leader of a great sect, have questions too?

Oh well, after answering his question, I've answered quite a bit; by then, asking for those resources will be well-justified.

With a calm expression, he asked, "Oh, I wonder what the Sacred Poison Sect Leader wishes to ask?"

"It's like this, I've been at the peak of the True Immortal Realm for some time. I vaguely feel that I've touched upon the path to achieving Golden Immortal, but I always feel I'm just a bit short of it.

I wonder if you, senior, can provide direction."

Preparing to break through to the Golden Immortal Realm?

Cao Zhen felt deeply astonished. This Sacred Poison Sect Leader has something special. Counting it all, he should be the person with the highest cultivation I've ever encountered.

While surprised in his heart, his face remained impassive as he asked, "You always feel a bit short. Can you describe your feeling?"

"It's just that..." The Sacred Poison Sect Leader briefly explained his current situation.

The more Cao Zhen listened, the more astonished he became. This Sacred Poison Sect Leader truly possesses remarkable talent, and among all in the Sacred Poison Sect within the True Immortal Realm, he's not considered old.

He pondered slightly, and based on Qin Yuan's experience in immortal cultivation, quickly formed a judgment, and whispered, "I have two methods that can help you solve the problem.

The first method. I can, based on my past life's cultivation experience, directly guide you down a path, and even teach you two methods of cultivating poisonous energy. Once you master these two kinds of poisonous energy, you will naturally find your way forward. I guess it won't take five hundred years, and you'll be able to break through to become a half-step Golden Immortal. As for how long it takes to achieve Golden Immortal, that depends on your own comprehension and fortune.

However, given your talent, I believe breaking through to the Golden Immortal Realm is only a matter of time."

Around, the crowd gasped in astonishment.

Is this the profound foundation of a Daluo Golden Immortal?

The Sacred Poison Sect Leader, after so many years, never found a direction forward, yet the Hundred Peaks Sect Leader directly said he could enable him to achieve half-step Golden Immortal.

To them, a span of five hundred years is indeed very brief.

Probably, no one in the world today dares to claim they can ensure someone achieves half-step Golden Immortal, yet the Hundred Peaks Sect Leader said so, and moreover, he had two methods.

Upon hearing the words "half-step Golden Immortal," the Sacred Poison Sect Leader, despite being one of the top ten most talented individuals in Sacred Poison Sect's history, despite being a sect leader of a great sect, and standing at the peak among the True Immortal Realm, couldn't help but tremble slightly with excitement.

That's half-step Golden Immortal!

Though half-step Golden Immortal isn't quite the true Golden Immortal Realm, it's worlds apart from the True Immortal Realm.

Being able to achieve half-step Golden Immortal means having found the path to Golden Immortal; what's left is merely to traverse that path.

What's more, the Hundred Peaks Sect Leader also said that given enough time, he could progress further to become Golden Immortal.

In other words, as long as he follows the path given by Sect Leader Cao, he could become the third Golden Immortal expert in their Sacred Poison Sect's history!

To become one of the ultimate beings in the world, how could he not be excited!

He forcefully restrained his inner excitement and continued to ask, "Then, senior, may I know what the other method is?"

The opponent mentioned two methods, so he naturally wanted to hear out the other method too.

"The other method, in fact, I have mentioned before. I said, in the path of poison, it requires continuous experimentation and re-experimentation.

I even think, regarding the path of poison, the most important thing isn't how strong you cultivate your own poisonous energy or blindly elevate your cultivation realm.

But rather, to research and experiment on the toxicity of everything in the world. You just mentioned that you still have much lifespan left.

The reason you've so quickly reached the peak among the True Immortal Realm is partly due to your good talent, and also because you've spent most of your time on cultivation rather than experimenting on the toxic nature of various entities.

I suppose you followed the records left by predecessors of the Sacred Poison Sect to cultivate.

Those records in the Sacred Poison Sect stated what things are poisonous, and what isn't, and you accepted them as correct without verification.

Essentially, you've been cultivating on the shoulders of giants, but have never walked the paths those giants treaded.

Back then, not many people informed them about what was poisonous or not, or which toxins were potent or mild. They found it out bit by bit.

But in the end? Not to mention the Golden Immortal Realm; among them, those who achieved Daluo Golden Immortal were not few, and there were even more terrifying existences."

Chapter 2038:

Cao Zhen isn't wrong at all, isn't the Shennong Clan known for tasting all kinds of herbs!

"Therefore, my suggestion to you is to take the herbs you know and experiment, to study the nature of their toxicity.

Once you've conducted enough experiments and have truly understood those herbs and poisons, you will naturally find your path forward.

Of course, compared to the first path, no one can guarantee when you'll find the path that suits you, you might even spend thousands of years experimenting without discovering the right path."

After Cao Zhen finished speaking, he said no more, just looked at the Sacred Poison Sect Leader, letting him make his choice.

Actually, the reason he helped the people of the Sacred Poison Sect, on one hand, was indeed because he wanted to demand a considerable amount of resources from their toxic goods, and on the other hand, considering their current situation, he hoped the Human Clan could become stronger, with more experts.

The Sacred Poison Sect Leader hesitated for a moment, then said in a deep voice: "I understand, I will choose to take the second path."

Comparing the two paths, undoubtedly the first path is much easier, and ensures they can break through to the Golden Immortal Realm.

However, that is someone else's path from a past life, and not the most suitable path for himself.

The latter is a path forged by himself and naturally more fitting for him, with a higher potential ceiling.

"Excellent," Cao Zhen nodded in satisfaction, "Although you'll need to conduct the experiments yourself, I can impart some methods to you. Of course, what I say is not complete, you can certainly search for additional methods to find more that fit you."

As Cao Zhen spoke, he looked towards the crowd in the encounter: "You should listen too."

Upon hearing this, everyone bowed again to Cao Zhen. They had heard the Sect Leader say before that the Hundred Peaks Sect Leader was a person of great virtue and not strict about sect ties; hearing is one thing, but witnessing the Hundred Peaks Sect Leader's guidance is quite another.

They really couldn't believe that someone could freely impart great teachings to others in such an unreserved manner.

Initially, they did not pay too much attention to these experimental methods, but when Cao Zhen imparted specific methods to them, they were once more astounded.

It turns out studying poison has so much intricacy. It turns out poison is researched in this way!

Before, they had merely borrowed the power of various poisons instead of researching them!

What Cao Zhen taught them about studying poison and experimental knowledge could permanently change a great teaching; it is the Sect Defense's legacy!

Yet Sect Leader Cao shared it with them just like that.

"Today's grace, our Sacred Poison Sect will never forget! We shall inform the Sacred Poison Sect disciples that you are forever the benefactor of our Sacred Poison Sect.

Your affairs are our affairs, the doors of the Sacred Poison Sect will forever be open to you and the Hundred Peaks Sect!"

The Sacred Poison Sect Leader truly did not know how to express gratitude toward the Hundred Peaks Sect Leader.

"Rise, all of you," Cao Zhen calmly waved his hand, "The world is in chaos now, and I hope our Human Clan can grow stronger. By the way, this time I am here also to request some materials."

"Please speak, as long as it's materials our Sacred Poison Sect possesses, we will offer them with both hands," the Sacred Poison Sect Leader quickly pledged.

"The materials I need are quite numerous. I want the ones over ten thousand years old, the Black mist iceworm..."

Cao Zhen spoke up, listing the materials he needed. Time was limited now, and he could only complete the first step towards the Invulnerable to All Poisons Physique.

Even just for the first step of the Invulnerable to All Poisons Physique, the materials needed were quite substantial.

The Sacred Poison Sect Leader listened to the list of materials, secretly astounded, unsure what pill the Hundred Peaks Sect Leader intended to make to require so many kinds of materials; indeed, apart from the Sacred Poison Sect, no other force could gather them.

Cao Zhen had already helped the Sacred Poison Sect so much, they naturally wouldn't ask for payment. Shortly thereafter, the Sacred Poison Sect Leader and the Grand Elder left, together opening the Sacred Poison Sect treasury, collecting the materials Cao Zhen needed.

Cao Zhen did not remain in the Sacred Poison Sect but swiftly returned to the Hundred Peaks Sect, beginning cultivation of the Invulnerable to All Poisons Physique. As he cultivated, he also took out some previously left-over treasures, and started swallowing them to enhance his physical strength.

Finally, with just one day remaining before departure, he mastered the first layer of the Invulnerable to All Poisons Physique.

"What a shame, not enough time to study these cocoons."

Cao Zhen glanced at the cocoons obtained earlier, thought briefly, and decided to take them all along.

The next day, members of the Hundred Peaks Sect and Extreme Formation Sect regrouped and headed towards the Fourth Dangerous Terrain. During these days, Nie Jie and others also selected the Earth Immortal Realm members to go to the Fourth Dangerous Terrain.

Although the Hundred Peaks Sect was close to the Fourth Dangerous Terrain, others were closer or had started out earlier. By the time they arrived, the area outside the Fourth Dangerous Terrain was already filled with experts from various forces, including many he had never encountered before, though some were familiar faces.

He was surprised to find Star Lord Hao Yue and the Axe Maniac.

Upon seeing the Hundred Peaks Sect team, Star Lord Hao Yue immediately led his group over, looking at Cao Zhen leading them, nodded slightly, and said: "Indeed, just as I thought, you're also heading to the Outer Heaven Battlefield."

Chapter 2039: Fifth

With your strength, killing five people at the same cultivation realm isn't difficult. However, I imagine you wouldn't easily leave the Outer Heaven Battlefield.

After all, the place that allowed the six alien tribes to dispatch numerous experts to seize it after descending upon our human Great Thousand World must be filled with countless opportunities.

This journey to the Outer Heaven Battlefield is a crisis, but it's also an opportunity!"

Cao Zhen nodded slightly without saying much, and soon his gaze fell on the faction closest to the Fourth Dangerous Terrain.

Star Lord Hao Yue, sensing Cao Zhen's gaze, softly introduced, "Those are the people of the Thistle Sect, and at their head is the leader of the Thistle Sect."

Cao Zhen cast a distant glance at Master Tu Mi of the Thistle Sect. Although Master Tu Mi wasn't emitting any aura at the moment, just standing there, he gave off a sense of tranquility and majesty, unfathomable in depth.

This was the Vice Alliance Hierarch selected from the five Golden Immortals of the Eastern Province for this Eastern Wasteland region.

The Sacred Poison Sect leader also belongs to this Eastern Wasteland area. He has already reached the peak of the True Immortal Realm, yet the five Golden Immortals did not choose the Sacred Poison Sect leader but chose Master Tu Mi, indicating that Master Tu Mi is stronger than the Sacred Poison Sect leader.

Could Master Tu Mi be a Half-step Golden Immortal?

Quickly, factions began arriving one after another.

After the arrival of the final faction, Master Tu Mi's voice rang out, "Alright, now that everyone is here, all True Immortals, follow me."

As his words fell, Immortal Lord Jue Zhen, True Immortals of the Xi Mu Immortal Lord, all flew up, landing behind Master Tu Mi.

Everyone had guessed beforehand that this time, the reason for summoning the True Immortal Realm, Immortality Regainment Realm, and Earth Immortal Realm experts was likely because they were headed to different places. Now it seemed, everything went as everyone predicted, and they were not surprised.

Master Tu Mi did not say more, he simply turned and walked directly towards the passage of the Fourth Dangerous Terrain.

From behind, people watched as Master Tu Mi entered the passage, each one suddenly widening their eyes, and some even couldn't help but exclaim softly.

"The 99th passage!"

"This is the most dangerous passage!"

"The Fourth Dangerous Terrain has appeared only briefly, and no one has explored the last 99th passage yet. But in the other three dangerous terrains, no one has entered the last passage either!"

"Of all the immortal lands in Eastern Province, no one has ever entered the last ten passages. Or rather, anyone who entered the last ten passages all perished; even True Immortals who entered never returned!"

"But now, Master Tu Mi is bringing everyone into this 99th passage!"

"Could it be that the 99th passage leads to the Outer Heaven Battlefield?"

"So perhaps those experts who previously disappeared in the dangerous terrain didn't perish, but were trapped in the dangerous terrain; or rather, trapped in the Outer Heaven Battlefield."

"But if the Outer Heaven Battlefield is inescapable, how do we return after entering?"

"Perhaps because the arrival of the six alien tribes changed the nature of the Outer Heaven Battlefield?"

"We'll know once we enter."

This time, among those summoned, the number of True Immortals was the smallest, but in just moments, everyone had fully entered the final passage.

At this time, someone dressed in the Thistle Sect's attire flew up into the sky and looked at everyone, saying, "I am Venerable You Zui of the Thistle Sect, all Immortality Regainment Realm, follow me."

With that said, he turned around and headed towards the 96th passage.

Cao Zhen glanced back at Liè Yàn and the others, rose, and followed quickly. What he needed to instruct, he had already instructed before, and reminding everyone now would do no good, it would even make everyone more nervous.

He had entered the Fourth Dangerous Terrain before, but only through the outermost passage.

This time, he entered the dangerous terrain directly through the fourth-to-last dangerous passage.

As soon as he entered the dangerous terrain, a biting gale roared in.

Now that he was already in the Immortality Regainment Realm, the incoming wind, when falling on his face, felt like sharp scythes slashing, cutting his cheeks painfully.

He looked around and saw some in the Immortality Regainment Realm, caught off guard by the wind, even having their skin sliced open.

In response, everyone quickly reacted, releasing their immortal and demonic qi, wrapping themselves to resist the incoming wind.

"Keep following."

Venerable You Zui called out softly and swiftly flew forward.

Everyone could only follow, and soon, Cao Zhen noticed something strange. This was not his first time entering dangerous terrain, whether it was the Fourth Dangerous Terrain or the Qian Sky Dangerous Land; upon entering, danger quickly appeared.

Yet, despite entering the dangerous terrain through a more perilous passage this time, they had not encountered any danger along the way.

There was no danger; he even sensed no life other than humans around him, yet could see extensive signs of battle everywhere.

No strange beasts?

Could it be that this area was cleared before? That all strange beasts were exterminated, clearing a passage?

Had those five Golden Immortals been absent to come here to clear the passage?

Everyone flew forward, even though they were all of the Immortality Regainment Realm, they flew for half a day. Then, before their eyes appeared a massive spacetime vortex!

Chapter 2040: Part 6

"Enter!"

Venerable You Zui, as usual, spoke little, and after uttering a single word, he flew directly into the vortex.

Subsequently, everyone followed him into the vortex.

As soon as Cao Zhen entered the vortex, he immediately felt a strong sense of dizziness. At this moment, his mind seemed to stop thinking, but soon, the sturdy feeling of stepping on the ground came from his feet.

He looked up, and his eyes suddenly showed an unexpected look—a giant city appeared before him!

All around, sounds of surprise followed suit.

"A city?"

"Weren't we the first ones to arrive here? How is there a city?"

"Could it be, we're not the first ones to come here?"

"What's the use of a city being built here?"

As everyone discussed, Venerable You Zui showed a trace of impatience on his face.

"Shut up! You all are in the Immortality Regainment Realm. Yet, you act as if you've never seen the world, like newly inducted disciples—what a spectacle!

The city ahead is called Broken Chaos City. I don't know why such a city exists. On our human side, there are eight such cities, two in each of the Four States: east, west, south, and north!

In short, within these cities are great formations, serving as human outposts. In these cities, we are safe as the alien races won't attack our cities.

Once you enter the Outer Heaven Battlefield, if you're injured or suddenly enlightened, you can return to the city for healing, cultivation, or resupply.

However, let me emphasize, do not hide in the city for a hundred years and then go out.

There are people in the city tasked with time-tracking, and the time spent in the city doesn't count towards the hundred years. Only when you truly step onto the Outer Heaven Battlefield does the time count.

So, as long as you don't go to the battlefield, even if you stay your whole life in the city, until death, you'll never be able to leave here.

Alright, now, follow me into the city."

As Venerable You Zui spoke, he rose and flew toward one of the city gates.

During the flight, the group noticed that within the city, Return Immortal Realm individuals were also flying out.

Immediately, the expressions of the people became peculiar.

What's this situation?

Weren't they the first to enter here? How come there are already others leaving? Is it people from other states?

Did others arrive here slightly faster than them?

It's a pity; Venerable You Zui genuinely dislikes speaking much. He only mentioned a few words about the Outer Heaven Battlefield, and said nothing about those flying out.

The Return Immortal Realm individuals who flew out also noticed the incoming crowd and glanced over.

"Oh? More people have arrived!"

"And so many came; they must be people from the Eastern Province, right!"

"Among the Four States, only the Eastern Province hadn't sent people until now!"

"I wonder about the strength of the people from the Eastern Province."

"Either way, having more people come is good for us."

After their discussion, the Return Immortal Realm individuals quickly flew away.

After that, the group flew to the city gate.

At this moment, the city gate was guarded by two people, who, upon seeing the crowd, immediately took out a jade pendant and said to everyone: "This is a Sound Transmission Jade Pendant. Soon, each of you will receive one. When you encounter danger outside, you can infuse your own immortal aura into the jade pendant.

At that time, the jade pendant will naturally show your current location, and the other pendants will alert their holders, letting them know that a fellow member of the human clan is in danger. Additionally, the pendants will display a pathway, guiding them to go for rescue. You can consider this your lifesaver.

After all, the Outer Heaven Battlefield is the frontline of battle against the alien races where danger lurks at every moment. A person's strength is limited, hence help from the clan is necessary.

Similarly, if you find any fellow member asking for help, I hope you'll go to the rescue. Of course, each time you rescue a companion, the jade pendant records it, and we will award you accordingly.

Alright, now, distribute the jade pendants and register your names."

Though the number of those in the Return Immortal Realm is not as few as the True Immortal Realm, it's still significantly less than the Earth Immortal Realm.

Soon, it was Cao Zhen's turn.

The person in charge at the gate handed Cao Zhen a jade pendant while taking out a black token, handing it to Cao Zhen with the query: "Name, and affiliation."

As Cao Zhen took the jade pendant, he replied truthfully, "Hundred Peaks Sect, Cao Zhen."

Apparently, the other party didn't know that the Sect Hierarch of the Hundred Peaks Sect was named Cao Zhen, showing no unusual expression. After recording, he pointed to the token in Cao Zhen's hand and said: "You, along with the ten people behind you, will all be part of the fourth squad. Tomorrow, you'll leave the city with the fourth squad.

Being your first time here and unfamiliar with the Outer Heaven Battlefield, you'll need to go out with others. Once you return, you'll be free to act on your own.

Later, head north with the token to find the fourth squad."

Cao Zhen nodded lightly, took the token, and stepped aside. Experiencing all of this, he felt as though they weren't cultivators but were in a military camp.

Fortunately, being the first ones from the Hundred Peaks Sect, they were all together.

The five disciples from the Extreme Formation Sect, following behind the Hundred Peaks Sect, showed a joyful expression—turns out the first city exit was pre-arranged here.

And they were even luckier to be assigned alongside those from the Hundred Peaks Sect.

With the Hundred Peaks Sect is none other than Cao Zhen!

Even though Cao Zhen was only in the early Immortality Regainment Realm, he was a descendant of the Daluo Golden Immortal with great abilities! Who knows what means he possesses!

Being with Cao Zhen, undoubtedly, was much safer than being with others.

After waiting for a while, Cao Zhen, along with the four from the Hundred Peaks Sect and five from the Extreme Formation Sect, walked into the city gate.
