

## **My Master 2051**

Chapter 2051:

This time, she unleashed twenty golden bolts of lightning.

Each bolt of lightning descended, instantly turning this world into an arena of golden lightning. Though only twenty bolts, it felt as if every part of this world was filled with an abundance of lightning.

The lightning bolts fell heavily, striking the flying insects.

Immediately, the bodies of those flying insects exploded, with arcs of golden electricity continuously leaping on them.

“This...”

“Such terrifying lightning!”

“Instantly wiped out more than twenty flying insects!”

“I even feel that after the lightning eradicated these insects, there was still power left!”

“It’s terrifying, what grade of spell is this!”

“This... I even feel that it doesn’t belong to the Mysterious Rank spells anymore!”

“Earth Level spell! This is definitely an Earth Level spell!”

They had fought these flying insects before, and even with ten of them retreating, they couldn’t kill as many insects!

“With Ruo Yun Immortal present, I feel we might be able to fight these insects!”

Everyone instantly became enthusiastic about a great battle with the insects.

Although Immortal Ruo Yun was only at the Mid Immortality Regainment Realm, they felt that she was stronger than many in the Late Immortality Regainment Realm, maybe even most of them!

Among them, Venerable Gui Jian remained calm and said in a low voice, “We shouldn’t linger in the battle. There are too many of these insects, especially since there is a mother insect here. Once it discovers that many insects are dying, it will surely use a Secret Technique to accelerate egg-laying.

The best way is to fight our way out and break through!”

Just as he finished speaking, the voice of an injured Immortality Regainment Realm expert rang out: “Poison, their poison is terrifying! The poisonous energy on my body is more serious, the injured arm has completely lost feeling!

If we engage in battle, with so many insects, we will inevitably be stung. When the poison takes effect, our combat power will greatly decrease, and we will not be able to handle these insects.”

As they spoke, more flying insects appeared in the void. Ruo Yun Immortal had to once again invoke the Gold Thunder Orthodox Method.

Unlike before, this time she condensed thirty bolts of gold thunder!

“Thirty bolts of lightning?”

“She previously released twenty bolts, and now it’s changed!”

“So, she can freely change the number of bolts with her spell!”

At the same time, Xiang Ziyu and the others also made their moves one after another.

Although Xiang Ziyu didn't particularly study the Five-thunder Righteous Method, he could still cultivate it. Given his talent, just a bit of cultivation and the level of the Five-thunder Righteous Method he learned wouldn't be much lower than others.

It's just that he wasn't quite suited to the Five-thunder Righteous Method; his cultivation base was much weaker than Ruo Yun's, and the power of his Five-thunder Righteous Method was indeed much less potent.

Wang Ren Di, although at the Mid Immortality Regainment Realm with his Immortal Mountain reaching two thousand feet, wasn't much good at fighting. The level of his Five-thunder Righteous Method was also lower than Xiang Ziyu's, and its power wasn't necessarily higher.

Still, with three people simultaneously executing the Five-thunder Righteous Method, lightning cascaded down from the void, making the scene grand and imposing.

Around them, Venerable Gui Jian and others also released their spells, but they focused more attention on the members of the Hundred Peaks Sect.

Although the lightning displayed by Xiang Ziyu and Wang Ren Di looked slightly different from that of Venerable Ruo Yun, they could still sense it was the same spell.

Perhaps their cultivation base was insufficient, and their cultivation was not yet perfected, so the lightning appeared different.

This spell is definitely an Earth Level spell!

No matter which Great Teaching, an Earth Level spell would be deemed a Sect Defense spell. An ordinary Immortality Regainment Realm practitioner wouldn't possibly obtain an Earth Level spell.

It's surprising that Venerable Ruo Yun possesses an Earth Level spell, but still understandable.

After all, Venerable Ruo Yun's talent is exceptional, possessing a True Immortal Figure, such an unparalleled genius logically gets an exception to learn an Earth Level spell.

But the problem is, Xiang Ziyu, though a genius, hasn't reached that level of talent.

And Wang Ren Di is even less qualified than Xiang Ziyu to inherit such a top-tier spell.

One wonders what the Hundred Peaks Sect meant by also imparting that kind of spell to him.

Everyone involuntarily looked towards Venerable Nai He from the Hundred Peaks Sect. Earlier, Cao Zhen had already taken action, using a terrifying flame, but he didn't display such Earth Level spells; now it's about Venerable Nai He.

Fortunately, Venerable Nai He didn't use the Earth Level thunderbolt spell either.

If all the people from the Hundred Peaks Sect had Earth Level spells, they would really start questioning life and feeling imbalanced.

Cao Zhen, hearing the mention of poisoning, swiftly looked over at them and said in a low voice, "Venerable Xuan Kong, I have some expertise in dealing with poisonous energy, why don't I take a look at you?"

Venerable Xuan Kong heard the words and showed a hint of surprise. The Hundred Peaks Sect also had people knowledgeable in poison studies?

At that moment, he had no other recourse but to tentatively trust the suggestion.

Upon hearing this, he immediately withdrew his aura.

Feeling the change in Venerable Xuan Kong's aura, Cao Zhen extended a hand and placed it on the wound of Venerable Xuan Kong, channeling a stream of Immortal energy into his body.

Chapter 2052:

This poisonous energy...

Cao Zhen sensed the changes in the poisonous energy inside Venerable Xuan Kong, and his heart was filled with joy. Although he hadn't formed a complete body immune to all poisons, his efforts in the past month before coming here allowed him to be immune to a portion of the poison. Now, he could feel that the poisonous energy entering Venerable Xuan Kong's body did not affect him.

He even noticed that these insects seemed neither very strong in defense nor in attack. The wounds on Venerable Xuan Kong could show that Venerable Xuan Kong was only affected by the other party's poisonous energy, with nothing else being a problem.

This simplified things, as he could completely find the enemy's lair and eradicate the mother insect!

His heart stirred, and he quickly controlled his immortal power, surging towards the area with the densest poisonous energy inside Venerable Xuan Kong to absorb and eliminate these toxins, bit by bit!

In just two or three breaths, the poisonous energy gathered inside Venerable Xuan Kong was almost completely cleared, and he swiftly withdrew his hand.

Venerable Xuan Kong's face immediately showed an expression of surprise. He widened his eyes and looked at Cao Zhen, exclaiming with joy, "My poison, my poison has been completely cleared."

All around, people heard this; even during battle, they each glanced at Cao Zhen with the corner of their eyes. Even the five from the Extreme Formation Sect showed a look of surprise.

They had just witnessed the changes on Venerable Xuan Kong. Even with the naked eye, they could see that the injured arm of Venerable Xuan Kong was almost impossible to bend, clearly stiffened to a certain degree.

But now, Venerable Xuan Kong said his injury had healed!

They hadn't seen Cao Zhen give Venerable Xuan Kong any pill. Just using immortal energy, he healed Venerable Xuan Kong's injuries? Cleared the poison?

Cao Zhen gently shook his head and said, "It's not completely cleared. I only removed the poison from your injured area. You still have a large amount of poison inside your body, especially in your meridians, and clearing these will be much more troublesome.

If my cultivation realm were higher than yours, it would be better, but at my current cultivation realm, I can't completely clear it for you.

However, after taking the pill, you will be able to slowly clear these toxins yourself."

"I see. Nonetheless, I must thank you, Dao Companion Cao. Unexpectedly, besides the Sacred Poison Sect and the Immortal Poison Sect, someone else is so familiar with poison!" Venerable Xuan Kong said, looking at Cao Zhen with a strange expression. Just now, after Cao Zhen cleared the gathered poisonous energy in his body and withdrew his immortal energy, he keenly detected something unusual. Indeed, Cao Zhen's immortal energy was obviously not that of the Mid Immortality Regainment Realm!

He himself was in the Mid Immortality Regainment Realm, so he clearly understood the aura of the Mid Realm. Although Cao Zhen was trying his best to hide it, he could still detect that Cao Zhen's aura was, obviously, of the Early Immortality Regainment Realm!

In the Early Immortality Regainment Realm, yet Cao Zhen's Immortal Mountain was eighteen hundred zhang tall!

Having such talent, if spoken about, would be truly frightening!

Venerable Ruo Yun, with an Immortal Mountain of three thousand one hundred zhang, was already astonishing enough, but compared to Cao Zhen, it was quite a gap.

In the Mid Immortality Regainment Realm, reaching an Immortal Mountain of three thousand zhang was already rare, but he had seen it before. At least in their Great Teaching, it was rumored that their Sect Hierarch reached an Immortal Mountain height of three thousand one hundred fifty zhang in the Mid realm.

However, like Cao Zhen, in the Early Immortality Regainment Realm with an Immortal Mountain of eighteen hundred zhang, he hadn't even heard of it, let alone seen it.

In the Early Immortality Regainment Realm, reaching an Immortal Mountain height of eighteen hundred zhang theoretically means that Cao Zhen could reach a height of three thousand five hundred zhang in the Mid realm!

Four hundred zhang higher than Venerable Ruo Yun's Immortal Mountain.

Not to mention, Cao Zhen's Immortal Mountain was so large, so majestic!

The more majestic and larger the Immortal Mountain, the stronger the immortal energy!

That's why Cao Zhen had to hide, using some method to make it seem like he was in the Mid Immortality Regainment Realm.

He thought, if it were anyone else, they would probably try to hide themselves like Cao Zhen.

Suddenly, he thought of Venerable Ruo Yun, and now he somewhat understood why someone with such talent, Venerable Ruo Yun, would be so polite to Cao Zhen, even considering him as the leader.

Because Cao Zhen's talent is even more terrifying. I'm afraid the Hundred Peaks Sect is grooming Cao Zhen as the next Sect Hierarchy!

Cao Zhen sensed Venerable Xuan Kong's gaze and instantly understood Venerable Xuan Kong's meaning. Venerable Xuan Kong obviously realized that he was in the Early Immortality Regainment Realm, after all, his immortal energy entered the other party's body, allowing the other party to detect the difference in his immortal energy compared to the Mid realm.

However, even so, he had to take action; he couldn't just stand by and watch someone die, right? Moreover, he also needed to confirm that he could suppress the poisonous energy of these insects.

As for Venerable Xuan Kong, perhaps the other party wouldn't reveal that he was in the Early Immortality Regainment Realm, and even if they did, so what?

They would only be together for a month, and after a month, he would naturally leave the fourth squad and assume another identity.

As he thought about this, he followed Venerable Xuan Kong's words, saying, "It's nothing, I do have a good relationship with the Sacred Poison Sect. Also, coincidentally, I have a pill on me. After taking the pill, these poisonous insects' poison truly has no effect on me."

"What!"

"It can suppress the poison of these poisonous insects!"

"The most dangerous thing about these insects is their poison. If you're not afraid of their poison, you could even consider going to eradicate their mother insect!"

The people around were all delighted upon hearing this, and Cao Zhen casually took out a pill, pretending it was a detoxifying pill, and swallowed it.

Although the surrounding people had been fighting these poisonous insects, they couldn't help but glance over at Cao Zhen when they heard his words.

They noticed Cao Zhen's actions on the boat, and Venerable Gui Jian and others became very anxious.

"No!"

"Don't take the pill!"

But as their voices fell, Cao Zhen had already swallowed the pill.

Immediately, the faces of all the people changed drastically, and someone wanted to confirm and asked, "Dao Companion Cao, you... you said there was only one such pill?"

Just now, they had heard Cao Zhen say there was only one pill that could suppress this poison!

Chapter 2053:

The members of the fourth squad couldn't understand Cao Zhen's actions at all. If there was a pill that could make one immune to the poison of the flying insects, shouldn't it be given to the strongest one, like Venerable Ruo Yun or Venerable Gui Jian?

This Cao Zhen, even though the antidote was his, what was the use of him taking the antidote himself!

He was just a Mid Immortality Regainment Realm existence, there were so many stronger presences here, wouldn't the effect be greater if they took the antidote?

"The antidote, I naturally have only one, but it is enough." Cao Zhen faced the crowd's inquiries, his figure moved, but he directly flew towards the flying insects.

"Enough? How can it be enough!"

"He just rushed over like that!"

"Come back quickly, you're just a Mid Immortality Regainment Realm!"

The crowd saw Cao Zhen's actions and couldn't help but exclaim in surprise. Even if Cao Zhen's cultivation base made him completely immune to the poison, it didn't necessarily mean he could rush through, after all, those flying insects, although relying mainly on poison, their stingers, once pierced, were not entirely harmless.

Moreover, now, it's just that these flying insects haven't shown other means of attack, who knows, do they have other means of attack!

Even if Cao Zhen could really rush through to find that queen insect.

However, the queen insect of the Insect Clan, although it couldn't move, its defense was exceptionally strong, even letting Cao Zhen kill it would take a long time.

This Outer Heaven Battlefield wasn't just populated by them.

Though the range of the Outer Heaven Battlefield was vast, no one could assure there were no other expert clans nearby. Their battle here, the commotion was too big, it could easily attract the attention of other clans.

By then, if some experts from the Beast Clan or Demon Clan came, they would be in danger too, so they must fight quickly.

Yet still, this Cao Zhen, shockingly used the antidote on himself and just charged out.

One after another, the flying insects, upon seeing a human flying towards them, all rushed over to meet him.

Sharp stingers, one by one, directly aimed at Cao Zhen's body.

Though Cao Zhen had a body protection spell, there were too many flying insects, in just a blink of an eye, his body protection spell had already shattered.

Subsequently, the stingers of the flying insects stabbed directly towards his body.

In the next moment, a series of crisp sounds like the collision of steel echoed, the stingers of these flying insects pierced his body yet seemed as though they struck hard immortal mine or a divine weapon, producing a metallic clanging sound.

In fact, where the stingers contacted Cao Zhen's skin, they even sparked brilliantly.

Cao Zhen felt a slight sting from his body, and couldn't help but secretly chuckle. This was the benefit of the Eight Nine Mysterious Art.

Though now, in the Immortality Regainment Realm, his immortal mountain reached a height of eighteen hundred zhang, it looked very intimidating, but the strength of his physical body, compared to when he descended the mountain, was still no weaker, equally impressive!*freewebnovel.com*

He cultivated the Eight Nine Mysterious Art after all.

The Eight Nine Mysterious Art was originally the peak of cultivation techniques, among the few who cultivate the Eight Nine Mysterious Art, their physical bodies are terrifyingly strong, often relying on their physical body to endure the opponent's spells.

As for Xiang Ziyu, although after breaking through to the Immortality Regainment Realm, he didn't pay much attention to the Five-thunder Righteous Method, that guy, Xiang Ziyu, had been constantly and crazily cultivating the Eight Nine Mysterious Art, continuously raising its level.

Moreover, with Zi Tie's technique, he could absorb various immortal mines to forge his physical strength.

Though he was only in the Early Immortality Regainment Realm now, he felt that, barring the six alien races he wasn't very familiar with, there was probably no other cultivator in the Immortality Regainment Realm with a stronger physical body than his.

His physical strength was so formidable that the stingers of these flying insects could not fully pierce through.

Of course, his body wasn't strong enough to completely block those stingers.

Some flying insects, after a failed stab, retracted their stingers and stabbed again heavily, while others kept pressing the stingers at their original position with force.

In the distance, everyone saw the bright sparks continuously flickering on Cao Zhen's body, each with widened eyes full of astonishment.

"What's going on?"

"Those sparks... why do I feel like those stingers didn't pierce into Cao Zhen's body!"

"Cao Zhen, what kind of physical strength is this, able to withstand these flying insects' attacks!"

"Could it be that these flying insects' stingers aren't as sharp as we thought?"

Just as someone finished talking, many around had already shifted their glances towards Venerable Xuan Kong, the only one among them who was pierced by the stingers of the flying insects.

Venerable Xuan Kong felt the gaze of everyone, yet didn't utter a word. He too was in a daze. His physical strength was decent, but when he was stung by those insects, the stinger pierced without any hindrance.

He could feel the sharpness of that needle.

Yet how come, with Cao Zhen, Cao Zhen could block the stinger purely with the strength of his physical body!

Venerable Nan Ji sensed the glances from all around amidst the icy white river beneath the attacking tiger, quickly speaking, "It's likely not because Venerable Xuan Kong's body isn't strong enough, Venerable Xuan Kong is primarily a close combat cultivator. For cultivators like him, their physical strength wouldn't be weak.

Chapter 2054:

Moreover, the most important attack method of those flying insects is their poisonous stinger. Naturally, they have to ensure that the stinger can pierce the opponent, so their stingers must be extremely sharp.

That they couldn't pierce Cao Zhen's body only means that Cao Zhen's body is too powerful!"

"Powerful enough to block the stingers? How is that possible!" Three-Eyed Honor exclaimed in disbelief. His vision is beyond ordinary, and he could clearly see that the stingers of those flying insects really did not pierce Cao Zhen's body, whether it was Cao Zhen's neck, arm, or even his leg!

"Hmm!"

Suddenly, Three-Eyed Honor exclaimed, "It pierced, a flying insect pierced Cao Zhen's body, but the penetration was very shallow."

"Even if shallow, once pierced, the poison will surely spread."

"Is Cao Zhen alright?"

"It seems he's alright..."

"Cao Zhen is still advancing, and his speed doesn't seem to have slowed at all, no, I even feel that Cao Zhen's speed is faster than before! Such amazing speed."

In everyone's sight, Cao Zhen suddenly exploded with speed again, flying into the cave within an instant and disappearing from their view.

The onlookers finally retrieved their gaze, their hearts already stirred with shock and awe. Did Cao Zhen really rely on his physical strength to block those flying insects' stingers?

If that's the case, Cao Zhen's physical strength is terrifyingly strong.

Impossible!

There's no way anyone in the Mid Immortality Regainment Realm could have such terrifying physical strength, not even in the Immortality Regainment Realm could someone's physical body be that terrifying!

It must be the pill that Cao Zhen took, which was targeted against the opponent's poison, and since the stingers' sharpness is related to the poison, once the poison is countered, the stingers aren't as sharp.

That must be it!

The crowd quickly understood the reason.

"Everyone, focus your minds. Let's try our best to keep those flying insects from coming near us and drive them outside. Then, stay here and try to attract more poisonous insects for our Dao Companion Cao Zhen!"

Venerable Gui Jian's voice soon reminded them, as he reminded everyone, he waved the sharp sword in his hand. Sword lights were shot out from the extremely narrow and slightly curved sharp sword.

While Ruo Yun was practicing the Five-thunder Righteous Method, releasing rays of thunder, she glanced at Venerable Gui Jian beside her, finding his swordsmanship quite interesting.

Just like his name, the devious sword's swordsmanship and sword intent clearly didn't follow the Righteous Path.

But the swordsmanship of the devious sword was sharp enough, every sword light gave a feeling of a hanging deer horn, with no trace to be found.

In the Outer Heaven Battlefield, a team of the Demon Clan was clearing the battlefield in the mountains, and under their feet were the bodies of the Beast Clan's gigantic bears.

The number of dead gigantic bears was over twenty, yet, on this battlefield, there were only ten demons, and none of the ten demons were injured.

Among the Demon Clan, a fox monster with nine tails, exceptionally beautiful, calmly looked at the group of demons and said, "Quickly clean up the battlefield, and then..."

Before she finished speaking, she suddenly raised her head and looked into the distance.

In the distance, thunderbolts were continuously falling, obviously indicating a battle between different races!

Around her, several other fox monsters also noticed the light in the distance and turned their heads to look.

"This should be the Human Clan's spell, I don't know which race the Human Clan is fighting against!"

"Regardless of who they are fighting, when two clans battle, a third benefits. In such times, we must go take a look."

"Princess, should we go and have a look?"

Each fox monster looked at the nine-tailed fox demon in the center.

In their Fox Monster Clan, having nine tails surely marked the lineage of the Royal Family.

"Of course, we must go, forget about these bodies, even if they know we killed them, what could they do? Could those stupid bears possibly dare seek revenge on us!"

Clean up the battlefield, quickly, and let's go take a look."

Meanwhile, in a canyon on the other side, a group of the Beast Clan with deep green bodies, human-like but with lizard-like heads, also raised their heads, looking towards the direction of the light. Subsequently, the leading lizard let out a cry, and in the next moment, all the lizards quickly got up and dashed towards the direction of the glow. There were more than forty lizards in total.

The Five-thunder Righteous Method, its power terrifying, and the display of the Five-thunder Righteous Method was imposing enough. All the Alien Races in the vicinity noticed the situation here and one after another got up, flying towards the direction where the light was falling.

It seemed that because Cao Zhen had charged into the cave, more flying insects started to attack Cao Zhen, and for a while, the number of flying insects flying out of the cave began to decrease greatly.

Eventually, there weren't many Insect Clan coming out anymore.

"Let's go, let's quickly enter the cave."

Upon noticing that no more Insect Clan were flying out, Venerable Gui Jian immediately got up and flew towards the interior of the cave.

Simultaneously, Ruo Yun and the others also moved, leaving behind the insect bodies outside.

According to Human Clan customs, in the Outer Heaven Battlefield, exterminating Alien Races, as long as you bring back their heads, you will naturally be recorded. Killing five Alien Races of the same cultivation realm allows you to leave the Outer Heaven Battlefield.

Chapter 2055:

But the problem is, these insectoid aliens are exceptions!

With the insect clan, only killing the mother insect counts; eliminating these ordinary insects doesn't matter. That's one big reason people dislike dealing with the insect clan.

As for the mother insect, if one could kill it, who would hand it over above? The value of an insect clan mother isn't just ordinary!

Everyone entered the cave, only to find that there weren't many insect bodies inside. Instead, a buzzing sound could be heard from deeper within.

As they continued to advance, their brows gradually furrowed.

“Not even one flying insect carcass.”

“This cave, however, has been severely destroyed!”

“He rushed all the way in, wouldn’t he have killed even one of the insect clan?”

“Then, how many insects could be inside!”

“With so many insects, even if he wants to kill the mother insect, it wouldn’t be easy!”

“The key is, he isn’t afraid of those toxins, but we are different. What if those insects turn around and attack us?”

“What do we do?”

Devious Sword listened to the voices around him but did not pause, continuing to fly quickly toward the front; he decided to deal with the insect clan once he saw them.

Since entering the cave, Cao Zhen has been rushing forward.

Because his physical body is robust, those flying insects’ poison needles couldn’t easily pierce into him.

Even if their poison needles did pierce, they had no effect on him.

It’s not almost no effect; it’s really no effect at all!

These needles indeed are sharp, but his body is so strong that their sharpness can be ignored, and the toxins have absolutely no impact.

He is completely immune.

If it were any other insect clan mother, he wouldn't rush in recklessly, as that would be seeking death.

But these flying insects are entirely curbed by him; even if their number doubled, it would be the same.

Finding that mother insect would be simple; just charge in the direction these insects flew from.

However, slowly, he also encountered problems.

Although the cave is sizable, the number of these flying insects is just too much.

Especially as he progressed, these flying insects blocked the entire path ahead, leaving him no way forward. He could only swing his arms to smash the surroundings, making the cave wider, but it's still not enough.

One after another, these flying insects blocked the entire cave and his path.

"These insects really have no brains; the ones behind have no space to attack me. Don't they know to smash the surroundings?"

"Can't you see I've been smashing the cave? Can't you learn?"

Cao Zhen complained speechlessly. Suddenly, these flying insects seemed to understand what he meant, or perhaps received orders from their mother insect. They began attacking the nearby walls, causing the cave to continuously shatter, and stones to fall, turning the place into a dusty mess.

Clearly, the cave was already penetrated, but it still wasn't enough; the number of these flying insects was too overwhelming, tightly sealing ahead.

“The size and strength of these flying insects shouldn’t be that big.”

Looking at these flying insects, Cao Zhen’s mind stirred, and he suddenly charged forward, pushing against these flying insects!

Experience the power of a wild charge.

With one collision, he instantly felt his path slightly obstructed, though the resistance wasn’t much!

With renewed force, he instantly opened a path through.

But more flying insects flew behind, swarming together.

He thus continued to push through these flying insects, charging forward, while the flying insects in front stabbed their poison needles into his body. As he continued charging, suddenly, a few clear cracking sounds were heard.

A few flying insects’ poison needles broke!

His body was already strong, and these flying insects’ poison needles barely pierced him. But under his collision, with other flying insects behind them, even if weak, there was constant resistance. Coupled with his impact, it’s no wonder these flying insect poison needles broke.

“Indeed, too thin; not enough.”

Seeing the poison needles break, causing those flying insects’ vitality to sharply drop, Cao Zhen continued rushing forward.

Those insects weren’t entirely stupid either; once their needles broke, they stopped going to the front. Instead, they moved aside, allowing other insects to approach Cao Zhen to sting him.

Soon, more soft sounds came, and a few insects' poison needles broke apart again.

Though these flying insects aren't strong, they indeed obstructed Cao Zhen's advance.

Behind him, Venerable Gui Jian and Ruo Yun flew over, soon seeing a mass of flying insects gathered together, and within them, a barely noticeable silhouette.

Watching Cao Zhen pushing forward through the swarm of flying insects by sheer strength, everyone was stunned.

"What... what is this!"

"We can't even see him, only when he charges can we see. How many insects are stinging him?"

He's not affected at all, what sort of antidote is this!"

"Crafting such an antidote must be costly. What is his relationship with the Sacred Poison Sect to let them give him such an antidote!"

Chapter 2056:

"What do we do now?"

At first, everyone thought they'd assess the situation before deciding how to help Cao Zhen.

But now, with so many flying insects gathered here, Cao Zhen is not afraid of the toxins having taken the detoxifying pill, but they are not so lucky.

If these poisonous insects attack them together, they won't be able to withstand it!

However, if they don't help...

As everyone was puzzled, suddenly, Cao Zhen's voice came from within the swarm of flying insects.

"What are you coming here for? Leave quickly, the farther the better. As for that mother insect, I have my ways to deal with it!"

While shouting, Cao Zhen kept charging forward.

These people, what are they doing here messing around? If the mother insect dies and the flying insects attack them, what then?

"Leave?" Venerable Three-Eyed frowned upon hearing this; Cao Zhen spoke lightly. He was about to deal with the mother insect, yet he was just at Mid Immortality Regainment Realm, not even as terrifying as Venerable Ruo Yun in Mid Immortality Regainment Realm. On what grounds does he have to say such things?

As he was pondering, suddenly he saw Venerable Ruo Yun turn around and fly towards the outside. Not only him but the other four from the Hundred Peaks Sect were the first to turn and fly away, and even the five from the Extreme Formation Sect did not hesitate.

Venerable Illumination Formation, while flying out, also looked at the few with Venerable Three-Eyed and shouted, "Go."

Are you kidding me? Sect Leader Cao, that's the reincarnation of the Daluo Golden Immortal. If Sect Leader Cao said he can kill that insect clan's mother, he naturally has a way to kill it.

Not to mention, it's just a mother insect of the Immortality Regainment Realm. Even if there were a mother insect of the True Immortal Realm, if Sect Leader Cao said he could destroy it, I would believe him!

That's the reincarnation of the Daluo Golden Immortal!

They all left?

Venerable Three-Eyed was stunned for a moment, do you really believe in Cao Zhen that much, or are these newcomers just too afraid to die?

Before he could regain his composure, Venerable Gui Jian had already turned around and flown out.

The fourth team of older members saw Venerable Gui Jian turn and fly away, each of them trusting Venerable Gui Jian, followed and flew towards the distance.

Venerable Three-Eyed, seeing everyone fly away, could only turn and fly out as well.

Cao Zhen charged towards the front all the way, he forgot how long he had been charging, lost count of how many poisonous needles he had broken through, finally, the view before his eyes widened abruptly.

In his sight appeared a massive platform, from the outside, one would never expect such a vast space inside this cave.

On top of the platform was a circular altar, covered with numerous patterns, clearly some kind of formation.

The altar...

Cao Zhen recalled the insect clan mother insects he had destroyed in the Central Continent, each one had been atop an altar.

At the time, he didn't find it strange, since those mother insects were in their own small worlds.

But now, here too, this mother insect has an altar in the Outer Heaven Battlefield!

It's quite apparent these mother insects need an altar to lay eggs.

Just like in the insect clan's small worlds, this altar was also piled with countless resources, medicinal herbs, various minerals, though alien race corpses weren't seen.

Previously, he discovered in those small worlds, the altars of many mother insects also had no alien race or strange beast corpses.

But, there was a bloody smell of corpses nearby.

Presumably, those corpses were devoured by them.

It's normal, after all, corpses decay, energy keeps dissipating, furthermore, corpses rot and stink.

Whereas, medicinal herbs, minerals, and other resources don't lose energy or lose it very slowly, so they choose to devour those corpses first.

Cao Zhen naturally focused on the center of the altar.

He discovered that the fighting soldier bugs of the insect clan, though varied in appearance, some like locusts, some like fighting insects, others like bees, the mother insects looked pretty much the same.

The mother insect before him was similar, spherical overall, with more than twenty tentacles, yet unlike the mostly white mother insects he'd seen, this one was earthy yellow.

The mother insect, after an unknown number of attacks by poisonous needles from flying insects, showed no sign of poisoning, but upon noticing the aura the human in front of her emitted, she opened a giant mouth capable of swallowing Cao Zhen whole, seemingly with a cold sneer, and said in a frigid voice, "Such a small, Mid Immortality Regainment Realm dares to intrude into my lair alone.

Be my nourishment then."

As the words fell, a towering Immortal Mountain suddenly appeared behind her, and at the same time, a horrifying aura burst forth; it's just an aura, yet it surged like a torrent.

Late Immortality Regainment Realm?

Cao Zhen was slightly taken aback, the mother insects he had encountered before were all in the Earth Immortal Realm, and without exception, they were peak Earth Immortals.

So naturally, he thought the insect clan's mother insect here must be a peak Immortality Regainment Realm existence, but it turns out it was just a late Immortality Regainment Realm mother insect.

If this mother insect was already at Late Immortality Regainment Realm during her previous slumber, and after awakening, due to weak strength and fear of being devoured by other mother insects, she couldn't stay in their small worlds and had to come to this Outer Heaven Battlefield.

Chapter 2057:

But if this is the case, and this Insect Clan Queen was not in slumber before but rather at the Peak Earth Immortal Realm, and then broke through into the Immortality Regainment Realm after the power of the Heavenly Dao ceased to restrain her, then that is truly terrifying. In such a short time, she directly broke through from the Early Immortality Regainment Realm to the Late Immortality Regainment Realm, and her Immortal Mountain...

Cao Zhen glanced at the Immortal Mountain of this Insect Queen, an Immortal Mountain that is four thousand seven hundred zhang high!

Among the humans he had seen before in the Late Immortality Regainment Realm, not one reached four thousand zhang in height.

This height is already extremely, extremely high!

"Late Immortality Regainment Realm, did you not slumber while at the Earth Immortal Realm?" Cao Zhen did not attack immediately but instead voiced the doubt in his heart.

However, the Insect Queen completely ignored him, her more than twenty tendrils swung directly towards Cao Zhen.

In an instant, a repulsive, choking stench wafted over, and from her tendrils grew poisonous needles.

The flying insects were produced by her, and since they have poisonous needles, naturally she also has poisonous needles, and her poison is even more terrifying.

Each of these tendrils, as massive as mountains, swung as if tearing through the sky, falling from the horizon, stirring up horrifying gales in the air.

In a moment, around the altar, chunks of shattered stone and wild grass were swept up, and even a few flying insects were blown uncontrollably far away due to the gales.

Yet, the resources on the altar did not take to the air, likely due to the Great Formation on the altar.

Those tendrils, as they swung, smashed obvious black fissures in the void, making it seem as if the entire void was split into several pieces.

Cao Zhen's face suddenly showed a terrifying expression; how was this Insect Queen playing by her own rules? Shouldn't she first answer my questions in a situation where victory seemed assured, and then attack?

Why did she attack directly!

This power is truly frightening!

Cao Zhen watched the falling tendrils and repeatedly retreated backward, while the Prosperous Age Picture Record appeared before him.

The Immortal Qi from the Immortal Mountain behind him surged madly, rushing into the Prosperous Age Picture Record.

In an instant, the Prosperous Age Picture Record fully unfolded, and for a moment, the sky of this world was shrouded by the record.

From afar, it looked like a world appeared overhead.

This world had rivers, plains, swamps, deserts, various terrains, and it also had towering mountains, with gateways in some of the higher mountains.

Eastern Wasteland!

This is the entirety of the Eastern Wasteland!

As the Prosperous Age Picture Record unfolded, in every mountain gateway, city, great mountain, and across every river of the Eastern Wasteland, streams of Age of Prosperity Qi suddenly flew out and away.

Even though this place was the Outer Heaven Battlefield, no longer in the Eastern Province, no longer in the Great Thousand World of humans,

Yet, in just a breath, the Age of Prosperity Qi that gathered the entire Eastern Wasteland had fully surged into the Prosperous Age Picture Record. Its limitless power seemed as though it could destroy this world, the entire universe, and emanated from the Formation Map, or rather, from the phantom of this Eastern Wasteland world.

Just with the surge of aura alone, the surrounding air seemed unable to bear it, trembling wildly. Consequently, the stone ceiling of the cave above shattered, and fragments of stone fell crazily.

Cao Zhen did not take action, yet having gathered the Age of Prosperity Qi of the Eastern Wasteland, the aura emanated from the Prosperous Age Picture Record was enough to start collapsing the cave.

The opponent's Immortal Mountain was so high, even if he did not fear their poison, it would still be impossible to kill this Insect Clan Queen with ordinary means.

To exterminate the opponent, there were only two methods. One was the Immortal Slayer Flying Knife, but he had crafted a knockoff version of this flying knife, and after using it three times, it would be

rendered useless. Thus, despite being able to use the Immortal Slayer Flying Knife in the Immortal Path Domain, he had never done it.

This time, he chose to use the other method first, which was the Prosperous Age Picture Record!

Cao Zhen felt the majestic Age of Prosperity Qi and pressed down with both hands furiously.

In an instant, it was as if the Prosperous Age Picture Record of the entire Eastern Wasteland suddenly fell down!

The current Prosperous Age Picture Record contained the power of the entire Eastern Wasteland, and the Eastern Wasteland now was home to many Great Teachings, as well as many sects from the Central Continent.

Although these Great Teachings did not consider the Eastern Wasteland as their homeland, still, there were some people among these Great Teachings that, after coming to the Eastern Wasteland, wanted to protect it, to join with all humans in resisting the six major alien races!

As a result, he could borrow the Age of Prosperity Qi from these Great Teachings and those experts. Even if he borrowed just a little, the strength of those people was inherently strong, and their numbers many, creating an incredibly terrifying conglomerate of power!

In a brief moment, the entire cave exploded, revealing the outside world, while the void outside the cave also shook wildly, continually bursting and bursting again!

Above the void, the clouds scattered, and the blazing sun vanished!

The Insect Clan Queen's eyes suddenly widened, her heart uncontrollably filled with endless dread, what was this!

How could someone at the Mid Immortality Regainment Realm unleash such terrifying power!

Chapter 2058:

Moreover, this force is so unique that he even has a feeling that what he is facing is not a person, but an entire world, a true world of the Human Clan!

This power gives her a feeling of being able to destroy everything in the world!

She has never faced such a terrifying power!

Not to mention a Mid Immortality Regainment Realm, even a Peak Immortality Regainment Realm, or even the peak of the Peak Immortality Regainment Realm, might not possess such terrifying power!

In her gaze full of horror, the Prosperous Age Picture Record has already descended with an unstoppable force!

Boom!

A loud explosion sounded, and under the impact of the horrifying force, the entire cave, and the giant mountain where the cave was located, exploded in an instant!

The force that seemed capable of destroying all things struck, causing her massive body to explode open.

Yet, this force did not dissipate, instead, it surged towards all directions.

All around, the nearby flying insects didn't even have the chance to react before they were instantly obliterated under the impact of this force!

Even the flying insects further away did not escape, some of them were swept by just the aftershock of the Age of Prosperity Qi, and instantly shattered to dust!

In face of the Age of Prosperity Qi's power, it seemed that nothing in the world could stop it; however, when this force reached Cao Zhen, it did not cause even a bit of damage.

Three-Eyed Honor had just flown out of the cave with Venerable Gui Jian and others, when suddenly, a deafening sound came from behind them, so loud that even they were instantly deafened.

Subsequently, a terrifyingly powerful force suddenly erupted from behind them, a force so strong that they couldn't describe it.

With the explosion of this power, the mountain beneath them suddenly shattered open.

Beneath them stood a remarkably majestic mountain; ordinarily, for any one of them to destroy this mountain, they could achieve it with their strength, though it would be a bit troublesome, requiring continuous bombardment.

But that force, in an instant, blasted the mountain below into oblivion, flattening it and pulverizing the mountain into dust!

"This... what is this? With just one strike, it pulverized the mountain! And that shockwave continues to push forward, impacting the neighboring mountains as well!"

"What... what kind of force is that!"

"Could it be... isn't that the power of the Insect Clan's mother insect!"

Everyone looked aghast in the direction where the power came from, and in the next moment, Venerable Gui Jian and Three-Eyed Honor wide-opened their eyes!

Even from such a great distance, the entire mountain had been leveled, and everything on the mountain was flattened. Regardless of whether it was flowers or trees, everything was flattened.

Their line of sight was completely unobstructed, and they could easily see the standing figure.

"Cao Zhen!"

"He's... he's still alive!"

"Around him, there are no Insect Clan members, no sign of the Insect Clan's mother insect, not even a single flying insect is visible."

"That earlier strike not only destroyed the entire mountain, but it also destroyed all lives within the mountain?"

"What kind of attack was that!"

"Yet, Cao Zhen doesn't have a single scratch!"

Everyone looked at the unscathed Cao Zhen in disbelief; such a terrifying blow, yet Cao Zhen emerged unscathed!

Even if that strike was executed by Cao Zhen, with such terrifying power, Cao Zhen should have been affected!

After all, Cao Zhen is just at the Mid Immortality Regainment Realm, definitely incapable of performing such a powerful attack, Cao Zhen must have used some special means.

By using those means, he should also have been impacted when releasing it, but how is it that Cao Zhen remains unharmed?

Moreover, what means did Cao Zhen use? To release such a terrifying strike!

These means, were they passed down by the Hundred Peaks Sect people to them?

However, even from the various Great Teachings in Central Continent, they don't come with such means; they've never heard of anyone in their Teaching having such terrifying capability!

How could someone from an Eastern Wasteland's Great Teaching possess such means?

Furthermore, even if it were to be true that such means exist, like some ancient artifact, it should be in the hands of a stronger figure like Ruo Yun, not in Cao Zhen's hands.

After Cao Zhen released the Prosperous Age Picture Record, he put it away, and witnessing its terrifying power made him quietly swallow.

He now represents the prosperity of the entire Eastern Wasteland, and he imagined that the Prosperous Age Picture Record's power would be tremendous, yet he hadn't imagined it would be this terrifying, not just exterminating that mother insect, but even annihilating all other flying insects!

If he had known it would be like this, he wouldn't have borrowed so much Age of Prosperity Qi.

After such a strike, trying to release Age of Prosperity Qi again would be difficult.

He feels that, never mind a few months, maybe not even within a year or two, he'd be hard-pressed to gather such a significant quantity of Age of Prosperity Qi.

Moreover, previously when he released Age of Prosperity Qi, although he'd feel exhausted, his internal aura wouldn't be too affected.

But now, after such a strike, he's feeling an unprecedented emptiness.

Not the emptiness of Chaos Qi, but an emptiness of prosperity.

In this state, he fears he can no longer borrow Age of Prosperity Qi.

Cao Zhen sighed helplessly in his heart, feeling that as prosperity grows stronger, the aftereffects of using the Prosperous Age Picture Record are becoming heavier.

This time, he really shouldn't have borrowed so much Age of Prosperity Qi; just look at the Insect Clan mother insect's corpse, it's been so utterly destroyed that some organs and skin have completely blasted away, and he doesn't know if it's still valuable.

After he first exterminated the Insect Clan's mother insect, he destroyed the corpse of the Corpse General's mother insect, but afterward, he realized that these Insect Clan mother insects are indeed special, possibly useful, so after subsequent exterminations, he would collect the mother insect's corpses.

And once he entered the Outer Heaven Battlefield, he further learned from Venerable Gui Jian that the Insect Clan mother insect's corpses are extremely valuable.

Because the other mother insects of the Insect Clan need the corpses of the mother insects.

Even though the insects they produce seem unremarkable, their intelligence is quite high, and they even openly declare that they purchase the mother insect corpses at high prices.

Chapter 2059:

As everyone knows, if a Zerg queen consumes another living Zerg queen, she might directly gain another ability and produce another type of soldier bug.

This is extremely important for a Zerg queen.

Ordinary Zerg queens can only produce one type of egg and have one type of soldier bug, which makes them particularly monotonous in combat.

It's unfortunate if they encounter an opponent that can restrain them.

For instance, if a queen's soldier bugs all use poison, and they encounter an enemy immune to their poison, their strongest means are rendered useless, and the result can only be the death of all soldier bugs, or worse, the enemy could track and destroy the queen's lair!

But what if she has another type of soldier bug?

If others can restrain one type, can they restrain two types?

Just like in the wars of mortals, armies are also composed of multiple kinds cooperating together, with archers, cavalry, shield bearers...

It's the same principle; only with multiple types cooperating can they exert stronger power.

However, Zerg queens almost never cooperate for unknown reasons, each fighting on their own, allowing other alien races to target and deal with them.

As for devouring other queens, it's equally extremely difficult.

Firstly, there's no trust between the Zerg queens. If consuming another makes one stronger, could they possibly let the other go!

The weaker queens must first think about hiding well enough not to be found by stronger ones.

Secondly, even if another queen is found, Zerg queens are almost immobile, relying on their soldier bugs for combat, and if they discover another queen, it's usually through the soldier bugs, which struggle to bring a living queen back.

Because if those queens, upon realizing defeat, face soldier bugs of another queen, they would rather self-destruct than be carried away.

After all, once taken, they would definitely be devoured.

If it were anyone else, would you choose to be devoured alive or commit suicide?

And even if these soldier bugs find another Zerg queen and use special means to control her, denying her the chance to self-destruct...

The bodies of Zerg queens are exceedingly large, and without a Flying Boat, they would have to drag her away.

In such a long journey, who knows if they'll be discovered by other forces, which certainly wouldn't want to see one Zerg queen devouring another. Under their frantic attacks, the Zerg queen might very well perish on the way.

That's why it's said that it's extremely difficult for a Zerg queen to devour another queen.

However, while impossible to consume a living Zerg queen, consuming the corpse of another queen, even though it doesn't grant her the ability to produce another type of soldier bug...

It is still a great nourishment for the queen.

This is why they publicly state that as long as one provides them a Zerg queen's corpse, they are willing to pay a high price, and their credibility in this aspect is excellent.

No matter the race, even the Demon Clan with the worst relations with the Zerg, if they bring a Zerg queen's corpse to another Zerg queen, she will fulfill her promise, give them resources, and let them leave, absolutely not attacking those delivering queen corpses.

They understand that if they break their promises, slowly, there won't be anyone from other races delivering queen corpses to them, and only they would suffer losses!

And although other races know that a Zerg queen's corpse is a great nourishment and strengthens another queen, they still deliver it.

After all, how much can it really strengthen?

No matter how nourishing, it can't cause a Late Immortality Regainment Realm Zerg queen to immediately break through to Peak Immortality Regainment Realm after consuming another queen's corpse.

If it were that terrifying, they wouldn't deliver the corpses.

Since that's the case, why not deliver it?

After all, killing a Zerg queen takes a tremendous amount of effort, costing countless skilled fighters their lives.

And Zerg soldier bugs don't use treasures, carrying nothing of value, at most the resources around the queen.

But some queens use up all resources, leaving only a small portion for emergencies, getting rid of the queen yields few resources.

So, they can only sell the corpse of the Zerg queen to earn again.

As for increasing the strength of the Zerg?

After all, it only strengthens a single Zerg queen, not an overwhelming increase—selling it makes sense.

If they don't sell it, others will, so why shouldn't they?

And if a particular queen becomes stronger, it doesn't necessarily mean they'll fight them, maybe they'll menace other races instead; among so many big races, what's there to fear!

In fact, in the early times of the Outer Heaven Battlefield, there were even some races secretly capturing living Zerg queens to sell, actions quickly discovered by strong figures of their clans, resulting in extreme punishment!

The stance of the upper echelons of major races is the same: if you sell a few corpses, they can turn a blind eye, not paying much attention.

Chapter 2060:

However, daring to sell living Zerg queens to the Insect Clan could greatly boost their power, potentially creating an incredibly strong insect army, which is something they absolutely cannot tolerate.

Even within each major tribe, there is a rule: no matter who it is, even if they're from the royal or imperial family within their tribe, if they dare to sell living Zerg queens to the Insect Clan, once discovered, they will be executed immediately!

Therefore, no major tribe dares to sell or trade Zerg queens.

Initially, the Human Clan didn't even sell the corpses of Zerg queens. However, later, upon discovering that other tribes were selling the corpses of Zerg queens to the Insect Clan, they started to sell them too.

Everyone else sells them, even the Demon Clan, the nemesis of the Insect Clan, sells them. So why shouldn't they sell them?

After selling them, they can exchange for a considerable amount of resources.

The Zerg queens are really quite generous when making deals.

After learning from Venerable Gui Jian about the value of Zerg queens' corpses, Cao Zhen pondered for a long time, fully understanding that the actions of the Human Clan leadership were not wrong.

If no tribe sold Zerg queens' corpses to the Insect Clan, it would have been fine; that way, the strength of the Insect Clan could have continued to diminish.

But the problem is, as long as one tribe sells the corpses of queens, the rest will follow.

At that point, it wouldn't make a difference if your tribe abstains, so you might as well sell them too. Now, in his Qiankun Bag, there are quite a few corpses of Zerg queens.

However, they are all corpses of Zerg queens from the Earth Immortal Realm.

Although the corpses of Zerg queens are valuable, the price varies depending on the specific Zerg queen.

A queen corpse from the Earth Immortal Realm is certainly not as valuable as one from the Immortality Regainment Realm.

Currently, this corpse of a Zerg queen from the Immortality Regainment Realm is so damaged that he doesn't know how much it's worth, or whether it can sell for more than a complete queen from the Earth Immortal Realm.

After collecting the queen's corpse, Cao Zhen raised his hand and gathered the surrounding resources, wondering why the Prosperous Age Picture Record had spared these resources from its devastation, as if its power did not target them.

However, the flowers and plants in this cave were all pulverized, which was baffling.

Seeing Cao Zhen starting to collect resources, Venerable Gui Jian and others reacted and flew over.

Though they couldn't fathom how Cao Zhen unleashed such a terrifying attack, they knew it must be a secret of his! They didn't ask, merely watched Cao Zhen in astonishment.

Quickly, Cao Zhen had gathered all the scattered resources into the Qiankun Bag, just about to speak to everyone when his gaze fell into the distance.

Almost simultaneously, Ruo Yun and Venerable Gui Jian also looked into the distance.

In their vision, several demon clan members resembling humans came into view, among them, the men were handsome, and the women beautiful.

The only difference from humans was the tails sprouting from their backs.

Leading them was a demon with nine tails growing from her back!

"A royal of the Demon Clan, an imperial from the Fox Monster Clan, a Nine-Tailed Fox Demon!"

Three-Eyed Honor gasped in a hushed tone.

Among the Demon Clan's top ten tribes, the most powerful was the Dragon Demon Clan, the imperial clan of demons, while the rest were termed the royals among the Demon Clan.

The Fox Monster Clan is one of these ten tribes.

And the Nine-Tailed Fox Demon is the imperial family within the Fox Monster Clan! The strongest presence in the Fox Monster Clan!

He had only heard of them before; on the Outer Heaven Battlefield, he had seen demons, but never a Nine-Tailed Fox Demon until now.

His gaze scanned around, noticing these demons, the fewest tails among them had six, all fox demons!

The remaining two fox demons had eight tails, while most had seven tails.

His heart sank instantly; the combat power of the Fox Monster Clan is easy to discern, generally, the more tails a fox demon has, the stronger it is!

Even if two fox demons are at the Mid Immortality Regainment Realm, the one with more tails is more than ninety percent likely to be stronger than the other!

The fox demon he encountered earlier had six tails, and he already felt it was extremely strong, anyway that opponent, like him at the Late Immortality Regainment Realm, was far stronger than him.

And now, the fox demons he encountered had at least six tails, so those with eight or even nine tails must be terrifying!

Around him, Venerable Gui Jian and others' expressions also became exceedingly grave.

Even if they hadn't seen fox demons, being one of the Demon Clan's nine royal families, how could they have not heard of them!

Fox Monster Clan is extremely troublesome, especially with their soul-targeting attacks that leave one defenseless and easy to fall for.

Cao Zhen looked at the fox demons in front of him, his gaze landing on the absurdly beautiful nine-tailed fox demon, an unexpected look appearing on his face.

"Ju E? Did you also enter the Outer Heaven Battlefield?"

Ju E!

In the past, when he was in the Central Continent, the nine-tailed fox demon he had once captured was also the temporary clan leader of the Fox Monster Clan in that particular small world.
