

One Planet 201

Chapter 201: First Day Results! Jiang Fan's ranking!

"There's no other way. Who told these candidates to be so monstrous? If they don't be ruthless, they may not even be able to get into the top universities in the end."

The male examiner shook his head with emotion.

"Given the current situation, there should be no problem for Bu Jing Yue." An older examiner next to her spoke up, "Her true strength is at least in the top 300 in the province! As for Tang Qingqing and Jiang Fan, it's a bit difficult."

"These two people, the only possible one should be Tang Qingqing." The male teacher smiled and said, "If Tang Qingqing hid some of her strength, then she would break out in the college entrance examination. It's likely that she'll be able to reach a top 1,000 or even a top 500 ranking."

"Let's see, there are so many geniuses in this session, who do not keep a little bottom card, the first thousand are not so good to enter."

The older examiner shook his head and said.

"Stop talking, it's almost time, let's get ready."

The chief examiner shouted at this time.

Immediately, the examiners stopped talking and started getting ready.

Inside the examination room with the prompting of the ethereal voice, the exam was also officially started!

At this time, Jiang Fan discovered that the connection between himself and Blue Star was reopened. However, it could only be observed.

The Great Desolate Army of Xia kingdom could be seen training desperately but it could not be operated.

He couldn't even give Yan an air cue.

It was as if it was isolated by some force.

Jiang Fan knew that this was the power of the college entrance examination space.

"Please prepare yourselves, there will be three examiners, who will go into your respective planets and assess your planets later. The time is variable and a reminder will be given one minute before the test." The ethereal voice prompted.

Jiang Fan waited quietly.

He was waiting for the test to actually begin.

After about half an hour, the ethereal voice rang out in Jiang Fan's ears again:

“Candidates whose admission ticket number?is **** please get ready!”

“Here it comes.”

Jiang Fan raised his eyebrows.

His consciousness entered the awakening space.

Not long after that, he felt that there were three channels of consciousness but he didn’t know how.

It actually entered the Blue Star!

Jiang Fan was clear.

These three consciousnesses were the awareness of the three examiners in charge of the assessment!

This was because each examiner was assessing many candidates at the same time.

So, many consciousnesses had to be separated.

There were also restrictions from the space of the college entrance examination.

These awarenesses could probably explore the overall situation of the planet and it was impossible to know the specific information.

For example, it was impossible to see exactly how many people there were in the Great Desolate Army, what they look like, etc.!

Although Jiang Fan was able to feel these three consciousnesses, it was also inaccessible.

One could only continue to feel in silence.

At the same time, in the main examination building, in an evaluation room, three examiners, two men and one woman, were sitting there.

They were all powerful planet masters of level 4!

Their awareness at this time was divided into countless channels.

They were entering each candidate’s awakened planet.

They were checking out the planet in general!

Jiang Fan could not communicate with them but among three people, it was possible to communicate with consciousness!

Naturally, because of the fairness, the three did not know exactly who the candidates being tested were.

The consciousness of three people went in on the Blue Star.

Only one sweeping circle was required.

It was probably clear.....

What was the deal with this planet?

After all, it was just a level 1 planet!

For a Level 4 Planet Master, the size was very small!

As the three people swept the Blue Star across the circle, a few moments later, they all revealed an unprecedented look of shock!

The first item of this test was the size of the planet!

As it was a level 1 planet, the diameter of the planet was used directly as a standard.

The full mark standard for the assessment was 500 kilometers!

Just rate it as a perfect score!

As the planet had awakened for three months, it was not possible to get this value.

In the previous year's college entrance examination, they were close.

This was the standard set by many powerful planet owners!

Naturally, there could be no mistake.

However, at this time, the diameter of the Blue Star detected by the three examiners far exceeded this standard!!
