O Summoner 2031

Chapter 2031 Arch Demons Versus Trickster God

The Trickster God Loki got slammed by Elder Bronx, but he did not crash into the waves. He crashed into a barrier that was already set up by Elder Koronn. He might only be a clone, but all the experiences of the clone are directly sent to the main body of the Trickster God Loki. He was also controlling this clone via possession which means he can feel what the clone is feeling directly.

"I am a god!" The Trickster God Loki shouted as he stood up, but Elder Bronx has transformed to his true form already.

A powerful slam on the shoulder sent the Trickster God Loki face flat on the floor. Elder Bronx then proceeded to grab him by the leg and slammed the Trickster God Loki like a rag doll. The sounds of bones cracking could be heard as the Trickster God Loki got continuously slammed and flailed by Elder Bronx without any remorse.

Seeing that they seemed to have this situation covered up. Adrian summoned Kanlaon and Saena to aid all of the players present against the Khadasha Leviathan. He sensed that the enemy was too strong without proper backup which is why he told the elders to finish up this fiasco. The Trickster God Loki might be a clone, but he was incredibly sturdy since he has the body of a greater god.

"He might have the body of a greater god, but it does not mean he has the strength of a Greater War God. Direct confrontations are the weakness of gods that rely on tricks and illusions. Just look at his pitiful self that is easily getting thrashed by Elder Bronx." Elder Koronn stated.

"I think that is enough pain. He might not be able to talk if you destroy his entire face." Adrian stated as he looked at the pitiful Trickster God Loki.

"Ha…ha..ha… do you think that I will talk just because you thrashed this body of mine." The Trickster God Loki stated while gasping for air because his entire head was being clutched by Elder Bronx.

"We did not need you to talk though. We will just extract it from your current memory now." Adrian stated as his eyes looked like that of a dead fish.

"Control your face, brat. You will look old quickly if you keep doing that dead pan face." Elder Bronx stated as he flailed the Trickster God Loki more.

"Make him stay put or else I will not be able to extract the memories. This will hurt a bi… a lot. I hope a god like you can withstand pain to the highest degree. Chrono Memory Release!" Elder Koronn stated as his finger suddenly sunk into the skull of the Trickster God Loki which made him scream loudly.

Elder Koronn suddenly pulled his finger that sunk into the Trickster God Loki's skull and fished up an orb. This was the memory orb that is created using the spell that he used earlier, and it has details of all the things that the Trickster God Loki has done. Elder Koronn then frowned when he saw the memory orb as it was incredibly small as if it was the memory orb of a small child.

"I see. I did not expect that this would be the result of extracting memories from a clone." Elder Koronn stated as he plucked the memory orb fully and severed its connection from the Trickster God Loki.

"Eh? He already fled the body due to extreme shock. I wanted to see how long he could last get thrashed though. I even unlocked most of my limiters in order for him to not escape. You were too forceful, Elder Koronn." Elder Bronx stated as he let go of the body of the clone.

As soon as Elder Bronx let go of the body, it immediately fell to the floor barrier as if it was a flimsy vegetable. The body soon slowly disintegrated as the divine consciousness controlling it has already escaped. Adrian did not even feel the divine consciousness of the Trickster God Loki escape which meant that it has prepared for escape should he be captured. The Trickster God Loki seemed to have learned from their previous encounter with one another.

"We do not even need him anyway. You will just turn him into your punching bag. We need to view the memories in this orb to see what his real objective is." Elder Koronn stated as he injected mana into the memory orb, and it started to project the memories of the clone.

The memories of the clone started with it awakening and handing the Chaos Shard Fragment to the Leviathan. The learned that the Trickster God Loki wanted to create a powerful disruption in time and space to pierce the barrier between worlds. They learned that beyond the area where the Leviathan is placed is Asgard. If the dimensional barriers were to crack in that area, then Asgard would be able to create a way to the main world via the Bifrost connection.

"It seems that is the reason why they were creating the numerous Artificial Bifrost in the northern continent. They were preparing to fully anchor Asgard to the main world, but I am afraid of what will happen should they succeed." Adrian stated.

"Should they succeed, the dimensional barrier would be permanently destroyed and will never heal even if we try to fix it. We could but that would mean we need to destroy the other world anchoring itself to the main world." Elder Koronn stated.

==

In the palace area where the Trickster God Loki is in a trance, his divine consciousness finally merged with his real body. Upon the return of his divine consciousness, he screamed in great agony until he passed out from the pain. The gods that saw this happen became frantic as they did not know what happened to the Trickster God Loki. n/o/vel/b//in dot c//om

"He was attacked mentally by the demons. I was able to see it through Hugin and Munin." The God King Odin stated.

Chapter 2032 Nephilim Versus the Primordial Beast

The army led by Nephilim has arrived even if they are late due to some complications. The angel and Nephilim NPCs did not want Ark to actually fight against the primordial beast. They were worried that something might happen to Ark again as he has become the figurehead of the angels, some of the devils, and the Nephilim. They are going against a primordial beast, and they have yet to fully consolidate their powers and hierarchy.

[All angelic beings will be buffed with an increase of 10% overall stats when in the presence of the Chosen Nephilim.]

[All devil beings will be buffed with an increase of 10% overall stats when in the presence of the Chosen Nephilim.]

[All Nephilim will be buffed with an increase of 15% overall stats when in the presence of the Chosen Nephilim.]

"Let us start to help cleanse the world of its filth!" Ark commanded as he looked like a capable commander now that he suddenly got this weight on his shoulders.

"Let there be light!" The angelic army shouted as they created a small golden sun.

"Let there be darkness!" The devil army shouted as they created a small black sun.

"Destroy them with the power of Twilight!" Ark shouted as he absorbed the two suns with his two differing sides and created a powerful atmosphere around him.

"Twilight Damnation!" Ark stated as he fused the two suns together and created an odd magic sphere where the energies of light and darkness are colliding but expanding at the same time.

Ark then released the sphere upon the Khadasha Leviathan and an explosion of chaotic light and darkness magic hit its body. The Khadasha Leviathan did not expect the sudden entrance of the Nephilim army as its body is incredibly weak to magic damage. The combined power of the angels and devils with the power of a Nephilim to control it made it deal devastating damage. The Khadasha Leviathan is still confused as she was getting attacked by thousands of players. n/o/vel/b//in dot c//om

The Khadasha Leviathan felt that the insects buzzing around her has far surpassed the level of annoyance that she could take. She was being bombarded by numerous beings that cannot be killed because of the demons. All of the beings that she would have killed are getting saved by the troublesome demons that are able to control time and space. She can only kill the pesky insects when they make mistakes and reach her jaws.

[Do you wish for power?]

"Who is there!?" The Khadasha Leviathan stated as which also made all the players hear her voice, but she was clearly not talking to them.

[Surrender your body to me and I shall destroy every enemy that you have in this world.]

"Get out of my head!" The Khadasha Leviathan shouted as she released powerful waterspouts around him.

Waterspouts were created all over the Khadasha Leviathan which made it difficult for the players to get near the primordial beast. The Khadasha Leviathan suddenly started to float as her entire body that was mostly submerged in water became lighter. The waterspouts made it possible for the Khadasha Leviathan to 'swim' in air. The players that flew are no longer safe from the onslaught of the Khadasha Leviathan as they could see that she has become like a berserker.

[Madness has started to creep unto the Khadasha Leviathan.]

"I will kill all of you here even if I have to break my own cycle of reincarnation myself!" The Khadasha Leviathan shouted as hundreds of waterspouts suddenly intensified and crashed towards the players.

"Dome of Light!" The angels shouted.

"Shroud of Darkness!" The devils shouted.

"Connect the two barriers! Show them the might of the Nephilim!" The Nephilim NPC commander shouted.

The attempts of the Nephilim Army commanded by Ark is great, but it was not enough. The defenses they brought up were not enough to defend against ten waterspouts that combined to become a large one. The other mage players supported the tank players, but the latter were easily swept up by the waterspouts due to the intense rotation.

"Help them!" Onyx commanded and they started to use a spell that can teleport the players but their attempts of even creating a magic circle suddenly shattered.

[An unknown energy has twisted the rules of the area and prevented your magic.]

The Daemos Corps are dumbfounded as they could not conjure up the magic to even save at least one person. Panic suddenly crept up unto Onyx' heart as this was his first time being a commander type figure in an actual battle against a powerful being. He suddenly felt that the world became darker and heavier.

"Calm down, son. Do not let your inexperience become your own inner demon. If you do not steady your heart, then you will never become your best self. Questioning yourself is natural for a commander and feeling helplessness is also valid. Still, you must remember that you also have subordinates that can help you in your times of need." Elder Bronx stated as he saw that his son started to panic just like him in his first major battle.

"Thank you, father. If you grant me the permission, I would like to lead the team once more." Onyx stated.

"I give you permission, my son. This is the reason that I chose you to be the commander today and not me." Elder Bronx stated which invigorated Onyx' weary heart.

"Daemos Corps member! Follow me to victory! Show the foul beast terrorizing the world's balance what it means to mess with the defenders of the world!" Onyx shouted as he utilized all of his strength to lead the charge towards the Khadasha Leviathan.

"You do know that they will run into danger if they charge like that." Elder Koronn stated.

"Which is why I am asking you to watch over them. I will personally clash with the Khadasha Leviathan now that it has gone berserk. We can no longer afford to let it get loose as the energy it disperses that breaks down the dimensional barrier has strengthened." Elder Bronx stated as he filled up his body with great force.

Chapter 2033 Arch Demons Versus the Primordial Beast

Elder Bronx immediately shown his true form and teleported above the Khadasha Leviathan. The Khadasha Leviathan might have some sort of energy field around it that makes any spell it uses have spatial interference, but it cannot stop something in the realm of pure force. Elder Bronx coated himself with a pure force shell that his body gleamed in an almost sinister dark violet light.

"Megaton Crusher!" Elder Bronx stated in a calm voice but anyone that hears those words and seen what he could do will immediately flee to the farthest place they can run off to.

The Khadasha Leviathan was still rampaging in the skies as its waterspouts made it able to fly but the players saw a dark violet meteor suddenly crashing down towards the ground. At first, they

thought that it might be a skill of a mage, but all the mage players are scrambling to escape from the numerous waterspouts. The players that could focus on the dark violet meteor could see the faint silhouette of a somewhat large being in the dark violet meteor.

"You seem to have the ability to disrupt space, but can you get out of time? Chrono Halt!" Elder Koronn stated as a powerful force suddenly made the Khadasha Leviathan freeze for five seconds.

The Khadasha Leviathan could be seen frozen in the sky for a brief moment of time, but it easily broke out of the spell. Elder Koronn was supposed to hold the Khadasha Leviathan for at least ten minutes, but it seems that the evolved primordial beast is difficult even for him alone. He would need the support of two more Arch Demons to achieve at least five minutes of time freezing.

Still, the five seconds that Elder Koronn has bought was enough for Elder Bronx. With a powerful blast that also created a shockwave, the dark violet meteor that was Elder Bronx managed to hit the Khadasha Leviathan's back. Elder Bronx aimed for the head, but the body of the primordial beast is also good enough when the enemy is so quick and agile.

The Khadasha Leviathan suddenly plopped to the waters below as soon as she was hit by Elder Bronx. All the waterspouts that she created were suddenly dispelled as a powerful shock to the system made it lose focus on maintaining them. The Khadasha Leviathan might have slightly lost its mind, but it has not completely lost it after all. The large body of the Khadasha Leviathan could be seen floating in the sea, but it was not yet killed.

Elder Bronx merely momentarily stunned the Khadasha Leviathan and bought time for all of the players to reposition. All the long-ranged players started to cast their skills and spells while the melee players charged towards the floating body of the Khadasha Leviathan. The sudden status ailment of the Khadasha Leviathan is the perfect chance for the players that greatly helped earlier.

Cersei was about to have her transformation cancelled and was waiting for the perfect time to cast one last spell before she returns to her normal form. Due to her being in the form of the Devil God Vepar, all the tussle and turning of the waters were unable to bother her. The only problem she had was when the Khadasha Leviathan started to fly using the waterspouts. She was immediately thankful that the primordial beast landed just near her.

"Devilish Waters!" Cersei shouted as the mermaid form suddenly started to melt as if she was maintaining that image using water.

[Devilish Waters has been applied to the area selected by the player Cersei.]

[All enemies in the water will have their defenses reduced by 50% for the first 10 minutes.]

[All enemies in the water will lose 1% of their health every minute. (Halved for boss monsters.)]

"Evergreen guild! Fire!" Anastacia shouted as she was already ready as she was also waiting for Cersei.

A series of elemental arrows and spells were released by the Evergreen guild members. Most of them chose elves as their race since they are protectors of the Tree of Life now which meant that they have great elemental affinity. They also have the blessings of the elementals as they have even gotten contracts from some of them. The barrage of the elemental spells that reached the Khadasha Leviathan was not enough to kill it, but it was enough to deal serious damage.

With the Khadasha Leviathan's defenses halved, the damage it received skyrocketed as numerous players used their spells and attacks on it. The large health bar was basically useless when its defenses suddenly dropped to that of paper. The continuous attacks of Cersei earlier also weakened most of the scales of the Khadasha Leviathan which makes some parts of it actually have 70% to 75% defense reduction.

The Nephilim army was the second to regroup as they released quick spells of light and darkness towards the Khadasha Leviathan. The barrage of light elemental spells and dark elemental spells colored the sky above. The Khadasha Leviathan did not stay floating about though as it has finally recovered from its initial shock.

[Give yourself to me and I will make sure that you will live.]

A voice still spoke to the Khadasha Leviathan even when it was stunned. The voice inside of its head actually became louder when the Khadasha Leviathan was weakened for a bit. The Khadasha Leviathan could not believe that someone dared to whisper sweet nothings to it and even dared to look down upon her.

"I shall not have it! Whirling Sea Demise!" The Khadasha Leviathan shouted in both anger and frustration as it no longer cared for its surroundings.

The sea suddenly swirled and turned into a large whirlpool that all the players standing on it were being sucked. Players that have been in combat with Equinox were familiar with this sensation. This was the same sensation when they were sucked by a black hole. All of the players that were caught by the whirlpool could not repel the suction force and ended up swirling along with it.

Numerous players were caught by the whirlpool and dragged to the seafloor. They were not drowning because of the blessing that they have received but they are still getting damaged by the currents. The Khadasha Leviathan even dove down into the waters as she started to devour one player after another which also healed small bits of its health.

"This is not good. Time Stop!" Elder Koronn stated as even he knows that getting inside the waters below would spell doom even for him.

"We have to do something." Adrian stated as his mirrors could not save anyone that is already inside the currents.

"Should I blast the water away?" Elder Bronx asked.

The three Arch Demons planned what they need to do in a world where time is suspended. Even the greater demons that they have brought were planning what they could do but they all looked at the Arch Demons for some guidance. In the end, Elder Koronn was the only one can provide a solution for this perilous situation.

"We have no choice but to use Inverse Realm." Elder Koronn stated which shocked Elder Bronx and the other demons except for Adrian.

"Is it really that bad?" Adrian asked as he only knows what would happen theoretically since he has yet to see the spell at work.

"It is quite a nice spell if I do say so myself. We will only apply it on this small area which means that the terrain will not change much. The damage to the barrier will not weaken as well since all of us will be casting the spell." Elder Koronn stated. n/o/vel/b//in dot c//om

"If this is the only thing you can think of to save them then I will also agree. Just make sure to control the spell so that the damage is minimal." Elder Bronx stated.

"Did you think that I will head the spell? The one to do that would be Equinox. He has finer control when it comes to spatial magic compared to me." Elder Koronn stated.

"Me?!" Adrian is shocked as he pointed at himself.

"We have no time for debate, Equinox. I cannot freeze time indefinitely as that would also ruin the dimensional barrier. Prepare the spell and we will support you." Elder Koronn stated while the other demons can only nod in their approval.

"Let us hope that I will not kill them in the process." Adrian stated as he looked at the players trying to save themselves.

"Up is Down while Left is Right. I am the master of dimensions that can twist the fabric of reality itself! Inverse Realm!" Adrian shouted as his eyes looked like the world turned upside down.

"Inverse Realm!" The other demons shouted as Elder Koronn already unleashed the Time Stop.

As soon as time returned to normal, a powerful energy swept the area which made the world rumble. The players that were caught up in the whirlpool did not know what was happening but those that can fly could see it clearly. The area they were in is suddenly turning upside down.

Chapter 2034 Inverse Realm

The world rumbled as the laws that governed it suddenly flipped in the specific area that Adrian has setup. The two elders were glad that Adrian was able to manage it perfectly, but they soon realized that the area he covered was too much. Even Adrian did not expect such a thing, but it was all due to his passive skill Rift Walker that enhanced the effects of Inverse Realm.

A sight so unimaginable became apparent as the water that should have been below suddenly started to pool upwards while the sky started to fall to the ground. The entire area suddenly became a mix and match of different things that should not have been possible. The laws of space were bent while the laws of time suddenly became erratic.

If one would describe the area that is affected by Inverse Realm, then they would describe it as a world that has been ruined. It could be imagined as a world where the star of the current galaxy failed and destroyed everything inside of it. The blessings of the world also stopped due to this effect but that also meant that everything that protected the Khadasha Leviathan has been cut-off as well.

[You are in the area of Inverse Realm.]

[All beings except the Daemos and their allies are unable to freely move in this realm.]

[All beings except the Daemos and their allies will have difficulty forming mana.]

[All allies of the Daemos will receive a 20% damage buff to all their attacks and spells inside the Inverse Realm.]

[All allies of the Daemos will receive a 25% defense buff to their physical and magical attacks inside the Inverse Realm.]

[All the Daemos will have double stats when they are inside the Inverse Realm.]

[Be careful inside the Inverse Realm as its entire area is unstable.]

[All elemental advantages will have their strengths and weaknesses reversed.]

[The Blessing of the Deep has been reversed due to the influence of the Inverse Realm. All players will now get the Blessing of the Sky.]

[You will now be able to freely move and jump in the air as long as you are in the area of effect of the Inverse Realm.]

[The connection of the Khadasha Leviathan from the world has severed and it lost 50% of its strength.]

A lot of notifications bombarded the players, but they could only lock onto one of the notifications that has been sent to them. They were looking at the notification where their blessing suddenly made them able to walk and move in the air. As soon as some of the players saw this, they immediately knew to test it as it was the dreams of theirs to do something even close to this.

A lot of players suddenly moved in the air and became overjoyed at the fact that they can freely walk in air. Some even did backflips and wuxia style moves before they realized that they have yet to defeat the Khadasha Leviathan. The Khadasha Leviathan looked disturbed as it did not know what had happened to its domain. The water that it rules over is now what filled the sky instead of the area below.

"Demons!" The Khadasha Leviathan shouted as it suddenly tried to move awkwardly in the air as it was also floating in air but did not have the mindset that it can freely swim in it.

"Attack while it is unable to move properly!" Anastacia shouted as she looked like an elegant elven goddess that freely floated in the sky.

Due to Anastacia's shout, the other players also started to attack the Khadasha Leviathan. The bombardment of spells and attacks were now much different than before. They also saw that the elemental affinity has been reversed which meant that fire will now be more effective against the Khadasha Leviathan. This made Hou Yiwei burn with great fervor as he could easily conjure up flames using his weapon.

"The area affected might be larger than anticipated but it is within the margin of error because it is his first time casting the spell." Elder Koronn stated as all of the Daemos were now linked in a mana chain due to the spell effect of Inverse Realm.

The duration of Inverse Realm did not have any cooldown, but it will revert back to normal when all of the demons in the mana chain loses their inherent mana. This powerful spell could easily destroy any being even inside their own domain as it reverses the laws of the world itself. This is a forbidden spell classified by the Daemos and is only used when dealing with beings that are heavily strengthened in their natural environment.

Now that the Khadasha Leviathan has been affected by Inverse Realm, she could no longer connect to the blessings of the world. She might have evolved beyond what the world has allowed her, but she was still heavily connected to it. As long as primordial beasts are connected to the world, they will have a health bar that is a hundred times their original. They are concepts formed by the world to represent its harshness and its ability to fight back.

The Khadasha Leviathan did not know what was happening to its body, but it knew that it had severely weakened. The energy it siphoned from the world has suddenly been cutoff and now its health has been decreased by a large amount. The barrage of spells and attacks from the players has started to take its toll on the Khadasha Leviathan. She was losing 1% of her health every minute that she was being barraged by attacks and spells.

"No! This cannot be! I cannot die here! I finally achieved my ultimate form." The Khadasha Leviathan thought as her body that could not freely move in the air became an easy target.

The large body of the Khadasha Leviathan is now succumbing to even the weakest of fireballs. It no longer boasted its large health pool and having a large body also makes it the easiest targets. Knowing that it will die at this rate, the Khadasha Leviathan had no choice but to abandon her large and powerful stature. As soon as her health dropped to 40%, the Khadasha Leviathan transformed her body into that of a humanoid shape.

The large primordial beast suddenly turned into a beautiful woman that is about four meters in height. She was still a fairly large woman, but she was now able to evade the attacks that were difficult for her earlier. The Khadasha Leviathan has become a giant woman that has the ears as fins and a fish tail on protruding from her back. She has transformed into a form that is now suitable for battle but still retains her initial power.

[The Khadasha Leviathan has transformed into her Giantess Form.]

[Be careful as she still has the same strength as her true form but can no longer call upon the power of seas.] n/o/vel/b//in dot c//om

A form that prioritized strength over elemental control is what the Giantess Form of the Khadasha Leviathan symbolizes. True to what was stated, the Khadasha Leviathan could no longer conjure up powerful blasts of water, but she did create a water whip. The water whip might not be as overly offensive as the powerful waves, but it could easily cleave any player in half. One such unfortunate player was the target as he was too close to the Khadasha Leviathan.

"Her whip is as strong as her jaws when in the form of a monster! Be careful!" One of the guild leaders in the battle shouted.

The players were indeed correct as the strength that her jaws possessed is equal to the strike of her water whip. The only difference is that the Khadasha Leviathan does not possess great abilities in handling the whip. She preferred the strength of her true form as that can harness the power of the world, but she resorted to this form since she was already cut off from it.

"Where are those demons!" The Khadasha Leviathan thought as she immediately went looking for the demons that cast the Inverse Realm. She knew of this spell because she saw it being cast when an Arch Demon went berserk once. It was a powerful spell that can make gods suffer if they are not prepared.

[Succumb to me or you shall die.]

The voice inside the Khadasha Leviathan still echoed which made it be hit by one of the flaming arrows that Hou Yiwei fired. She was on her way towards the demons when the voice distracted her. The flaming arrow dealt damage to her, but she could easily destroy the flames or at least that was what she thought. As soon as she touched the flaming arrow, she suddenly got burned into a fiery inferno.

"As expected of a beast that was impervious to flames before. She did not even think twice of touching the Arrow of Immolation." Hou Yiwei stated as he changed to his dual swords to try and finish off the Khadasha Leviathan before Equinox moves.

Chapter 2035 Chaos Ensues

The flames burned the body of the Khadasha Leviathan, and it did not stop because Hou Yiwei made sure to inject more mana. The Khadasha Leviathan could not believe that she was being held back by a mere dragonoid that she could easily destroy with her jaws. If she could still use her true form, then she would have but she was no longer empowered by the world. A sudden realization came into the mind of the Khadasha Leviathan.

"Did I actually think of fleeing?! Me! The great and powerful Primordial Beast and Ruler of the Seas?!" The Khadasha Leviathan thought as it entered her thought process, but it was all because of a third party.

The thing that has started to influence the Khadasha Leviathan is none other than the Chaos Shard Fragment. She was not the first being that has claimed ownership and siphoned power from the shard. The Aesir Gods experimented on this shard that has the power of the creator god. They have used it on numerous beasts that ranged from weak to strong.

The shard itself did not possess any type of consciousness but things can be created when enough emotional energy attaches itself to it. A consciousness has bloomed from the continuous use of the Chaos Shard Fragment. A consciousness born from the malice and resentment of the magical beasts that died have housed itself in the shard. The fact that it had been able to influence even a mighty primordial beast meant that millions of magical beasts have been sacrificed at the very least.

[You will die if you are not powerful enough. Surrender your body and I will make sure that we will live. I have the power to overcome the obstacle now and you know that. I only gave you a part of my power. A mere taste of what might be.]

The voice became more apparent as the Khadasha Leviathan became weaker and weaker as it was getting bombarded by the players. For each drop in health, the voice inside of the shard became heavier and closer. It was already at the point that the Khadasha Leviathan could basically hear the voice as if it was shouting near her ear. She basically fought with instinct as she could not deal with the voice and combat at the same time.

"Shut up!" The Khadasha Leviathan shouted as she released a powerful blast of energy that sent all of the players near her flying for ten meters.

"What is happening to her?" One of the players asked as they finally saw the health of the Khadasha Leviathan drop down to 20%.

"I do not know. Maybe one of the players have the ability to send telepathic messages to the Khadasha Leviathan and confuse her." The player next to her stated but that was not the case.

The Khadasha Leviathan's mind finally succumb as her body has grown weaker. She was able to deter the voice in her head before because she was supported by the world itself. When Adrian and the other demons used Inverse Realm, the connection was severed which destroyed one of the mental barriers that the Khadasha Leviathan had. More mental barriers got destroyed as she got weaker and weaker overtime until she finally got trapped.

The Khadasha Leviathan suddenly found herself inside of her mental domain while her body outside was suddenly surrounded by a sinister aura. The Khadasha Leviathan was in her true form while she saw a being that can only be called a shadow of its form. The only difference is that this shadow had a will of its own as if it has been an intelligent being. The Khadasha Leviathan and started to attack the shadow being inside of its mental area but that was her prison.

The Khadasha Leviathan was already caught as soon as its main consciousness was pulled to its subconscious. The ego that was created by the Chaos Shard Fragment has already won at that moment. It was no longer the Khadasha Leviathan that controlled her body, but it was the ego of the shard. The ego that was created from the death of a million magical beasts.

"Finally, I have arrived." The Khadasha Leviathan stated but its voice no longer had just the feminine tone. n/ô/vel/b//jn dot c//om

A darker tone of voice colored the current voice of the Khadasha Leviathan. A darker and more sinister voice that emanated a terrifying energy that made all of the beings around it shiver. Adrian tensed up when he heard the voice and felt the energy because he was familiar with it. He could not believe that the Khadasha Leviathan still had one more source of power that transcended primordial energy.

[The Khadasha Leviathan has been taken over by ???]

[The Khadasha Leviathan is undergoing change due to ???]

[Prevent the Khadasha Leviathan from changing into an ever more horrifying entity or else all of humanity might perish.]

The Khadasha Leviathan that had the form of a giantess suddenly curled up into a ball. The shard that is located on her forehead suddenly burst out this tar like substance and created a sphere to protect her. A sphere of pure malice and hatred appeared to all of the players as it was the signal that the Khadasha Leviathan is undergoing a massive mutation now.

The players were familiar with this scene already as they have fought powerful bosses that suddenly evolve in the middle of a fight. They would need to destroy the health barrier protecting the chrysalis and they would be partially stopping the transformation. They would then be able to fight a weakened version of the boss monster because the process stopped halfway through. This is what they expected but sometimes things do not go as one would expect.

The dark sphere suddenly created an eye or rather eyes all around it. To make matters weirder, it created tentacles out of the tar like substance from its shell. The players tried attacking the many eyed spherical being, but it actually distorted space and appeared ten meters away from its original location. This sudden development shocked all of those present because sudden teleportation like that was only possible for the Daemos.

"It transformed into a Bedaubler. A being that is from the outer realms that act like they are parasites that cling onto intelligent lifeforms. The problem is that those things are beings that devour their host and adjust it to become something to a more perfect being." Elder Koronn stated as he has already seen one of those things.

"Destroy it with everything you got! We cannot let it complete its transformation! Revert the realm as we cannot stop it with Inverse Realm since it operates in its own gravitational laws like us." Elder Bronx stated as he and the other Daemos Corps members unlinked from the mana chain. "We

will try to maintain it with just the two of us. If we cancel it now, then all of those younglings will lose their ability to move in the air which would make it more difficult to destroy that shell." Elder Koronn stated.

"Can you hear that?" Adrian suddenly stated as he could hear something whispering in his ears.

"It seems that the brat has accumulated too much fatigue. I will take over the spell, but I can only maintain it for five minutes at max. Destroy that thing before it starts destroying the dimensional barrier when it awakens." Elder Koronn stated as he took over control of the spell from Adrian which shocked the latter.

"I can still keep on. I have half my mana left." Adrian stated.

"You would be much better help if you attacked the Bedaubler like them. You might be the only one that can easily destroy the shields that it has already set up. I will take care of the spell as Temporal Magic does not work on the Bedaubler. They are beings that have been created from the dust created when the creator made the universe." Elder Koronn stated but Adrian could see the intense pressure that he shouldered.

"I will defeat it immediately so that the elder would get more rest." Adrian stated as he used Limit Break: Summoner to release all of his soulbounds. He also relayed the information to all of the players he can talk to and warned them of the impending danger that will happen if that thing hatches.

The players scrambled upon the revelation that the thing that would hatch could end the world. If any other player said this then they would not have believed them, but it came directly from the Demon's mouth. They know that Equinox will not joke around when it comes to fights as demons do not joke around when it comes to the fate of the world. If there was a world protection force, then the demons are the heads and elite force.

"Foolish lower beings. All of you shall die even if try to attack me." The Bedaubler stated as it suddenly created numerous hands to capture players around it.

Chapter 2036: Bedaubler

==

Monster Name: Bedaubler

Barrier Health: 91%

Description: A being that is said to be created from the dust of creations that has achieved some sentience. It is a being that does not adhere to the laws of reality as it is an independent being born from the dust of creation. It can absorb other beings in order to recover but it can never kill another being. It can also be created when specific conditions happen due to an unnatural phenomenon.

==

"Foolish lower beings!" The Bedaubler stated as it created thousands of tar hands that stretched towards all of the players near it.

The Bedaubler managed to catch some players while some easily destroyed its hands with swords or magic. Those that were captured are those that could not move due to them being caught in an awkward position. They were unable to repel the hands that bound them as they were either caught

by the neck, by the eyes, or by restricting their hands. All of the players that are caught were immediately pulled towards the Bedaubler and became like hanging ornaments.

As soon as the players were caught, they were unable to get free as they got covered in more tar hands. The players looked like mummified beings wrapped in a black cloth instead of a bandage that is off white in color. The players also started to get their health sapped while the barrier health that the Bedaubler possessed started to get recovered. As soon as they saw that the Bedaubler could recover using the players, all of the melee players made sure to look and check around them since they might get captured.

"Universal Threat!" Adrian stated as he appeared behind the Bedaubler and hit it directly with his scythe.

The Bedaubler did not mark Adrian as a dangerous being because he was not part of the attack force earlier. The Khadasha Leviathan might have paid attention to him since he was a demon, but the Bedaubler has other thoughts. An entity that just attached to another being will not have the same tendencies and perception as that of the host. The Bedaubler marked Hou Yiwei as the most dangerous due to his powerful attacks that always hit its health barrier.

[You have dealt great damage to the Bedaubler's barrier health.]

[You have decreased the barrier health of the Bedaubler by 15%.]

Adrian used all of his nether energy in the attack and hit the Bedaubler. A powerful crack could be heard as the barrier health shattered in the backside of the Bedaubler and some of its eyes were also destroyed. A strange scream was emitted by the Bedaubler as it suddenly became erratic. The Bedaubler suddenly bent time and space to create a wormhole to escape from.

"Cosmic Cull!" Adrian followed up before the Bedaubler entered the wormhole.

Adrian might not have hit the Bedaubler using his Cosmic Cull skill, but he was able to destroy the links that trapped the players. He managed to cut the black tendrils that linked the players to the Bedaubler. As soon as he did this, the captured players were freed from the restraint, but they are clearly somewhat weakened. The life force was clearly sapped from their bodies which made them move sluggishly.

"Thank you." One of the players that Adrian freed weakly said as she tried to drink the health potion she got from her inventory.

"It is not finished yet." Adrian stated as he tried to trace the wormhole, but he was unable to.

Adrian was the most sensitive to changes in time, space, and even force among the Arch Demons. The fact that he could detect nothing meant that the Bedaubler was indeed a strange being. It could easily bend time and space without even leaving any evidence or record of its tampering. This made Adrian's head hurt because an enemy that leaves no traces could easily escape.

"Fortunately, the Bedaubler cannot leave the area where it started metamorphosis until it emerges." Adrian muttered as he heard the screams of players from behind him.

Adrian did not need to turn around as he already commanded all of his soulbounds to act independently and kill the Bedaubler as fast as they can. The first to respond was none other that Charon as he was behind Adrian hiding. As soon as the Bedaubler appeared near Charon, the chains immediately got deployed to trap the being, but the Bedaubler is faster in movement.

Before Charon could even subdue the enemy, the Bedaubler has already sent out hundreds of hands to capture the nearby players which prompted the screams. Still, the players that were caught served as a great distraction as Charon's chains managed to coil around the Bedaubler. The Bedaubler tried to escape by creating a wormhole, but Charon's chains emitted nether flames that burned the life force of the Bedaubler.

"Nice one, Charon." Adrian stated as numerous attacks were suddenly fired towards the Bedaubler.

The players that were caught could be seen getting caught in the attacks but that was the state of the battlefield. They needed to destroy all the barrier health or else a being capable of destroying the world will be hatched. Even the players that were caught by the Bedaubler knew what their fate is, but they still felt a bit angry for what will happen to them. "Megaton Crush!" A deep voice erupted from the watery skies as Elder Bronx used another one of his signature skills.

A powerful force shield coated his body which easily destroyed a large chunk of the Bedaubler's barrier health. Due to Adrian making sure that the Bedaubler did not escape or move, Elder Bronx was able to smash his body towards the enemy. It looked like a comet slammed into a small and strange planet as a shockwave ensued when it happened. The players were not knocked back much but it enables the capture players to destroy the tendrils that bound them.

The impact was so powerful that some players were also affected by it since they were closer to the Bedaubler. The players that barely had any defenses became dust when the Bedaubler and Elder Bronx hit each other. Still, Elder Bronx managed to destroy 40% of the barrier health in just one attack. The downside is that he also destroyed the chains that bound the Bedaubler as it proceeded to create a wormhole to escape from.

Just as the Bedaubler was about to enter the wormhole, Sirius suddenly appeared behind it and plunged shadow spikes towards the Bedaubler. The destruction of the barrier health was low, but the Bedaubler became unable to move. The Bedaubler is once again caught by the beings that it called lowly.

"Mega Force Crush!" Onyx along with the Daemos Corps members suddenly appeared next to the Bedaubler and coated their spears with force shell. This was an easier but still deadly application of the force shell as they reinforced a lethal item. They might not be able to do what Elder Bronx is doing but they can deal as much when they group up.

Each of the Daemos Corps members were able to destroy 2% of the barrier health. They were able to collectively destroy 32% of it with their unified attack. The large barrier health that the Bedaubler previously had was destroyed in a matter of seconds. The Bedaubler now only held about 8% of its barrier health which was easily destroyed by the combined attack of Kimat and Kanlaon.

[The barrier health of the Bedaubler has been destroyed. The being inside of it has failed in mutating completely.]

A loud explosion erupted as soon as the Bedaubler got destroyed and it revealed the failed mutation of the Khadasha Leviathan. The Khadasha Leviathan that looked elegant and fierce was no more as it became a monstrous being that would terrify even adults. The Khadasha Leviathan or rather the Tumultuous Leviathan (Failed Mutation) had the shape of its original look, but it was no longer fish scales.

[The Tumultuous Leviathan (Failed Mutation) has come out of the Bedaubler prematurely.]

[The Tumultuous Leviathan (Failed Mutation) has only recovered 10% of its health.]

[The Tumultuous Leviathan (Failed Mutation) has only increased its stats by 15%.]

[The Tumultuous Leviathan (Failed Mutation) has lost its rationality and will attack anything that is near it.]

The fish scales that covered its body became eyes that moved on their own while the rest of its

body looked like the substance that the Bedaubler was made of. It did not look like the primordial beast that it once was. A scream that was like a mix of five different beasts emanated from the Tumultuous Leviathan (Failed Mutation).

[You have been affected by Tumultuous Scream.]

[You have managed to negate the confusion due to your special constitution.]

[You have managed to negate paralysis due to your special constitution.]

[You have managed to negate fear due to your special constitution.]

[Your stats shall be reduced by 5%.]

[All of your elemental resistance has been decreased by 30%.]

[All of your status resistance has been decreased by 50%.]

Chapter 2037: Failed Mutation

==

Monster Name: Tumultuous Leviathan (Failed Mutation)

Monster Tier: Transcendent

Monster Type: Mutated Primordial Beast

Monster Species: Mutated Aquatic Primordial Beast

Monster Level: 460

HP: 20%

MP: 45%

Description: The result of having the evolution of the Khadasha Leviathan be interrupted. It acquired this form using the power of the unknown shard that is embedded on its forehead. It has failed the complete evolution which resulted in it having the same body qualities to that of a Bedaubler. Its sanity is not stable and will devour and destroy any beings near it.

==

The Tumultuous Leviathan (Failed Mutation) is indeed a monster that can be said to be the stuff of nightmares. Just looking at its serpentine body with eyes as scales makes anyone have nightmares every day. The body itself of the Tumultuous Leviathan (Failed Mutation) looked extremely flexible and also almost immune to physical damage due to the unique nature of it.

Before any player could even react, the Tumultuous Leviathan (Failed Mutation) already released a scream that decreased stats and inflicted numerous status ailments. Adrian was able to not get

affected by the status ailments, but he was not safe from the status reductions. His resistances were even reduced as long as he is in combat with the Tumultuous Leviathan (Failed Mutation).

"Saena, Cleansing Light!" Adrian commanded.

"Yes, master!" Saena replied as she returned to her large size because it will not just be Adrian that she will heal.

Saena spread out her wings and radiated a gentle light. All players that got affected by this light experienced some form of euphoria as if a heavy feeling has been lifted from their bodies. Not all players were affected by the Cleansing Light as Saena's ability is not that powerful to cover the large battlefield they are in.

[Your status reduction has been cleansed.]

[Decreased the reduction of your elemental resistance by half.]

[Decreased the reduction of your status ailment resistance by half.]

[You have been healed by 5% of your maximum health.]

The gentle light did not only cleanse all of the abnormalities of the body but also healed those in the vicinity. Anastacia saw that Saena has worked her wonders and followed suit as she also performed a spell that cleansed status ailments. A green wind swept to a large area and all those that were affected by it managed to cleanse all of the reductions that they have been afflicted with.

[Your elemental resistance is no longer reduced as it has been cleansed.]

[Your status ailment resistance is no longer reduced as it has been cleansed.]

Adrian commanded Saena to cleanse the other players that were not affected by her initial spell. She also picked up Anastacia as they spread out to cleanse the status reductions of all the players they could reach. The Tumultuous Leviathan (Failed Mutation) did not like this as the two beings are now its target due to them performing too much healing. As soon as the Tumultuous Leviathan (Failed Mutation) learned that the two beings cleansed everything it affected, the enemy charged like a fierce python as it could now freely move in the Inverse Realm.

"Did you think that I would allow you to do that?" Adrian muttered as he commanded the rest of his soulbounds to attack.

Sirius was the first to reach the Tumultuous Leviathan (Failed Mutation). He tried to destroy the body of the Tumultuous Leviathan (Failed Mutation), but his physical attacks all passed through its body. The body of the boss monster was not solid as it looked like it was partially liquid in structure. Seeing that his claws were ineffective, Sirius proceeded to call upon Yuki as both of them blasted the boss monster with shadow and ice.

Kanlaon was the next one that attacked the Tumultuous Leviathan (Failed Mutation). He fired a fully charged Genesis Dragon Breath towards the boss monster which severed its tail. The only problem is that the severed tail suddenly became a small serpentine monster that attacked players that are next to it. The severed being is called Miniature Serpents that has the level of 350 which is fairly high considering that it is a remnant part of the Tumultuous Leviathan (Failed Mutation).

This did not happen when Charon appeared and coiled its chains on the Tumultuous Leviathan (Failed Mutation). Charon's chains are enchanted with magic, and it can bind anything as long as

they have souls. The chains that Charon bound the boss monster with made it unable to freely move the body part, but the large body of the Tumultuous Leviathan (Failed Mutation) made him unable to completely stop it. It was Charon that was dragged by the boss monster instead.

Seeing that he could not stun or bind the Tumultuous Leviathan (Failed Mutation), Charon opted to sap its life force. All of his chains plunged towards the body of the boss monster and sunk even deeper. He then connected the chains to all the melee players in his vicinity which reinvigorated the spirit of all the players he helped.

"The Merciful Chained Magus has blessed us! We shall be unkillable!" One of the players that is actually a huge fan of Charon shouted as this was not his first time being connected to his

chains.

Kimat faired better as he actually commanded the mages in the Pantheon and Evergreen guild to cast lighting magic with him. Some of the players were shocked that a soulbound talked and even commanded them but they thought that it was Adrian's commands. The mages also felt the immense circulation of mana in the area when Kimat is in the presence. Kimat's entire body purifies mana in the area due to it being mostly made of pure lightning.

"Lightning Hammer!" All of the mages casted simultaneously while Kimat roared and imbued that lightning spell with his own divine mana.

[A divine beast of lightning has blessed your spell.]

[Doubles the critical chance of the spell.]

[Increases the damage dealt by the lightning spell by 300%.]

A few notifications popped up and all of the mages are shocked. The Lightning Hammer spell is an Epic Tier spell that can be cast quickly but it was not that powerful. They all saw a huge pillar of lightning smash towards the body of the boss monster. Unlike Kanlaon's attack, Kimat's enhancement increased the lethality of the spell which destroyed any Miniature Serpent to be spawned. The mages cheered but Kimat issued the next command because the enemy has yet to fall.

Dodu, on the other hand, did not approach the boss monster. Adrian did not command it to press on as his soulbound told him that the bodies or the two are not compatible. If Dodu actually tried to predate on the body of the boss monster, then they would cancel each other out. Given the sheer volume of the boss monster, Dodu would die even before it could defeat the Tumultuous Leviathan.

"Your duty would be saving those that are getting attacked by the Miniature Serpents." Adrian commanded as those pesky little monsters were born from the boss monster itself.

Wisteria also provided support as it could easily fly in the air as she used her vines to catch any players that fall down. Her aromatherapy also provided great coverage as she could entice the Miniature Serpents to attacking her. If one were to see a large flying turtle with a tree on its back running away from numerous serpentine monsters, then that would be Wisteria. She has great synergy with the ranged unit of the Pantheon and Evergreen Guild.

"The health of the boss monster is not getting reduced fast enough. All of the spells and

attacks are hitting properly but we barely made a dent. We only reduced 1% of its health from all those attacks." Adrian muttered as he killed a miniature serpent with his scythe, and he

saw what is clearly happening.

The Tumultuous Leviathan will not get killed if you attack the main body but one needs to destroy all of the Miniature Serpents that spawns from its discarded body part. Adrian shared what he observed to the group chat of the guild masters of each guild, and they all went to verify its authenticity. The guild masters of each guild destroyed Miniature Serpents while looking at the health bar of the boss monster and they were shocked. The health bar of the boss monster dropped by a small percentage as soon as they killed the smaller monsters it

spawned.

"Focus on killing the Miniature Serpents! They might be spawned by the boss monster, but they are still part of its body." All the guild masters relayed this information to their guild

members.

Having found the way to conquer the boss monster that failed to mutate, all of the players proceeded to group up to defeat the Miniature Serpents. It was easier said than done as not all smaller monsters are of the same level and power. A bigger chunk destroyed would give birth to a bigger Miniature Serpent.

Chapter 2038: Failed Mutation II

"We now know how to destroy the Tumultuous Leviathan! Make sure to be prepared for anything unsavory that might happen!" The guild masters shouted to all of their guild members as they can now see the end of this raid.

The raid of a Primordial Beast is something that should be difficult, but they did not think that there would be different stages that are troublesome. Unlike normal raid bosses, the Primordial Beast could also be considered as an NPC as they could be interacted with. If one is hostile, then that is the only time that the Primordial Beast would be completely hostile. Still, the players are not entirely sure about the last statement as the Leviathan was the first primordial beast to ever awaken.

All of the players thought that they could see the end as they reduced the health of the Tumultuous Leviathan to 15% by rapidly destroying the Miniature Serpents that it has produced when struck. What they did not believe is that there are other ways for the failed mutated primordial beast to attack when it cannot attack the target it wants. The Tumultuous Leviathan suddenly twisted its body and punched a wormhole into existence.

All of the Daemos immediately knew that this is something that should not be created as the Tumultuous Leviathan was able to destroy the dimensional barrier in that specific spot. The Tumultuous Leviathan would then enter the wormhole and it reappeared in the area where the most miniature serpents were killed. All of the players in the area are suddenly inside of the encirclement that the Tumultuous Leviathan created using its own body.

Without even a moment of hesitation or it might be due to its craze, the Tumultuous Leviathan pounced on all of the players inside of its encirclement. The jaws of the Leviathan have been strengthened to such a degree that a bite would create shockwaves. One bite of the Tumultuous Leviathan would kill the players inside of it and decrease the health of those near it by 40%. They were not even bitten directly but they lost almost half their health.

Even the defenses of the players did not matter as the powerful bite defied common sense and also has defense penetration. One bite is all it takes to defeat all of the players present and they were terrified of it. Even the tanks would get killed instantly if they are caught which is now happening to them as they are the slowest to run away.

"I can no longer hold it!" Elder Koronn stated as he could no longer use Inverse Realm. As soon as Elder Koronn cancelled Inverse Realm, the blessings it gave have vanished as well. The only upside is that the Tumultuous Leviathan got slammed by a huge body of water that was the sea. The players were mostly safe as the Blessing of the Sky returned to the Blessing of the Deep where the effect of the sea is mitigated. The only downside is that they could no longer freely walk in the air.

"Attack while the Tumultuous Leviathan is falling down!" All the players shouted as they saw that the Tumultuous Leviathan seemed to have lost its control over the sea and was mercilessly slammed by it when it fell down from above.

The players did not even care of the bizarre scene of heaven and earth returning back in place as they are more preoccupied with killing the Tumultuous Leviathan. Numerous attacks rained down on the Tumultuous Leviathan and numerous miniature serpents also burst out from its large body. As soon as the miniature serpents appeared, the players ganged up on destroying all of them. The health of the Tumultuous Leviathan massively dropped due to this situation until it reached 10%.

"KUWAH!" The Tumultuous Leviathan roared menacingly as if it was showing that it is now desperate and will kill any that comes near it.

The Tumultuous Leviathan became smaller than its original size and it is now only about a hundred meters in length. It became smaller due to losing most of its body, but it was not that good of an omen to the players. The Tumultuous Leviathan moved much more swiftly with its smaller body, and it even used an attack that warped reality.

[The Tumultuous Leviathan has used Wormhole Feeding.]

The Tumultuous Leviathan suddenly created numerous wormholes that could not be detected unless you are a Daemos. It then jumped inside of the wormhole that it created in front of it and proceeded to appear behind a group of mage players. The mage players could not even react as all of them turned to particles of light. Half of their bodies vanished with just one bite of the Tumultuous Leviathan as its attack power did not diminish with its smaller body.

"This is not good. Daemos, alert the others on the area where it will appear." Elder Bronx commanded but it was easier said than done.

The Daemos Corps members can sense the wormholes, but they cannot fathom where the Tumultuous Leviathan will appear. All the wormholes were actively emitting a powerful aura that it was close to impossible to determine where the Tumultuous Leviathan will pop out. Even Elder Bronx could not ascertain the location and only planned to interrupt when it appears.

The Tumultuous Leviathan struck once again, and it was the players riding on Wisteria's back. Wisteria tried to fight back and use her leaves to deter the Tumultuous Leviathan, but she was not fast enough or strong enough to escape. Still, Wisteria valiantly sacrificed her life to make sure that all of the players riding on her would be safe. She called upon her brothers to save the players which Sirius and Kanlaon responded as the two rescued them.

[Your soulbound Wisteria has died.]

The death of Wisteria enraged the other soulbounds as Kimat turned himself into lightning to strike the Tumultuous Leviathan, but he failed. The Tumultuous Leviathan immediately entered the wormhole once again to vanish without a trace leaving Kimat dumbfounded. Charon tried to follow through the wormhole, but he did not get inside of it and was even damaged by it. Even the other Daemos Corps members tried to invade the wormholes, but a powerful energy repelled them which is most likely primordial energy mixed with the unknown energy of the Chaos Shard Fragment.

"Maybe I can access them?!" Adrian suddenly thought as he proceeded to touch the wormhole but even, he got a repelling force.

Even if Adrian got repelled, he was actually able to see within the wormholes. He had a glimpse of the structure that was the wormhole. It looked like a complex web of passages that are all interconnected, but he could not be extremely sure. He tried to touch it again but the damage he received was equivalent to 4% of his maximum health per second. The wormhole themselves seem to be something akin to the domain of the Tumultuous Leviathan.

While Adrian was assessing what to do, a lot of players scattered as they knew that grouping up would just end in them getting killed in one swoop. Elder Bronx tried to catch the Tumultuous Leviathan, but it would run away as soon as it sensed his presence. It seems that the boss monster would rather kill all the others while ignoring and escaping from the

Daemos.

"Since this is the case, everyone must come to me!" Elder Bronx shouted and then casted Dimension Shrink which brought most of the players near him.

"Let us see where you will appear now!" Elder Bronx stated as he also displaced the players in groups where he can reach in time.

He grouped the players into five areas where he could easily reach. The players did not like it, but their best chances are being bait even if they do not like being one. As if the Tumultuous Leviathan could see through what Elder Bronx thought, it did not reappear immediately this time. The players thought that the Tumultuous Leviathan would not appear as they knew it was afraid of the demons.

Contrary to what they think, the Tumultuous Leviathan seemed to be quite the monster. Three Tumultuous Leviathan's surfaced in three different wormholes. Elder Bronx is shocked to see this but quickly responded to the closest to him and blinked to that area. He encased his fists with Force Shell and slammed the head of the smaller Tumultuous Leviathan.

It seems that Elder Bronx did quite the amount of damage, but it was not enough to kill it. The smaller Tumultuous Leviathan created a smaller wormhole and hid inside of it immediately. The two other smaller Tumultuous Leviathan charged towards the players, but they felt something different. The tanks that defended the group were able to repel the attacking boss monster which they could not do earlier.

"It becomes weaker when it splits itself to attack!" The players that defended against the two smaller Tumultuous Leviathan shouted as the tanks lived on with half of their health.

Chapter 2039: It's a Bug

Seeing that the Tumultuous Leviathan used its other form of attack, the players started to prepare for it. It was not perfect and there were some casualties along the way, but they were now able to

defend against the Tumultuous Leviathan. The problem is that all they can do is defend against its attack and not damage it. As if the Tumultuous Leviathan is incredibly sensitive towards killing intent, it would dive the instant it senses it which makes it evade any attack.

Even Elder Bronx could not land a clear hit on the Tumultuous Leviathan. The mana recovery of Elder Koronn is also slow since he really pushed himself too far in extending the Inverse Realm all by himself. Adrian was trying his best to tap into the wormholes as he knew that this will be the chance they get if he is able to do this.

"It is not a Leviathan anymore but a Loach!" Elder Bronx shouted as he was beginning to get frustrated as he suddenly started to make the entire area shake.

Elder Bronx started to let his anger get the best of him as he started to lose control of his force shell. Elder Koronn had to slap shoot him in the face with pure mana to calm him down. The Daemos Elders knew better than to lose control as the enemy has almost the same capability as them. If they clash with the wormholes of the enemy, then they might hasten the collapse of the dimensional barrier.

Seeing even the Daemos Elders having no way to stop or catch the Tumultuous Leviathan, the player started to think of ways themselves. Some tried to fire magic spells on the wormholes, but it only ended on another wormhole. They even committed friendly fire in the process as they do not know the inner workings of the wormholes. Even attacking the inside does not guarantee that they would hit the Tumultuous Leviathan.

"We are getting nowhere, and we are pressed with time. The dimensional barrier is still weakening as we speak. Killing the Leviathan is the only way for us to stop it or else another set of gods would be difficult to battle. It already lost its mind, yet it is still fulfilling its end of the bargain or maybe that is the only thing that it has in its mind." Adrian thought as he and the other elders knew what would happen if they did not destroy the Tumultuous Leviathan.

"Master! I have finished my slumber, and I might be able to help you in your predicament." Kenos stated via their soul link as it seems that the small bug has also gained some intelligence to converse as well.

"If you have a way then tell me." Adrian stated but Kenos seemed hesitant.

"Kenos wants the master to dive into the Soul Chamber for a moment. The master will know more once he sees the situation." Paradox stated as it seems to have understood what Kenos wants.

"If that is the case, I will look for a safe spot first." Adrian stated as he then remembered that he could just create a pocket dimension for now and use that since it will not take long.

Adrian created a pocket dimension and immediately went into a meditative state to look at his subconscious. He went directly to the Soul Chamber where Kenos is placed, and it was a very odd place full of webs and wormholes. He did not know how the images of the soul chambers are exactly created but it is said to transform to a place where ethe soulbound is comfortable.

"Master! You are here!" Kenos stated as its voice was childlike, but all Adrian saw was a huge ball of silk that glistened like the stars floating above him.

"I am here but what is your form? Are you in the Pupa stage?" Adrian asked as he knew that insect type soulbounds operate in a different form of evolution.

"Yes, master! I also gained new abilities thanks to my current form. Do you wish to see?" Kenos stated which Adrian smiled as the excited tone of his soulbound is always something to look forward to.

Adrian looked carefully and only Kenos' eyes could be seen and all of his body is covered in silk of unknown origin. Adrian knew that this silk that is covering Kenos is not normal because it is pulsating Origin Energy which he did not think was possible. Kenos gained its form thanks to Adrian giving it his blood. What Adrian did not know is that his blood is incredibly potent not only for being a demon but also having the Asmodian trait as well.

"Universe Sericum Insectum. Even the new race is quite peculiar and difficult to say." Adrian stated as he looked at the soulbound status card.

==

Name: Kenos

Monster Tier: Legendary

Monster Race: Universe Sericum Insectum (Origin Beast)

Monster Species: Origin Insectoid

Description: This is the pupa stage of the Origin Insectoid. Not much is known about their species or race as they tend to not show themselves until they are mature. It is said that they hide in the far corners of the universe and create multiple pocket dimensions to protect themselves from other Origin Beasts. It is said that they are incredibly nutritious which is why they created a defense mechanism to hide themselves.

==

"You have grown! I am proud of you, but I cannot bring you out to fight." Adrian stated as he did not want to endanger Kenos when he is in a precarious stage of its evolution.

"I am strong, master! Do not worry but I cannot easily move on my own. Instead, we can fuse together, and I will empower master." Kenos stated.

Adrian returned back to the real world and also exited the pocket dimension. The scene before did not change that much as he was not gone for long. He was only gone for about five minutes which would not change much since the interval for attacks of the boss monster is between five to ten minutes. The players could be seen trying to find a way to catch the boss monster or prevent it from diving into a wormhole, but they have not yet found a way.

"I should trust Kenos since the skills that he acquired are perfect for the situation. Even Paradox agrees which means that this is very feasible. Let us change form first. Primordial Armament: Mirror!" Adrian stated as he changed form.

"What is the guild master doing?" One of the Pantheo guild members asked Solstice.

"He found a way out of this situation. Everyone must get ready as this would be quick just like always." Solstice stated as she saw the other guild members nod in agreement.

"Perfect Assimilation: Kenos!" Adrian stated as Kenos' magic circle suddenly fused with his body.

Adrian's appearance changed almost completely as his armor changed to match the silk that Kenos is covered in. If Adrian used Beast Form, then he might look more like Kenos, but he used the humanoid form for more ease of use. Adrian's mirrors that spun around him also changed to go with his new aesthetic. The eyes that looked like that of a demons changed to a more insect-like eye while the outer edges had the same silk pattern.

Adrian's blindfold also changed to that of silk which made him look incredibly stunning. If Adrian looked cool and mysterious in his mirror demon form, then his Kenos Mirror Demon form made him elegant and mysterious. Everyone that looked at him almost forgot that they were still being threatened by the Tumultuous Leviathan.

[You have fused with your soulbound, Kenos.]

[You have gained more stats for the duration of the fusion.]

[You have gained the active skill Cosmic Silk Web from your soulbound, Kenos.]

[You have gained the passive skill Cosmic Vibrations from your soulbound, Kenos.]

==

Skill Name: Cosmic Silk Web

Skill Tier: Legendary

Skill Type: Active

Effect:

Able to create Cosmic Silk Webs to aid the user in using Cosmic Vibrations. Can be used to restrain enemies. More mana used will create a stronger and longer Cosmic Silk Web.

Mana Cost: 10 Mana points to 1000 Mana points per second

Cooldown: None

Cast Time: None

==

Skill Name: Cosmic Vibrations

Skill Tier: Legendary

Skill Type: Passive

Effect:

Able to sense everything that the Cosmic Silk Web touches. Automatically used to sense the

entire area that is not perceived by the user. The larger the area being revealed, the longer the time needed to perceive. Using more Cosmic Silk Webs will hasten the process of perceiving

the area.

Mana Cost: None

Cooldown: None

Cast Time: None

==

"Let us start." Adrian stated as his voice also contained Kenos' voice since they are fused together.

Adrian suddenly sprouted six extra insect arms from behind him with a cool effect of a wormhole being the source. As soon as the extra arms appeared, the Cosmic Silk Webs started to invade the wormhole domain of the Tumultuous Leviathan.

Chapter 2040: A Complex Web

Adrian deployed all eight of his arms and release numerous webs towards the wormholes created by the Tumultuous Leviathan. At first, the wormholes of the Tumultuous Leviathan were repelling the Cosmic Silk Webs that Adrian created. Adrian even felt the repulsion as if he was connected to the webs themselves.

The webs were like nerves that Adrian could feel and see everything like he was extending his mind. Coupled with Adrian's omniscient view, the webs created a clear image as if he can view the world around him like a diorama. The world became easier to web as if he can manipulate things with just a simple twitch of his finger.

Adrian easily manipulated the energy that the cosmic silk webs possessed as they became more fluid in motion. The harsh energy that the wormholes have were now letting the silk webs inside as if it was the Tumultuous Leviathan entering. This sudden change did not prompt the attention of the Tumultuous Leviathan as it could not feel the webs since Adrian masked the energy very well.

Adrian did not expect that the world could be viewed in an even more intricate detail than when he is in his normal demon form. He was being inconspicuous as he did not want to get the attention of the Tumultuous Leviathan. He already infiltrated the wormholes with his webs and eluded the attention of the Tumultuous Leviathan but that will not be forever. If the Tumultuous Leviathan runs on instinct, then it could sense the looming threat that Adrian gives it.

"Let us make this quick before he realizes. No... make it faster so that it can be caught in the web when it already realizes its mistakes." Adrian muttered as he actually sprouted more insect arms from behind him to create more webs that went inside of the wormholes.

Adrian already got the connection now all he needs to do is map out everything to the point that he will know where the Tumultuous Leviathan exits. This operation is exceedingly challenging for him as this is the first time that he attempted this. This is the first time he even possessed Kenos at all as the little cosmic bug barely had any combat ability.

Adrian's webs snakes across the wormholes and at the same time mapped the inside. Adrian's brain would have overloaded trying to process the information, but he was getting aided by Kenos and Paradox. Kenos made sure that the information would be sent to him in bulk while Adrian and Paradox processed it. Assimilation means that both Kenos and Adrian could function as the former has a strange passive ability called Cosmic Mind that lets him process the world a bit differently than normal beings.

Kenos could only see things in another perspective as all he basically sees is energy. The only person that he could see the face would none other be his own master when they are in the Soul Chamber. Adrian even tried Kenos' perspective for a bit, and he almost puked from all the colors

that flashed before his eyes. The mind of Kenos and Adrian are also built differently which is why he could not easily see the world in the former's perspective.

"Just a little more." Adrian added as he has already scattered all the cosmic silk webs inside of the numerous wormholes.

From the wormhole networks, Adrian could see that all of them were interconnected and that each passage can easily lead to another. He could even see points in the passages where the Tumultuous Leviathan used to create new ones. Creating new passages required the Tumultuous Leviathan to close off one of the existing ones which meant that the number of wormholes themselves are limited.

Adrian pushed himself to the point that his mana dropped to 15% which is incredibly low even for his standards. It is thanks to Kenos' mind that he was not suddenly affected by Mana Overdose because he used a large amount in a short amount of time. It is also due to his strong body that he was able to negate the effects such as his heart stopping. Massive usage of mana in a short span of time can literally make one's heart shut down as the mana circles are located in the heart.

"I guess I should thank the durability and the demon core for such instances. Now, let us see where you are currently hiding." Adrian stated as he recreated the entire wormhole connectivity using his mind.

Adrian even created a red flickering image to represent the Tumultuous Leviathan. He even recreated the movement and passage of the Tumultuous Leviathan in its series of wormholes. This interaction made Adrian smile, but he would be late to alert the others if he cannot share what he envisions. Adrian could warn them, but he might be a step too late in doing so as he would need to actually speak.

"We can connect them to our mind, master. We will use the webs to connect to their spine to send out the detailed images that they need. We might need more mana as we cannot cover all of the people here." Paradox stated as Kenos has not yet developed his full vocabulary.

"Is that so? It is terrifying to imagine what we are going to do but this should be done for us to win. Also, we do not need to give it to all people here but only the ones that can make a huge difference." Adrian stated as he counted about a hundred people.

"With that amount of people, our mana would be enough." Paradox stated.

"Let us defeat the boss monster then." Adrian stated as he smiled.

==

"Ah!" Solstice exclaimed as she suddenly felt a jolt behind her and reached out to check what it is, but a voice suddenly echoed in her mind. This is the case for all the people that he chose.

"Do not cut the web or rather it would take a great effort to even do it. I am barely maintaining it using my own mana. I have already deciphered the wormhole network and I will now give all of you the image that I see." Adrian stated but there were still some that cut off the connection.

Adrian did not blame those that cut the connection, but he also did not try to reconnect it. In the end, about 67 people made the connection work as these are the people Adrian believe that can change the course of the battle. This would be the biggest regret of those that cut the connection, but they do not know of that.

"Let us give them a live feed." Adrian stated as he looked even more determined than before because there were people that rejected his invitation to work together.

There were still people that did not believe that they can see what Adrian sees but they were beyond shocked as images started to flow into their minds. It was like there was someone uploading memories into their minds via the web connection. It was terrifying but amazing at the same time because this can change courses of wars. The way that information is given is both discreet and extremely detailed.

The images of three red snakelike beings could be seen entering three different passages. One of the smaller Tumultuous Leviathan headed towards a group that was farther from Elder Bronx. One could clearly see that the boss monster was indeed evading the Arch Demons as it did not want to be near one. The Tumultuous Leviathan would have easily done so but Adrian exists in this world.

"Finally, I can grab you! You are one slippery loach!" Elder Bronx shouted as he appeared above the smaller Tumultuous Leviathan and slammed it towards the sea.

Elder Bronx was able to grab the Tumultuous Leviathan because he coated his entire body with a malleable force shell that could grab beings made of mana. The current form of the Tumultuous Leviathan is one such beast as it is made of mana which could harden and soften when it needed. The Tumultuous Leviathan could not escape the clutches of Elder Bronx and slammed it to the bottom of the sea.

The other smaller Tumultuous Leviathan showed up in the group where Adrian can easily reach. With a quick swipe of his mirror, he sent his guild members along with the Evergreen guild elites. The Tumultuous Leviathan looked shocked to suddenly being cornered and tried to escape. Unfortunately for the Tumultuous Leviathan, Solstice was there, and she has already collected enough blood.

"You will not be getting anywhere." Solstice shouted as she created a massive net of blood that she collected from all of the players that were hurt near her.

The other Tumultuous Leviathan appeared in an area where Adrian does not have a connection with anyone. They thought that they could catch the Tumultuous Leviathan, but

they did not anticipate it fast enough. In the end, the smaller Tumultuous Leviathan escaped back into the wormhole before it would get caught.
