

One Planet 225

Chapter 225: The real decisive battle! The last test!

A look of determination flashed in Bu Jing Yue's eyes.

"Good luck, Fang Zhenting. You were on par with Bu Jing Yue, Jiang Fan, and the others during the competition. You're all known as Jiangcheng's top geniuses, but why is the gap so big now? Today's exam isn't about comparing these monsters. Let's do our best! The top 100,000! The top 50,000!"

Fang Zhenting also clenched her hands tightly, and her heart was very determined.

It was not just in Jiangcheng, in the entire Dongyang Province.

East Star City.

Amber City.

Purple Star City.

Tianjing City.

.....

The eyes of all the candidates, whether it was an ordinary student or a peerless genius were full of determination!

"Go for it, Shanzi, the overall first prize is definitely yours."

Lei Xun smiled at Wang Shan.

"Good luck to you too, see you in the top ten!"

Wang Shan also smiled faintly.

"Young Master, good luck, fight for the top five."

In the Tianjing City College Entrance Examination Square, the beautiful maid said with a smile.

"It doesn't matter, the top five are no different from the top ten. Today, I want to see what other deeply hidden dark horses are exposed."

Bai Jiao Yang's face was full of relief.

Then there was a hint of regret, saying: "Unfortunately, in the college entrance examination, I cannot leave the field early, otherwise, it would be nice to see the other geniuses in action!"

"Today is really exciting! Hmph, yesterday's spotlight was all taken away by that guy named 'Jiang Fan'."

In Purple Star City, the black-clothed girl Ye Han was hiding in the crowd.

There was a glimmer of unwillingness in her eyes.

Originally, yesterday she scored 87 in his second subject!

On the same level as those four recognized super demons!

She was ranked in the top five in the province!

It could be said to be a hit!

After ten years of hibernation, a burst out!

However, no fame!

All the limelight was taken away by Jiang Fan..... who got a perfect score in both subjects!

Not many people had noticed Ye Han!

This made Ye Han very angry!

“A perfect score in both subjects is only two hundred!”

Ye Han thought to herself, and said, “Let’s give this guy the limelight on the first day. Today, it’s time for me to really make a name for myself! Wang Weiwei, Ma Ya, and those who used to look down on me will all see what a peerless genius, super demon I am! All of them will be trampled under my feet, Ye Han, one by one! This overall first prize of the college entrance exam is mine!”

.....

“All candidates, get ready, the teleportation is starting.”

As the ethereal voice fell, on the huge college entrance examination square, the black mass of hundreds of thousands of candidates, immediately disappeared.

Jiang Fan also saw a blur and came to the same examination room as yesterday!

In the layout of the examination room today, there was only one chair and a table.

There was also a clock in the front!

There was still nothing around!

He couldn’t tell the difference between east, west, north and south.

Jiang Fan tried out the connection between himself and Blue Star but it was still disconnected.

Time went by little by little!

“Ten, nine, eight, seven, six, five.....”

Some people meditated in their minds.

Nine o’clock was coming!

The ethereal voice sounded very punctually in the ears of each candidate:

“The exam has officially started, and today is the fourth and final exam! This subject will be a practical test for each candidate. Each candidate is requested to make appropriate preparations for their respective planet in accordance with the requirements mentioned next.”

At this time, Jiang Fan discovered that the connection between himself and Blue Star was reconnected!

This was not surprising.

For practical examination, naturally, each planet master was required to operate on their own planet!

“Each candidate, please adjust their respective planet’s time flow rate to the most appropriate multiple, and the examination will begin exactly ten minutes after the end of this notification. In front of you, a countdown will appear! After the test begins, no time flow adjustments will be allowed!”

As the words fell, there was a ten minute countdown in front of each candidate.

Everyone was nervous to start making adjustments to the time flow rate to their respective planets.

Their planet was awakened three months ago.

Since the planet was not as fragile as it was at the beginning, appropriate time acceleration was possible.

This point, during regular school classes, their teachers certainly taught this and it was still the key content.

Everyone was relatively skilled in this.

Jiang Fan checked out the situation of the Blue Star.

After calculating the time, he didn’t make any changes.

There was no need for that.

Other candidates were also operating one by one, and it was done soon.

Of course, there were also students who didn’t usually take long.

They were adjusting impatiently!

While many candidates were nervously waiting for the practical test.

Outside the examination room, one place after another, the real-time live broadcast of the practical test of the college entrance examination had begun!

Of course, this was not open to the public.

Instead, there were only a few institutions such as each school, the city lord’s office of each city, and the planet association.

They could only see the screen of the candidates!
