

One Planet 189

Chapter 189: Blue Star's Evolution! Ten years of development! Changes in the Heavenly Pride Ranking!

It didn't matter anymore.

The work was carried out quickly.

First of all, there was the official selection and formation of the Great Desolate Army because Jiang Fan once again gave Yan instructions.

It was the same as in the era of Qi.

He was conducting outer planet trials once every three months!

After seeing this instruction, Yan was completely sure that a new glory expedition was about to begin!

This time it must be more important and more difficult than the era of Qi!

For this reason, Yan temporarily put aside her research on energy conversion and personally participated in the formation of the Great Desolate Army!

Seeing Yan's urgency, the wise Ghost Buster, Zhuge Ming, Zhang Liang and others guessed what was going on and they actively cooperated.

This time for the Great Desolate Army, the initial planned number was 50,000.

The number of soldiers was not as important as the quality.

It applies to any era!

Out of hundreds of thousands people of the original Great Desolate Army and the surrendered army, the best 50,000 soldiers were selected.

Those soldiers were divided into five legions of 10,000 people.

The selection of generals had also begun.

Without any surprise, Chang Yu Chun, the oldest qualified person, temporarily served as the main general.

It was difficult to choose the generals of the five legions.

Xu Tiande, Han Xin, Le Yi, Zhao Zilong, Han Chuhu, Zhang Liao, Lu Sun, Li Wenzhong and others who had just surrendered.

It could be said that there were a lot of talents!

As the saying goes, there is no first place in literature and no second in martial arts!

These were great generals.

No one was convinced by anyone!

For these five spots.

The fight was on.

The new round of tearing each other started again!

This time because there were too many people, Yan was unable to make a decision for a while.

She could only let Ghost Buster and others figure it out.

The choice of the advisers was no easier than a great general, either.

Those who surrendered included Guo Jia, Zhuge Ming, Deng Li, Gao Ying and so on.

It was very difficult to decide!

After a few days of infighting, the spots were still out.

There were five great generals but ten candidates.

Following the plan made by Yan, every three months, the expedition would be led by one of the legions.

After all the conquests would be over, the final five spots would then be selected from the battle results.

In this way, no one had anything to say.

Anyone could take the position with their ability!

The Transcendental Research Institute had expanded again!

Yan pulled in some of the firearms research groups as well.

By now, the number of scholars possessed by the entire Great Desolate Army had already reached tens of thousands of people, exceeding the number in the Era of Qi.

Under the collective efforts of so many people, improvements to the rifle came out soon.

The first semi-automatic rifle was born in a research laboratory!

The semi-automatic rifle was without the bolt.

A soldier just directly pulls the trigger.

Every time a soldier pulled the trigger, a bullet was fired!

Some scholars also found the semi-automatic rifle to be inadequate.

They were thinking that it could be improved even more!

Another research team got an idea for the use of gunpowder.

It was felt that a more convenient, smaller-yielding powder pack could be made.

Thus the prototype of the hand grenade was born.

There was also a research group specialized in researching the ultimate move against powerful transcendents but for a while there were no results.

After one month, it was time for the trial quest.

The planetary channel opened again.

This time the leader of the team was Xu Tiande.

His qualifications were only less than Chang Yu Chun.

As for the difficulty of the quest, Jiang Fan went from simple to difficult to slowly let the Great Desolate Army adapt!

Time passed quickly.

In the blink of an eye three years passed.

The Great Desolate Army had carried out twelve quests of planetary conquest.

Each great general personally led the team once!

In these three years, whether it was the Great Desolate Institute of Science and Technology or the Transcendent Research Institute, the results came out like a fountain.

All kinds of novel inventions were springing up like mushrooms.....
