

One Planet 202

Chapter 202: The explosion begins! The first record of the college entrance examination..... is born!

The first day of college entrance examinations got everyone's attention!

There were hundreds of millions of candidates in the entire Dongyang Province.

There were quite a few friends and relatives standing behind them.

Naturally, they also cast their eyes on this event where geniuses were most likely to be found!

They were aware of some of the absolute demons.

Usually it was very low profile.

Even if it's a competition like the Jiangcheng Grand Competition, they were not interested, just like Bu Jing Yue.

If it weren't for Jiang Fan's awakened planet's diameter surpassing her, she hadn't planned to attend either.

However, the college entrance exam was different.

Even if you were more genius, another demon would come!

Or the background would be more powerful.

All must take the entrance exam to get into a good university!

Not many people paid attention to the morning theory exam of "Planetology".

There were no surprises this year.

The many geniuses on the Heavenly Pride List took a perfect score!

Not one of them was negligent and careless and the afternoon exam was not that easy!

The assessment was the overall situation of each planet.

There would definitely be a difference!

The size of the planet, this important information, was the top secret of every planet master!

It was generally not leaked to the outside world.

The people on the outside could know only in the high school entrance examination.

Even if it was the leaders and teachers of their respective schools they couldn't get first-hand information.

Like Tong Zhensheng.

He didn't know this aspect of information about several geniuses at his own school.

"Tang Qingqing's planet should be more than three hundred kilometers in diameter now, right?"

Teacher Liu Yue spoke up.

“I guess so.”

Tong Zhensheng nodded.

“What about Jiang Fan? He has an ordinary civilization and the diameter of the planet may grow slower.”

Liu Yue guessed a little.

According to common sense, among the civilizations of ordinary people, only Jiang Fan cultivated it but naturally no one was optimistic about the development prospects.

“It must have been more than three hundred kilometers.”

Tong Zhensheng couldn't help but remember the fright he received when he last communicated to Jiang Fan.

He smiled slightly and said, “Let's see if it can exceed 400 kilometers or more!”

Saying this, Tong Zhen Sheng's hands clenched slightly.

It was just that ,he just realized that before Jiang Fan's last big competition, the diameter of the planet was more than 350 kilometers.

At this rate, it should probably be more than 400 km!

Four hundred and fifty was also not impossible!

Or it could be even higher!

This was also the exam that Tong Zhensheng was most looking forward to for Jiang Fan!

Even though Tang Qingqing and Bu Jing Yue's ranking in the heavenly pride list far exceeded Jiang Fan, the reason why Tong Zhensheng still had a glimmer of hope for Jiang Fan lies here.

“As long as he can surpass Bu Jing Yue in the assessment of this subject, maybe there is still a chance!”

Tong Zhensheng thought to himself.

.....

“The first place in the assessment of this subject is bound to be the peerless monster from Tianjing City.”

On the eighth floor of the Jiangcheng Planetary Association, in the spacious living room, several planet masters with powerful aura were sipping tea at the same time.

They were discussing with each other.

Naturally, the discussion was about the ongoing second subject of the college entrance examination!

One of them was Tang Qingqing's brother, Tang Yushu and sitting next to Tang Yushu, it was also someone Jiang Fan knew.

The middle-aged supervisor of the association!

The middle-aged supervisor at this time was receiving the planet masters with a smile on his face.

These people, including Tang Yushu, were all admissions teachers from top-notch universities who came to Dongyang Province!

As Tang Yushu's sister also participated in this year's college entrance examination, they all came to Jiangcheng.

"The one in Tianjing City....."

Tang Yushu replied: "There is really no suspense, let's see how many points we can pull away from other demons!"

"Mr. Tang, what about your sister? After the training of this elite teacher of yours, the size of the planet should be good now."

A teacher looked at Tang Yushu and asked with a smile.

The others also looked over.

"My sister, you know that too."

Tang Yushu smiled and said, "The diameter of the planet when it was awakened was not too big, it hadn't exceeded 30 kilometers, now it can't be high. It's no match for those demons!"

"This section pulling points will not be big and not really critical." A teacher said.

"This year, one by one monsters are rampant, and the gap between them is very small. It is really impossible to distinguish between high and low in this subject."

Another teacher nodded in agreement.

According to the grading standard, five hundred kilometers was a perfect score.

Every 100 km was 20 points.

If the diameter of the planet reaches four hundred and fifty kilometers, that's 90 points!

A score that is considered very high.

.....

In the assessment building, two men and one woman were the three examiners.

After scouting the size of Jiang Fan's planet.
