

One Planet 241

Chapter 241: Operation Fish Fry! Capture the golden fish people's king alive!

"Ha ha ha."

.

"Here it comes, here it comes, the most terrifying racial skill of the golden fish people is here!"

In City Lord's Mansion Hall, everyone saw the candidate's planets being submerged by the sudden flood.

There was a lot of laughter from all the big guys.

They were happy as hell!

The golden fish people were like fishes.

Naturally, they lived in water.

How could they fight anyone on land?

That was not going to happen.

They directly drew waves of water..

"This is the talent that only golden fish people have among all the fish people's races. They can summon tides!"

An admissions teacher smiled and said, "No matter where you are, you will be able to make the place turn into a swamp of water for a short time!"

"Generally speaking, the greater the number of golden fish people, the greater the tide summoned." Another teacher picked up, "It looks like the number of these golden fish people is at least a thousand!!!"

"It should be around 1,500.!"

A powerful planet master nodded and said, "It can trigger the tides for a long time, so these candidates can't even think about delaying time and let these floods dissipate and will try to find a way to solve it as soon as possible."

"The farther back you go, the more the water level will be!"

In fact, examinees also discovered this more or less.

On the planet, the tide summoned by the golden fish people was increasing with time.

It was getting bigger!

There was the key point for these summoned waters.

The golden fish people would also perform preliminary manipulation.

Like..... directions and shapes and more!

The water was only in front of their position!

It won't flow to other places.

Like the position of the Great Desolate Army.

Outside the huge city walls, the big-headed fish people had triggered the water that had crossed the 400-meter cordon!

It came to the bottom of the city wall.

In the beginning, it was still less than a meter high?but with the passage of time, it was getting higher!

A large-headed fish people?of huge size was skating like crazy on the water!

It was a thrill to watch.

Bang! Bang! Bang!.....

The Great Desolate Army naturally could not sit back and wait for death.

As the big-headed fish people?slid over,?they just started aiming and shooting, but as expected by a group of scholars, these large-headed fish people were physically very strong.

They had?a thick layer of fat.

The bullet got stuck in the middle of the fat whenever it hit the?large-headed fish.

The damage was done?but it was not fatal.

In addition, the key thing was?that these big-headed fish people, who looked like burly, big animals, were also quite intelligent.

Under the command of a large-headed fish?behind them, they instantly went into the water?after being hit by a bullet!

Now the Great Desolate Army was helpless?because the bullets went into the water, after a short distance, the speed would drop sharply because of the resistance of?the water!

There was not much power left at all.

Seeing this scene, many soldiers?of the Great Desolate Army couldn't help but curse secretly.

Everyone saw that?this defensive battle was tricky?as compared to the previous two waves.

It completely increased several difficulties.

But on an individual basis, these big-headed fish people were much more powerful.

It was an advanced civilization race!

The most important thing was..... they had such terrifying talents!

They were actually able to summon a tidal wave over.

Turning this location into a large lake was very difficult for the Great Desolate Army.

The big-headed fish people hid under the water?so the bullets couldn't handle them at all.

The effect of the shells also amounted to almost nothing!

The Great Desolate Army was still good.

At least, there was still a tall city wall thirty meters high.

The big-headed fish people could not climb up for a while!

For some of the candidates, it was a disaster?because there were no city walls.

The race created by itself was also restrained by water!

For example, Lu Tao, the chief genius of No. 2 Middle School,?once fought with Jiang Fan in the Jiangcheng Grand Competition.

His creation was also an advanced civilization race:

The Rock People!

The rocks were very resistant.

The Great Desolate Army also spent a lot of effort at that time.

Only then was it defeated.

But the Rock people also had weaknesses.

Their figure was bulky.

They were not much afraid of fire?but were very afraid of water, especially the big waves.

After the water flooded over, those slow-moving Rock People didn't have time to escape to a higher place.

They were directly flooded.

Next.....

Naturally, it was a one-sided massacre!

Rock people's resistance was higher, but?it was not much use in the water.

It was like the man who fell into the water, completely immobilized.

There was no resistance.

Being attacked like a target by the big-headed fish people.

Each big-headed fish man was holding a huge trident of the sea king!

They would keep hitting the rock monster hard!

A?moment later, cracks would?knock out of one rock monster after another!

After that, their entire body would definitely be broken!

Seeing this scene, Lu Tao sighed helplessly.

He could only opt out!

In order to reduce the losses of the rock people that he had worked so hard to cultivate.

Anyway, he met his mortal enemy.

No matter how much he struggled, it would be a waste of time.

There was no point.

So far, the chief candidate of the second school.

The highly anticipated genius Lu Tao of the leaders and teachers of No. 2 Middle School stopped in the third wave!

It was not just Lu Tao, some geniuses who were usually quite famous also stopped.

It was also because of racial restraint.

That they opted out of the stage of the college entrance examination.

The rest of the candidates continued to hold on.

One by one, the races they created were moved to higher places.

Naturally, there were not many students.

Who would be confident enough to fight with golden fish people in the water!

But with the talents of over a thousand golden fish people stacked on top of each other.

From beyond the passage, the water poured in more and more.

The water level was getting higher!

The golden fish people were not in a hurry at all.

They were hidden inside the water, waiting for when the water level would approach the enemy!

Soon, at Tang Qingqing's location, the water level came to the feet of a Dou Qi warrior.

Under Tang Qingqing's command, eight hundred Dou Qi warriors had already formed a defensive formation.

They were waiting for these golden fish people to attack!

The legion of magicians even started chanting long ago!

This time, it was not a fireball spell that was used.

Instead, they used ice magic!

Fireball was naturally not feasible against water-based transcendent creatures.

Ice was the most effective!

Bang!

There was a loud sound.

A golden fish person rushed up, holding his Trident.

And he slapped it down hard.

The first Dou Qi warrior's energy shield was knocked to pieces.

Seeing this scene, Tang Qingqing's heart trembled.

She immediately ordered the people behind to switch to defense!

This golden fish man's combat power was clearly beyond her prediction.

Dou Qi warriors actually could barely block even one blow from the other side.

And on another planet.

Jiang Fan's opponent in the group stage.

The pretentious Fang Yan.

Chapter 242: Operation Fish Fry! Capture the golden fish people's king alive!

The pretentious Fang Yan was commanding the battle between the snake people and the golden fish people below!

Both races were gliding with their tails.

Serpents could fight in the water, therefore Fang Yan made a wrong decision.

He let the snake people and the golden fish people fight inside the water!

Although her clan could fight in water, it was not on the same level as the golden fish people who were experts in water warfare!

Immediately she just got knocked out with a crushing defeat.

Even the petrification of the snake people had not yet played out.

They were just beaten up one by one.

"No, no, I can't fall here"

Fang Yan clenched her fists tightly.

Her nails sank into the muscles but in the end, there was no choice but to quit!

She was eliminated from the game!

With the passage of time, more and more candidates were choosing to concede defeat.

That scene exited everyone in the examination space.

Not to mention those ordinary candidates who were lucky enough to pass the first two waves, even for geniuses like Lu Tao and Fang Yan, it was also unavoidable!

None of the remaining candidates had an easy time.

In the first two waves, the candidates who ranked at the top passed under the crushing strength but this time, unfortunately, it was water warfare!

It was like if you are not careful, you will roll over.

Each one was struggling to figure out how to defeat these big-headed fish people.

The golden fish people themselves were almost no natural enemies either.

Even if there were candidates who had cultivated water-based transcendent races, it was also difficult to be the opponent of the golden fish people!.

For the Great Desolate Army, this battle couldn't be more trickier.

The golden fish people were more powerful than anyone expected.

However, it was not completely off the original strategy!

Before the glory conquest, Ghost Buster and a group of strategists developed more than a hundred strategies?for every possible scenario!

Water-based transcendent creatures were?relatively rare?but the Great Desolate Army was still prepared for it!

“Let me command this battle.”

Looking at the rising water level, Lu Sun?stood up!

.

Chang Yu Chun had nothing to consider, so he nodded in agreement.

Lu Sun was among the great generals.

He was the only one who surrendered from Jiangdong.

Since childhood, he had lived near water.

He was the commander of the Jiangdong navy?and had rich experience in water combat.

He was also one of the current five generals.

He was the only one who could command a water battle.

Chang Yu Chun and Xu Tiande from the north?couldn't even swim, not to mention commanding water battles.

Lu Sun replaced Han Qinhu who was originally in this wave.

The only commander!

“Activate the backup plan and start the water warfare mode!”

As soon as Lu Sun came up, he just gave the direct order.

Immediately, a?soldier took the order and went!

Logistics team in the rear?were?also busy and nervous in action.

Boom!

A huge wave slapped over!

The first batch of large-headed fish people rushed over.

They were rushing under the huge walls!

They did not recklessly jump up from the water to attack but?they continued to move forward.

They were hiding under the surface of the water.

Suddenly.....

Boom! Boom! Boom!.....

Beneath the city walls a dull sound could be heard.

“They’re banging on the gates!”

A scholar shouted.

It was not solid?and there was also a gate for entering and leaving!

The door of the city gate was made of iron?but it was not thick.

Nor was it especially?made.

It was not like any of these big-headed fish people were stupid.

After seeing the door, they would naturally take a?shortcut route to attack in.

As the pounding continued, the dull sound took?on more of a cracking motion!

Lu Sun, on the other hand, quietly watched the big-headed fish people’s move.

Soldiers were not allowed to fire to destroy.

After a while, there was a click sound.

The city gate cracked open!

A large-headed fish man with a sea king trident, knocked hard twice.

It knocked?a hole directly out of the city gate!

Claptrap.....

The water instantly gushed in?but a group of big-headed fishermen were very alert.

They didn’t go in immediately.

They waited for the large group behind them.

The water rushed into the entrance of the city.

However, there was another gate behind it.

That?was the rear city gate.

It was still blocked out.

“Damn it!”

First a large-headed fish man cursed angrily in the language of the fish people.

After that it charged?up with the other fish men?and continued?towards this rear gate.

Then they spreaded out and knocked madly!

Boom! Boom! Boom!

A series of terrifying sounds rang out.

After that the big team of big-headed fish?people?finally?reached there, with an even bigger fish man!

His size was larger than that of a normal big-headed fish man.

It was nearly twice as big, including the trident of the sea king held in his hand!

Golden color on his forehead was also more intense!

“This must be the leader of these big-headed fish people, right?”

A scholar asked.

“It should be. It?looks very experienced in combat.” Another scholar said with a stony face.

Roar!

A loud voice rang out, the big-headed fish-man leader raised the trident of the sea king.

There was a thunderous sound.

They were roaring madly!

In the next moment, all of them turned into water surfers?and they quickly rushed over!

“Attention to all. Follow?the plan!”

Lu Sun still ordered calmly and coolly.

There was no change in his expression!

With the speed of the big-headed fish?people, soon?all of them rushed under the huge city wall.

Boom! Boom! Boom!

The vanguard large-headed fish men were still pounding on the rear gates.

Finally, under the continuous gravity beating, the rear city gate was also knocked open.

The water instantly gushed in.

Roar!

The big-headed fish people’s leader glanced at the Great Desolate Army on the city wall with a pair of huge fish eyes?and again raised the Sea King’s Trident.

They were letting out a roar of anger.

The other big-headed fish?people?were visibly excited.

All of them were carrying the Sea King’s Trident.

They followed the entrance to the city?and swiftly rushed in, one after another.

Even the leader of the big-headed fish men was the same.

Seeing this scene, a?faint smile suddenly appeared on Lu Sun’s face!

The city gate was wide enough.

It was enough to accommodate several large-headed fish men at the same time.

The speed of the big-headed fish people in the water was extremely scary.

Not long after, one thousand and five hundred large-headed fish?people?rushed into the city walls.

This was only the first wall!

Behind a hundred meters, there was an even taller wall!

Yes.

During the preparation period of nearly ten years, Yan naturally couldn't have built only this thirty meter wall.

This was only the outermost one!

The real city wall was this second one!

It was taller and thicker!

It was 50 meters high!

There were two more walls on both sides.

Together with these front and back walls, it was surrounded by a narrow rectangular urn!

The big-headed fish men could never have imagined that the Great Desolate Army would have such a trick!

Chapter 243: Operation Fish Fry! Capture the golden fish people's king alive!

Seeing that the city gate broke, big headed fish people headed into the water and charged forward!

It was very exciting.

After they got inside, they?discovered?the second wall.

How the fuck was there another, taller wall!

At this time, the big-headed fish people only had some doubts in their eyes.

The big-headed fish people's leader was even more careless!

He yelled out.

He was commanding the big-headed fish?people?under his hand?and?continued to charge forward!

The target was the very gate of the front wall!

A crowd of big-headed fish?people?pounced on them.

They raised the Sea King Trident in their hand?and hit?it hard.

However, this time, the second?city gate was not that easy to break.

This was all made of star meteorite iron.

The degree reached a whole level!

If not star meteorite iron, ordinary iron was also difficult to make.

Dozens of large-headed fish men?took turns.

Heavy hitting in turns!

They were exerting all their strength.

They were frantically pounding on this one meter thick gate!

The boom-boom kept ringing!

“This..... should not be able to break, right?”

A young scholar asked with some concern.

“Don’t worry.”

An old scholar next to him smiled slightly and said, “Give these big-headed fish people three more days, and they still won’t be able to break it!”

Yes.

This city gate did not just have star meteorite iron,?a portion of the vibranium was also added!

The quality was very reinforced!

The Great desolate Army had also done experiments.

In the ears of the many scholars and generals who participated in that experiment, the knocking sound of a large-headed fish man sounded.

It was as if they were scraping the bottom of the barrel!

Above and below the walls, a?ridiculous scene unfolded at this time!

Tens of thousands of soldiers of the Great Desolate Army quietly watched the dozens of golden fish people.

They seemed to be enjoying them scraping the bottom of the barrel!

This scene was very creepy,?except for the sound of splashing.

It’s “Boom! Boom! Boom!” The dull thumping sound!

Gradually, the big-headed fish people’s leader also began to notice something wrong!

He called out?and commanded a hundred large-headed fish men beside him to exit.

However,?at this time, Lu Sun spoke up and said, “Close the gates!”

Rumble!

A thick rear city gate fell down.

This was the back gate of the front wall!

It was also a full half meter thick!

It was also made of star meteorite iron and vibranium.

It could have fallen a long time ago?but?at that?time Lu Sun ordered, for the sake of killing!

Destroy the morale of the big-headed fish people.

As expected, after seeing the sudden fall of this city gate, a?hint of panic appeared in the eyes of a group of fish people!

They realized that these ordinary people seemed to be prepared.

They were just waiting for them to be fooled.

At that time, they really got caught in the trap and became a turtle in a jar!

They were surrounded by tall walls!

Both gates were difficult to break.

There was no longer a way to go back.

This was also a backup tactic for the Great Desolate Army?while facing a powerful enemy.

There was no frontal resistance.

Instead, it was trapped into the middle of the inner wall.

They were conducting a closed-door fight!

Roar!

The leader of the big-headed fish?people?looked?up at the sky.

He was shouting in anger!

Immediately, everyone in the Great Desolate Army saw that?the water level outside had risen a lot!

It had risen to a height of seven or eight meters.

It was still going up!

“Will it rise up to the walls?”

Chang Yu Chun asked a scholar who specialized in aquatic biology.

“That’s hard to say.”

This scholar observed the water level inside and outside the walls and said, “Let’s see how much strength these big-headed fish people?still have left, judging from what just happened.”

“Attracting large waters seems to be depleting their power, it can’t be endless!”

“But it is difficult to estimate exactly how much water can be attracted. We?have to be prepared for the worst!”

“But one thing is certain!”

“In a short period of time, the water level cannot rise too fast.”

“All of you, pay attention. Begin the attack. Kill these large-headed fish men in the urn as soon as possible!”

At this time, Lu Sun ordered.

No one else objected!

Lu Sun was also very cautious!

He was not giving these big-headed fish men a chance!

Before the water level rose completely, he was?prepared to take out the big-headed fish man in this urn first!

They were enclosed in the inner wall at that?time?but inside the water, how to kill these powerful big-headed fish men?

“Pumping machines ready!”

Lu Sun shouted.

Immediately, a?huge pumping machine stretched out a pipe mouth.

These pumping machines were still currently using steam engines?but the steam engine in the Xia Kingdom had reached a pinnacle!

Others were hard to say?but there was nothing wrong with using it to pump water.

After seeing that the fish people were?able to summon great waters.

The logistics people had already put a huge pumping machine in the water.

They pushed from the warehouse.

It was placed on the inner wall of the urn.

A very large diameter water pipe was released from the wall, reaching into the water.

The pumping machine started.

The loud sound rang out.

Instead, the big-headed fish men in the vicinity were startled!

They thought that this was some kind of scary war weapon!

One by one, they were scared away.

Boom boom boom!

As the pumping machine started.

The flow of water?pumped up along the pipe!

At this time, because of the inner city gate, the water outside could only seep in a little.

The water level inside the inner wall was less than two meters high!

The Great Desolate Army at once deployed fifty pumping machines!

For a variety of possible opponents to be encountered, the Great Desolate Army was well prepared in all aspects!

The big-headed fish people inside the water started to discover that the water under them was decreasing little by little!

These big-headed fish men were not fools.

Soon!

They just noticed.

The water was all sucked up by those dozens of large diameter pipes!

Roar!

The big-headed fish people's leader let out a loud roar!

Immediately, several hundred large-headed fishermen lunged toward these pipes.

They raised the trident of the sea king and were prepared to chop the pipe off!

For the first time, in the huge fish eyes of the big-headed fish people's leader, a hint of unease was revealed.

It felt like an accident.

Today, he was going to fall down here.

So, the big-headed fish people's leader personally dispatched.

He was waving the large Sea King Trident in his hand.

He came to the inner city gate.

He started hitting hard!

"Stop them!"

Lu Sun immediately ordered.

The 10,000 soldiers of the Great Desolate Army were prepared early on.

Bullets and cannonballs were poured out crazily, straight down on these big-headed fish people who were rushing towards the pipe!

No need to kill, just block and delay!

"General Lu, can we capture this big-headed fish-man leader alive later?" The leader of the research team glanced at the big-headed fish-man leader below and asked.

This was the strongest transcendent individual the Great Desolate Army had ever encountered since the Glory conquest!

"You can!"

Lu Sun's answer was simple.

Capturing the transcendents alive was the fine tradition of the Great Desolate Army.

Even the golden fish people were no exception!!!

Chapter 244: Destruction! Amazing harvest! Terror is coming!

In fact, the Great Desolate Army could also use the way to open the gates of the inner city wall?to let the water level drop.

The only problem was?that?the inner city wall was the last wall.

There was no third wall behind it.

Behind the inner city walls, there?was the warehouse and logistics department.

There were also a lot of logistics staff.

Naturally, Lu Sun couldn't risk it!

Seeing the water level lowering little by little, one thousand five hundred big-headed fish men were anxious.

The big-headed fish?people's?leader led a part of his clan and frantically pounded on the fallen gate?and the rest of the other big-headed fish people rushed to the fifty water pipes!

The Great Desolate Army was also on fire.

Ten thousand soldiers of the Great Desolate Army fired wildly with dozens of artillery.

The cannonballs didn't stop!

It kept landing on the big-headed fish people?because the water pipes were?located right at the edge of the water.

So!

These large-headed fish?people?must float on the surface to make a move.

Naturally, they had to suffer a barrage of bullets and shells!

Boom!

A big-headed fish man was hit in the brain!

His sturdy body also staggered.

It almost sank?in the water!

"The bullets are still working."

This scene cheered up the scholars!

The lethality of the alloy bullets that were made of star meteorite iron with vibranium was not comparable to ordinary bullets.

If it was an ordinary bullet,?it?would?just be a tickle for the big-headed fish people.

Boom!

A cannonball flew over.

As?the big-headed fish people were too dense, they were blasted directly by this shell!

Their backs became?gray and black!

In the air, there was a smell of burnt fish!

Under the frantic firing of the Great Desolate Army, a large-headed fish man was hit by dozens of bullets in a row.

It was affected by the power of a cannonball again.

His sturdy body shook slightly.

He couldn't hold it up any longer.

The huge fish head fell into the water!

First fish man was killed since this battle started.

Over time, more and more fish people were injured or killed but as it was in the water, the accuracy of artillery shells and bullets was also an issue.

It was not possible to hit them all.

More and more big-headed fish men were also closing in on the lower side of the fifty pumping pipes!

Witnessing this scene, Lu Sun still did not panic.

He said calmly: "The projectile, throw the bombs!"

On the city walls, large baskets had been placed.

There were small cannonballs of the size of a fist inside the buckets!

Jiang Fan observed curiously for a few moments.

It looked very similar to the hand grenades of the previous life.

It was called here: hand-thrown bullets because it was parabolic.

So it could only be used at close range.

Soldiers on the city walls reached out, grabbed a hand-thrown bullet and threw it at the big-headed fish people approaching below!

There was a boom.

The hand-thrown bullet hit the big-headed fish man and detonated directly!

He was fried head over heels!

A big-headed fish man was blown straight over!

Snow-white fish meat overturned on the surface of the water!

Big-headed fish people weren't stupid either.

A threat from the walls was immediately spotted.

They immediately held the Sea King Trident high and waved it vigorously in the air.

Most of the hand thrown bullets that were thrown down were blocked away but there were still a few that went through the Sea king Trident.

It was thrown at a large-headed fish?people.

A few more were blown up!

“Huh?”

Lu Sun suddenly saw that.

A few more big-headed fish men?drilled into the water?and scampered directly to the location of the water pipe!

These few big-headed fish people?were clearly the more intelligent of the races.

They were using the watery ground to fend off hand-thrown bullets and the Great Desolate Army’s attacks!

Himself, he quietly touched the city walls,?raised the trident of the sea king?and forked upwards from the water!

They were trying to break these water pipes!

It was just that?these water pipes were also specially made!

Those were made from an alloy of star meteorite iron and vibranium!

The power of the trident that was poking out from inside the water was obviously much weaker.

Several large-headed fish men in the water forked several times in succession?but none of them?were able to break the water pipe!

These big-headed fish?people?were anxious!

A large-headed fish?man’s stubby fish tail swept away.

Surprisingly, it sprang directly from the water, wielding the trident of the sea king?and stabbed hard at the water pipe like a wolf.

How could the soldiers of the Great Desolate Army let it get away so easily?

On the city walls, countless hand thrown bullets were thrown!

It landed straight on this big-headed fish man.

That?big-headed fish man was brave. Surprisingly, he ignored these hand-thrown bombs.

The sea king trident in his hand did not block hand-thrown bullets.

He frantically slapped the water pipe.

Although it was the most powerful and wise one among the big-headed fish people, he still underestimated the power of hand-thrown bullets.

Boom! Boom! Boom!

Dozens of hand-thrown bullets fell.

It caused a series of explosions.

After the smoke dissipated, everyone looked over and discovered?that this one big-headed fish man’s meat had turned white.

Other parts were charred and black.

The smell of grilled fish emanating from it was very strong.

He was dead as a door nail!

Bang! Bang! Bang!

At the same time.

The leader of the big-headed fish men?was crazily pounding on the back gate of the first city wall? with dozens of fish men.

After countless bombardments, he still didn't give this gate.....

This was also Lu Sun's strategy.

Inside the city gates, there were two front city gates and two rear city gates each.

Both of them could be controlled by?a switch!

The first one was made of ordinary iron.

Its?thickness was also average.

The second was the one that the big head fish people were facing now.

It was very thick.

Even if it was?bombarded with cannons, it wouldn't break!

Boom, boom, boom.....

The hordes of big-headed fish men in the rear were still frantically attacking the pumping pipes!

Under this kind of desperate attack, the?water pipes were?transformed by being knocked by the Trident of the sea king!

The force of pumping was instantly reduced a lot.

This made all the big-headed fish people feel very excited.

The water level underneath their bodies?was diminishing more and more!

Roar! Roar! Roar!

A large-headed fish man led the way.

Immediately, all the big-headed fish men roared in anger.

They were bursting out with more speed and power than usual!

.

They were crazy as hell!

They lashed?out at the water pipe!

In addition, there was also cooperation.

Some big-headed fish men were using their Sea King tridents to block shells and hand-thrown bullets!

Chapter 245: Destruction! Amazing harvest! Terror is coming!

Some other big-headed fish men were attacking the water pipes!

“These big-headed fish men have launched a general attack!”

.

The research team’s leader said solemnly.

“Fight as normal, don’t mess up!”

Looking at the slightly impulsive soldiers of the Great Desolate Army, Lu Sun immediately ordered.

This was what made Lu Sun different from other generals.

With a touch of scholarly elegance, even at any moment in time, he was extremely calm!

There would be no hot-blooded performance.

If he was replaced by Han Qinhu at that time, it would be inevitable to shout out and let the soldiers follow suit!

In Lu Sun’s opinion, there was no need for that.

These big-headed fish people were already trapped!

Finally, under the frantic onslaught of thousands of large-headed fish people, more than a dozen water pipes were deformed or directly cracked!

However, those big-headed fish people suffered extremely heavy casualties for this purpose!

The group of big-headed fish people who took cover were blown out of shape.

Their whole body was charred and black!

Inside and outside the city walls, there was a strong smell of grilled fish!

“It tastes better with some spice.”

Jiang Fan couldn’t help but mutter to himself.

The big-headed fish people who were killed and injured by the blasts.

With a quick glance, there were at least a few hundred of them!

The vast majority fell under the hand-thrown bullets.

Within close range, the accuracy of the projectile was still stronger than that of the cannonball!

The power was also good.

A bunch of big-headed fish people suffered because of this.

The remaining big-headed fish people were still excited.

They had taken care of about a dozen of the pumping pipes.

What’s left!

Just get another half done.

That's pretty much it!

With a roar of anger, a bunch of big-headed fish people headed for the other water pipes!

It was still the same tactics as before.

A portion of the large-headed fish people were covering the top.

A portion of the large-headed fish people were attacking the water pipes with all their might.

Bang! Bang! Bang!

The big-headed fisherman wielded the sea king trident and pounded hard on the water pipe!

Boom! Boom! Boom!

The shells and hand-thrown bullets fell without mercy.

The big-headed fish people kept falling down!

Finally, another dozen or so water pipes were knocked out of service.

Nearly a hundred or more big-headed fish people were also blown up and killed!

Roar!

After seeing that their purpose was initially achieved, a large-headed fish man raised his Sea King trident and roared!

The other big-headed fish people wanted to join too but in the next moment, they felt that something was wrong.

When they were attacking the water pipes, a lot of water was pumped up.

Now underneath their bodies, the water level was down to less than a meter!

There were only about twenty water pipes left, plus there was interference from the big-headed fish people.

It was not so good anymore.

Relying on that water, the damage of bullets and shells to the remaining big-headed fish people would still be greatly reduced.

Lu Sun decisively ordered, "The pumping is over. Now use the sandbags!"

Above the city walls, bags of sand had been ready for a long time.

After just deciding to lure the big-headed fish people in to fight on the inner wall.

It had been brought up by the logistics staff.

It was not just the soldiers of the Great Desolate Army.

The logistics staff also worked together and threw down lots of sandbags!

There was a large rock thrower in the back!

This kind of rock thrower had long been eliminated in the era of Han?but at that time, in response to the glory conquest, they temporarily set up several more!

Of course, the performance of the new stone thrower was much, much better and not at all on the same level?as compared to the previous traditional stone thrower.

On the stone thrower, a?big bag was packed.

This bag contained dozens of sandbags.

It was able to throw dozens of sandbags at once!

On the surrounding walls, there were?stone throwers.

There were also soldiers and logistic staff!

Even the scholars and generals watching the battle from the sidelines followed suit.

They were quickly throwing down sandbags!

At the beginning, the big-headed fish people still looked confused.

They didn't know what this was.

Later, they saw that the sandbags increased, and the water was covered.

They also reacted.

And were super furious.

They raised their sea king's trident and stabbed at these sandbags!

It?was just that?the sandbags were not cannonballs.

After being stabbed, what came out of it was sand.

It had no effect at all!

Time passed little by little.

Inside the inner walls.

The number of sandbags was increasing.

It was gradually filling up the water level of less than a meter!

The big-headed fish people were incompetent and furious!

They were not sure what to do at all.

All they could do was raise their trident!

Finally!

The one-meter water level was completely covered by sandbags!

At that?time, there were hundreds of big-headed fish people left.

Each one of them shrunk under the sandbag.

Their lower bodies?were in the?water.

They were still more accustomed to living in the water.

The leader of the big-headed fish people also gave up on banging the inner city gate.

A few of his own guards hunkered down in the corner of the city gate.

This was because of the infiltration of water from outside.

There was more water!

“General attack!”

Seeing that the time had come, Lu Sun gave the order!

Tens of thousands of soldiers of the Great Desolate Army aimed dozens of artillery at the big-headed fish people below.

Bullets and artillery fire burst out!

In the operation of just breaking the water pipe, out of the one thousand five hundred large-headed fish men, more than 500 had been killed or injured.

There were almost nine hundred of them left.

Many of them still had burned black marks on them!

In front of the continuous firing of shells, a group of big-headed fish people still raised their Sea King Trident to block but the biggest difference was that the big-headed fish people were now stuck between the sandbags.

They were completely unable to slide freely.

Their huge bodies were more like a giant maggot!

At that time, they became a living target!

Puff! Puff! Puff!

Boom! Boom! Boom!

Artillery shells, bullets, and hand-thrown bullets kept falling.

Most of them fell on these big-headed fish people who couldn't move an inch.

The explosions were continuous!

Inside the inner wall, there was a cloud of smoke!

Immediately after that, there was an unprecedented strong smell of grilled fish!

Roar!

A large-headed fish man could not stand it any longer.

He climbed straight out from the sandbags and raised the trident of the sea king.

Unfortunately, there was no more water and their speed was slower than ordinary people.

His thick fishtail twisted and turned.

A cannonball fell down on him, and he directly blew away!

After getting there, everyone finally breathed a sigh of relief.

This battle had been decided!

Jiang Fan also relaxed his spirit.

Chapter 246: Destruction! Amazing harvest! Terror is coming!

Next, there was no suspense!

The big-headed fish people were all blown up, or hit by hundreds of bullets on the slope.

After half an hour, out of almost nine hundred large-headed fish people, more than 800 were wiped out inside the inner wall.

Only a few dozen were left there.

They were hiding under the city walls.

“Capture ten of them alive, including the big-headed fish people leader, and shoot the rest!” Lu Sun gave the last order!

They were on a wide field and there was plenty of room for dozens of large-headed fish men to move around but their speed was too slow.

They kept falling down one after one!

In the end, only the underside of the city wall was left.

The golden fish people king and the ten or so personal guards around him were obviously more massive than their counterparts but without water, they were also more bulky!

The Great Desolate Army was not in a hurry.

No artillery were used this time.

Instead, a series of hand-thrown bullets were thrown down.

These dozen or so big-headed fish people were fried to a crisp by that!

The Golden Fish man King was the focus of everyone’s attack!

Bullets and hand-thrown bullets kept coming at it!

The Golden Fish man King was completely blown away.

The smell of roasting also emerged from his body.

Followed by, a huge fishing net fell from above.

It fell on these big-headed fish men.

This was also a special fishing net made of Star Vibranium alloy!

It was very sturdy!

These big-headed fish people couldn’t break free once they were intact.

Not to mention the current situation of dying, covered by a special fishing net, the Golden fish man king wielded his trident and struck it a few times and saw that it was useless.

He also gave up the last struggle!

And the side of the Great Desolate Army was still very cautious.

The last “killer” was sent out:

Anesthesia!

The development of medicine over the years was not ignored.

Anesthetics had long been invented.

The idea of the tranquilizer gun had long been proposed.

In the past few years, it was initially manufactured.

Puff! Puff! Puff!

A dozen shots went down.

The golden fish-man king could no longer support it.

After ten minutes, his huge body collapsed with a bang!

The other big-headed fish men also could not escape being anesthetized.

“It’s over.”

Seeing this scene, all the people of the Great Desolate Army breathed a long sigh of relief!

This battle?was the toughest and most troublesome battle, since the start of the Glory conquest.

The Great Desolate Army was forced to use a very large number of tactics and weapons!

At the same time, on planets of other candidates.

Some of them had already defeated the golden fish people?while others were still trying to resist!

Tang Qingqing’s army of magicians?revealed big fireballs?and bombarded the golden fish people who were frozen in ice.

They blasted the golden fish people to pieces!

This was the strategy used by Tang Qingqing. First, she?used ice magic?to freeze the Golden Fish people, then?she?used the fireball spell.

One by one, they were blown away.

Although this tactic was a bit clunky,?it was still quite effective.

After a long attack, all the golden fish people were finally wiped out!

Tang Qingqing let out a long breath of relief.

This battle was really too tough.

A single mistake?and the whole situation would be turned over.

But Dou Qi warriors and magicians suffered heavy casualties!

Other geniuses were also using extreme efforts to pass this level one by one?but there were still some geniuses?who couldn't stop the golden fish people's attack.

Their position was breached!

One by one, their Transcendents were taken out by the Golden Fish People!

In the end, they had no choice but to quit!

Finally, after an unknown period, all candidates were done fighting!

The ethereal prompt sounded, "The third wave of Transcendental Invasion is over. Please?take a short break. The?next round will start in ten minutes!"

Hearing this prompt?all the remaining candidates breathed a sigh of relief?but they started to feel a little tired!

The third wave was so damn hard?but they were still lucky.

In this wave, another large number of candidates were eliminated!

Among them, there was also no shortage of geniuses ranked in the heavenly pride list!

On the college entrance examination square, Lu Tao and Wang Tianyi from Jin Yao Middle School got together.

Looking at the list in the sky?both of them couldn't help but sigh!

"Failed."

Wang Tianyi Junyi's face was full of disappointment, no matter how free and easy he usually was.

But on this most important stage,?his performance was poor.

Anyone would be disappointed and frustrated!

"Our Jiangcheng ranked in the top ten, this round eliminated half, and only a few people like Bu Jingyue, Tang Qingqing and Jiang Fan are left."

Lu Tao shook his head and lamented.

"Huh? Fang Zhenting is still there!"

Wang Tianyi looked at the list in the sky?and found a familiar name.

"Yeah, this kid got lucky."

Lu Tao smiled.

A hint of envy flashed in his eyes!

With every additional wave, that's a whole 50 points more!

It was possible to jump hundreds of thousands of places in the rankings!

The universities you could apply to were also a notch up!

"Forget it, forget it."

Wang Tianyi made a slight edit and said: “This year is so difficult, and there is no way to do it. At least we still have a university to go to.”

“Let’s take a look at the performance of these geniuses, and see how they are better than us?”

There was a trace of unwillingness in Wang Tianyi’s tone!

As a genius, he had been a star holding the moon since he was a child.

No one would think that they were inferior to others!

“Take a look.”

Lu Tao raised his head and looked for a candidate he knew.

“Bu Jing Yue and Tang Qing Qing’s ranking is really high. They?actually both ranked in the top one thousand.”

While watching, Lu Tao said, “Huh? Jiang Fan’s ranking.....”

At the same time, Jiang Fan was also watching and following his own ranking?but it was only a glance.

.....

Outside, the big guys didn’t pay much attention to rankings.

Their focus was on the remaining candidates!

“This wave eliminated too many ordinary geniuses, and even several of the demons on the Heavenly Pride List are gone.”

A planet master smiled and said, “I guess there aren’t many candidates left now!”

“There should be less than 100,000 people left! So.....”

Another planet master nodded and said, “The next fourth wave is the real showdown!!!”

“In this wave, a lot of geniuses will also fall in large numbers!!!”

Chapter 247: Meteor Tactics! Shocked planet masters!

Numerous planet masters were aware of this.

In accordance with the practice of the previous year’s college entrance examination, the fourth wave would be an important watershed point!

In this wave, even if it’s the geniuses on the heavenly pride list, they would also fall one by one.

This was the wave that would distinguish the super demons from the ordinary demons?and this year’s difficulty was even greater!

The second wave was of the difficulty of the third wave in previous years!

Following this trend, if there were no accidents, the difficulty of the fourth wave would be the same as the fifth wave in previous years!

There would be an extremely terrifying transcendental race!

In other words, the decisive battle has begun!

“There should be no surprises. According to the nature of this year’s examiner, the fourth wave is definitely of super high difficulty. Maybe it will be very scary!” An admissions teacher said.

“In the first three waves, each one was more difficult than the last one. The golden fish people came out in the third round. There must be quite a few heavenly geniuses who fell in this round.” The leader of a powerful organization glanced at Projection and said.

“Ten thousand geniuses on the Heavenly pride list have fallen by several hundred in this wave.” Tang Yushu also smiled, “In previous years, not to mention the third wave, there wouldn’t be so many even in the fourth wave!”

Tang Yushu’s mood was very relaxed because Tang Qingqing played well in this wave.

Her ranking had improved to the top 500!

This made Tang Yushu see a lot of hope for a super-first-class university!

“There’s no way out.”

One of the recruitment teachers smiled and sighed, “The third round sent out a monster-class species like the Golden Fish People. They were able to trigger the tide and many geniuses were restrained. Either they were caught off guard or they were eliminated!”

“How many candidates are left in this round? Is there a million left?”

A planet master asked.

“One million? How is that possible?”

Another planet master shook his head and said, “I reckon there’s only half a million at most!”

“The statistics are out.”

A middle-aged executive said with a smiling face.

Immediately, everyone looked over.

This middle-aged supervisor was the one who received Jiang Fan at the Planet Association.

People called him supervisor Lan.

Since there were only rankings and grades in the entrance exam, all forces needed to mobilize the manpower to count to get the complete list of rankings.

The Planet Association was someone who specialized in this job.

Naturally, the results came out quickly!

Supervisor Lan projected the results up!

A list of names was instantly displayed!

First place: Qingqing Wei.

Second place: Wang Shan.

.....

Seeing this ranking, the crowd was not surprised.

A planet master nodded slightly and said, "The top ten still haven't changed."

"This also confirms the old saying that as long as you are strong enough, any test is just a change in form, it won't make much difference!" Another planet master laughed.

"Hmm? This wave actually eliminated so many people?"

Someone found the total number of names on the ranking.

It was still less than 300,000!

"Not even 300,000? Haha, it's a good thing I was born decades early and didn't have the chance to take this year's entrance exam."

"There are less than 300,000 left in the third wave, so after the fourth wave, it is estimated to be less than 100,000!"

"More than that, I don't think there will be even five figures after the fourth wave!"

"....."

One by one, the big boys were laughing and talking about it?with a lot of fun on their faces!

The more who were eliminated, the happier the crowd of bigwigs was.

It couldn't be helped, it was the evil taste of a powerful planet master!

Jiang Fan also saw his ranking:

Eight thousand eight hundred and eighty-one!

A full increase of one thousand.

"Again, it's the same as the Heavenly Pride List?"

Jiang Fan couldn't help complaining.

This high school ranking was the standard of the Heavenly pride list?

"Attention all candidates, the fourth wave of Transcendental Invasion will begin in one minute, please get ready!"

The ethereal prompt sounded!

On the contrary, their whole body was shaking!

It was like a reminder that the college entrance examination was about to end!

“Here it comes.”

“Here comes the fourth wave!”

“Haha, in this wave, a lot of geniuses on the Heavenly Pride List will be in danger, and there will definitely be a lot of people eliminated!”

“Hundreds of people were eliminated in the last wave, at least 1,000 people will be eliminated in this wave!” In the editorial room of the “Heavenly Pride News” branch in East Star City, a bunch of editors were watching excitedly.

A few editors were staring at Jiang Fan’s ranking.

Their faces were even more extremely expectant!

“In this wave, this Jiang Fan will probably go down!”

A few editors were somewhat gloating about it!

“I didn’t expect that the gap between actual combat assessments would be so big.”

In the conference room of the No. 7 middle school, the group of leaders and teachers were also a bit surprised when they looked at the ranking list.

“Bu Jing Yue ranked in the top 200, Tang Qingqing also entered the top 500. Although Jiang Fan’s ranking has also risen in this wave, it was mainly because hundreds of candidates from the Heavenly Ranking were eliminated.”

Teacher Liu Yue said.

“Ranked over 8,000!”

A school leader said, “That’s a little too much worse.”

“Don’t rush.”

But Tong Zhensheng pressed his hand and said, “This is only the third wave. Many candidates are still retaining their strength and not using it all!”

“Look at the fourth wave. The fourth wave is a watershed moment!”

“Yeah, the fourth wave should be of the same difficulty as the fifth wave in previous years.” Qiu Yunfei nodded and said, “Starting from this wave, the candidates who are at the bottom of the Heavenly pride list must do their best, otherwise, there is a danger of being eliminated!”

“What is the strength of each candidate? This round will make it very clear!”

One by one, the candidates were also waiting nervously.

One minute seemed particularly long at this time!

Finally, the ethereal prompt sounded again:

“The fourth wave of transcendental invasion officially begins! The countdown is ready!”

Jiang Fan’s consciousness probed into the Blue Star.

Ten seconds later, outside the Royal Tombs Mountains, the planet channel opened again.

Chapter 248: Meteor Tactics! Shocked planet masters!

This time, the aura coming from it was not too strong.

It was nothing special either, but everyone was more vigilant!

As the saying goes, “When something goes wrong, there must be a monster”!

In fact, transcendent species were able to control the aura of their bodies better.

It meant that they were at a higher level of civilization!

Naturally, they were more powerful!

With a flash of light, tall figures appeared in front of the Great Desolate Army, inside the passage.

When they came out, they looked no different from people, but their body was much taller and slimmer!

In addition, they were an unidentified species whose appearance had been enhanced several times!

The most conspicuous thing was not their good-looking face but the long, pointed pair of ears of these humanoid creatures!

“Elves?”

“This wave turned out to be..... elves?”

“No way, that’s the transcendent species? In such an important round, he came up with the elf thing?”

“Is the questioner out of his talents? Do you despise the most demonic candidates in this session? How dare they let the elves in!”

Seeing these transcendent creatures with long, slender bodies, pointed ears and top-notch looks, the planet masters couldn’t help but complain because everyone knew these creatures.

It was more than familiar!

Elves were very common in many transcendent civilizations.

They were more common than the Fish people.

They were also more famous!

The main reason was naturally that the elves were blessed with super high appearance!

More than that, it was loved by many people.

Many candidates were creating elf civilization!

“Hahahaha.”

Hearing the arguments of many planet masters, an old man sitting next to the Jiangcheng City Lord could not help but laugh and said, “These are indeed elves, but look carefully…… they are not quite the same as ordinary elves.”

“Huh?”

Hearing the words of this old man, everyone looked carefully.

With the vision of these planet masters, the difference was soon noticed.

“Look, these elves look exactly like ordinary elves, but the clothes they wear, and the bows and arrows they hold, are dark black in color.” A planet master pointed to the image in the projection and said.

“It is indeed different. Most ordinary elves are mainly white. There are other colors, but it can’t be black!” Another planet master also saw this and was a bit puzzled!

The crowd really knew the habits of elves?all too well.

The elves were extremely arrogant and particular as a race!

The clothes and the weapons worn were very elaborate!

Their colors were all kind of bright, the dark ones were rare?but?it was all black!

It was totally impossible!

“Aren’t these elves!”

A planet master couldn’t help but ask.

Even Tang Yushu and other admissions teachers frowned slightly.

Even with what they had seen and heard, they also had not seen this kind of elves!

For a while, everyone turned their heads?and looked?at the city lord of Jiangcheng and a few big guys beside him who were?sitting at the top!

Only these well-informed fifth-level planet masters should know what species this was.

“These are indeed elves.”

Jiangcheng City Lord spoke up and said, “But not ordinary elves, their name is…… Dark Elves!”

“Dark Elves?”

The crowd was slightly stunned.

This was the first time that they heard this name.

“Dark elves are very rare.”

The City Lord of Jiangcheng continued: “It is also a transcendent species that is extremely difficult to cultivate, and they are more powerful than ordinary elves!”

“Most of the elves are advanced civilizations.”

“And the dark elves are among all the elf races.....”

“Their strength can be ranked second!”

“Second place?”

The crowd was in awe!

Everyone knew that the first in line were the High Elves, who were in the ranks of the super civilization!

This second ranking was not much weaker!

“The Dark Elves have not yet reached the super civilization level.”

Jiangcheng City Lord looked at the crowd and said, “But they are among the most fearsome of the many high-level civilizations!”

“As for the reasons, just wait and see for yourselves!”

Similarly, in the examination room, as long as the candidates who usually study seriously? recognized this transcendent species.

Aren’t they just elves?

The Great Desolate Army also initially recognized it.

On a previous planetary conquest, the species to deal with were?the elves!

“Are these..... elves?”

A scholar observes the transcendent species that came in.

“For elves, it’s okay, we still have experience.”

Another scholar breathed a slight sigh of relief!

Elves were sort of tricky?but the Great Desolate Army had experience to deal with them.

It was not difficult to deal with them. At?least it was easier than the big-headed fish people!

The others also had slightly more relaxed expressions.

The most fearful thing was to encounter transcendent species that had never been seen before and which had terrifying abilities!

“No, you guys, look.”

At this time, a?young scholar pointed to the elves on the opposite side and said, “These elves are not like the ones we met before. Look?at their clothes and the color of their bows and arrows!”

Immediately, everyone observed again.

A quick glance revealed these differences.

“Aren’t these ordinary elves?”

One scholar speculated.

“I don’t think so.”

Another scholar frowned slightly and said, “It’s not just that the colors of the clothes and bows and arrows are different. You can see their expressions. They’re very cold and depressing, and they don’t have the arrogance of the elves we have seen before!”

Others were picking up on this as well.

On the elf planet from earlier, the biggest impression on the crowd was that?Elves could be really arrogant!

That high and mighty look was completely engraved in their bones?but these elves were not arrogant?at all!

Claptrap.....

During the talk of the Great Desolate Army, these tall elves had walked in quickly.

The number of people was growing!

In the end, there were thousands of them!

They were?black!

All of them were top-notch in terms of looks?but there were so many people.

It still put a lot of pressure on the Great Desolate Army.

A group of 100 elves broke away from the group?and walked up to 500 meters from the city walls.

They removed the bow and arrow from their back?and shot the arrows!

Whoosh! Whoosh! Whoosh!

With a slight rattling sound, one hundred arrows went against the wind!

Their target was none other than the soldiers of the Great Desolate Army on the city walls!

Their speed was amazingly fast.

“No!”

Chapter 249: Meteor Tactics! Shocked planet masters!

Chang Yu Chun realized something was wrong the moment he saw the elf remove the bow and arrow.

He immediately shouted: “Crouch down, shield defense!”

The discipline of the Great Desolate Army was very strict.

As the words fell, all of them immediately crouched down.

They were hiding behind the battlements.

They even raised their small shields on their heads.

This was the standard equipment of the Great Desolate Army.

The small shield was naturally built with the Star Vibranium alloy.

Bang! Bang! Bang!

Most of the one hundred arrows were shot at the back of the wall?but there were several others.

It actually fell from the sky?and?landed on the heads of several soldiers of the Great Desolate Army.

With a boom, a?small shield over the head of a soldier of the Great Desolate Army was shot.

It blew up straight away by the arrow!

Everyone saw that?and discovered that the small shield had turned black and gray.

It meant that the kinetic energy and potential energy were absorbed and scrapped.

Seeing this scene, Chang Yu Chun and the other?generals' faces changed drastically!

The opponent's range was actually so far!

They could shoot arrows from 500 meters away!

In addition, it was?very powerful!

.....

Likewise, seeing that these elves suddenly attacked from 500 meters away, the planet masters also revealed their shocked look in City Lord's Mansion Hall..

"The range of a level one ordinary elf is generally only three hundred meters, and at most only four hundred meters, these elves are actually able to reach five hundred meters?"

A planet master said with some shock.

"That's a bit scary. It's very difficult to deal with from such a distance." Another planet master said.

Everyone else had no doubts?because there were remote outputs?for the various transcendent species.

Especially the most feared attack for the level 1 transcendent species!

Like the martial artist, profound practitioners, these melee combat systems?were?even more intimidating!

Facing?these elves with ultra-long-range, they could only be beaten passively!

There was no way to fight back!

"Scholar team, fall back.?Everyone?down, artillerymen ready, fire for me, blast these elves out from 500?meters!"

On top of the city walls, Chang Yu Chun immediately issued a series of orders!

The generals next to him were also busy.

Although this battle was commanded by Han Qinhu, the other generals were not resting either.

They were watching the situation just as carefully to give their own advice!

Cannons roar!

One after another, the shells were fired in succession.

The target was the 100-person elf team that was 500 meters away!

The crowd also saw it, 500 meters should be the effective range of these elves!

Further away, there would not be such precision and power!

The threat would be greatly reduced!

The cannonballs quickly fell towards the hundred elves!

On the verge of landing on the position, suddenly a meteor landed!

Unknown amount of meteors, generated out of thin air and smashed down.

Their speed was amazingly fast.

They hit the flying shells directly in the air and detonated it!

One by one, the elves below bent to the ground and dodged the maximum impact!

Seeing this bizarre and amazing scene, it was not just Chang Yu Chun and others, even all the planet masters were directly blown up!

Is this a f*cking elf?

They had never seen elves with such incredible skills!

“What was that just now?”

“How did those meteors appear? I couldn’t even see them!”

“The elves also have the innate skill of Meteor!”

Every big guy was asking questions.

Even when Tang Yushu’s sister Tang Qingqing’s Wizards attacked fireballs, meteors appeared out of nowhere and blocked all of them!

Not a single fireball was missed!

This took the crowd completely by surprise.

Everyone was very surprised!

Only the Jiangcheng City Lord and a few old men beside him stroked their beards and smiled.

They seemed to know exactly what this was.

“How is that..... possible?”

On the side of the Great Desolate Army, all the scholars were stunned.

They were just holding binoculars.

They clearly saw the scene of the falling meteor.

These meteors were not launched by elves. It suddenly appeared out of nowhere.

They didn't know where it came from!

"Wait, you guys, look."

At this time, a young scholar pointed in one direction and said, "That captain in the elves' team of 100 people!"

Everyone looked.

All of them saw that among the hundred elves, there was an elf riding on the back of a huge tiger-like creature.

Just now, everyone found out that this should be the captain of a team of 100 elves!

"Do you guys think these meteors are related to this captain?" This young scholar speculated.

"Huh?"

Another scholar seemed to have noticed something at this time and immediately exclaimed, "Look at the bow and arrow behind this captain, it seems to be different from the others'!"

The crowd looked again.

Even Chang Yu Chun stared at it with wide eyes.

After observing carefully for a while, they indeed discovered that the bow and arrows on the back of the elf captain that was riding on the back of a huge tiger were identical in appearance to the other elves but there was an extra meteor-like mark!

"Does it mean that these meteors just now were sent by this elf captain?"

An elderly scholar speculated, but then shook his head and said, "No, just now this elf captain has been sitting on the back of that tiger, and did not even take off his bow and arrow!"

"Scholars continue to observe, gunners proceed to fire!"

Chang Yu Chun ordered, "Keep firing this time, and don't stop until I yell stop!"

The crowd was aware of Chang Yu Chun's strategy.

It was like dealing with the undead knight in the second round.

He would order constant bombardment with artillery fire to find out the source of the opponent's bizarre ability!

Boom! Boom! Boom!

Countless shells flew out and blasted at the 100-man elf squad 500 meters away!

This elf squad did not back off.

The look on their face didn't change much.

They didn't even shoot arrows to attack the shells.

Instead, they watched quietly.

The moment the shells were about to land on the elf squad, a meteor fell!

Again, it appeared out of nowhere and hit the incoming shells completely!

At that time, the artillery fire from the Great Desolate Army was continuous.

One shell after another blasted through!

However, the crowd saw an even more terrifying scene!

As soon as a shell fell on top of the elf squad, a meteor appeared, putting the shells on the ground!

From beginning to end, the elf captain sitting on the back of the huge tiger didn't even move his hand!!!

Chapter 250: Under the Darkness! The first trump card of the Great Desolate Army!

According to Chang Yu Chun's order, a group of gunners of the Great Desert Army continuously fired shells.

It was also because of the experience of dealing with the second wave of undead knights.

All bullets were smashed into the 100-person elf squad!

A whole ten minutes passed and thousands and hundreds of shells fell, but none of them could kill these 100 elves.

Not even a little damage could be done.

No matter how many shells fell on the elf squad, meteors fell from the sky and blocked all the shells!

A group of generals and scholars of the Great Desolate Army were shocked.

Seeing the scene, shock converted into goosebumps!

The cold hairs on their whole body stood up!

It was not just that these meteors were too bizarre.

In addition, the key thing was that there were so many of them.

It was not visible at all.

How did these meteors appear?

It was as if something had been created out of nothing.

It was completely baffling.

There was no clue!

If these meteors kept appearing, no matter how many shells the Great Desolate Army had, and how sharp the artillery fire was, what was the use of that?

“Calm down.”

Looking at the group of scholars who were slightly turbulent around, the team leader of the research team, an old scholar snorted coldly and said, “Don’t confuse yourself. It’s still the same thing. There’s nothing incredible. It’s just that we haven’t discovered the essence of this thing yet!”

“One by one, observe well and don’t get discouraged!”

This quote from the old scholar quieted down the surrounding area.

After that, they picked up the binoculars again.

They started watching more carefully!

They just didn’t believe it.

One hundred of the most elite scholars still couldn’t find out how these meteors appeared?

Chang Yu Chun also slightly frowned, but he didn’t give orders indiscriminately.

He still did not shout for a stop!

The gunfire continued!

He would like to see if these meteors were infinite.

“Huh?”

A young scholar suddenly snorted and said, “Have you noticed? These meteors have a certain range and will only appear near the 100-person elf team.”

“If it is a further range, the shells will fall directly, and they will not be blocked by the meteor!”

Hearing this, all the scholars took a careful look at it one by one.

Not long after, it was discovered.

The truth was exactly what the young scholar said.

If the shells were ten meters away from the perimeter of the 100-man elf squad.

It won’t encounter that mysterious meteor!

“There is more.”

Another scholar added: “The number of these meteors is not spontaneous, but it’s similar to the number of shells we fired.”

“To be precise, it’s the same as the cannonballs that landed on the one hundred person Elf Squad!”

“The number of the meteors is the same as the number of the shells falling on it!”

“So?”

A young scholar had a whim and said, "Could it be the talent of the captain of the 100-person elf squad? Or the ability of the bow and arrow on her back?"

"It's like the natural ability of the big-headed fish people before! They could summon the tides!"

"Are these meteors also a talent of this elf?"

Hearing this.

The crowd couldn't help but think deeply!

This was..... highly likely!

They know very little about the transcendent species but each one had its own special ability!

It was just that there was no such a BUG as this time!

"Keep watching and find a way to figure out if it's the talent of these elves or the ability of that meteor bow and arrow?"

Chang Yu Chun gave the order!

A trace of gloom flashed in his eyes.

If they couldn't figure out the real reason for it, even if the Great Desolate Army had more shells, they couldn't afford to consume them either.

.....

"It should be the meteor bow, right?"

"It's a meteor bow. Even though dark elves are more powerful than ordinary elves, I don't think they can have such a terrifying talent!"

"So the powerful side of the dark elves is here!"

"If this meteor bow is really so terrifying, then... this wave will be difficult for the candidates!"

"Completely flawless. The examiner is even more ruthless in this wave, and I'm afraid that each and every one of the geniuses is going to cry."

In the hall of the City Lord's Mansion, the planet masters also reacted one by one after the initial surprise.

What a vision they had!

Naturally, they soon discovered the secrets of the meteors!

The city lord of Jiangcheng, who was sitting above, also spoke up and said, "In this wave, it is estimated that more geniuses will fall than we estimated!"

"I'm afraid some of the top geniuses will be forced to show their trump cards!"

“It depends on whether these geniuses can discover the secrets of these meteors. Otherwise, they can only use their strength to fight head-on, and that will be a big loss.” A few old men next to him added.

.....

“Try to bombard the elf army in the back.”

Above the city walls, Han Xin, who had been observing, suddenly spoke up.

“Bomb the elves in the back!”

Chang Yu Chun was slightly stunned, but he immediately reacted.

He immediately ordered: “All attention, half continue to shell the 100 man squad, the other half change the target, bombard the elf army in the back!”

In the next moment, just about half of the shells changed the target.

The shells roared away towards the back of the 100-man elf squad.

Those shells were going to the elf army of thousands of people!

Seeing the shells flying over, these elf people in the back were not panicking.

They scattered quickly!

In terms of agility and speed, these elves were still very fast.

In addition, each squad had arranged for an elf captain riding a huge tiger!

Likewise, on his back was a longbow engraved with the mark of a meteor!

Boom! Boom! Boom!

Shooting past the shells.

All were blocked by the meteors that appeared out of thin air!

Same as the previous 100 man squad.

It was all within a certain range.

These meteors just appeared automatically!

These elf captains didn’t make a move either!

“Hmm? Look guys!”

A scholar pointed to the middle of the elf team, a female elf riding a huge tiger, and said, “The meteoric bow and arrow behind this elf captain is obviously bigger than the others!”
