

One Planet 311

Chapter 311: Entering the University! The method to upgrade the planet! The mystery of the super-first-class university!

"I choose Beidou University!"

Jiang Fan said.

"Beidou University!?"

Tong Zhensheng and Liu Yue looked at each other.

They saw the look of confusion in each other's eyes.

They felt that what they just said was for nothing!

Both of them also knew that a demon like Jiang Fan had his own considerations.

It was impossible to act recklessly and it couldn't be just for that huge entrance bonus from Beidou University alone!

It was just that Jiang Fan really came for this huge sum of money!

That was one billion federal dollars!

With this, he could buy a thousand pieces of the power of origin!

It was enough to sustain the rapid evolution of Blue Star for a long time!

Although other universities were better, they were useless for Jiang Fan!

During the rest time, Jiang Fan had also done his homework.

He checked out the information about these universities.

In addition, he also used the deduction system to conduct some deductions and finally discovered that there was no university that he had to go to.

Since this was the case, he was naturally going to choose the university that gives the most money!

"Okay, then I will send the message to the admissions teacher of Beidou University."

Tong Zhensheng did not persuade Jiang Fan any further.

With that, he closed the projection.

Then he turned around and left!

On the other side of the hall, when they heard Jiang Fan's choice, admissions teachers from thirty-six universities were stunned!

This Jiang Fan did not choose the Sixth Academy of Starlight, nor did he choose the high-priced Demon Eye University!

Instead, he chose a lower ranked Beidou University!

"Teacher Su, what is your university's offer? It's amazing that Jiang Fan didn't consider us at all!"

The silver-haired old man from Demon Eye University asked.

The admissions teacher of Beidou University was a middle-aged man.

His name was Su Jicheng!

Su Jicheng smiled faintly.

After that he held out a finger!

“One Billion!!”

Everyone was slightly surprised!

This was a really high price!

Even the silver-haired old man from Demon Eye University shook his head.

He was very helpless.

Their Demon Eye University really liked Jiang Fan very much!

Before coming here, the principal also explained it himself?that no matter what the price was, they also wanted to snatch Jiang Fan!

His?offer was also really high.

It reached 600 million!

However, there was actually a more ruthless one!

If it was 700 million, the silver-haired old man will still think about it, and ask the university for a higher price, but one billion.....

They simply couldn't afford to pay it!

“It's too high, it's too high, I have to quit the Behemoth Academy.?It's outrageous, and we can't compete.?Old classmate, there is no way, even if I declare it, the school will not approve of this outrageous reward!”

“.....”

All the admissions teachers shook their heads.

They felt like this was more than they could handle!

They could only disperse?to target the other remaining candidates.

Beidou University's admissions teacher, Su Jicheng stayed and came to the rest area with Tong Zhensheng.

“Hello, Jiang Fan, I'm Su Jicheng from Beidou University.”

Su Jicheng extended his hand toward Jiang Fan.

“Hello, Teacher Su!”

Jiang Fan shook hands!

After a short exchange of pleasantries.

Su Jicheng laid out all the conditions that he had prepared very well..... all of them!

Jiang Fan browsed through it.

After confirming that there was no problem, application procedures were completed on the spot!

The application procedure in this world was very simple.

It took no time at all!

It could be done by a communicator!

The admissions process was extremely fast.

It was done in less than one day!

Jiang Fan also waited for an extra day in the provincial capital.

“Jiang Fan, do you want to go home first? Or do you want to follow me directly to university?”

After all the processes were done, Su Jicheng asked.

“Can I go to university now?”

Jiang Fan asked.

“Of course.”

Su Jicheng smiled slightly and said, “Theoretically, you are now a member of Beidou University! You can come and go at any time. In addition, the sooner you go, the better for your planet’s development!”

This aspect.

Jiang Fan also heard Tong Zhensheng and Liu Yue say it before!

There was a fundamental difference between super-first-class universities and other universities!

After thinking about it for a moment, Jiang Fan decided not to return to Jiangcheng.

He went to Beidou University directly with Tong Su Jicheng!

One of the reasons.....

Of course, the ticket fee was waived!

Su Jicheng was also not a bad person, he used a magic spaceship from a magical civilization!

Its speed was much faster than Tong Zhensheng’s luxury car!

After saying goodbye to Tong Zhen Sheng and Liu Yue, Jiang Fan also boarded the magic spaceship.

There were also nine other geniuses from Dongyang Province who took admission at Beidou University!

This time, they recruited a total of 30 people from Dongyang Province!

Twenty did not come immediately!

In this world, there was also a summer vacation after the college entrance exams, but it was only for one short month!

The magical spaceship quickly rose into the sky!

It drove fast forward at an alarming rate.

Countless provinces were crossed in between.

After five hours, the speed slowed down.

Everyone knew that Beidou University had arrived!

The magic spaceship slowly landed.

It stopped on a flat ground.

Under the leadership of Su Jicheng, Jiang Fan and the others stepped off the spaceship one after another!

Following the road, they came to the front of an immense university gate!

This university gate looked very ancient!

There was a peculiar smell, but the most surprising thing was not the simplicity and hugeness of the school gate, instead, this school gate itself was very similar to the planet passage!

“Is it possible that the super-first-class universities are not within the main world!”

Jiang Fan suddenly had such a guess in his mind.

“You should have seen it, too.”

Su Jicheng pointed to the huge gate and said, “Our Beidou University, including other super-first-class universities, is not in this world, but on a planet created by a powerful planet master!”

Chapter 312: Entering the University! The method to upgrade the planet! The mystery of the super-first-class university!

“Come on, follow me in.”

Su Jicheng was the first to walk in.

Jiang Fan and the others followed closely behind!

This was no different from the passage they took in the college entrance examination!

After going inside, it was just another space!

It was suddenly bright!

A huge campus appeared!

The one in the front was a spacious square!

Flowers and trees were planted all around.

It was no different from a normal university!

It was just that?it let Jiang Fan feel that?the atmosphere here was very similar to that in the college entrance examination space!

“Welcome to Beidou University! Ten new little guys.”

An old voice suddenly sounded in everyone’s mind!

It left?everyone surprised!

Seeing everyone’s surprised expressions, Su Jicheng smiled slightly and said, “Don’t panic, this is the spirit of this planet!”

“Spirit of the Planet?”

Jiang Fan couldn’t help but raise an eyebrow.

He vaguely heard it somewhere.

This was something that was only available on a level 6 planet.

“The spirit of the planet will monitor the entire planet. Transcendent?creatures will be discovered as soon as they come in, so this place is absolutely safe!”

Su Jicheng explained: “The spirit of the planet has most of the authority of the planet’s?master!? You must take care of yourselves in the future!?Don’t do anything wrong, you will be noticed by the spirit of the planet right away!”

“Of course, we won’t.”

A pretty girl answered.

“It’s about time,?you guys guessed.”

Su Jicheng said at this time: “The reason why our super-first-class universities are considered being?fundamentally different from other universities is because?we are on a level six planet!”

Jiang Fan nodded slightly.

He also knew?that there were a lot of Level 5 Planet Masters.

The city lords of hundreds of cities in Dongyang Province were all at this level!

Level six?was another level!

In the entire Dongyang Province, there was not a single level 6 planet master!

Even if one looked at the entire Federation, there were not many!

It?was very, very difficult to get promoted up there!

There was a huge jump from level five to level six!

For example, the first thing was to be able to give birth to the spirit of the planet!

“On the sixth-level planet, there will be all-round help for the development of the planets you have built.”

Su Jicheng said, “This is an effect that no treasure can achieve. It’s also the main reason why all geniuses have to apply for super-first-class universities! Well, don’t be curious at first. Go to your respective places of residence to tidy up a bit, and then have time to show you around.”

Su Jicheng smiled.

Jiang Fan and a few people came to the freshman housing area.

As the spirit of the planet was there, there was no need for Jiang Fan and others to verify their identities.

While passing through the gate, the Spirit of the Planet had already verified it!

Seeing the freshman housing area, Jiang Fan couldn’t help but have his eyes lit up!

This was surprisingly not the kind of building that was several stories high, as in his previous world.

There were villas!

“Come on, everyone, go to their quarters and feel free to contact me if anything happens.”

Su Jicheng said and then left.

Jiang Fan also walked towards his own villa!

As Jiang Fan’s admission ranking was the highest, the location of his villa was also the best.

Unlike others, Jiang Fan had nothing to salute!

After walking into the villa, this was a two-story building.

It was very clean.

Its layout was also very simple, but everything was there!

Jiang Fan walked upstairs and looked around.

He went back downstairs again and sat on the couch.

As he was about to go into the awakening space to take a look.

Suddenly, there was a knock at the door!

Jiang Fan stood up.

He opened the door and took a look.

There was a very good-looking girl.

Jiang Fan also had an impression.

This girl was called “Lin Ke’er”.

She came from a relatively large city in Dongyang Province.

Her college entrance examination ranking was also in the top 500!

“Is there a problem?”

Jiang Fan asked.

Lin Ke'er glanced at Jiang Fan, blinked and said, "Jiang Fan, several of us are from Dongyang Province, so we are thinking of gathering for a meal later. Why?don't you come along too?"

"Gathering?"

Jiang Fan thought for a moment and said, "Where to? The cafeteria?"

"Of course not."

Lin Ke'er shook her head and said, "Although this is on campus, there are also many restaurants and other places. We have already booked a restaurant and are going to gather there."

"Then you guys go ahead.?I won't go."

Jiang Fan was not interested.

There was nothing of interest.

He could go to the cafeteria for dinner!

Besides, the cafeteria wasn't far from there either!

After just coming to the villa, Jiang Fan had already seen it.

There was a similar white talisman car in the university for transport.

It was fast!

He could go anywhere!

"Huh?"

Lin Ke'er had no idea that Jiang Fan would refuse.

After being stunned for a moment, she said, "We're not just getting together, we're going to discuss our next survival strategy here.?I heard that although there are many resources in super-first-class universities, the competition is very strong!?Most people are gathered together. It's hard to fight alone,?no matter how strong you?are."

"Then you can discuss.?I will not participate."

Jiang Fan said.

"You're really not coming?"

Lin Ke'er was a little unbelievable and couldn't help but say, "We are okay, but your planet's diameter has exceeded 500 kilometers in the college entrance examination, and you are close to the planet's upgrade. You should compete for various resources."

"I'll take care of this myself. Thanks?for the invitation. Make?yourself comfortable."

Followed by.....

Bang!

Jiang Fan directly closed the door!

Basically, most of the resources were useless to Blue Star!

There were only a few extremely precious treasures, like the ten times amplification card he obtained last time.

Only that was effective!

Chapter 313: Entering the University! The method to upgrade the planet! The mystery of the super-first-class university!

However, this kind of treasure?is something that would move even a level 5 planet master!

Even if this was a super-first-class university, Jiang Fan didn't think that they would provide this kind of treasure to students!

In addition, Jiang Fan didn't want to hang out with others either.

That would be a waste of time and energy.

Wouldn't it be better to save this?time to develop Blue Star?

"You....."

Seeing that Jiang Fan actually closed the door, Lin Ke'er was so angry that she jumped to her feet!

"Why is this guy so incomprehensible?" Lin Ke'er thought through gritted teeth.

Among the few who came, it was also only for Jiang Fan that Lin Ke'er herself came over to invite.

There was still one more meal to go before dinner.

Jiang Fan also did not go out to visit the campus.

He sat back on the couch.

He remembered what Lin Ke'er said just now.

"Planet upgrade!"

Jiang Fan exhaled gently.

For the planets of this world, it was not an automatic upgrade.

Instead, they had to go through a special test!

There?was something in this that?Jiang Fan was not quite clear about.

This was the only chance to be called by the outside world to "change one's life against the sky"!

In other words, even Tang Qingqing, a planet master who had not been admitted to a super-first-class university, could directly change the future of her planet, if only she could play against the odds in a planet upgrade!

That kind of meaning was even better than being admitted to a super-first-class university!

According to Jiang Fan's limited understanding?from ancient times to the present, people who succeeded in changing their lives against the sky were only a few!

So!

That's why the fight for the super-first-class universities was so intense!

As Blue Star was growing more and more rapidly, the upgrade was not far away!

Jiang Fan had to plan ahead to get ready early!

He entered the awakening space.

The Blue Star was slowly evolving.

Jiang Fan's eyes were fixed on the Great Desolate Army.

At this time, the Great Desolate Army was recovered from the joy of victory in the Glory Conquest!

Some temporary measures were also eliminated!

Yan's eyes were set on the development of the whole Kingdom.

The original delayed steam train project started again!

However, after all these years, the project hadn't launched yet.

It just died in the womb because a more powerful form of transportation was born.

Jiang Fan slightly accelerated the flow of time.

Xia Kingdom moved forward year after year!

Changes in the personnel of the Great Desolate Army were very frequent!

After the conquest, Chang Yu Chun, who was already in his sixties, had chosen to retire.

He gave up the position of commander, but for the position of the commander.

Yan did not immediately appoint someone.

Instead, he was looking at the performance of each general!

Yan still maintained her childhood interests.

Every night, as long as it was allowed, she would spend a little time observing the sky through the telescope.

These stars were all made of the power of the origin and the telescope couldn't see that, but that night, Yan looked at the stars again.

Jiang Fan appeared.

"Father!"

Yan was surprised and delighted!

"Your mission is not complete yet."

Jiang Fan displayed the text.

"Next, there is a battle more important than the glory conquest that is waiting for you!"

“More important than the glory conquest?”

Yan was a little confused.

“You should know that the planet under your feet is constantly getting bigger, right?”
Jiang Fan asked.

“Yes, and so far I can’t find out why.”

A hint of curiosity flashed in Yan’s eyes!

This was the special feature of Awakening Planet!

A lot of things could not be explained by common sense!

“Can you find out how big this planet is?”

Jiang Fan continued asking.

“The most recent measurement was around seven hundred and fifty kilometers.”

Yan replied.

Measuring the size of the planet was not too difficult.

It was measured long ago by a team of physicists and geographers!

“This kind of growth?doesn’t last forever, and it may stop before long.”

Jiang Fan continued to display the text.

This statement, let Yan couldn’t help but stare!

“Planets are also graded.”

Jiang Fan explained, “This Blue Star beneath our feet today is level one according to our classification!”

“It’s the lowest level of the planet!Up there?is the second level!The diameter of the planet at the first level is restricted.?If you want to be promoted to the second level, then you must participate in a special assessment!You can think of it as an upgrade assessment!Only by moving up to level two will the planet’s size be able to continue to increase!”

“I understand, Father.” Yan nodded and said, “This upgrade is not only about glory? but also about the future development of our Xia people!”

“Yes.”

Jiang Fan displayed the text.

“You can first formulate a plan for the next fifty years and develop it step by step, but don’t be too hasty. There is still a long time before the upgrade assessment.....”

Jiang Fan warned, and?with that, he left.

On the other hand, Yan's eyes lit up again!

She was not afraid of difficult tasks.

Instead, she was afraid of not having an assignment.

Yan, who had read the diary left by Qi and Han.

She knew that Han didn't get Jiang Fan's call in the decades-long succession.

One could say it was depressing, and now she was very lucky.

In the future, there was an even more important upgrade assessment!

This rekindled a glimmer of motivation in Yan's heart!

After talking the exchange with Yan, Jiang Fan turned his attention to the second continent he had been paying attention to for a long time!

"Huh?"

While glancing around, Jiang Fan suddenly discovered that there's been a lot of changes here.

The original skeleton reptile that ruled this continent was on its deathbed!

It was seriously wounded by another powerful creature!!!

Chapter 314: A new overlord! Ten years after the war! The Second Technological Frenzy!

On the second continent.

Since the skeleton crawler killed the giant eel.

Skeleton reptile was the ruler in these years.

During this period.

There were also many very powerful creatures.

Who came to challenge the dominance of the skeleton reptile!

But without exception!

They were all defeated by skeleton reptile!

However.....

This time.

The skeleton reptile had met a real opponent!

Beside the huge lake in the center of the continent.

Next to the seriously wounded skeleton reptile.

There was an immense and unbelievably huge gorilla standing there!

This gorilla was over ten meters tall!

Not only was it physically strong.

He was also holding a big rough stone axe in his hand!

This was also the most obvious difference between this gorilla and other powerful creatures.

That said.....

It could be used to create and use tools!

This gorilla was able to smash the skeleton reptile only with this big stone axe!

“Roar!”

After defeating the skeleton reptile.

The gorilla looked up at the sky and kept beating his chest while roaring.

The seriously wounded skeleton reptile also died soon.

One of the other creatures hiding in the nearby woods watched this in silence!

And witnessed it first hand that.....

Another new overlord was born!

And in a hidden corner.

A few droplet people were also peeking this way.

They were a little dumbfounded!

Although this gorilla successfully defeated the skeleton reptile who had been invincible for many years!

But in the battle just now.

It also suffered some considerable injuries.

The droplet stared at the gorilla.

It seemed like they wanted to make a move!

Jiang Fan noticed.

After decades of development.

The technology of the water droplet people had improved very significantly.

Especially that iconic “water drop”!

It had evolved to 2nd generation!

Compared to the first generation.

Its power was greatly enhanced!

The number of water droplet people was also growing rapidly.

They had gotten out of that valley and were slowly expanding towards the outside!

With the growth in strength.

The “ambition” of these water droplet people was getting bigger and bigger.

Now.....

Their target had been set on..... a giant creature like a gorilla!

But!

After observing for a long time.

A few water droplet people still gave up their plans.

This gorilla was really too strong.

Even with water drops.

It might also be in vain!

The wisdom of the droplet people told them.

There was no need to rush!

After achieving dominance.

This giant gorilla wasn't as dominant as the giant eel and skeleton reptile!

Instead.....

It was very casual!

As long as other creatures didn't overdo it.

It was also too lazy to pay attention!

He concentrated on making offspring with other female apes!

Meanwhile.

The previous atomic dinosaurs.

They have also had their own families over the years!

One by one, offsprings were born!

Among these offsprings.

A dozen more atomic dinosaurs had appeared!

Starting from this generation.

It could be said that the group of atomic dinosaurs ?was really taking shape!

However, they seem to have inherited the characteristics of the first generation of atomic dinosaur, Lan.

They were very lazy!

Their favorite thing to do all day.

It was all about lazing around and sunbathing!

For the battle for continental domination or whatever.

They were not interested at all!

The second continent had temporarily restored peace.

But beneath that peace.

There were a lot of secret peeping eyes!

Deep underground.

The same kind of skeleton reptile.

It was gaining strength!

The space underneath was no longer enough to support the survival of too many skeleton reptiles.

They were curious and ambitious about the outside world!

They wanted to be like that skeleton reptile from earlier.

Defeating one opponent after another.

And stand at the top of this continent!

Whoosh!

There was a loud sound.

Jiang Fan saw that.

In the sea at the edge of the second continent.

A huge figure emerged!

Terrifying giant creatures had also begun to be born in the deep sea!

After reading the situation on the second continent.

Jiang Fan turned back his attention.

Back to the first continent.

In Xia Kingdom at this time.

It had been more than one year since the glory conquest!

“Hmm!”

Jiang Fan suddenly discovered.

In this one year.

Xia Kingdom, regardless of the birth rate of newborns.

Or the disease and death rate of the population.

All of them had a significant change.

The birth rate had greatly increased.

The death rate was decreasing.

The probability of people getting sick also continued to decrease!

Not only that.

Jiang Fan checked other aspects and discovered that.

Xia Kingdom has had a bumper harvest of food in the past year!

It was higher than all previous years!

In this year.

Planting techniques and fertilizer levels did not improve.

The weather was nice.

Wind and sunshine!

The wind and rain were good!

Basically, there were no natural disasters!

It was not just food.

Yields of other crops had also changed a little in many areas.

There was also a significant increase.

The increase was not small for the yield of monoculture crops.

In addition to the crops grown by humans.

All living species seemed to be changing.

The trees in the forest were taller and more luxuriant!

The wild grass and wild horses on the grassland were also climbing high!

In the mountains.

On the hills.

In the lakes.

In the rivers.

In various regions.

The number of all lives.

All had been significantly improved!

“This is..... because of the level six planet!?”

Jiang Fan thought for a moment.

Then he understood.....

That was the reason for these changes!

As Su Jicheng said.

Level 6 planet!

For the development of the planet, that's a comprehensive support!

It was not just these beings.

But the whole planet!

Although it was not like some treasure.

That could enhance the quality and quantity of a certain aspect in a short period of time!

However.....

This change was steady and long lasting!

It was incomparable to any other treasure!

Like a level 5 planet.

It doesn't work like that!

Even.....

It was impossible for the university to be stationed on a fifth-level planet.

Because.....

Level 5 planets were not stable enough!

“No wonder each candidate and the forces behind them are so crazy about the super-first-class university, fighting for it at any cost.”

Chapter 315: A new overlord! Ten years after the war! The Second Technological Frenzy!

Jiang Fan also understood that even if the super-first-class universities did not provide other resources, only the role of this sixth-level planet would be totally worth it!

This could not be bought with money or other resources!

Since there were other resources, Jiang Fan wouldn't give them up either!

As for these phenomena, the Great Desolate Army naturally noticed it too.

At this time, the Great Desolate Army in the Royal Tombs Mountains had become the actual management organization of the Xia Kingdom!

Even the palace in the capital had more of a symbolic meaning!

The emperor who had previously been used as a puppet by Captain Dong at the age of five or six and held up to the throne.

Now he was also grown up, but he was still a puppet!

After the glory conquest, Yan put the focus of a part of her work onto the livelihood of the people.

While vigorously developing agriculture and industry!

The steam car project was immediately brought to the table.

However.....

At this time.

It was too late!

The steam-age frenzy hadn't reached its peak yet.

But it was already coming down to the end.

Because.....

A new era had arrived!

Electricity..... appeared!

More than a decade back.

There was one biologist.

During the dissection of the frog.

He discovered the existence of electric current.

In the past ten years.

Research on electricity was also progressing slowly.

After the glory conquest.

Yan was also very interested in electricity.

She personally took charge of it.

While conducting her own research!

The results soon kept coming out one by one!

With the combined efforts of this elite group.

The theory of electromagnetic induction and electromagnetic field is proposed! The concepts of voltage, direct current, alternating current were also born!

Shortly thereafter.

When Yan got thirty-five years old.

The first generator appeared!

A lot of people were shocked.

This also made the steam car project directly dead!

No one spoke about it again.

Followed closely by.

Electric motors were also invented!

And what really led to the beginning of the entire electrical age was when Yan got thirty-seven years.

The first internal combustion engine was out!

It directly replaced the steam engine!

It became a new source of power!

Its principle was to use fuel combustion to obtain power.

It was stronger than a steam engine in all aspects!

With the birth of the internal combustion engine.

A car without horsepower.....

It was also on the agenda!

When Yan got thirty-eight years old.

Under the crazy general research and development of many scholars.

The first automobile was born!

Even though this first car was very modest!

Many features were missing.

It was still very hard to drive!

However.....

It still caused an unprecedented sensation!

On the day of the trial!

It attracted high-level officials of the Great Desolate Army to watch the scene in person!

Even if it was Chang Yu Chun who was almost 70!

He couldn't help but want to do it in person!

“Cars? It just walks on the ground. What we want to develop is something that can fly in the sky!”

A group of only five people in the research institute were working hard in the lab!

They heard the noise outside.

A young scholar's face flashed a hint of disapproval!

Because.....

What he wanted to develop was.....

Something that could fly directly in the sky!

In the opinion of many scholars.

It was almost impossible to do!

If not for the strong support of Han Xin.

This group of five people.....

It would be disbanded long ago!

“Don't be disheartened, although we have failed so many times, but..... in the end we will succeed.”

The young scholar named “Lei Te” stood up.

While waving his arms.

He cheered up the other four scholars in a loud voice!

“Think about Dr. Chen, after so many years of being ignored and looked down upon, in the end..... wasn’t an instant success! We are..... the same!”

Lai Te was not only a high level of researcher and developer.

He was also very good at boosting morale.

He took the bald scholar Dr. Chen as an example.

Dr. Chen was now a star among scholars!

There were many scholars under his hand.

Improvements to Super Zombie Virus were in progress!

As well as research and development of more powerful biological weapons!

Seeing this.

Jiang Fan discovered that.

Xia Kingdom’s technological level seemed to be.....

Somewhat unbalanced!

It was very high in terms of weapons and people’s livelihood!

And yet it was not good!

Of course.

Yan also noticed this problem long ago.

After the end of the glory conquest.

She immediately “set things right”!

].

And increased investment in people’s livelihoods!

It was also for this reason that she personally went off to participate in the research of the current project!

At this time.

Almost all of the scholars from Xia Kingdom were concentrated in the capital area!

Jiang Fan also discovered that.

Although the population of Xia Kingdom was not large.

However, the probability of scholars appearing was significantly higher than the earth in his previous life!

Jiang Fan guessed.

This was probably because Blue Star was more talented!

Among so many scholars.

Dr. Chen is not the only oddball.

There were also many scholars who have fantastic ideas and even made people feel absurd!

For example.....

A scholar named Xiong who specialize in research of materials.

This Xiong scholar was nicknamed “Crazy Xiong”.

Because.....

He was even more bizarre than Dr. Chen!

His ideas were more offbeat and crazy!

The projects he made were also more unbelievable than the other!

If not for Yan.

If there was any other superior.

It was impossible to let him toss around like that!

“Humph, this time..... I must research this thing!”

After another failure.

Crazy Xiong was not the least bit discouraged.

On the contrary, he had more confidence in his eyes!

With messy hair that hadn’t been washed for a week!

The Xiong Crazy once again plunged into.....

He was the only one on the project.

As for the others.....

They already slipped away!

It couldn’t be helped.

This project had failed..... more than a hundred times!

Jiang Fan also noticed this crazy guy.

When seeing the project, he developed.

He also couldn’t help but feel a little of interest in my eyes...

This was way too advanced!!!

Chapter 316: Weird Weapons! Meeting Bu Jing Yue! Heavenly Selection!

Near the Royal Tombs Mountains.

Inside a huge auditorium.

The night was full lights!

All the top brass and most of the scholars of the Great Desolate Army.....

Basically, they were all here!

Because.....

Today was the time for the Great Desolate Awards!

The auditorium was full of people!

Thousands of scholars from various fields..... came together!

They were looking forward to the awarding of this Grand Desolate Army!

This was the highest honor belonging to Xia Kingdom's scholars!

Unlike the Nobel Prize in the previous world.

The Great Desolate Award had only one award per year!

There was no specific field of physics, chemistry, biology, etc.!

The team judging the award was a team of highly respected doctrates!

All of them were the people who had won the Great Desolate Award.

Yan was also among them!

Only with the approval of these people.

It was considered to be the most important and contributing research invention of the year.....

They could win this award!

In the past few years.

With the current discovery.

The age of electric was officially here!

Many new inventions were also springing up like mushrooms after a rain.....

They kept popping up.

.

Making the competition for this award more and more fierce!

There was one more thing.

After receiving the Great Desolate Award.

One will be automatically promoted to a doctrate.

Doctorate was the highest title of the Great Desolate Army!

There were "scholars" and "doctors"!

Scholars were good.

Their number was in thousands!

But there were far fewer doctrates.

In order to obtain the title of “Doctrate”.

There were three main conditions:

One was to receive the Great Desolate Award, which would automatically promote.

The second was to make a major research invention, which was evaluated by Yan herself.

The third was to make great contributions in the Glory Conquest!

The third method was the most important and main way to get promoted.

There are now only a few dozen remaining doctrates.

Most of them were promoted through the third method!

The competition for this year’s Great Desolate Award was..... particularly fierce!

Finally.....

The winner was a middle-aged scholar who invented the “telegraph”!

He successfully used the “on”, “off” and “long and short” of electric current to replace human words for transmission.

The invention of the telegraph.

It was also the opening of the telecommunications era!

It created the history of human use of electricity to transmit information!

It was very meaningful!

The Great Desolate Award was well deserved!

All the scholars who saw it were very envious.

Most scholars concentrated on their research.

There might not be as much demand for other aspects.

But this Great Desolate Award.....

It was like a dream that came true.

“Lai Te, look at people, you’d better change your career and hang out with our steam ship team, don’t drum up your impossible stuff.”

Among the scholars seated below.

A young and handsome scholar said to Lai Te, who looked a little lonely.

The tone was quite sarcastic!

This circle of scholars naturally had internal competition.

The two of them used to be in the same class.

But now the young and handsome scholar was in the promising research team of new ship.

It was very much favored.

His future was looking bright.

While Lai Te was

With a few young people.

He didn't believe that the devil was fiddling with something that could reach the heavens!

"Don't you worry about that."

Lai Te held back his anger!

But he could not help but clench his hands!

He secretly swore that he will certainly develop this flight project!

And shock everyone!

But not all of the scholars came to this event.

There are also some scholars who don't even care much about the Great Wilderness Award.

They were obsessed with their own research.

For example.....

The currently famous Dr. Chen!

Although he was now famous, and his reputation was also high.

But he was still the same as before.

There were all kinds of strange ideas in his mind.

This night.

He just stayed in the lab and was staring at the dozen or so flaming giants locked in huge cages.

He kept rubbing his chin with his hand.

A dangerous light flashed in his eyes!

"Teacher, are these flame giants not sprouting flames from their bodies right now because they lack transcendental energy?"

A teenager next to him asked.

This was the only student Dr. Chen had ever accepted!

In one way or another.

This student was even more whimsical than Dr. Chen!

"That's right!"

The bald Dr. Ji nodded and said, "The flame giant now basically has no transcendental energy in his body, so the flames naturally can't emerge!"

"Wouldn't that cause a big drop in their strength, and they wouldn't be that useful!"

The teenager asked.

“How can they be useless?”

Dr. Chen’s eyes flashed a strange light and said, “Even if the flame giant no longer has transcendental energy, but its strong body is unchanged, we can do something on it!”

“Maybe there will be a new terrible biological weapon!”

Dr. Chen and the boy.....

Once again, they were engaged in a mind-boggling research!

And people in a stunning research group like Dr. Chen were actually not much.

There were several more!

Jiang Fan observed them one by one.

After watching.

Even he was a little surprised!

“If this can be developed, Blue Star’s technological level will be a big step forward in certain fields compared to my previous life!”

Jiang Fan thought to himself.

After observing the situation in Blue Star.

Jiang Fan also felt a little hungry!

Then he detached from the awakening space.

He stood up and went out.

To the nearest canteen!

But in this huge campus.

Even if it was the nearest canteen.

It was also 10 kilometers away!

Luckily, there were talisman cars.

Jiang Fan directly called a car using his communicator.

This car was engraved with a talisman.

It could drive automatically.

Of course!

It was not free.

He still had to pay for it.

Soon!

He came to the cafeteria.

Right at the restaurant.

There were many students and teachers who came to eat.

It was same as in his previous life.

There was a maid in the cafeteria serving food.

And surprisingly.

All of the maids were... planet masters!

And they were still at least level two!

In fact.....

Here, it was possible to use the automatic formation.

However.....

Because there were more jobs available.

These maids and planet masters were willing to work in the cafeteria!

Their main purpose was to enjoy the environment of this sixth-level planet.

“Young man, you’re a newcomer, right? Which province are you from?”

This maid had a very good memory.

Her eyes were also very vicious.

At a glance, she could see that Jiang Fan was a freshman.

“Dongyang Province.”

Jiang Fan replied.

“Ah, the Dongyang Province.”

The maid nodded, a trace of memory flashed in her eyes, and she said: “I also went to your provincial city there once when I was young, isn’t it called East Star City!”

“Yes.”

Jiang Fan said with a smile.

This maid was very chatty.

This was the work of cooking.

She chatted a lot with Jiang Fan.

When the meal was almost finished.

She said in an experienced tone, “You can not do anything else in this university, but you must talk about relationships. Otherwise, when you leave the campus, it will be hard to find a partner.”

“Look at the one behind you who also looks new. She looks really beautiful and matches you well. Then why not get down while you can.”

Hearing this.

Jiang Fan picked up the rice bowl.

And couldn't help but turn around and look.

He saw that ?not far behind.

A beautiful girl did walk in.

She was tall, white as snow, and with a cold face!

It made everyone around him look at her for a while!

In this world.

Beauty was also a scarce resource.

“Bu Jing Yue!!!”

Jiang Fan raised his eyebrows.

He was slightly surprised.

Chapter 317: Weird Weapons! Meeting Bu Jing Yue! Heavenly Selection!

This one..... why did she come to Beidou University?

At the same time when Jiang Fan saw Bu Jing Yue.

Bu Jing Yue's eyes also looked over at the same time!

Upon seeing Jiang Fan.

There was also a flash of surprise in her eyes!

The two of them could be considered as old acquaintances.

With a slight nod of head.

Sort of a greeting.

Jiang Fan found a random place to eat big mouthfuls of food.

When he finished eating and came outside.

He called a talisman car.

And discovered.....

A familiar figure appeared next to him.

Who else is it if not Bu Jing Yue?

He immediately thought.

Both of them were from Dongyang Province.

Their accommodation area should naturally be allocated in the same place.

It's just that, men and women were separated.

But it was not too far away.

After boarding the talisman car.

There were no words on the way.

After getting to the villa area.

When the two were about to go separate ways.

Bu Jing Yue suddenly said: “By the way, your mentor..... have you selected it yet!”

“Mentor?”

Jiang Fan was slightly taken aback.

Then he just remembered what Su Jicheng once told.

It was not the same as the university in the previous life.

Because everyone built a different planetary civilization.

They must choose a mentor in the first year!

It’s about what kind of civilization seeks what kind of mentor!

Jiang Fan had been observing the development of Blue Star these days.

He didn’t have the time to bother with this matter.

“Not yet.”

Jiang Fan said.

“You can choose early, the number of students for each teacher is limited.” Bu Jing Yue reminded.

Jiang Fan blinked and looked at Bu Jing Yue.

Then he asked: “Could it be..... you have already chosen!?”

Bu Jing Yue nodded.

Jiang Fan suddenly understood the reason why did Bu Jing Yue also enrolled in Beidou University.

Emotions.....

There should be a certain teacher who had a great relationship with her!

“Thanks for the reminder, do you have any good advice?”

Jiang Fan asked.

He was really too lazy to choose!

He heard it from Ms. Liu Yue.

Here.....

There were a lot of doorways!

In a super-first-class university.

There were also various intricate relationships.

A good mentor was more than just being able to teach you better.

In addition.....

They were also able to provide better resources!

On the contrary.

If he met an average mentor!

That would be hard to take.

For Jiang Fan.

It didn't matter what the level of the mentor was.

But the point was.....

There must be more and better resources!

“The civilization you built is different from others, and I don't have any good suggestions.”

Bu Jing Yue said.

Followed by.....

Something seemed to have occurred to her.

He added: “But..... you are the champion, so you can consider participating in the ‘Selection of Heaven’.”

“Selection of Heaven?”

Jiang Fan couldn't help but blink.

What is this thing?

“I'm not very clear about the details, you can ask others.” Bu Jing Yue said.

After the two left contact information for each other.

Both of them went back.

Jiang Fan returned to his villa and sat down.

Through the communicator.

He looked for a long time.

But he couldn't find anything about the “Heavenly Selection” mentioned by Bu Jing Yue!

“It seems that this..... should be a relatively secret thing.”

Jiang Fan muttered to himself.

After thinking about it.

Jiang Fan thought of a person –

When Teacher Su Jicheng came.

The communicator was connected through.

“Student Jiang Fan, what’s the matter?”

Su Jicheng’s mellow voice sounded from the communicator.

“Mr. Su, excuse me, there is one thing I want to ask.” Jiang Fan said.

“Go ahead.”

“I heard someone talking about choosing a mentor today. It seems that there is a ‘heavenly selection’. Is that true?”

Jiang Fan asked.

“Heavenly selection!?”

Su Jicheng’s tone became serious.

After a pause, he asked, “You..... want to participate in the heavenly selection!?”

“Not really, I just don’t know much about it.”

Jiang Fan said.

“It’s not surprising that you don’t know.”

Su Jicheng smiled and said: “This is a relatively secret thing in our school, and it is not allowed to spread out!”

“I can tell you that there is such a thing as ‘Heavenly choice’.”

Su Jicheng continued: “It..... can also be regarded as a selection method for mentors.”

“It’s just that.....”

“There’s something special about this mentor.”

“Special?”

Jiang Fan raised his eyebrows.

“Do you remember the Spirit of the Planet when you first came into the school?” Su Jicheng asked.

“Is it possible that Teacher Su means.....?”

Jiang Fan blinked.

“That’s right!”

Su Jicheng continued, “This special teacher is the spirit of this planet. A long time ago, the planet master of our planet personally came to be a teacher!”

“But later.....”

“For some reason, it didn’t continue.”

“That is, the responsibility of the mentor was handed over to the spirit of the planet!”

“But not really the spirit of the planet, but..... an incarnation of it.”

“Other than the fact that it’s an incarnation, it’s not that different from other teachers!”

“But in the end, it is the spirit of the planet, and you should be able to imagine.....”

“If you have it as your own mentor, there will be all kinds of benefits!”

“This also makes the number of students who apply for the exam..... very, very high every year!”

“The competition is very, very fierce!”

“Although you are the top student in the college entrance examination, I am afraid it is still somewhat difficult.”

Su Jicheng reminded politely.

Jiang Fan naturally knew.

Although he was the overall top student of the province in Dongyang province.

But looking at the entire Federation.

Dongyang Province was one of the many provinces..... an inconspicuous small province!

He was the first place.

And the first place of those powerful provinces.....

In the eyes of outsiders.

He was totally incomparable!

Beidou University offered one billion!

The most important thing was to buy his title of provincial champion!

After all.....

Beidou University had not admitted to a provincial champion for more than 100 years!

“Thank you for reminding me, Mr. Su, but I should try it anyway!”

Jiang Fan said with a smile.

“That’s true.”

Su Jicheng also laughed: “You are the only provincial top student in this year’s admitted freshmen!”

“It doesn’t seem justifiable if you don’t go to the Heavenly selection!”

“The reason I reminded you is because.....”

“Heavenly selection is not an ordinary mentor selection, it will be very cruel!”

“And, most importantly.....”

“There is only..... one place for the annual heavenly selection!”

“One spot!!”

Jiang Fan raised his eyebrows.

“So the competition is very scary, those top geniuses and demons from other provinces are the ones who will come to participate.”

Su Jicheng said.

“You should think about it first, and you don’t have to dwell on the matter of Heavenly selection.” Su Jicheng continued, “The school also has other very good mentors to choose from, so if you’re not sure, you can always come and ask me.”

“Okay.”

Jiang Fan thanked him.

Then he hung up the communicator.

“The Spirit of the Planet as a Mentor!”

Jiang Fan muttered to himself.

There’s no need to think about it.

Jiang Fan also understood.

For him.

It was the best choice!

Other instructors still didn’t know what was going on at that time.

“Let’s take a look at the situation first, and listen to Teacher Su’s words. There is still some time left for the heavenly selection, so there’s no rush.”

Jiang Fan put this matter down for the time being.

After turning around.....

He took out a sealing crystal.

It was the same blind sealed crystal box sent by the city lord of Jiangcheng!

Jiang Fan hadn’t opened it yet.

“I wonder what will open up in this?”

Looking at the blind sealed crystal box in his hand, Jiang Fan’s eyes flashed with anticipation!

If.....

It was something like a tenfold booster card.

That would be satisfactory enough.

Chapter 318: **Blue Star's Evolution! The Pearl of the Stars! The Third Land!**

It was not difficult to open the sealing crystal.

It had a mark on it.

He just had to trigger it.

Then he will be able to open!

Jiang Fan tapped this mark.

Followed by.....

He saw that the appearance of this sealed crystal started to change slowly.

It turned out to be empty!

But now it was gradually forming something completely new!

Jiang Fan fixed his eyes on it.

And discovered.....

It was a translucent bead!

There was something like mercury flowing slowly inside it!

“Pearl of the stars!!!”

Jiang Fan couldn't help but have his eyes light up.

He was lucky.

This was a great thing!

The value of the Pearl of the Stars was even better than the tenfold amplification card!

Its greatest effect was.....

It could transform the local terrain and topography of a planet in a short time!

In addition!

It would not disturb the balance of the planet.

And there would be no after-effects!

In a sense.

The value of the pearl of the stars was almost comparable to the heart of the stars!

Of course.

Star pearls also had different sizes.

The larger the volume.

The larger the local area of the planet that could be transformed.

The one Jiang Fan obtained was small in size.

It was not enough to rival the Heart of the Star!

“A level one planet is still too small for the star pearl to be used, I have to wait until it is at least level two or higher.”

Jiang Fan looked at the star pearl for a few moments.

With that, it was put away!

He prepared to wait until the Blue Star reached Level 2.

Then he would consider using it!

Now, the Blue Star had two continents!

According to normal evolution.

The third continent was estimated to have to wait until at least a few million years..... before it could be formed!

But if the star pearl was used.

That would be different!

Because this star pearl was not very big.

The local area for renovation was limited.

Instead of using it immediately, Jiang Fan decided to wait until Blue Star was upgraded to Level 2.

Before that.

Jiang Fan still observed the development of Blue Star first!

The overall situation could be described as great!

The enhancement effect of the sixth-level planet also continued to the second continent.

The gorilla who was now the overlord.

It started breeding offspring!

Furthermore.....

What's surprising was that.

He had actually created a civilization!

This giant gorilla led the clan.

And made all kinds of tools!

Although very rough.

But ultimately, it was still a tool.

Subsequently.....

More than that, a shrine was built out of stone.

Jiang Fan was slightly stunned.

But other gorillas were a little less intelligent.
A fully formed gorilla civilization had not fully developed!
Among the offspring.
However, there were several cubs that had inherited the genes of giant gorillas!
This also let the civilization of the giant gorilla continue!
It's just that!
What the giant gorilla didn't expect at all was that.
Around it.
There were at least three kinds of eyes peeping in the dark!
There were several skeleton reptiles.
That crawled out of the underground cave.
They were clever and cunning.
There was no big fanfare.
Instead, they were secretly watching in the dark!
They didn't dare to directly mess with this huge, burly gorilla!
Its just that.....
What these skeleton reptiles didn't know was.
Their every move.
It had been targeted by the water droplet people who were hiding deeper.
Facing these giant underground creatures.
In the eyes of water droplet people, it seemed that.....
They were showing some interest!
And deep in the forest.....
There were also many large figures.
That were getting restless!
They seemed to want to sneak attack on this giant gorilla.
But there was no certainty!
They were indecisive and hesitant.
Jiang Fan was naturally happy that there was no fight for the time being.
One less giant beast.
That was one less life.
The increase in the number of giant beasts over the years.

It made the overall volume of Blue Star change again.

And on the first continent.

Yan was thirty-eight years old.

Something big happened.

Although the actual management of the entire Xia Kingdom was now in the hands of the Great Desolate Army.

But the imperial court in the capital still had its own team!

At New Year's Eve time of year.

Yeon would also make a trip back.

To perform ancestor worship rituals!

This year.

Yan remained the same as usual.

She returned to the palace.

She was walking on the road.

Suddenly.....

A gunshot rang out with a bang!

But that wasn't the sound of the attacker's gunshots.

Instead.....

After the discovery of this sneak attacker by Yan's personal guard's.

They fired this shot!

This sneak attacker was one of the guards of the palace.

The gun had just been drawn.

It was about to be targeted at Yan.

Then it was discovered by the guards.

Killed on the spot!

This matter completely angered the Great Desolate Army!

Chang Yu Chun personally led the investigation.

With a total of 30,000 people.

The entire capital was surrounded!

Although now Chang Yu Chun had stepped down from the post of commander in chief of the Great Desolate Army!

But there was no retirement.

Instead, he continued to stay by Yan's side as a consultant!

Shortly thereafter.

The Great Desolate Army found Emperor Xiu who died in a palace after taking poison!

As the investigation progressed.

They discovered.....

It was not just Emperor Xiu.

There were more wealthy nobles who participated in the planning of this attack on Yan!

Along with the rise of the Great Desolate Army.

These magnificent aristocrats who were holding a lot of resources and wealth.

They felt the unprecedented crisis!

They were not stupid either.

Knowing that they were not a match for the Great Desolate Army.

Then they aimed at the soul of the Great Desolate Army – Yan!

As soon as Yan died.

The Great Desolate Army could be said to be without a leader!

It was likely that they would be attacked individually!

These wealthy aristocrats owned a lot of land and wealth in the Xia Kingdom!

It was also because of them.

That the problem of land annexation was very serious.

In the past decade.

Because in preparation for the glory conquest.

Since these wealthy nobles were also quite cooperative.

Yan also did not have the heart to bother.

But now.....

This attack gave the Great Desolate Army the best excuse!

Yan also did not hesitate.

And directly put Chang Yu Chun in full charge!

These days.

The capital was rolling with heads to kill.

The wealthy nobles were dragged out one by one!

Whether they were involved in the planning.

Or innocent.

None of them were spared!

This incident was deliberately spread to the whole country by Chang Yu Chun.

The wealthy nobles of the entire Xia Kingdom.

All of them were affected by the wave!

They were being held down by the head.

To spit out the land in their hand!

After this incident.

The Great Desolate Army simply and brutally solved the land problem!

And advanced in the disciplines of chemistry and biology.

Fertilizers and seeds were also greatly improved!

Let the fields of Xia Kingdom be more abundant every year!

Chapter 319: Blue Star's Evolution! The Pearl of the Stars! The Third Land!

When Yan got forty years old,

Many new inventions were born!

Telephone.....

It was the first representative of the new year!

The first railway was officially completed!

The first train started running!

The car was still in the process of being improved.

Above the Great Desolate River.

A new type of internal combustion engine ship was moving on the water one after another!

Along the Great Desolate River.

The Great Desolate Army has started to explore the ocean!

A few decades ago.

The people of Xia Kingdom had just observed that beyond this land.

On the other side of the sea.

There was another continent!

Its just that.....

Because of the constraints of the time.

Plus a very dangerous ocean between the first land and the second land.

People couldn't get past it either!

With the creation of the new ships.

A new round of exploration had started!

Jiang Fan was looking forward to the collision of the first continent and the second continent!

However.....

He also knew that.

With the current technology of the ships.

He estimated that it was still impossible to cross the turbulent ocean!

Telephones, cars, trains..... these were the most eye-catching.

But apart from people's livelihood.

In these years.

The greatest focus of the Great Desolate Army was still on the military side!

To encourage competition.

Yeon divided the projects into several large groups.

There were five future leaders, Han Xin, Le Yi, Lu Sun, Han Qinhu and Xu Tiande respectively!

Each person was responsible for one direction!

Under the huge investment and competition.

All kinds of brand new results were released!

The alloy of star meteorite iron and vibranium!

It was a top priority!

After the glory conquest.

Every scholar was aware.....

The importance of star vibranium alloys and their shortcomings!

The alloy they made earlier!

It was still a little too rough!

More technical improvements were required.

Other than that!

The speed gun was improved and improved again!

A terrifying new type of speed gun was born –

Quadruple Speed Gun!

There were four holes on the barrel!

It could fire four shots at once!

Its power was several times greater!

There was also a hard shell for something like the last royal bug in Endless Mode!

There was a research group that even invented a special bullet.
The Heaven splitting cannon was in the hands of the capricious Le Yi!
He was preparing to improve it for being capable of becoming a conventional weapon!
But these were all petty jokes.
The truly major invention of this year.....
It was made by the group led by Han Xin—
A mobile military fortress!
Its surface was covered with a thick alloy!
There was a crawler under it.
There was also a huge muzzle in the front.
It could attack and defend!
Though it was still very rough.
But the first tank representing the Blue Star..... was officially launched!
It triggered a lot of attention from the top brass of the Great Desolate Army!
Everyone was aware that.....
In positional warfare.
It would play a very big role.
The main thing was.....
It preliminarily solved the defense problem of the Great Desolate Army as an ordinary people!
However.....
This year's winner of the Great Desolate Award was not the inventor of the telephone.
Nor was it the creator of tank.
One of the most sensational inventions this year came from..... Lai Te, who had been unnoticed!
This person was working on a machine that could fly.
After squatting in the laboratory for many years.
Leaving early and returning late.
He was less than 30 years old.
His head was already bald.
But in this year.
His project..... succeeded!
The first aircraft in the history of the Xia Kingdom!

In the witness of Yan, Ghost Buster and many other senior officials of the Great Desolate Army, the test flight was successful!

Upon seeing this humble glider fly to the skies.

Even Yan couldn't help but be quite excited!

She knew that.....

This represented the beginning of another era!

Since then.

There was another area of human exploration!

Sky was no longer a dream!

This year's Great Desolate Award was originally very competitive!

But after the plane came out.

There was no debate at all!

The bald boy Lai Te..... won the Great Desolate Award of the year without any suspense!

He was promoted to doctrate!

And he became the leader of the aircraft research team!

The importance of this group.

It was no less than Dr. Chen's biological weapons research team!

The years after that.

The plane was slowly being improved!

All sorts of little inventions and research were being born too!

It continued the second technology explosion since the invention of the generator!

The impact of the electric age on ordinary people.

It was much more obvious than the age of steam.

The most notable was..... electric light!

It had gradually replaced the original candles.

Into the thousands of households!

And during these ten years.

Benefits from the improvement of people's livelihood.

And the help of the sixth-level planet.

The population of Xia Kingdom also experienced an explosive growth!

The number even exceeded the total of Yan's first thirty years!

This also gave Blue Star a good vitality.

Jiang Fan took a look at the current Blue Star.

The numbers had changed quite a bit —

Name of the planet: Blue Star

Planet level: Level 1

Diameter of the planet: 803 km

Planet Species: 1430

Deduction route: none

From the high school entrance exam to now.

The diameter had improved a lot.

For the first time, it broke through to 800 km!

And at this time.

A pale voice suddenly sounded in Jiang Fan's mind—

“The new little fellows!”

“This is..... Spirit of the Planet!?”

Jiang Fan immediately recognized the somewhat familiar voice.

It was not exactly same as before.

When I just entered the university entrance.

That voice in mind!

It was not just Jiang Fan.

In the freshman dormitory area!

Each one of the newly arrived students.

All of them stopped their movements.

They listened carefully to the voice in their head.

Because.....

They knew.

The ability to make the spirit of the planet speak by itself.

Something big must be going on.

“This year's heavenly selection has been canceled, and I will no longer accept disciples in the future.” The voice of the planetary spirit continued to sound: “But in order not to disappoint you little guys, let's change it to the Freshman Challenge!”

“Whoever can win the Freshman Challenge, then.....”

“He will get my specially refined star space!”

“All of you little ones!”

“Show your strength to your heart’s content!”

As the voice of the spirit of the planet fell.

After a short period of silence!

All of the villas..... exploded!

“Star Space!!!”

The next door to Jiang Fan.

In a villa.

Lin Ke’er was having a small gathering with several new students who were also from Dongyang Province!

At this time, their eyes widened involuntarily!

Even if it was Jiang Fan!

He was also a little surprised!

This star space.

It was not the same thing in the college entrance examination square.

Instead.....

It was a real star space!

Only planets of level six or higher could make them!

It’s value was incalculable!

It was far more than any treasure!

Even more than the Heart of the Stars!!

Chapter 320: Freshman Challenge! The most precious treasure! Star Space

“Ah, the star space.”

Inside a villa.

Bu Jing Yue was sitting with a middle-aged woman.

They were also discussing.....

These words from the Spirit of the Planet just now.

As Jiang Fan thought.

This mentor chosen by Bu Jing Yue.....

It was her teacher’s best friend!

She also created a civilization of immortal cultivation!

"I didn't expect that such a big deal would be made this time to compete for that demon!"

The middle-aged woman sighed.

"Competing for the demon?"

Bu Jing Yue was a little puzzled.

"You don't think that something as precious as the Star Space is really a prize for the Freshman Challenge, right?"

The middle-aged woman smiled slightly.

Shortly after the voice of the Planet Spirit sounded.

Jiang Fan received a communication from Su Jicheng.

"Jiang Fan, you should have heard the announcement from the Spirit of the Planet!" Su Jicheng asked.

"I heard it."

Jiang Fan said.

"Although you already know it, as your admissions teacher, I have to officially inform you. For some reasons that I don't know, from this year onwards, the heavenly selection will be canceled."

Su Jicheng said: "As a replacement event, there will be a freshman challenge this year!"

"The prize is the star space, you should know this, right?"

"I know, but..... I am not very clear."

Jiang Fan said.

"Star Space, as the name implies, is actually a space." Su Jicheng explained, "Do you know how big this Beidou University of ours is?"

"I'm not sure."

Jiang Fan said bluntly.

"I'm not really sure about the specifics either."

Su Jicheng smiled and said, "But..... in the past few days, you should have felt the changes on your planet!"

"Yes, the enhancement effect of the sixth-level planet is still very obvious." Jiang Fan said.

"In fact....."

Su Jicheng said, "Our Beidou University is not really on this level six planet, but is divided in a..... huge space!"

"This space is the..... star space!"

"It was made by the spirit of the planet with a trace of the origin power of this sixth-level planet!"

"There are all kinds of incredible effects!"

"However....."

"Because there are hundreds of thousands of people in total at Beidou University!"

"So the effect that each person enjoys is very little!"

"And the prize that the spirit of the planet said just now is this star space....."

"It's a smaller version of the star space where we are!"

"It inherits all the effects!"

"In addition....."

"For a single person, the effect is a double-enhanced version!"

"How could such a treasure actually be used as a reward for the Freshman Challenge!?"

Jiang Fan also heard and understood.

But then.....

Then there was a doubt!

One could say.

The applicability of the star space!

It was broader than the heart of the stars!

Basically!

As long as the planet master could use it.

And the heart of the stars was for some planet masters who had created several transcendent species.

It might not be that necessary.

But the star space was different.

This could only be condensed from a sixth-level planet.

Putting it outside.

I'm afraid it's going to cause a lot of powerful planet masters to kill each other!

"If the Heart of the Stars is outside, it may be possible to buy it, but....." Su Jicheng smiled and said, "The Star Space is absolutely priceless!"

"No one will take it out and sell it!"

"Because it will consume a trace of the origin power of the sixth-level planet!"

"In general....."

"It is impossible for a sixth-level planet to condense a star space!"

"And this time....." Su Jicheng paused and said with some emotion: "It's not for the reward of the Freshman Challenge, actually....."

"It's a deal!"

"Deal!!!"

Jiang Fan raised his eyebrows.

"Right."

Su Jicheng continued: "This matter is not a secret, many teachers know it!"

"This year in Yongyang Domain, a monster with a very terrifying talent has appeared!"

"Our thirty-six super-first-class universities are all competing!"

"Yongyang Domain!?"

Jiang Fan thought faintly.

Then he just remembered.....

This was also an area under the Federation.

The federation here was said to be a federation.

In fact.....

The structure was very loose and broad.

Its territory was vast and boundless!

It consisted of domains and forces!

How many were there?

Nobody knew for sure!

Like the provinces.....

It was only equivalent to one of the regional divisions.

There were other regional divisions as well.

For example, domains, sects, various islands, etc.!

A lot!

Because these had a long history!

Plus the federal structure was loose.

And nobody bothered to unify the naming of the zones!

And Yongyang domain.....

It was the largest of all domains!

This domain was owned by the Yongyang Dynasty!

The monarchy was also adopted.

“This demon is the third-ranked prince of the..... Yongyang Imperial Dynasty.”

Su Jicheng continued: “The outside world calls him Prince Qing!”

“This Emperor Qing has incredible talent!”

“At the time of the high school entrance exam.....”

“The diameter of his planet had reached 600 kilometers!”

“It can be ranked second in our school for nearly a thousand years!”

Jiang Fan was not much different.

Dongyang province was only a small province after all.

Jiang Fan’s perfect score was the record of Dongyang Province.

But for many provinces.

Every year, many students were able to get a perfect score!

“You also got full marks in this subject in the college entrance examination. You should know how incredible it is that the diameter of the planet has reached 600 kilometers in just three months after awakening!” Su Jicheng said with emotion.

“I know something in general.”

Jiang Fan smiled gently.

More than five hundred kilometers.

The higher you go, the harder it gets!

Six hundred kilometers was indeed very unbelievable!

“So the thirty-six super-first-class universities, even the Sixth Academy of Starlight, are madly competing for this Prince Qing!”

Su Jicheng continued, “Even.....”

“No blood is spared!”

“One university has even offered a high price of ten billion dollars!”

“Ten billion!!!”

Jiang Fan was a little surprised.

Originally.....

The diameter of a planet of 600 kilometers was so valuable!

Wasn't it a big loss for him!

Of course.

Jiang Fan just complained.

Now the diameter of his planet had exceeded 800 kilometers!

If he let people outside know about it.

Then it was not unbelievable!

Instead.....

Hell no!

“Our school had no choice but to come up with such a killing move.” Su Jicheng said with some emotion, “Using the star space as a bargaining chip to gain the favor of this Emperor Qing!”
