

One Planet 206

Chapter 206: Consecutive explosions! Unprecedented in history! The record terminator..... Jiang Fan!

Perfect score in both subjects in the entrance examination.

Naturally, it was an unbelievable honor for the candidates and for the examiner in charge of the assessment but to be more cautious, the middle-aged man still followed the usual practice.

He brought his own consciousness and went in over the Blue Star and probed as much as five times.

“It seems that I met a too low-key demon, but it’s okay, let me, old Zhu, meet him.”

The middle-aged man thought to himself.

In the entire Dongyang Province, there were five hundred and eighty cities and towns.

That was, five hundred and eighty chief examiners.

These chief examiners were also assigned with a hint of hidden rules.

The most wanted by all examiners was the big cities of the college entrance examination.

For example, East Star City, Amber City, Sky Crystal City and so on!

It was easy to come up with good results or even good luck and to be able to break a record!

The middle-aged man could only be sent to a small city like Jiangcheng in the middle and lower reaches!

It was just that he didn’t expect that such a heaven-defying genius was actually bumped into him!

“Let’s sign together.”

After probing and confirming that there were no problems, the middle-aged man also regained his composure.

He signed on Jiang Fan’s grade for this subject with other examiners despite the reluctance of the female examiner.

However, she could only sign her name!

At this time, there was still about half an hour or so before the end of the exam, Jiang Fan sat down in his seat.

He still had to wait in boredom.

Outside, in various places in the Dongyang Province, many people were waiting anxiously.

It was different from the “Planetology” theory test in the morning.

The two subjects in the afternoon not only scored as much as 200, it was even possible to directly separate the levels!

By convention, the difference in points between the various talents was usually not too large but if you encounter special circumstances, if the score difference was straightened out then even if there was still the most important subject exam the next day, it was also very difficult to recover!

Two subjects in the afternoon basically set the tone for the overall score of the entire college entrance examination.

This was the consensus of all experienced people!

“There is no suspense in the second section. Basically, the monster from Tianjing City will rank first. The only suspense is whether he can break the historical record of Dongyang Province!”

On the eighth floor of the Planetary Association.

As the end of the exam came closer, several admissions teachers were talking with increasing anxiety.

“There really isn’t much to say about the second section.”

Another teacher nodded and said, “What is the diameter of the planet? Actually each candidate has it in his or her own mind. How much is how much, at a glance! It’s considered an objective question, and the teacher who grades it can’t give you an extra point, or deduct an extra point!”

Everyone else nodded slightly.

According to the standard of five hundred kilometers for a full score.

Every 50 kilometers equals 10 points!

That’s 0.2 points per kilometer!

For example, when four hundred and twenty kilometers were converted to fractions, it would be 84 points!

Three hundred and sixty-seven kilometers equals 73.4 points!

The value of the diameter of the planet was hard there.

There was no room for the examiner to manipulate.

How much was the corresponding score!

“The third section is a different story.”

This teacher then said, “This subject is among all four exams. The most subjective subject of the examiner! It’s possible to give an extra point and it’s possible to give two or three points less!”

“This is all very possible.”

Others had no objection.

They all participated in the college entrance examination exam back then and some of them also used to go as examiners to supervise exams.

Very clear about the inside of this!

It was like the female examiner who was responsible for evaluating Jiang Fan.

If Jiang Fan's results were not too demonic, those two or three points might have been deducted!

"This subject, even though it is highly subjective, is not generally rated high."
Tang Yushu said with a smile.

"How can a level 1 planet be rated high?"

The middle-aged supervisor next to him also replied.

This was also the consensus of everyone.

The third subject focuses on the species richness and ecosystem integrity of each candidate's planet!

However, a level 1 planet was still a planet that had just awakened three months ago.

How many species could there be?

Not to mention the ecosystem integrity.

Putting in the eyes of these powerful planet owners was really miserable and pathetic.

It was like a martial arts master watching a little kid doing a turtle punch there!

If it was not because the college entrance examination had a corresponding standard none of them were passable.

"It's true that in previous years, none of the third subject ratings were higher and in fact they couldn't have been higher."

A teacher smiled and said, "It's possible for any of the four super monstrous geniuses in this subject to take first place. It's not like there's no chance of others suddenly killing it and blowing it out."
