

O Summoner 1771

Chapter 1771 Semi-Mythical Field Bosses

[Your soulbound, Kanlaon, has used Elemental Apocalypse and dealt with a large horde of monsters.]

[You have gained a lot of experience points as a result.]

All of the players that were in Avalon witnessed the might of a dragon that is unhinged. The entire field below could be seen to be extremely ravaged by the intense clash of elements. The ground caved in while there are traces of the elements that destroyed it as well.

The sight of numerous monster body parts scattered about could be seen. Some were even blown away or disintegrated because of the powerful elemental attack that hit them. Still, there were some monsters that were either lucky or extremely defensive which is why they are still alive.

The monsters that survived are either really injured or extremely exhausted as they used their energy to defend themselves. Sirius and Dodu immediately jumped at the opportunity to clean up the battlefield. Sirius killed the weakened monsters that were about to die while Dodu devoured those that were just exhausted.

Adrian then announced that they can now charge as there were still monsters that survived and are still charging towards Avalon. Adrian swept through the monsters to see if the two semi-mythical tier monsters that he sensed were still there. Just like Adrian thought, the two semi-mythical monsters were slowly creeping in while also carefully observing him as well.

"Sorry to say but I have already locked in your location. Ark, is the team ready?" Adrian asked as he descended to his guild members.

"We are ready." Ark stated.

"Good. Things will be chaotic the moment I sent you there, but I will mark the enemies that we will need to defeat. I will try my best to support all of you, but I will need to focus on one of them first." Adrian stated.

"We got it guild master!" All the Pantheon guild members replied as they know why they need to defeat the monsters.

Adrian then created the mirror that will send the respective teams to the semi-mythical monsters. The teams are sent to the location of the monsters, but they did not see them. It was only when Adrian shot a beam of light to both of the semi-mythical monsters did the guild members know which are their actual targets.

The two semi-mythical monsters were able to deflect the beam of light that Adrian directed at them. The Armored Titan Bear emitted an energy shield that absorbed the impact of the light beam. The Spine Needle Jaguar rolled into a ball and was able to absorb the hit from the attack.

The guild members were surprised that the monsters that they need to defeat were those two. They were not able to distinguish them from the other monsters that are trying to attack Avalon. The two semi-mythical monsters were able to hide their oppressive auras from the players.

Even Adrian would have difficulty sensing them if he only used normal methods. He had to use his evil eye in order to distinguish them as well. He also needed to rely on the omni vision that the mirror demon form is using.

The two semi-mythical monsters no longer hid their auras when they were now marked. As soon as they released their auras, the pressure that the two monsters emitted were no longer the same as before. One could even say that the air around them became heavy as they were now in full battle mode.

Adrian and his team are going against the Armored Titan Bear while Ark and his group will deal with the Spine Needle Jaguar. The two semi-mythical monsters also took some distance from each other as they did not want to be cornered together. The two of them have actually managed to unlock some wisdom which is why they can plan out their next moves.

Adrian told his team members that he will be the one that will deal with the Armored Titan Bear. They would need to support him by attacking when they get the chance. He also told them to be wary of the surroundings as there are still monsters around them.

Kanlaon returned back to Adrian's soul chamber as he utilized all of his stamina in completing all of those spells. Adrian could not even summon Kanlaon for half an hour due to the severe exhaustion. Adrian immediately summoned Charon to replace Kanlaon as he knew that both of them work well together.

"Let us see what will happen then. Sirius, start us off." Adrian stated as he was still a bit wary of the Armored Titan Bear.

Sirius suddenly released lots of shadows from below in an attempt to bind the Armored Titan Bear. The shadows headed towards the Armored Titan Bear like snakes and wrapped around its body. One could see that the Armored Titan Bear is covered fully in shadows and is actively trying to shake it off.

The Armored Titan Bear emitted a powerful roar and suddenly expanded its own energy outwards. The Armored Titan Bear could be seen emitting an aura around it that solidified. The solidified aura looked like an even bigger silhouette of the Armored Titan Bear.

"Master, it is releasing primal energy from its body to solidify its aura. We must penetrate it in order to even deal damage." Paradox reported as it was tasked to investigate the enemy.

"I see. Let us see it deal with an elemental attack then. Kimat!" Adrian stated as the skies rumbled.

The sky darkened and suddenly released a powerful burst of lightning that headed towards the Armored Titan Bear. The semi-mythical boss monster was unable to move away as Charon suddenly used its chains with Adrian's mirrors to bind the former for a few seconds. The Armored Titan Bear was unable to shake off the chains easily which led it to be directly in line to be hit by the lightning strike.

A powerful lightning strike hit the Armored Titan Bear and a column of smoke arose. Adrian wanted to see if the Armored Titan Bear was directly hit but his wishes did not come true. The Armored Titan Bear just roared loudly as the lightning that has struck it suddenly became a part of its body.

The Armored Titan Bear could be seen to have harnessed the lightning that Kimat has summoned. The lightning element could be seen swirling about on the aura of the semi-mythical boss monster. Not only did the Armored Titan Bear look fierce, but the addition of the lightning element also made it even deadlier.

"Lightning Paws!" The Armored Titan Bear suddenly stated as it was actually able to use human speech.

The lightning aura that gathered on its body is now transferred to its paws. The Armored Titan Bear's paws are now filled with intense lightning energy that can vaporize anything. The Armored Titan Bear suddenly started charging towards Kimat as the two monsters are now embroiled in a fight for supremacy.

Sirius no longer hid in the shadows as the Armored Titan Bear is not even affected by its shadow bindings. The Armored Titan Bear seems to be a field boss that has great elemental resistances which is why it can easily block any elemental attacks. Kimat and the Armored Titan Bear started to fight each other physically as their elemental attacks did not work on each other.

"Everyone! Clear up the monsters!" Adrian suddenly commanded as the monster horde started to flood once more.

Adrian and Charon utilized each other's specialties and connected their skill together so that the chains can reach even farther. Adrian materialized all of the mirrors as chains burst out from all of them since Charon's chains contain debuffs when hit. Sirius wanted to join Kimat in attacking the Armored Titan Bear, but Legendary tier monsters started to surround him.

"No use holding back then. Nether Domain! Netheros True Form! Limit Break: Summoner!" Adrian stated as he knew that the Armored Titan Bear might use more of its energy if the fight becomes even longer.

All of the battlefield where Adrian is standing is immediately shrouded in Nether Mist. The Armored Titan Bear that was about to land a hit on Kimat was bewildered as its opponent suddenly vanished. The semi-mythical boss looked around and suddenly raised its left arm to block something.

By utilizing its instincts, the Armored Titan Bear was able to block Kimat's surprise bite attack. Kimat was immediately summoned back into the battle by Adrian in his nether form. The Armored Titan Bear tried biting Kimat's head as it roared in pain from the deep bite that Kimat has done.

A foreign substance suddenly started to invade the body of the Armored Titan Bear as Kimat's attack contained nether energy. The arm of the Armored Titan Bear could be seen starting to spurt blood as the blood vessels were bursting out due to the nether energy. Before the Armored Titan Bear could bite his head off, Kimat immediately retreated as two new monsters were trying to hit the semi-mythical boss in their nether forms as well.

Chapter 1772 The Armored Titan Bear I

The Armored Titan Bear roared as it tried to expel the nether energy that was injected into its body. The Armored Titan Bear tried to use its special ability that manifests an aura armor, but the nether energy did not leave its body. Adrian could see that the Armored Titan Bear is starting to lose a lot of health by the second due to the infection.

"Now is the chance! All of you! Bind it and bombard it." Adrian commanded as this command is not only for his soulbounds but also to his guild members.

Sirius, Charon and Wisteria focused on pinning down the enemy while Kimat and Dodu focused on dealing damage to the Armored Titan Bear. Saena is not in this fight with them as she is busy protecting the Tree of Life and Death from flying monsters that appeared. Adrian could feel the power of a legendary tier monster hiding in the clouds, but Saena would be able to handle it on her own with his buff.

Even if Saena is not with Adrian, she can still heal the team as she is connected to the Tree of Life and Death. She would send out a healing wind every minute that is amplified by the Tree of Life and Death which directly heals 10% of all the players affiliated with or fighting for Avalon. She would also send out a pulse that heals 2% of maximum health and cleanses the status ailments or status debuffs.

The reach of Saena's healing abilities is amplified by a hundred when she is fighting for the Tree of Life and Death. This was a welcome benefit for all the players which made them fight in a fiercer manner. A healing wave that heals 10% of maximum health is something that is equivalent to an Epic tier healing spell from a priest that has a five-minute cooldown.

The Armored Titan Bear felt the sudden fierce eyes that were targeting it and wanted to escape as it feared for its life. It was supposed to be a predator amongst the prey, but it was actually regarded as prey all along. Even if it is now in a semi-mythical tier state, the Armored Titan Bear is not yet used to its newfound power as it just absorbed it from the skies a few hours ago.

The Armored Titan Bear did not want to come to Avalon, but its own power is not yet stable. It has already gained some wisdom when it became a legendary tier monster, but it still has early-stage intelligence. When the energy inside of its body suddenly surged uncontrollably, the Armored Titan Bear feared for its life as it has already seen a monster have an unstable energy and explode due to not being able to control it.

The Armored Titan Bear marched on towards the powerful source of life energy that it first felt and knew that it would be able to survive as long as it eats that. Still, the Armored Titan Bear has already gained wisdom and knew that the place it sensed the powerful life energy is a settlement where people live. It knows that it will not be able to get that life energy source by its own.

Fortunately for the Armored Titan Bear, the Spine Needle Jaguar is also at the same state it was. The two field bosses have known each other and marked their territories. Their territories come from having mutual agreement that they will not step in each other's area which is why they are at peace.

Seeing that the both of them have unstable energies inside of their bodies, the two monsters agreed to share the life energy source that is located in Avalon. Both of them are already in the semi-mythical tier which means that they only need half of the source to complete their metamorphosis. As both of them agreed to working together, the two monsters roused all of the monsters that is locate in their new location.

All of the monsters that were also unstable wanted a taste of that potent life energy source which the two monsters used as bait. The two semi-mythical monsters promised to help the monsters that are in a precarious state once they have obtained the life energy source. They even promised that they will be the new rulers of that sacred land which produces such precious things.

The Armored Titan Bear started to turn tail but then it remembered that it would die if it does not eat the life energy source. It has already pushed through such difficult battle and now is not the time it will fall back. The Armored Titan Bear knew that it would either die fighting now or die after it has escaped.

The Armored Titan Bear suddenly braced itself for impact as it used every energy in its body that it could properly control. With a loud roar, the Armored Titan Bear suddenly got hit by powerful lightning that it has summoned itself. Contrary to before that only its paws were energized, the entire body of the Armored Titan Bear is now filled to the brim with unstable lightning energy.

[The Armored Titan Bear has sacrificed 20% of its maximum health in order to enter Frenzy Mode.]

[The Armored Titan Bear has called upon the lightning above to energized it. It will have an unstable energy surrounding its body and any contact may deal 1% to 15% of the individual's maximum health.]

The Armored Titan Bear that was a quadruped suddenly started to stand up with its own two feet. One can even see that it actually doubled in size not just due to it standing. The actual muscle mass of the Armored Titan Bear increased as it was filled to the brim of unstable energy which caused its muscles to contract ferociously but it also came with the fact that it is losing small amounts of health.

"I AM THE STORM!" The Armored Titan Bear shouted as it suddenly released a powerful shockwave containing lightning with it at the center.

Adrian immediately conjured up mirror that swept across all of the players that he could see. Some were unlucky as they were almost saved by the mirror, but the electric shockwave hit the mirror which destroyed it. All those that Adrian was unable to save got stunned in place and a portion of their maximum health was deleted in an instant.

[The Armored Titan Bear has injured itself from using such a powerful skill.]

[The Armored Titan Bear lost 5% of its maximum health as a result.]

The Armored Titan Bear did not even flinch from the pain as it started to charge towards those that have been stunned. Even if it has such a large body, it actually arrived at the closest monster. The electric shockwave not only hit the players but also some of the monsters in the vicinity.

The monster thought that the Armored Titan Bear would save it, but it was wrong. With its large paws, the Armored Titan Bear scooped up the stunned monster and tore through its flesh. Fresh blood surged from the dying monster's body, but it also healed the Armored Titan Bear.

[The Armored Titan Bear has recovered 3% of its maximum health.]

"Stop it from consuming anymore monsters!" Adrian commanded as he opened multiple mirrors once more and all his allies and soulbounds came out of it to deal with the Armored Titan Bear.

The Armored Titan Bear did not fear the sudden influx of enemies as it has already sunk into partial madness. The Armored Titan Bear cannot think as straight as it could due to the power surge also affecting its brain. The instinct of the Armored Titan Bear has kicked in and its first priority was getting the life energy source at all costs.

"It has lost some of its intelligence which means it would be easier. Bombard it with all you got! I shall deal with the upcoming monsters." Adrian commanded as he manifested all of the mirrors that broke when the lightning shockwave hit.

With a clap of his three hands, all the mirrors that he summoned released powerful beams of light that sent the same energy of the lightning shockwave. The monsters that were charging to the location of the Armored Titan Bear were stunned as the effects of the absorbed skill was still there. This made the Armored Titan Bear the only monster that can be dealt with.

Adrian used all of his focus to manage the battlefield as he not only uses his own guild members but also the other players as well. Adrian would swoop in when the players are about to die to send them to the priests or would redirect the attacks that they missed using his mirrors in order to accurately hit the enemies.

The players can feel the thrill of what it truly means to fight alongside the one coined as the Demon. They now know that Equinox did not receive that title just because of his race but also due to the fact that he can make difficult situations easier which feels like it is the work of a demon.

Chapter 1773 The Armored Titan Bear II

The players heard the ecstasy of the notification windows telling them that they have killed monsters even if their initial skills did not hit. They are once again beholden to the fact that demons have a very interesting power that can bend time, space and force. Still, all of the players knew that the skill cap must also be quite high.

"We have no time to waste as the Armored Titan Bear might get used to using its newfound power and absorb all that energy that we need. Activate all of your domains!" Adrian commanded.

Sirius, Charon, and Dodu immediately activated all of their domains which also melded well with Adrian's current domain. The domain that was filled with just nether mist started to undergo some slight variations as some elements were mixed into it. If one will observe closely then the entire area felt different as the amount of energy being released became heavier.

The sudden heavy atmosphere is not felt by the players and allies of Avalon as Adrian did not select them as enemies. Domains can be perfectly controlled as a set of rules which is why any ally inside the domain will not be affected by its powerful restriction. The same cannot be said to all the monsters that are invading Avalon though as their movements became heavy and they felt like they are being squeezed.

Four domains that should not be easily fused together have started to pressure all the monsters. This should not normally happen, but this is the result of the sync between all of Adrian's soulbounds. It is also due to a unique thing that is planted inside of Adrian's soul as the chosen one of the Twin Gods ever since his birth.

If the enemies were players, then they would have been horrified at the number of status debuffs that all of them will get. This type of interaction will not be easily replicable unless a summoner has full control of all their soulbounds. This is a hidden mechanic for summoners that have all of their soulbounds in maximum favorability which cannot be easily measured.

The sudden change in the surroundings also prompted the Armored Titan Bear to change things up. It called upon the lightning once more in order to counteract the negative effects affecting its body.

The Armored Titan Bear baptized itself with lightning once again, but the negative effects did not disappear which made it incredibly furious.

If the Armored Titan Bear is still in full thinking capacity, then it would have noticed that the monsters that it was facing were already in the Mythical Tier as they were able to release domains. This is also news for some players as they did not know that soulbounds could have domains but what they do not know is the difficulty in getting one.

"Start the assault at full capacity!" Adrian added the most cold-hearted command as if he already saw the Armored Titan Bear as a monster that is defeated.

Sirius suddenly became larger as he already activated Realm Ender. Charon already started its powerful assault on all the living enemies in the battlefield as well. The chains that made its body started to scatter in all directions as all the living enemies are attached. The Armored Titan Bear started to feel sluggish and sluggish as phantom chains were already attached to its body that it is unaware of.

Dodu is the next one that started punishing the Armored Titan Bear as every touch that it does makes the body of the enemy weaker. Dodu has stolen much of the Armored Titan Bear's defenses with each passing graze while also swiftly and professionally avoiding the lightning strikes so that it would not be damaged. If the people of the past already feared powerful slimes before, then they would be absolutely petrified to find an intelligent powerful slime monster.

The Armored Titan Bear tried and tried to shake off the amount of bombardment it was receiving but it has started to lose health at a considerable rate. It was already losing health because its body cannot contain the vast power that it holds since it has yet to get a divine body. The lightning that the Armored Titan Bear summoned is actually filled with divine energy, but its current body cannot process it which is why it is also losing health.

The steady decline of the Armored Titan Bear's health made Adrian smile as the end is getting near for it. He also had a bit more time to look at the other side if they were handling that monster better on their end. Adrian saw that Ark and Pana with the guild members were making great use of all their skills in such a wide setting which made him believe that they can easily defeat the other semi-mythical tier field boss.

"Just 20% more health and we will be done. Everyone! Focus!" Adrian stated as it was not only for his soulbounds but also for his guild members that are participating in dealing damage as well.

The Armored Titan Bear started to become weaker and weaker as its health slowly dropped to 10%. As if it was the last futile attempt of a powerful monster, the Armored Titan Bear released all of the lightning that it has absorbed in its body. A powerful dome explosion of lightning energy came out of the Armored Titan Bear.

The lightning dome explosion was so fierce and fast that Adrian was unable to save some of those that were caught up in it. The attack was faster than him manifesting a mirror that takes only half a second. Some of the players were able to withstand the attack but a hefty amount died in the process as well including some of his guild members.

When the lightning dome explosion was no longer in sight, the monster at the center could be seen fragile and weak. The Armored Titan Bear that was incredibly bulky and menacing suddenly

became a frail and weak looking monster. The muscles bursting on its body can no longer be seen as all of it has vanished.

The Armored Titan Bear would be more adequately called the Skeleton Titan Bear as it no longer as proud armor nor the large muscles. The breathing of the Armored Titan Bear is also suddenly so heavy as if it was already dying. It only kept standing due to the sheer determination that it has but that is all it has.

Sirius suddenly sprouted from the shadows and ripped its head off. The Armored Titan Bear' frail body crashed on the ground without even a loud thud as all of its body mass was already used up. Adrian immediately appeared beside the corpse and hacked the heart of the Armored Titan Bear. A shiny rainbow-colored crystal could be seen emerging from it which he immediately stored in his inventory.

[You have defeated the Armored Titan Bear.]

[A great deal of experience points has been received.]

[You have gained +1 Divinity due to absorbing some of the divine lightning it has emitted through your soulbound.]

The players in Avalon did not care if Adrian will take all the loot as he basically made them get more than that ever get when fighting against a horde of monsters. The players that fought with Adrian rang in cheers as they have defeated the powerful field boss in their side. They are also alive due to him as he made the battlefield his chess board which made them both fear and awe when it comes to his capability.

"Help! The other field boss is trying to run away!" Ark shouted as he used his spells to bring down numerous light and darkness swords to stop the Spiny Needle Jaguar from escaping.

The Spiny Needle Jaguar saw the demise of its accomplice and knew that it must not remain here any longer. The Armored Titan Bear was a proud being with exceptional physical qualities and defense. Even the Spiny Needle Jaguar knew that it cannot deal with the Armored Titan Bear easily, but a group of powerful humans defeated it while also making it look pitiful.

The Spiny Needle Jaguar might not look like it, but it is a prideful monster that does not want to look weak even in death. It also has a great obsession for life which is why it did not fight against the Armored Titan Bear for territory when they are close to each other. The Spiny Needle Jaguar has a great need when it comes to clinging to its life which is why it is now trying to run away.

The Spiny Needle Jaguar even released some of its spines that latched onto the other monsters trying to run away. The monsters that had spines sting them suddenly became enraged and mad as they went berserk. The monsters also looked at the players and other beings killing them with great bloodlust which became a clever cover for the stealthy escape of the Spiny Needle Jaguar.

Chapter 1774 The Spiny Needle Jaguar

Ark and Pana were leading the others in battling the Spiny Needle Jaguar and they were mostly able to handle it. Although, the two knew that the Spiny Needle Jaguar is still holding back. Ark and Pana could see that the Spiny Needle Jaguar is not paying extremely close attention in fighting them as if it is wary of something from afar.

The Spiny Needle Jaguar is also not like normal predatory monsters that are extremely aggressive. It is incredibly shrewd and made sure to even attack the blind spots that cannot be defended easily. It has already hit Ark and Pana a couple of times using its spines that it launches like flying needles.

The good thing is that the attack power of the needles is not that high but there is poison in them. There is also a chance to be controlled by the Spiny Needle Jaguar if one gets hit by the needles, but it has less effect on humanoids compared to monsters. The guild members can easily cleanse the effect by making sure that the needle no longer is embedded on the skin of the one getting controlled.

Ark and Pana were making use of their teamwork that uses the former as the vanguard while the latter is the rear guard. Basil would have been their heavy hitter, but she was not there since she is still trapped in Dragon Rock. They were doing their best in order to get the magic stone of the Spiny Needle Jaguar as they have been told that it might be the thing that they need to cure Basil.

Ark did not pull his punches as he made sure to attack the Spiny Needle Jaguar with all that he has. Ark has already mastered the manipulation of light and darkness elements. He can shape them into things that have physical mass which is something that angels and devils can do as well.

Ark uses the two-handed weapon style, but he usually uses a sword made of light and a shield made of darkness. He uses a sword made of light due to the fact that the light element has defense piercing attributes which helps in dealing damage. He tried using a normal sword before, but ordinary weapons will crumble after being injected with pure light element that he wields.

He uses a shield made of darkness because compressed darkness is actually heavy, and firm compared to light that scatters with just one hit. For his shield, Ark coats it with the darkness element instead which makes it more of an enhancement than a shield made of complete darkness. Still, the shields that he uses are often destroyed after a few hours due to the immense strain they carry from getting injected by pure darkness.

Ark has yet to find suitable weapons that can take his pure elemental manipulation because weapons that can bear such power are in the Mythical Tier. He was already an existence that can be said to be very unique since he is a combination of two polar opposite races. Still, the power that a Nephilim holds is not something that can be shrugged by as he can go toe to toe with the Spiny Needle Jaguar.

Although the Spiny Needle Jaguar is not yet exerting everything it has, the fact that Ark can catch an attack from a semi-mythical monster is a noteworthy feat. Pana is also doing great as he has actually activated the legacy that was given to him by dark elf instructor back in the starting village. Pana still uses a bow as his weapons, but he can also change into a being that can go for a melee style of fighting.

Ark's new job is called Nightfall which is actually one of the lost hidden jobs of the Dark Elves. Nightfall is what they call the group, but it is also a job class as it is something that can only be given true a legacy. Pana inherited that legacy as he can now create traps using darkness and even hexes from death attribute magic.

Pana worked well with Ark as he can amplify the darkness in the area due to being a Nephilim born from angel and devil. The traps made of darkness made the Spiny Needle Jaguar unable to easily leave the area but also made sure that it is wary of the two beings that are trying to hunt it. Ark and

Pana with the help of the guild members are able to steadily deal damage to the Spiny Needle Jaguar but it all changed when the area was flooded by lightning.

Ark and Pana had to close their eyes in reflex as lightning illuminated the area and a loud roar came from the direction where Adrian was. The Armored Titan Bear could be seen like a gigantic bear god of lightning that has descended unto the world. The Spiny Needle Jaguar saw this and actually looked like it was extremely excited.

The Spiny Needle Jaguar that was not facing Ark and Pana properly suddenly looked at them with the intent to kill them. This was the first time that Ark and Pana felt like their lives were in danger as the enemy that was not looking them earlier is now hyper focused on them. They are glad that the enemy is no longer looking down on them, but they are still anxious that the real fight is now starting.

The Spiny Needle Jaguar suddenly emitted a low growl that made it menacing as the needle hairs on its body started to vibrate. The sound of buzzing could be heard in the surroundings as the Spiny Needle Jaguar made its needle hairs rattle. Ark and Pana along with the other guild members are now in high alert as this behavior is nothing that they witnessed earlier.

"I shall probe." Pana stated as he pulled his bow and materialized an arrow made of the darkness element.

The arrow imbued by the darkness element flew swiftly towards the Spiny Needle Jaguar, but the monster did not even move. With a low roar, the Spiny Needle Jaguar released a flurry of needle hairs that disintegrated the darkness arrow before it can reach its final destination. Pana saw this happen, but he still released numerous arrows, but this is not the end for his plan.

Pana released countless arrows that did not hit the Spiny Needle Jaguar. The arrows, however, are not just random ones as Pana is using his newly found skills to the test. The darkness arrows that missed actually formed a circle around the Spiny Needle Jaguar which it did not notice.

"Got you! Dark Net!" Pana stated as he threw a kunai made of darkness upwards but also released arrows towards the Spiny Needle Jaguar.

The Spiny Needle Jaguar destroyed the arrows that are about to hit its body, but it did not hit the kunai that Pana threw. Pana smiled as the plan worked and the field boss did not suspect anything. The kunai that he threw flew all the way at the top of the Spiny Needle Jaguar.

The kunai exploded and released potent darkness energy which created chains made of darkness. The chains made of darkness connected with one another like a net. Soon, multiple chains made of darkness covered the Spiny Needle Jaguar as it was in the center of the formation.

"Now!" Pana stated as his bow suddenly changed to a two chained kunai.

Pana is suddenly shrouded in darkness as his entire demeanor and clothes changed. His presence became weak as if he was going in and out of the mortal plane. Pana then tossed the kunais on his hands towards the Spiny Needle Jaguar which hit its body perfectly.

The kunai are attached to a chain but the weapon itself is made of darkness. As soon as the kunai pierced the Spiny Needle Jaguar, Pana would plant the other end of the chain to the ground. This made sure that the Spiny Needle Jaguar will not be able to run away for the next event.

"Dead or Alive!" Ark stated as he conjured a sphere of pure light element on his right hand while a sphere of pure dark element is on his left hand.

Ark fused the two elemental spears together and created an ominous sphere of volatile energy. He then threw this volatile sphere of energy towards the Spiny Needle Jaguar which engulfed it in an odd energy sphere. The Spiny Needle Jaguar suddenly had its vision become impeded as light and darkness swirled around it and dealing damage to its body.

The Spiny Needle Jaguar did not mind the damage its body is getting because it also somehow alleviated the pain it is receiving from its own body transformation. The Spiny Needle Jaguar even thought of staying inside the elemental sphere when the energy it felt from the Armored Titan Jaguar suddenly vanished. The Spiny Needle Jaguar suddenly released half of its needle hair to destroy the elemental sphere and see the sorry sight of the severed head of the Armored Titan Bear.

Chapter 1775 Extreme Magic Core

The Spiny Needle Jaguar saw the death of the Armored Titan Bear and immediately felt the look of all the soulbounds as if it was prey. The Spiny Needle Jaguar immediately started to turn tail and run. It created an opening by releasing all of its needle hairs outwards to create a distraction.

Pana saw this and immediately tossed more kunais towards the Spiny Needle Jaguar. The kunais had chains made of darkness appear when all of it hit the body of the Spiny Needle Jaguar. Pana knew that he cannot pull a monster of that size on his own which is why he asked the help of all the warrior guild members.

Pana and the others started to pull heavily which actually deterred the Spiny Needle Jaguar. Ark then created swords made of light and dark elemental magic and released it towards the fleeing field boss. The Spiny Needle Jaguar is no longer protected by its needle hair as it released a lot of it earlier and will take some time to regenerate.

"I must escape! I will use anything to live!" The Spiny Needle Jaguar thought to itself as it wanted to really escape as the monsters of the mist are now closing in on it.

The Spiny Needle Jaguar would have activated the energy in its own monster core if it was desperate. It wanted to become powerful enough in order to escape but it actually lacked the resolve unlike the Armored Titan Bear. The Spiny Needle Jaguar did want to escape but it did not want to lose its own sanity in the process.

The personality of the Spiny Needle Jaguar is what actually makes it unable to tap into the vast power that is absorbed by its monster core. Its energy was about to explode but it suddenly fizzled out as it was afraid to lose rational thinking. In the end, the Spiny Needle Jaguar was not able to slightly evolve like the Armored Titan Bear as it valued its thinking capability rather than pure power.

As the Spiny Needle Jaguar did not want to exchange sanity for power, it was not able to get the burst of energy that it needs. The swords of light and darkness that Ark created all hit the body of the Spiny Needle Jaguar. The semi-mythical field boss was unable to dodge as its body slowed down when the energy that it was trying to bring out backfired.

The Spiny Needle Jaguar released a soft cry as numerous swords of light and darkness pierced its body. With it being essentially bald, the Spiny Needle Jaguar is now prone to attacks easier. The

Spiny Needle Jaguar tried to claw its way out but numerous chained kunais were still attached to its body.

"Pull it down!" Pana stated as he made the darkness chains thicker and heavier.

"Huwa!" All the players that gripped the darkness chains shouted as they pulled.

The Spiny Needle Jaguar wanted to use its strength, but its body actually became stiff. The swords of light and darkness hit some important muscles that stabilizes its body. This made the Spiny Needle Jaguar move slower and weaker than usual.

"All of you attack!" Adrian stated as he opened numerous mirrors near the Spiny Needle Jaguar.

The mirrors that appeared let out all the soulbounds in action and the guild members that were on Adrian's side. The Spiny Needle Jaguar suddenly felt its life flashing before its very eyes and knew that it had to surrender its sanity for a chance of survival. The Spiny Needle Jaguar closed its eyes and made the energy deep in its monster core activate.

"Too late!" Adrian stated as he suddenly appeared out of a mirror then changed his weapon that of a scythe.

"Universal Threat!" Adrian stated as he vanished then appeared below the Spiny Needle Jaguar

One might think that Adrian's attack failed but the neck of the Spiny Needle Jaguar suddenly burst with blood. The neck of the Spiny Needle Jaguar was cleanly sliced as it was already low in health from the attacks before. Adrian sliced the chest of the Spiny Needle Jaguar and saw a rainbow-colored crystal that is the same size as that of the Armored Titan Bear.

The monsters that were rushing towards Avalon suddenly snapped out of some sort of mind control. The powerful beasts that were commanding them are now dead. With the leaders of the monster horde dead, the monsters in the horde are now in great confusion.

The monsters started to either runaway in confusion while some started to go ballistic as they no longer have any direction. Adrian and the others immediately started to kill the other monsters as fast as they can. Who would not want an experience point buffet when they are already presented with one.

The battle lasted for two more hours until all the monsters that rushed to Avalon are either dead or ran away. Some players went and chased monsters that ran away as they did not want such precious experience points go to waste but Adrian decided to stay. He already held two rainbow-colored crystals in his hands which are the things that he needed.

==

Item Name: Extreme Magic Core

Item Tier: Semi-Mythical

Item Type: Monster Core

Effect:

- Can replenish mana and health when one absorbs energy from it.
- The energy inside has unknown uses that must be found out.

Description: A monster core that has been filled with intense energy that is not of this world. It carries some hint of unnatural power that might be able to create miracles. Some of its energy has been used but a vast majority of this unknown energy still remains. More research is needed in order to find out the real uses of this thing.

==

"Will this really help?" Adrian thought but he was suddenly awoken by a loud shriek from the skies.

Dark Clouds suddenly rolled in while a gigantic bird that is the same size as a full-size Saena. The bird monster looked like a Thunderbird as well, but it actually has a crown on its head. Adrian did not frown when he saw the monster because he sensed the same energy from it like the Armored Titan Bear and Spiny Needle Jaguar.

"Three is much better than two. Greater Summon: Kanlaon!" Adrian stated as Kanlaon can be summoned once again.

Sirius had to return back to the soul chamber as he used Realm Ender. Dodu, Kimat, and Wisteria were unable to fight in the air which is why only Kanlaon and Charon were the ones that followed. Saena already flew towards and clashed with the gigantic monster that was crackling with lightning.

==

Monster Name: Thunderbird King

Monster Tier: Semi-Mythical

Monster Level: 290

Monster Type: Thunderbird King

Monster Species: Thunderbird

HP: 95%

MP: 88%

Description: The ruler of the thunderbirds that is said to bring clouds of great thunder with every flap of its wings. It has absorbed and eaten powerful lightning which it uses to temper its body for evolution. It is said to become a divine being once it has bathed in a hundred lightning storms.

==

"Let us catch it. Gravity!" Adrian stated as he used up a great chunk of his mana.

The Thunderbird King suddenly felt its own body become extremely heavy to the point that its wings could not carry its weight. It suddenly started to fall down but it will not go down without a fight. With a loud squeal, the Thunderbird King released numerous arcs of lightning from its body trying to energize its wings.

The Thunderbird King thought that it was struck by a curse which is why it used one of its skills that cleanses its body by releasing a powerful burst of lightning. The burst of light should be able to destroy the magic that it is being affected by, but lightning and gravity do not affect each other that much.

The Thunderbird King actually forgot that it was also in battle with another ruler of the skies due to its dilemma. Saena has already charged enough energy due to Adrian buying time as she spread her wing vast. Saena suddenly glowed like the sun and released a powerful beam of light in seven colors which hit the right wing of the enemy.

The Thunderbird King pushed its body to dodge but it suddenly found itself be covered in chains. The chains did t only restrict its movement but also slowed it down. The Thunderbird King could feel the chains sapping away at its own life force.

Kanlaon did not stop ascending as he also released its dragon breath. A golden beam of energy came out of Kanlaon's mouth which pierced the left wing of the Thunderbird King. The flying semi-mythical monster could no longer keep itself airborne which is why it started to crash down onto the ground as its wings were damaged.

"Delivery!" Adrian stated as he increased the gravity affecting the Thunderbird King in order to send it crashing to the ground.

Chapter 1776 Numerous Unknown Treasures

The Thunderbird King cannot steady itself in the air due to both of its wings becoming heavily damaged. It is also being affected by gravity in such powerful intensity. For the first time in its life, the Thunderbird King felt that it was powerless in a domain that it has considered as its territory.

A large bird monster crashed on the ground as the Pantheon guild members heard their guild master saying that he was delivering something. The Pantheon guild members did not expect that the delivery was another powerful monster. The Thunderbird King crashed on the ground and received intense fall damage due to how quick it fell due to the intense gravity.

The Thunderbird King tried to stand up, but it was too late as there were other beings waiting for it to land on the ground. Kimat did not utilize its own lightning as the Thunderbird King has great resistance to it but used his sharp claws and fangs instead. Kimat pounced at the first instant that the Thunderbird King dropped from the sky and ripped some of its proud feathers.

The Thunderbird King's feathers contain great lightning element that can shock any being if they did not have enough lightning resistance and also stun resistance. Kimat is basically at the same level of elemental manipulation or even better than the Thunderbird King which is why he is not affected in the slightest. It is not just Kimat that is preventing the flight of the Thunderbird King as vines started to wrap around its body and keeping it pinned on the ground.

Wisteria utilized all of her energy to make sure that the Thunderbird King does not regain flight. The binding is further enhanced by Charon once it has also reached the ground. There were other thunderbirds circling about that is under the command of the Thunderbird King, but Kanlaon and Saena were dealing with all of them along with other flying guild members.

Flying monsters are one of the most difficult monsters to catch in Pandemonium as they have free reign in the skies. They are known to utilize the skies without difficulty which is why players often become wary when hunting flying monsters as even players capable of flight are hard stuck as well. Just because players can fly does not mean that they can compete against monsters that were born to fly or have been flying since birth.

Even if flying monsters are difficult to capture, the fact that they are the weakest when grounded is also obvious. This is the reason why it also just takes one opportunity to turn the tables on flying

monsters as they are weak when not in flight. Flying monsters are also weak when it comes to terrestrial combat as they cannot use their talons for attacking as much since they use it to stand up and walk.

The Thunderbird King tried to stand up but the gravity bearing pressure on it prevented it from doing so. The Thunderbird King that is a proud and feared overlord of the sky can only take on the beatings that it is currently receiving. A few minutes later, the gravity that was enhanced on the Thunderbird King suddenly vanished as Adrian lost mana to continue using it.

The Thunderbird King was already incredibly weak, but it finally saw the chance it was waiting for. It used all the strength it could muster to try and stand up. It was actually able to break some of Charon's chains and Wisteria's vines. It finally saw the chance and exerted some of the energy its magic core has absorbed.

"The Great Divide!" Adrian stated as a giant axe suddenly appeared in the sky and came crashing to the ground.

The Thunderbird King could not even look up as it was still struggling to stand up. A loud crash could be heard as a huge crack could be seen where Adrian's axe landed. The Thunderbird King stood up but its body or rather its head started to slide down.

With a thud, the head of the Thunderbird King was split from its neck due to the attack that Adrian used. He even created a large rift on the ground that healed back slowly. The Thunderbird King died without even knowing that it died as the sudden decapitation was not something that it has noticed.

[You have killed the Thunderbird King.]

[You will receive a great deal of experience points.]

A rainbow-colored stone suddenly slid out of the decapitated neck of the Thunderbird King which Adrian picked up. It was another Extreme Magic Core which is greatly appreciated as having more is better than having less. The thunderbirds that were flying in the sky saw their king die a gruesome death and started to flee.

They were not able to subdue the escaping thunderbirds as flying monsters were more difficult to chase since they scattered in different directions. Adrian also sealed back all his soulbounds since they were already pushed to their limits. Despite saying that Adrian's soulbounds are powerful, the fight with numerous monsters also takes quite a toll on their physical bodies.

"We did it! I was not able to show off more because the guild master was too quick to kill all of them." Ark stated.

"If we waited for you to show off then Basil might be dead by now. We need to get the magic cores as quickly as possible or else the dragons would be goners." Pana stated.

"All of you can clean up right? If you are not part of the cleaning crew, then please check the surroundings as there might be other monsters that slipped in. A smaller monster might have entered the territory if we are not careful." Adrian stated as he tasked the others to monitor the remainder of the battlefield.

"You two can come with me as Apolaki has some great news." Adrian added as he called the two before teleporting to Avalon.

==

"I found something in Mahar Lika. It is a strange plant that suddenly bloomed and attracted all the monsters that evolved due to the intense energy flooding of the world." Apolaki stated as he showed Adrian, Ark, and Pana the flower that look like a bell flower but is radiating a rainbow light.

==

Plant Name: Kaleidoscope Mystica

Plant Tier: Semi-Mythical

Plant Type: Herb

Uses:

- Unknown

Description: An unknown flower that came to be when a vast energy suddenly surged forth in the area where it was planted. It attracts monsters due to the pure energy that it is emitting and is also extremely fragrant as well. The uses of it are currently unknown, but it is said that only beings of the forest can use its special magic. Eating it might invoke an evolution to monsters but that is not a verified fact.

==

The Kaleidoscope Mystica looked like it was somewhat alive as if it has gained some wisdom, but they do not know. It was only swaying a little bit but there are no further movements other than that. Adrian then presented the three Extreme Magic Cores that he got from slaying three semi-mythical field bosses.

Adrian then saw the Kaleidoscope Mystica act so lifelike and hungry. The bell flower suddenly lunged itself at Adrian's hands to devour the Extreme Magic Cores that he has. Adrian was so shocked by what happened that his brain actually did not process what he properly saw.

Ark, Pana, and Apolaki screamed in horror as the Extreme Magic Cores were suddenly devoured by the plant. The Kaleidoscope Mystica suddenly started to emit a bright light and also a powerful fragrance which made the air in Avalon smell sweet. The Kaleidoscope Mystica suddenly grew slightly bigger and even grew two more flowers as a result.

==

Plant Name: Kaleidoscope Magna Mystica

Plant Tier: Mythical

Plant Type: Herb

Uses:

- Unknown

- Unknown

Description: An unknown flower that evolved due to engulfing such powerful traces of pure energy. It is said to be something that even the gods would covet due to its great beauty and alluring

fragrance. This herb contains great power that is said to rival even a potent divine magic spell when used properly. Only beings of the Great Forest can utilize this herb properly.

==

"Ahhhh! I am so sorry!" Apolaki stated as he almost dropped the Kaleidoscope Magna Mystica.

"It ate the things that we need!" Ark shouted as he started to almost yank the flower bud of the Kaleidoscope Magna Mystica, but Pana was making sure that he did not do anything foolish.

"Do not panic guys." Adrian stated with a smile but even he did not look like he was genuinely smiling.

"What should we do? Do you think that it can spit it out?" Apolaki stated.

"That would be impossible because it has already digested it. It has such life and wisdom to actually eat things that it needs for evolution that it is almost scary. It is a good thing that it did not become a monster when the pure energy wave hit it." Adrian stated.

Chapter 1777 Kaleidoscope Magna Mystica

This is the first time that Adrian has encountered a being that is not a monster that can eat other beings. An herb that can eat things that can nourish it is something extremely weird and rare because of its nature. Adrian even thought that he could nurture it to Divine Tier if he nurtures it but that also mean that he needs to feed it semi-divine tier materials.

"There is no time. We need to deliver it to Dragon Rock to see if Levin Cloud can use it as a way to cure all the beings in the island." Adrian stated as he did not want to be greedy in the expense of his best friend.

"How are you going to deliver it when you said that teleportation is not applicable?" Apolaki stated.

"Direct teleportation is not applicable but teleporting to the ocean that is fifty kilometers is possible. My only worry is that the monsters at sea might be tempted to get that thing. I cannot use Kanlaon to fly there as well since he might get affected by the Dragonsbane." Adrian stated as he could see the danger that he is signing up for.

"We can just defend you while you fly towards Dragon Rock. It would be easier if all of us will do that." Ark stated.

"Can I remind you that we cannot fly." Pana stated as he pointed to himself and to Apolaki.

"We can use Saena to fly then." Apolaki stated.

"Unfortunately, she cannot leave the area as she is in full guardian mode due to the numerous monsters trying to come to the Tree of Life and Death. I am also unable to summon her away to another area until things calm down. The whole world has suddenly got a surge of pure energy which caused the evolution of creatures." Adrian stated.

Just like what Adrian said, the world is suddenly poured with a large clump of pure energy which prompted the evolution of monsters. Some monsters were unable to easily evolve to Mythical Tier which is why they became stuck in the semi-mythical tier. Some monsters were able to utilize it to breakthrough and become mythical tier monsters.

The land not only expanded but also the forbidden lands as these mythical tier monsters made these their homes. Only the brave ones can practically travel in these forbidden zones as mythical tier monsters are at a different realm. Even Adrian is reaping the benefits of having mythical tier monsters like Sirius, Kanlaon, Saena and Charon after all.

"I have the thing for the flight, but the effects are only short which means that the two of you must get to land before the time limit." Adrian stated as he gave two talismans to Pana and Apolaki respectively.

==

Item Name: Boundless Sky Talisman

Item Tier: Legendary

Item Type: Talisman / Consumable

Effect:

- Once the user activates the talisman, they are imbued with the power to become friends with wind elementals and fly.

Description: A talisman created by a somewhat great scribe which enables the user to fly in the sky. It is said that those that always wanted to fly will want to have this. Who said that only winged beings can fly when you can use the Boundless Sky Talisman.

Duration: 30 minutes

Cooldown: 35 minutes

==

"Awesome!" Pana stated as he did not expect a piece of paper could create an opportunity for a flightless person to fly.

"This is good, but we do not know how to fly. We have no experience whatsoever. We might just go straight up until we reach the atmosphere." Apolaki stated as he has no experience flying whatsoever.

"Flying is simple. You just need to go whoosh and then wooh!" Ark stated as he described the feeling of flying.

"Can you translate what he said to something understandable?" Apolaki asked Adrian as he did not consider Ark's words as useful.

"Flying is more on the mind when using this talisman. Unlike us that have wings that need to visualize it flapping in order to utilize it, all the two of you have to do is imagine yourself walking on air." Adrian stated as he personally tested one of these talismans when he created them.

"If it is like walking in air then that is doable. The only problem would be to think that air is something solid that we can walk on." Pana stated.

"If we are all good then let us go." Adrian stated as he clapped his hand and suddenly whisked all of them away from Avalon.

==

"You did not even tell us that we need to prepare! I am not prepared mentally." Apolaki shouted.

Adrian teleported them in the air about five hundred meters above the fifty-kilometer distance from Dragon Rock. The barrier on Dragon Rock affects a large space which is why they need to be transported in the skies as being near the ocean would be a death sentence. As soon as they were teleported, Adrian and Ark spread their wings while Apolaki and Pana activated the talismans.

The two of them were not able to activate the talismans immediately which is why Adrian had to control gravity to make sure that the two of them floated. When they activated the talismans, a small tattoo appeared on their back which has the image of winds blowing.

[You have activated the Boundless Sky Talisman.]

[The wide sky is no longer something that hinders you. You have gained the ability to fly temporarily.]

"Woah! I am actually flying!" Apolaki stated as he imagined the empty space beneath him like a solid platform which made him stand mid-air. "Awesome!" Pana stated as he is also doing the same thing.

"I like all your enthusiasm, but we need to get going. Look behind you." Adrian stated as he pointed at the monsters rushing towards them.

A school of large fish monsters suddenly turned towards them as the powerful senses of the sea beasts managed to pick up the scent of the Kaleidoscope Magna Mystica. A large number of monsters were actually fighting against each other in a battle for supremacy over the ocean territory, but they all stopped when they smelled the enticing sweet scent of the Kaleidoscope Magna Mystica.

As soon as Adrian said that they are now the center of attention, he immediately unfurled his four wings and headed to the lone island standing on the horizon. He did not wait for them to process what he said as he told them that time is off the essence and that he needs to reach Dragon Rock without any problem. Adrian looked back and could see that the three of them immediately followed after him as they could feel the bloodthirst of all the sea beasts.

"I will try to slow them down! Heaven and Hell Slice!" Ark stated as he suddenly stopped to use a skill.

Ark's blade was coated with light and dark elemental magic which was chaotic. He then performed a horizontal slash which created a powerful ripple on the ocean surface. All the weak monsters were sliced in half by the elemental sword wave that he created but there were those that evaded by diving.

"Your sacrifice will be worth it!" Pana stated but he did not really mean it as he was also worried about his friend.

"I do not think that he would be able to block all of them. We must help him." Apolaki stated as he suddenly turned back to aid Ark.

"I am not a fan of open waters. Please know that." Pana stated as he also turned around.

"Go and deliver the Kaleidoscope Magna Mystica while we deal with the sea monsters." Ark stated.

"Okay! Take care and make sure to pay attention to the waters below. If the color of the water is becoming getting dark, then there is a high chance that a monster is about to pop out." Adrian stated as he boosted his speed with Chrono Shift.

As if responding to Adrian's statement, the waters below him suddenly started to get darker but it was such a large shadow that his alarm bells rung. Adrian did not even think much and used Enhanced Blink to vanish from the location he was in. Thankfully, he thought of doing that as a series of large tentacles suddenly exploded from the ocean surface.

The tentacles gripped the location where Adrian was previously, but nothing was caught. The head of the large sea monster suddenly sprung up as it thought that it was able to get the sweet-smelling thing. When it opened its tentacles, the source of the sweet scent was not there but is getting further away.

The sea monster in question is none other than a Shell Kraken which is also a Semi-Mythical monster. The Shell Kraken screeched as it swam like a missile underwater to chase after Adrian. The Shell Kraken was so locked in to getting Adrian that it also rammed into other sea monsters that was allured by the scent of the Kaleidoscope Magna Mystica.

Chapter 1778 Avoiding Tentacles

"This dang seafood is not letting me go peacefully." Adrian stated as he dodged left and right as soon as the tentacles sprout out of the water like a cannon.

Adrian is able to do this easier because he has Paradox to tell him when and where to evade if he loses focus. He is making sure that his flight path is the shortest as he could feel that it was not only the sea monsters starting to get allured by the scent of the Kaleidoscope Magna Mystica but also the flying monsters flocking. The flying monsters are starting flock as the sea monsters are their meals.

Just as Adrian thought that he would be safe, a huge flying monster suddenly swooped down and tried to use its talons to grab him. Adrian was alarmed by Paradox, but the speed of the flying monster was too fast for him to just normally dodge. Adrian needed time and time is what he can manipulate as his surroundings started to stop.

"Time Stop!" Adrian immediately stated as he did not waste a moment.

The surroundings were frozen in place and Adrian finally saw the monster that swooped down to catch him. The flying monster looked like a giant pelican that has red feathers that look like flames. Adrian did not waste time to inspect the monster because he is utilizing all ten seconds that he can stop time for.

Adrian poured a vast amount of mana into his wings and flew like a jet towards Dragon Rock. After the ten seconds were up, the flying pelican monster and the Shell Kraken collided with one another as they were in each other's way. The flying pelican monster did not or rather was not able to fly up immediately because Adrian used Chrono Shift on it to make its body accelerate.

The talons of the flying pelican monster struck the Shell Kraken instead of the intended target which was Adrian. The Shell Kraken also did not expect the attack from the flying pelican monster as it was too focused on catching Adrian as well. The two monsters collided which became a brawl for the two which gave Adrian enough time to zoom away from there.

"Can you tell me what the two are currently doing?" Adrian asked Paradox as it has full view of what is happening.

"The Red Plumed Pelican is currently battling the Shell Kraken. It seems that their collision has agitated each other that they now want to kill each other. We now have ample time to escape, master." Paradox stated.

"Good! Now I can just hurry on over there and everything will be alright." Adrian stated as he zoomed by using Chrono Shift on himself regularly.

Adrian thought that all his troubles were over when the Red Plumed Pelican and the Shell Kraken are now fighting each other but it increased instead. Numerous smaller Flying Krakens started shooting out of the water and headed towards Adrian. It seems that the Shell Kraken commanded those under it to get the thing it wants since it is incredibly occupied by the Red Plumed Pelican.

"Annoying squids! Dodu, it is an all you can eat seafood buffet!" Adrian stated as he did not stop himself from summoning a soulbound.

Dodu appeared and immediately used its full size as it created tentacles to start its all you can eat seafood buffet. The sudden appearance of Dodu did not stop the Flying Krakens from attempting to get Adrian but it the numbers that attacked him became lesser. Dodu would just need to grip a Flying Kraken and it would automatically turn to acid upon dissolving in its body.

The sea monsters that had some intelligence immediately hid into the depths of the ocean as soon as they felt the presence of a monster like Dodu. The only ones that are still trying to get a taste of the mythical tier herb are the mindless ones. Dodu could be seen happily eating all the flying krakens while defending Adrian from them.

Adrian is actually impressed that Dodu seems to be much faster in water than on land as it could be seen gliding on the ocean. When Adrian asked Paradox how Dodu was keeping up with him, Paradox answered that Dodu used the ocean water as propulsion. Dodu as intaking and then expelling ocean water from his body at the same time which is akin to a speed boat.

"Proceed to kill those that comes to close to me that Dodu cannot block. I will fly straight to the island since I am now free from danger." Adrian stated as Paradox started expending mana using spells to kill any flying kraken that bursts out from the water that is in Adrian's way.

Adrian was able to smoothly fly the distance of twenty kilometers without any noteworthy hindrances but that did not last long. The Shell Kraken finally caught up to him as it was able to deal with the Red Plume Pelican. The drowned corpse of the Red Plume Pelican could be seen floating on the previous area before.

The Red Plume Pelican was only a Legendary Tier monster that has just evolved which means it is not yet used to its current strength unlike the Shell Kraken that just evolved from a Legendary tier monster. The difference between them was apparent but Adrian did not think that it was that far apart as the Red Plume Pelican was ripped apart.

Still, the Red Plume Pelican did some damage on the Shell Kraken as parts of its soft flesh could be seen spilling out of its shell. It seems that the Red Plume Pelican managed to pierce through the hard exoskeleton of the Shell Kraken while it was struggling to survive. Adrian smiled as this made it easier to subdue the beast before him compared to before.

"Dodu, wrestle that thing and declare supremacy!" Adrian commanded to which Dodu agreed as it was not satiated from the monsters that it has eaten earlier.

The Shell Kraken released all of its tentacles towards Adrian, but Dodu created the same number and even more to counter the attack. A tug of war between a squid and a slime is now happening in the vast ocean. One would think that the Shell Kraken was the superior one, but they should not forget the special properties that Dodu has.

The shell that was covering even parts of the tentacles of the Shell Kraken started to fizzle as Dodu's ability to destroy defenses was greater than the defense of its shell. The Shell Kraken tried to escape but it was now Dodu that clung to it and made sure that it will not go into the depths of the ocean. The Shell Kraken knew that it would not be able to escape easily which is why it proceeded to do its last measures.

The Shell Kraken started to detach its tentacles from its own body in order to escape. Seeing that Dodu would not be able to subdue the monster alone, Adrian decided to meddle as well. Adrian called Charon out and also made the gravity affecting the Shell Kraken be condensed in the area it was in.

"You will die for meddling with me when I am in an important mission." Adrian stated as he created a condensed sphere of gravity with the Shell Kraken as the center.

Charon then created numerous chains that buried onto the soft exposed flesh of the Shell Kraken. The Shell Kraken started squirming uncontrollably upon being attacked on its soft flesh. This was not the end as Dodu suddenly condensed its shape and plunged itself inside the cracked shell in order to destroy the Shell Kraken from the inside.

The Shell Kraken started foaming up as its own brain and heart started to get dissolved by Dodu. In the end, the Shell Kraken succumbed as it cannot stay alive when all parts of its inner body got eaten by Dodu.

[Your soulbound, Dodu, has killed the Shell Kraken.]

As soon as the Shell Kraken became an empty husk, Dodu came out of the cracked shell and presented Adrian with a rainbow-colored stone. He immediately stored the Extreme Magic Stone inside his inventory so that the mythical herb will not have any idea and devour it again. He needs to have some spare just in case the Kaleidoscope Magna Mystica does not work.

"Thanks for your help." Adrian stated as he returned both his soulbounds to the soul chamber.

Adrian could then see that the other three were flying towards him as they managed to subdue the beast tide enough. It seems that they killed the monsters with the highest intelligence and raw power that almost all of them ran away. Some monsters were still chasing them, but they are the ones that have extremely low intelligence.

"Hurry! Our flying time is almost running out!" Apolaki stated as he ran towards Dragon Rock like his life depended on it.

Chapter 1779 Dragon Rock I

All four of them rushed towards Dragon Rock while there are still some sea monsters trying to catch up to them. Still, the ones that are left can be outrun or rather be left in the dust. All of them were flying at a fast rate that the waves are getting riled up.

All of them could finally see Dragon Rock within reach but Adrian immediately stopped the three of them using gravity. Ark, Pana, and Apolaki were caught off guard as they suddenly almost dropped to the ocean, but Adrian controlled his ability perfectly. All of them stopped at one meter before the ocean and floated to Adrian's level.

"Is there something wrong, guild master?" Ark asked.

"There is a barrier covering the island. It seems that we need to be invited inside in order to actually be able to get in. If we are not invited, then a powerful force will eviscerate our bodies. It is different compared to the barrier that prevents teleportation." Adrian stated.

"How are we going to get in then?" Pana asked.

"I already sent a message to Levin Cloud. Let us wait in an area where we are visible." Adrian stated as he led them to a place where they can be visible to the dragons in Dragon Rock.

==

"Our friend has arrived, and he requests to be let inside." Levin Cloud stated.

"We have sensed the demon, forest guardian. Still, we do not invite demons to Dragon Rock." One of the ancient dragons stated.

"He has an item that might help with the current sickness that all the dragons here are experiencing. I cannot keep the forbidden magic any longer as well. Choose what you wish to happen. Will you stick to your unbending rules that will endanger all or take a chance so that all of the others can have a chance of getting better." Levin Cloud stated as he could be seen to be panting.

"The forest guardian is telling the truth. Not one of the dragonkin that we have employed have found a way to cure all the dragons here. It might be too late for them as some of the young ones are already starting to weaken greatly." The female ancient dragon stated.

"I do not want a demon stepping foot on our land. We had a deal with them that we do not meddle with the business of each race. It should be that way as we have agreed upon." The male ancient dragon stated.

"You are the only one left to vote." The female ancient dragon stated as she looked at the last ancient dragon.

"I believe..." The ancient dragon stated when Adrian's voice suddenly echoed.

"I do not really care what you three choose. I can just have Peridot and Basil be the ones healed by the thing that we have brought. I can just transport them back to my territory for them to be healed and let the ones that are sick to die." Adrian stated as he was eavesdropping in on the conversation that Levin Cloud was having.

Four individuals could be seen floating above Dragon Rock. Adrian and the others were just a meter away from the barrier. The Boundless Sky Talisman has lost its effects and Adrian is just making Apolaki and Pana float by using gravity manipulation. Ark is standing guard as there might be flying monsters that want to swoop down to attack them.

"Such impertinence!" The male ancient dragon stated as he snorted at Adrian's remark.

"I want to be a middleman, but he is correct. He does not care about the other dragons as we only have two companions here. I, myself, only used the forbidden magic because my beloved is affected

too much by the Dragonsbane. All of you were just here to also be affected by my own blessings." Levin Cloud stated which made all the ancient dragons shut up.

Even if they want to say that Levin Cloud used forbidden magic to save them, he only used it to save Peridot. The others were just lucky that it was a magic that affected the terrain itself. If the forbidden magic can only target one being, then a lot of dragons would have started to die.

"Choose immediately as my friend is not one to be patient." Levin Cloud stated.

"Fine! We shall allow the demon to step foot in our sacred island." The male ancient dragon grumbled as he reversed his decision since he saw some dragons started coughing up blood.

==

"Why is it taking too long?" Ark stated.

"Dragons are prideful creatures. Especially the ones that have lived long." Adrian stated.

"The dragons that I met were much more flexible though." Ark stated.

"We met them when Basil was present. I doubt that they would be that respectful if she were not there." Pana stated.

"Make sense." Ark exclaimed as he got the nuance.

"The barrier is going down. It seems that we are invited." Adrian stated as he slowly descended along with the others.

As the three descended, they could see the state of the dragons heavily affected by Dragonsbane. The proud dragons could be seen suffering and coughing up blood. This is the case for the three elemental dragon kings that are affected heavily. Peridot is also heavily affected but Levin Cloud made sure that she would be his priority.

Peridot is encased in a chrysalis made of leaves while the other dragons are just taking in the healing effects that Levin Cloud has spread. Still, the situation is becoming worse as Levin Cloud can no longer keep up the forbidden spell as he is already straining his own health to keep it active. Adrian immediately landed with the others and the eyes of the older dragons could be described as piercing.

They were not glaring at the others, but they were glaring at Adrian. The one being glared at did not care as he walked towards the center tree that sprouted as Levin Cloud is located there.

Chapter 1780 Dragon Rock II

"I have brought something that might ease your penalty." Adrian stated as he handed the Kaleidoscope Magna Mystica to Levin Cloud.

As soon as Levin Cloud got the Kaleidoscope Magna Mystica, he could feel the rush of life energy in the herb. He can also feel the powerful and potent pure energy that is within the plant. The information that was impossible to read is now visible as the faekin have mastery over all kinds of plants.

==

Plant Name: Kaleidoscope Magna Mystica

Plant Tier: Mythical

Plant Type: Herb

Uses:

- Ingest in order to fill the body with pure energy that can even bring the dead back to life.
- When used by the faekin, they are able to negate the effects of any type of forbidden magic that has been used within a month. (Can only be activated once a year)
- Nourishes the body of a faekin by an unknown degree or can loosen make the bottleneck of evolution for any other being.

Description: An unknown flower that evolved due to engulfing such powerful traces of pure energy. It is said to be something that even the gods would covet due to its great beauty and alluring fragrance. This herb contains pure nature energy that can reverse any ailment. It is coveted by any faekin as they can use forbidden magic without any penalty.

==

"Where did you get an herb like this?" Levin Cloud is shocked because this is something that can make even the Fairy Queen drool.

"It was Apolaki that found the herb, but it evolved when it ate the Extreme Magic Cores that we got from killing semi-mythical monsters. It is a long story, but can you use it to cure everyone here?" Adrian stated.

"Not just cure everyone, I can even restore the stats that I lost when I cast forbidden magic. This is basically a miracle herb that defies nature even though it is nature that created it." Levin Cloud stated.

"If that is the case then you should start already." Adrian stated as he could see that Levin Cloud is losing health continuously.

"I am going to use another forbidden spell. I need your help in order to use it because we will call upon the will of Gaea. I am not enough in my current state even if I use the Kaleidoscope Magna Mystica." Levin Cloud stated.

"Fine. I shall help you, but can you tell all those dragons to stop glaring at me. I might not like being here, but their unnecessary passive aggression is not helping as well." Adrian stated.

Levin Cloud agreed as the stares were indeed very taxing to one's perception. Adrian is also very perceptive so he might make a mistake if his focus was shaken. Levin Cloud told the ancient dragons to command all the glaring dragons to look away or else he will not perform the healing rite.

"They are still not stopping with the glares. I guess I need to make these dragons feel fear then." Adrian stated as he released the aura of an Asmodian that he was holding back.

Adrian even mixed some of Kanlaon's aura into the mix as he cannot summon the latter. As soon as the oppressive aura of an Asmodian and a Genesis Dragon came out, all the glares that Adrian received suddenly vanished. The dragons could not even look at his direction as they needed to turn their heads away as they could feel the powerful pressure emanating from Adrian.

"Is he the one that created the Genesis Dragon?" One of the Ancient Dragons asked.

"It seems that he is the one as his soul is emanating the same force as that of our ancestor." Another ancient dragon stated.

"To think that it was really a demon that made one of our kind to evolve. I thought that the flame dragon king was just making a story up." Another ancient dragon stated.

Levin Cloud's Leshy form usually looked in between a dead and lush humanoid plant monster but this one is different. His body was booming with life as all parts of his body sprouted the Kaleidoscope Magna Mystica. He even glowed like the herb which made him look like he was a hidden god of life that suddenly appeared.

"This is unacceptable! We should be the ones that are taking care of the dragon that is carrying the strength of our ancestor." The male ancient dragon stated.

"You cannot do anything to him because he is a demon, and the pact remains. Unless you want to go on an all-out war with the Daemos then we can only be amiable. He has given the method to get recreate the blood of our ancestor and we promised to not bother him about that anymore." The female ancient dragon stated.

==

"We can start." Adrian stated.

"Okay then." Levin Cloud stated as he brought the Kaleidoscope Magna Mystica to his mouth and ate the mythical herb.

As soon as Levin Cloud ate the Kaleidoscope Magna Mystica, a powerful energy suddenly started to explode in his own body. The entire island that he has rooted in started to glow as the trees and grass started to light up in pure energy. The land illuminated in such a beautiful scenery that all the dragons that were sick started to rise up as they can feel pure energy circulating in the air which made them a bit better.

"I should start as well." Adrian stated as he shifted to his Aetheros form.

"I am ready." Levin Cloud stated as his full Leshy form manifested but he looked different.

Levin Cloud's Leshy form usually looked in between a dead and lush humanoid plant monster but this one is different. His body was booming with life as all parts of his body sprouted the Kaleidoscope Magna Mystica. He even glowed like the herb which made him look like he was a hidden god of life that suddenly appeared.

"I will prepare the Rite of Life." Adrian stated as he floated in the air and spread aether energy to create a magic circle using it.

The magic circle that Adrian created had runes that even the ancient dragons cannot decipher. He also started to speak in a language that cannot be understood by even the oldest of the ancient dragons. As soon as Adrian stopped chanting, the whole area became silent as an incredible pressure suddenly fell down onto Dragon Rock.
