

One Planet 341

Chapter 341

341: Planet promotion against the odds!

Jiang Fan thought to himself, "I wonder if I can reach the upper limit of a first-class planet?"

The upper limit of a first-class planet was

Infinitely close to a thousand kilometers!

"Next."

Su Jicheng looked at Jiang Fan and continued, "Emperor Qing's side will definitely go all out to prepare for the planet's promotion!"

"Although they don't have a star space, they have a similar thing."

"Something similar?"

Jiang Fan raised his eyebrows.

"Right."

Su Jicheng nodded and said, "This university of ours is a big star space, and those people in Ao Xiong"

"Once at great cost, using a formation of a formation planet, the role of this large star space coalesced and doubled the amplification!"

"The effect after amplification should not be as good as that star space given to you by the planet's spirit, but it is not much worse!"

"But"

"The daily consumption of this formation is very terrifying!"

"Even Ao Xiong those people can not afford to consume, at most can only support two or three months continuously!"

"But these two or three months should be enough for Emperor Qing!"

"Enough for him to develop the planet to its upper limit!"

Hearing this, Jiang Fan faintly nodded his head.

Su Jicheng couldn't help but smile and said, "Talking to you about Emperor Qing isn't just for comparison, but"

Su Jicheng's tone became somewhat solemn and said, "Our Beidou University has a thin base and limited resources!"

"Each freshman class will only select the most outstanding one to cultivate!"

"So, now the university is trying to choose between me and Emperor Qing?"

Jiang Fan understood at once.

“That’s right.”

Su Jicheng nodded and said, “Although you’ve already defeated Emperor Qing, Emperor Qing also has an advantage!”

“He is the royal son of the Yong Yang Dynasty, and the one who has the most hope of succeeding the throne!”

“And he also has created a King-class Golden Behemoth!”

“And although your musketeer is strong, it is a brand new civilization, and no one is sure of the future!”

“I understand.”

Jiang Fan nodded slightly.

On the outside, many considered the Musketeers to have the potential of a super civilization!

That’s right.

There was just potential according to the civilization’s classification standards.

Whether a civilization was low, medium, high or super It depends on the upper limit of civilization!

Take for example the Behemoth civilization both high and super were available.

It was a generic term.

It depends on what kind of Behemoth was inside!

Ordinary Behemoth was even a senior civilization and the golden Behemoth!

It was a super civilization!

Because in the long history,

There had been planet masters who built the Golden Behemoth civilization promoted to the sixth level!

As long as a civilization could be promoted to level six!

Then This civilization was a super civilization!

A civilization could be promoted to level five at most!

Then it’s an advanced civilization!

And so on!

Let’s say why Bu Jing Yue’s Xiu Ling Clan was a super civilization.

It was because in history Someone built the Xiu Ling Clan into a level six planetary civilization!

And a brand new civilization like Jiang Fan.

There were naturally many in history.

What level of civilization to locate depended on the final promotion level of the planet!

“So, I’ll have to fight even if I don’t?”

Jiang Fan smiled faintly.

“It can’t be helped.”

Su Jicheng smiled and said, “It can only provide Top resources like star space by a level six planet master, but it requires the level six planet master to consume a trace of origin power!”

“This will cause damage to the planet master!”

“It’s equivalent to a person drawing a large tube of blood!”

“That great being would not do this if he did not encounter a demonic genius.”

“In the past, there were even six or seven consecutive years where not a single new student could get a star space!”

“And this year, it was because of the appearance of Emperor Qing, of course

“And now there’s you as well!”

“If you do not compete, the star space is still yours, but they will offer all sorts of other precious resources in large quantities to Emperor Qing!”

“Behind him stands the Yong Yang Dynasty, the school originally” Su Jicheng’s eyes flashed a trace of inexplicable color, said: “is intended to Emperor Qing as he is well cultivated, sitting on the Yong Yang Dynasty heirship, better alliance!”

“ButThere is some recognition that this does not approve!”

“After all, Emperor Qing is still a member of the Yongyang Dynasty after all, and you” Su Jicheng looked at Jiang Fan and said, “The body is clear, and if you are trained, you will truly be one of our own in the future!”

“Many leaders and teachers are controversial!”

“But now there is little point in who supports more, it is well known”

“To train, or does it also depend on the promotion of your planet?”

Jiang Fan nodded slightly.

These he could also think of.

“Planet promotion is so important because it will redefine talent of each planet!”

Su Jicheng said in a deep voice: “The diameter we are talking about is only one of the main criteria used by first-class planets to show the planet’s talent!”

“In fact

“It can’t represent the full range of talent!”

Jiang Fan immediately thought of Tang Qingqing.

Tang Qingqing’s planet did not have a diameter of over thirty kilometers.

But built two transcendent races.

Better than many geniuses with a diameter of more than thirty kilometers!

“A true planetary talent is every aspect of that planet, all encompassed.”

Su Jicheng then said, “There are also levels, not simply or roughly by the use of the diameter of the planet to divide!”

“They divided the planet’s talent into according to low to high”

“Ordinary level, elite level, commander level, king level, epic level, legendary level, mythical level and The highest eternal level!”

Jiang Fan had little doubt.

Naturally, he had heard of these things.

“The first-level planet is very simple, and the talent can be basically determined by directly using the diameter of the planet!”

“And the planetary promotion assessment will determine which level of talent your second-level planet belongs to!”

“The assessment task is automatically issued by the awakening space at that time!”

“The difficulty of the task will be chosen by each planet master himself!”

“The higher the difficulty, the more difficult it will be to complete!”

“But upon completion, the higher the planetary talent!”

Speaking here Su Jicheng paused for a moment.

Looking at Jiang Fan, he said, “Like the planet’s talent level, the difficulty division of the planet promotion assessment task is also

“Ordinary level, elite level, commander level, king level, epic level, legendary level, mythical level and The highest eternal level!”

“Which level of difficulty you complete, then

“What level is the planet’s talent after promotion!”

“Let’s say You complete an elite-level assessment mission, the upgraded planetary talent is elite-level, and has absolutely nothing to do with your first-level planetary talent.”

“What if I cannot complete the task?”

Jiang Fan asked with a smile.

“If you can’t complete the mission, then naturally you will fail the promotion and stop at level one.” Su Jicheng smiled and said, “Even if it’s Emperor Qing, after failing!”

Chapter 342

342: Planet promotion against the odds!

“He also has no more hope and is worse than the least talented level two planet master!”

“So

Su Jicheng’s face became serious and said, “You must recognize your own strength and choose the task that you can ensure to complete!”

“In the past history There have been many geniuses who failed because they wanted to challenge a higher difficulty!”

“Many of them have met their own demise afterwards!”

“Especially for geniuses like you, it’s especially important to pay attention to this!”

“So, what difficulty do you think I should choose?” Jiang Fan asked.

“It’s unclear at the moment.”

Su Jicheng shook his head and said, “This is something that outsiders can’t give an opinion on.”

“Only the planet owners themselves know best about the development of each planet!”

“But you have to roughly estimate the upper limit of your planet’s development!”

“For example, eventually it will develop to eight hundred kilometers, or more!”

“Use this to make a choice of the difficulty of the assessment!”

“After determining the difficulty It is necessary to take on the task of that difficulty to prepare!”

“-Generally.....”

Su Jicheng paused for a moment and said, “The maximum difficulty for planets with a diameter of 500 kilometers is elite!”

Su Jicheng paused for a moment.

Speaking of which.

“The upper limit of six hundred kilometers, the maximum difficulty to choose at most is the king level!”

“The upper limit of seven hundred kilometers, choose the epic level is more stable!”

“And if you want to challenge the legendary level, or even the The mythical level!”

“The upper limit of the planet’s diameter must be at least more than eight hundred kilometers!”

“But this is only the usual case, there are exceptions!”

Su Jicheng smiled and opened the communicator and projected a piece of information inside into the air.

Jiang Fan looked at it.

It was exactly the students of Beidou University at the first level in previous years.

Taking the planet promotion test!

There was the planet diameter in the front.

The back had the difficulty of the test chosen.

And the final result!

“Look at this one.”

Su Jicheng pointed to a student in the projection and said, “This is a student from over sixty years ago, when the upper limit of his planet’s diameter was over five hundred and fifty kilometers, not even six hundred kilometers!”

“And he was over five hundred kilometers when he enrolled that year! It was one of the top five freshmen that year!”

“His later development was very out of whack!”

“According to what I said above.”

“His planet diameter, the most secure, should be to choose the commander class, at most the king class!”

“But”

“This student was not willing, plus his girlfriend ran away with someone, he was so ruthless that he directly chose the Legendary level!”

“The final result, as you can see”

“He changed his fate against the odds!”

“This is the only example in recent centuries that has succeeded against the heavens!”

“Look at these other students again.”

Su Jicheng pointed to one of the other names on the projection and said, “There are quite a few who dare to challenge themselves and their destiny!”

“But all of them failed in the end!”

“Not to mention our school, even in the entire history of the Federation

“There are few who have changed their lives against the odds!”

“This is just a gimmick from the outside. If you really believe it, it will be doomed, especially for a genius like you!”

Su Jicheng’s tone became very serious at the end!

Jiang Fan also understood.

It’s not the same as taking a high school exam.

The college entrance examination was messed up.

There might be some hope!

But planet promotion failure means that you really fall from the clouds into the mud!

No more chances!

No wonder so many geniuses have fallen on their own!

But The reason why geniuses are geniuses.

Because they were high-minded and arrogant!

Who wanted to challenge higher difficulty.

Let your planet get higher talent!

Between each level of talent

There was a huge difference!

“According to my guess.”

Su Jicheng sent the projected information to Jiang Fan at once, while saying, “On Emperor Qing’s side, the difficulty chosen is at least epic level, legendary level is most likely, even if the planet develops well

“Mythic level is not without hope!”

“What about the eternal level?”

Jiang Fan asked rather curiously.

“Eternal level!?”

Su Jicheng faintly froze, then shook his head and said, “Don’t get hung up on this.”

“Do you know, in the entire history of the Federation, how many people have passed an Eternal Grade difficulty mission?”

Not waiting for Jiang Fan to answer.

Su Jicheng extended a finger, then shook it and said, “Not a single one!”

“Not just in the Federation’s history!”

“Not even in the the entire history of the development of the planet.”

“And never heard of anyone completing this final pole of difficulty!”

“The entire history of the planet, that’s an endless number of long years!”

“From ancient times to the present, there are countless geniuses who have challenged the eternal level of difficulty!”

“Most of them are in that ranks of the most demonic in all eras, stronger than Emperor Qing by an unknown amount!”

“But they

“Also failed, all of them!”

“None of them succeeded!”

“There are many powerful planet masters asserting that!”

“This is not a difficulty that can be completed at all! Maybe it’s just a joke of Awakening Space!”

“Don’t think about it.”

Su Jicheng looked at Jiang Fan and warned, “You can even consider challenging the Myth level difficulty, but the Eternal level is just a story to look at!”

“Even those geniuses who are the strongest in the history of our thirty-six superlative academies!”

“Many of them were overconfident and went to challenge the eternal level, and finally

“They all died miserably!”

“It’s too far off.”

“What about the Mythic level!?”

Jiang Fan raised his eyebrows.

“Mythic level is also divided into small myths, and great gods live, small myths. You can see how your planet develops and try to challenge it.”

Su Jicheng added: "That Prince Qing, if you want to challenge the difficulty of the mythical level, it is estimated that"

"It's a little myth at most!"

"Great mythology is also very difficult!"

"You should consider it, figure out the difficulty of the promotion you want to challenge, and then..."

Su Jicheng looked at Jiang Fan and said solemnly, "For this difficulty, make adequate preparations!"

"Don't worry about anything else!"

"Prepare this planet promotion with all your heart and soul!"

"The corresponding resources I can get or even if I can't I'll try. You also do not worry too much!"

After Instructing a lot Su Jicheng patted Jiang Fan's shoulder.

Only then did he leave!

After Su Jicheng left.

Jiang Fan poured himself a glass of water while sitting on a chair.

He considered the problem of choosing the difficulty of planet promotion!

Different difficulties later correspond to unique talents!

He only had one opportunity!

Failure is the end of the game!

Must be careful and cautious!

"Should I choose the King level? Epic? Legendary? Mythic? Or the eternal The eternal level no one has ever completed it!"

Chapter 343

343: Difficulty Selection! The result of deduction!

After walking out from Jiang Fan's villa Su Jicheng did not leave directly.

Instead, he looked back at the direction of the villa.

There was also some emotion on his face!

Su Jicheng was also in the school as a tutor for nearly twenty years!

There were also many students he had taken!

Those who would enter the super-first-class universities..... The top group of geniuses in each province!

Who were not high-minded and arrogant.

The most important thing was that you have to be very proud of yourself.

Some things

Even if you are careful several times, these geniuses might not listen to it!

Especially on something as important as planet promotion.

Against the odds was only a very small number.

It's more...the fall of a genius!

Resulting in a broken path ahead!

Eventually Seeking their own death!

Not to mention a genius like Jiang Fan who could defeat Emperor Qing.

"I hope Jiang Fan can be a little more secure. With Jiang Fan's strength to build a musketeer, it should be more secure to pass Legendary difficulty!"

Su Jicheng thought to himself.

It's just that.....

Su Jicheng was afraid that Jiang Fan would not be willing!

He would choose a higher difficulty!

"If you want to choose a higher mythical level difficulty, the small mythical level will do, don't choose the big mythical level."

Su Jicheng was even more nervous than Jiang Fan himself.

For Su Jicheng there were dozens and hundreds of students.

None of them could compare to one as demonic as Jiang Fan!

As for the Eternal level

Su Jicheng didn't think Jiang Fan would be confident to this extent!

Inside the villa Jiang Fan was looking through the information Su Jicheng had just sent.

While considering what difficulty he should choose!

Inside the information he Looked at the difficulty and results chosen for the promotion of the student planets of Beidou University in previous years!

The completion rate of promotion tasks was still relatively high.

But there were many failures!

"According to all the years, there is a big difference in the difficulty of each level."

Jiang Fan muttered, "But"

"There's also an equally huge gap in talent at each level!"

“What if Emperor Qing completed a legendary level mission, then

“His future planet is a legendary level talent!”

Planet talent was too critical.

It would determine every aspect of a planet.

For example

Survival environment, mineral resources, quantity and quality of life, etc.!

Especially for transcendent species!

More supernatural beings with higher talent would be born!

That would be the birth of more geniuses!

For example, Emperor Qing’s planet was legendary level talent.

Then his planet was going to give birth to more Amethyst Behemoths!

If it would be mythical-level talent.

Then probability would be even higher!

And if it would be at an eternal level Basically, you could be sure.

The birth would be almost all Amethyst Behemoths!

“The gap between the Eternal and Mythic levels was even greater than the gap between other levels!”

Jiang Fan thought darkly.

“The technological civilization I’m building actually needs more than other transcendent civilizations geniuses!”

“Especially the kind of epoch-making genius!”

The explosion of technology needs the support of fundamental theories!

And a big breakthrough in basic theory

That’s not a quantitative change that could reach a qualitative change!

It was the domain of geniuses!

And it must be an epoch-making super genius!

Like Yan!

The earth was in the previous life.

At the time Jiang Fan was crossing, the technology was changing day by day.

Seemingly very rapid development.

But!

The basic theory was nearly a century with no major updates!

The current Blue Star was already about to come to that stage in the previous life.

Back to Jiang Fan could not guide.

From surface civilization to interstellar civilization again.

That would require even more theoretical support from epoch-making geniuses!

“The school chose a key training point for me and Emperor Qing. It should be based on this planetary promotion assessment.”

Jiang Fan quickly figured out what Su Jicheng had just said.

“Whoever ends up with the higher planetary talent, that’s who it is!”

Jiang Fan thought nothing of it.

With Blue Star’s current level of technology,

Completing the legendary level of difficulty It should be a sure thing!

“Mythic level is also possible? What if it’s the Eternal level?”

Jiang Fan couldn’t help but think of this final difficulty.

“If Blue Star can turn into an eternal level talent, then”

“It should be able to give birth to more geniuses similar to this level of Yan, or even higher!”

But this was difficult!

Jiang Fan was really not sure at all!

Jiang Fan also had some understanding of this world.

Planet development history was very long!

In terms of epochs, It was not enough!

So long that no one could tell.

This world was also huge!

No one knew how big it really was!

There were so many top geniuses in all regions!

From ancient times to the present for so many years.

There are so many geniuses who challenge the Eternal difficulty of Ganges like Xingsha!

But Not one of them succeeded!

All fallen!

But if I only choose the mythical level of difficulty.

Jiang Fan was unwilling again.

He thought for a long time.

Jiang Fan suddenly remembered

He himself seemed to have a system.

After thinking for a while.

Jiang Fan asked the system, "System, if I choose the Eternal level difficulty, what are the odds of passing it then?"

Chapter 344

344: Difficulty Selection! The result of deduction!

A moment later The result of the system's deduction came out –

Extrapolation route: Host's probability of passing the eternal level difficulty.

Extrapolation result: 30%.

"Thirty percent!?"

Jiang Fan couldn't help but raise his eyebrows.

This probability would be a little too low!

If it was for the other most demonic geniuses.

It would be considered very good.

But for Jiang Fan.

It's totally a gamble with life!

"It's just that"

Jiang Fan thought at this point: "It should result from extrapolation according to the current normal development rate of Blue Star."

There was no external interference.

Jiang Fan could basically imagine.

Blue Star's technology level would be after the second technological explosion.

He might fall into a slump, crawling forward!

By then, the warfare power would not be much stronger than now!

Because

Research in various fields was continuing though.

But the basic theory,

There had been little breakthrough.

And inside the Blue Star there was no war.

A lot of things just don't develop at all!

Instead, these years.

Entertainment and culture and other tertiary industries

There were signs of the rise!

Afterwards, the people of Xia lived and worked in peace and happiness.

Naturally there would be more spiritual pursuit!

Television, cameras, film technology had been born one by one.

And flourished as well!

It was also the inevitable trend of history!

Jiang Fan was not much of a surprise.

Into the awakening space.

Jiang Fan checked out the current level of technology in Xia!

Especially in the military!

“With the current level of weapons, it's still far from enough to challenge the Eternal level difficulty.”

After observing a circle.

Jiang Fan had a preliminary judgment In his mind.!

He couldn't help but think of the former Earth

The most terrifying kind of weapon!!!

But with Blue Star's current technological direction.

Obviously he was more enthusiastic about biological viruses and metal alloys!

In a short time There would not be a breakthrough in another field!

Jiang Fan found Yan and was ready to talk about it.

It was like the guidance he gave to Yan when he was in his teens.

At this time, Yan was nearly fifty years old.

The beautiful face had wrinkles crawling!

But the smile was still beautiful!

With years of sedimentation and blandness!

After the glory conquest Someone hinted at Yan to consider a lifelong event.

But it was rejected by Yan.

Since thenNo one mentioned this aspect!

The Great Desolate Army was strange.

Someone also advised Yan to claim the empire.

Yan also rejected it!

The throne of the emperor in the palace.

The one sitting was still the puppet who was about the same age as Yan!

The air trembled slightly.

At the time when Yan was watching the starry sky at night.

Jiang Fan appeared.

“Father God!”

There was still excitement in Yan’s eyes.

“If there was a weapon a hundred times more powerful than the Sky Rift Cannon, what do you think it would be!”

This time

Jiang Fan was the same as when Yan was a child.

Using the method of air vibrating out of sound!

Yan faintly stared.

Immediately afterwards a hint of joy flashed in her eyes!

She naturally reacted.

Wasn’t this the way Jiang Fan had taught her when she was a child.

“If such a weapon really existed, wouldn’t it be able to extinguish the world?”

Yan began to seriously consider this question Jiang Fan asked.

“Is Father God trying to solve the more powerful transcendent?”

Yan asked.

“No.”

Jiang Fan said, “Inaccurate, the escalating conquest of the Blue Star is coming soon, and to get through the highest difficulty, more powerful weapons are needed.”

After saying these words

Jiang Fan left behind a deep-thinking Yan.

With Yan’s intelligence.

Naturally, she would think clearly about many things!

She didn’t continue to observe the starry sky.

Instead, she thought about

what Jiang Fan had just said.

“Is it an extinction-grade weapon?”

Yan looked up at the distant pale earth and muttered, “Wouldn’t it be enough to increase the scale of the Sky Rift Cannon by a hundred times?”

“No, that’s not right.”

Immediately after that Yan immediately shook her head.

“Let’s not talk about whether this vision is practical, but Father God should not mean this.”

This night, Yan rarely fell asleep at night.

She thought for a long time in bed.

But there was no clue.

Jiang Fan silently observed.

In terms of intelligence, Yan was even more intelligent than Kai!

Even Jiang Fan did not need too many hints.

Just say one or two edge-related words.

Yan could comprehend it all.

“Ding-dong!”

At this time the communicator suddenly sounded an alert.

Jiang Fan picked it up and took a look.

He found that

It was the admission bonus promised by the school earlier that arrived A whole billion!

“This should be related to Teacher Su, right?”

Jiang Fan instantly understood.

If you follow the normal process.

How could it be so fast?

Jiang Fan first spent one hundred million.

Purchased some Origin Power again in the school mall.

Then re-entered the awakening space on the Blue Star.

Three days had passed.

Yan still did not know.

But she changed her strategy.

She was no longer thinking on her own.

Instead, she prepared to inspect one research group after another.

To see if she could get inspiration from other scholars or.....

Get inspired!!

Chapter 345

345: Choice of extinction-grade weapons! A sudden inspiration!

The Transcendent Research Institute in the middle of the Royal Tomb Mountain Range!

At this moment It was still in the midst of a busy time!

But the scale was already quite small compared to its peak.

The height of its peak, Naturally, was the period when they were preparing for the conquest of glory.

The entire summer country, Tens of thousands of scholars.

Over eighty percent. All were here.

After the latter's glory, the formation of the war ended.

Yan relaxed the restrictions on scholars.

The Academy of Scrupulous Things, the Academy of Heavenly Engineering, the Academy of Medicine, and the Academy of Science and Technology!

These were the four current academies in Xia.

More than half of the scholars concentrate on these four academies!

The rest were still staying in the Transcendent Research Institute!

It was also the most elite group!

The private capital also began to develop slowly!

There were many private workshops or factories!

But it was different from the previous world.

Like the financial industry, stocks and bonds, etc.. had not yet appeared.

One aspect is the influence of policy.

The other side Xia's population was still not large enough.

Many things simply could not be useful.

But the number of scholars was increasing day by day!

It was because of the status of scholars In the society.

It could be said that

Scholars were the most valuable and status of the profession!

The treatment was also very good!

Once you became a scholar, you would be assigned a house and a job!

A lifetime of food and clothing!

In the eyes of every mother-in-law...the best son-in-law!

Contrary to that,

Various local officials were not so popular.

The most popular exam of the entire year was in the summer country.

From the original imperial examination.

Turned into a scholar exam!

Every year, thousands of people apply.

And only by passing the scholar exam could they become a scholar!

Yan issued A scholar's certificate herself!

Under the impetus of this trend.

At this time, the Xia already had over 100,000, including scholars in various fields!

Although the second technological explosion was ending.

But all kinds of research was still popping up!

Who all wanted to be like Laite, Dr. Chen.

And wanted to create an amazing invention!

To be promoted to PhD and get fame and fortune!

Inside the Institute of Transcendent Research.

Life was full of excitement!

One by one, scholars were walking around.

Some were arguing fiercely about a particular issue.

Some gathered together to discuss something.

Some were looking at the sky with their heads and muttering to themselves.

In particular, Dr. Chen and Laite's research group was the most lively.

In these two people's groups the number of scholars was now over a hundred!

The scale was very huge.

The top was also important.

Laite's aircraft had been developed to the third generation!

After gliders, jets.

Laite was ready to develop more advanced aircraft!

And Dr. Chen's group was busy with research things

That was a lot!

It was full of all kinds!

Two guards accompanied Yan.

She was visiting silently.

And swept a few glances.

The stronger virus that Dr. Chen was preparing to develop Should not be the weapon she wanted!

It might not have a small killing power to be used against powerful transcendent individuals.

There was still something to be done!

Yan arrived at Madman Bear's lab.

According to the last scholar's suggestion,

Madman Bear had already developed a small armor.

But that super large armor still hadn't been dismantled.

Madman Bear still had not given up at this plan!

Yan could only look at it a few times.

And then go away!

It might have potential in the future.

But at present it was just a fancy!

An ordinary shell down to kneel!

Walking around

Yan came to a silent area.

Slightly stunned.

Then she realized!

Wasn't this her old job – the physics research group?

There were quite a few physicists inside.

But one by one, they were all quietly doing experiments.

Not as noisy as outside!

Yan suddenly remembered.

Since the last research on energy.

She also had a long time.

And did not create a brand new theory.

She took a trip to the research institute.

Yan still had little thought.

She did not stubbornly go on.

She gathered a group of scholars in chemistry, physics and biology.

And had a discussion!

“With our current level of technology and theory, is it possible if we want to invent a terrifyingly destructive weapon?”

Yan scanned the crowd and asked.

“A destructive weapon! Terrifying!?”

Most of these scholars were PhDs!

All had taken part in foreign conquests.

As soon as they heard Yan’s words.

They guessed that

This was going to deal with powerful transcendent individuals again?

And with the current weapons, it was not enough?

“They can develop the Super Rift Cannon.”

An old doctor took the lead and spoke up.

The crowd turned their heads to look.

This old doctor was the leader of that research group of the Rift Sky Cannon!

Not only the first Rift Sky Cannon created by him.

The various cannons that were improved later on.

He was also the old doctor who presided over it.

In terms of high-powered weapons.

No one had more say than Dr. Laite!

“How powerful can it be?”

Yan asked.

“If conditions allow, by gathering the nation’s strength, we can create a super cracking cannon that is ten times more powerful than the current one!”

The old doctor said in a very confident tone!

“Ten times greater!”

He staggered other scholars in the field!

All of them had seen the power of the Rift Sky Cannon.

It could blast the Flame Giant directly into slag!

One cannon down.

It could fracture the walls of the capital!

If this was ten times bigger!

It is estimated that a small half of the capital would be lost!

“Any other ideas?”

Yan, however, did not deny it and continued to ask.

The crowd was slightly stunned!

Yan was not satisfied with the Super Rift Sky Cannon!

The old doctor frowned slightly.

In terms of single-unit power,

The Super Rift Sky Cannon was the strongest weapon he could think of at the moment!

The others were also silent for a while.

Including the biologists.

Not even the Super Rift Cannon could do it.

Then I guess any zombie virus was even worse!

“There is no need to limit ourselves to the current conventional technology, we can envision more from other aspects.”

Yan prompted, “As long as you think it can explode with amazing power!”

Speaking of which Yan did recall what she had read in the diary left by Kai.

At that time, The inspiration for Kai to develop gunpowder was from among the fireworks!

Of course.

Kai did not write that this was from Jiang Fan’s prompt.

The crowd looked at each other!

Quietly discussed for a long time.

There was no idea!

Even after an hour, It was still the same.

Despite much discussion.

Every scholar was desperately trying to figure out what to do.

But whatever they thought It wasn’t helpful at all.

They were discussing the same old conventional weapons!

Nothing more than associating around artillery shells, sniper rifles and biological weapons!

Although Yan still did not know what Jiang Fan wanted.

But intuitively she could feel it.

Chapter 346

346: Choice of extinction-grade weapons! A sudden inspiration!

These were definitely not the "world-ending weapons" that Jiang Fan needed!

So the discussion was about to end.

As the crowd was still talking about these things.

And Yan was also a bit helpless.

She could only announce the dismissal.

Suddenly

This time, a young scholar sitting in the back row raised his hand!

"Hemmer, do you have any idea?"

Yan recognized this young scholar.

He was just under twenty years old.

The youngest one in the entire Transcendent Research Institute!

He took the scholar exam this year with an excellent score of first place.

He was recruited into the Transcendent Research Institute.

He is also the only one among all the new scholars this year... to enter the Transcendent Research Institute.

The crowd was looking at him.

Hemmer still had some traces of immaturity on his face.

Immediately

He gathered courage and said, "If we are talking about that kind of powerful weapon, I do have an idea."

"Don't worry, just say it."

Yan said encouragingly.

"I think our thoughts should not be limited to the weapons we humans make."

Hemmer stood up and said.

"What you mean is"

Yan's eyes widened slightly.

All the scholars were smart people.

They instantly understood Hemmer's words.

“Compared to the power, even if we can develop a super Rift cannon or a more powerful weapon, the strongest still exists in nature.” Hemmer said loudly, “For example, storm wind, sea waves, earth movement and so on!”

“Which are all a hundred times, more than a thousand times stronger than the Super Rift Cannon!”

The other scholars were frozen.

What Hemmer said about this was..... Although very unusual.

But indeed, it was also an idea!

It's just that No one thought of it before!

In front of these terrifying forces of nature.

Humans still seem too small!

“What you said is indeed a direction, but”

The old doctor from before questioned, “How are we going to use it? If it can't be used for us, it's useless even if it's powerful!”

Many scholars were nodding their heads.

Borrowing the power of nature was not something that could be done at the current level of technology.

“Well...”

Hemmer was speechless.

He also just thought of all kinds of powerful forces in nature!

But he was thinking about how to solve this problem.

“Let's just put forward an idea first, speak freely, and be imaginative, without considering the feasibility of reality.”

Yan voiced out to relieve and encourage Hemmor!

“There are a lot of nature's various super-energy phenomena, and it's hard to borrow them, but we can consider imitating them.”

A scholar spoke up.

“Imitation?”

The others faintly started.

“For example, the storm wind, we can create a device to artificially generate the storm wind, and weaken its power!”

This scholar continued.

“Artificial windstorm?”

Many scholars’ eyes faintly lit up.

But not long after, One by one, they all shook their heads.

This idea was indeed bold.

But it was very unlikely to succeed.

Even if the technology was enough to support it.

But nature’s kind of powerful storm.....

How much equipment would be needed?

Same goes for other natural phenomena as well.

Earthquakes, waves, avalanches, etc. All had innate limitations!

Humans could only use it on a small scale!

It could not be replicated equally!

It was basically impossible!

This proposal opened up another idea.

But it ended before it even started!

Seeing this, Yan could only declare this meeting dismissed!

Back in the laboratory, Hemmer’s mind kept thinking about this matter just now!

“Isn’t there any natural phenomenon that can be replicated?”

Hemmer thought inwardly.

He was a little unconvinced.

He took a telescope with him and walked out of the research room.

Came to the high mountain near the King’s Tomb mountain range.

Overlooking the surrounding natural conditions.

It was autumn at this time.

There were streams and lakes and rivers in the distance.

The breeze was blowing around!

The mountains and forests were dyed with layers of trees!

Suddenly

Hemmer realized something.

He looked up to the sky.

Looking at the red sun hanging in the sky.

Jiang Fan made this by imitating the sun in his previous life with the power of his source.

Except for being smaller.

The rest was like the sun!

“The red sun emits light and heat, and it can still affect us from such a distance?”

Hemmer thought while observing, “Is it relying on its own combustion?”

Some doubts arose in his heart.

The combustion of mattercould reach at this level?

“Or, like gunpowder, several seemingly ordinary substances react with each other to achieve amazing power?”

The more Hemmer thought about it, the more excited he became.

He felt as if he had discovered the unimaginable secret!

“The top side of the red sun should be a completely new substance reacting, so
The power that explodes out is even more than gunpowder!”

Hemmer was very excited.

The whole body was trembling!

The young and tender Hemmer immediately ran back to the Institute.

He was ready to conduct experimental research.

But there was a problem

What substance reacts on the red sun?

He knew nothing about it.

The telescope couldn't see it.

Even the most advanced astronomical telescope couldn't find it either!

Hemmer was a little helpless.

To know what matter was above.

We must observe it.

To be observed, It must have a more advanced astronomical telescope!

It was not something he can do as a young scholar who just entered the research institute!

So!

Hemmer could only suppress his own blockbuster idea.

So he went out to find Yan.

After hearing the story of Hemmer.

Yan could not help but be stunned.

She could not help but look up towards the red sun!

Afterwards She slapped her head.

Why am I so stupid?

I've been observing the starry sky all day by myself.

I couldn't believe I didn't find this!

On the most powerful weapons.

I'm afraid nothing could be compared to this red sun hanging in the sky.

Yan immediately ordered and formed a research team to develop more advanced astronomical telescopes!

Because there was no need for this.

On the telescope, Xia's development was far below from the previous world.

But the telescope technology was easy.

After the concentration of human and material resources.

Soon Better astronomical telescopes were made!

It could observe the situation more clearly in the red sun!

It's just that the result was amazing.

There was nothing special about the substances initially probed above!

Mainly hydrogen and helium!

Nothing else unusual.

This discovery surprised both Yan and Hemmer!

By these elements alone, the red sun could release such powerful energy?!

But with the thinking of a top scientist.

It was an unusual thing. It excited Yan!

She realized that This could be a whole new field!

It could be something that had never been discovered before!

Yan immediately formed an elite team.

Because of the matter and elements involved.

She mobilized physicists and chemists to come over!

They took part together in researching the secrets of the Red Sun!

"Interesting."

Seeing this, the corner of Jiang Fan's mouth revealed a smile!

This wasn't quite the same process as in the previous life.

Yan and the others actually started their research on the element of hydrogen and nitrogen only
.....

The later development,

But it was a little unexpected for Jiang Fan too!!!

Chapter 347

347: Atomic Plan! The second land's most terrifying creature is born!

Hemmer's discovery made scholars like Yan all excited!

Many people thought that this was the door to a new world!

They only wanted to observe the matter present on the red sun through the telescope.

But it made them dumbfounded!

There was no special matter!

There was a lot of hydrogen and helium!

The crowd was naturally more familiar with these two elements.

At this time, chemistry was also developed to a certain level.

The periodic table of elements had long been established more perfectly, but relying on these two elements, was it able to generate such powerful energy?

A very large number of scholars expressed doubts.

Doubt was doubt, but the facts were in front of them.

This was something that no one could deny.

“This could be a whole new field.”

Yan scanned the crowd in the conference room and drawled, “All we need to do is”

“Find out the door to enter in this field!”

Yan gave an order.

A new type of research group was established.

All of them were elite scholars in physics and chemistry!

This time it didn't go so smoothly.

It took a long time to study, but they gained nothing.

This made many scholars, who already felt unreliable in their hearts, lose their motivation!

In response to that, Yan raised the volume rarely and Harshly criticized a part of the scholars and directly expelled an old senior doctor from the research group who was against her!

This one incident triggered an unprecedented shock within the Great Desolate Army, because, ever since Yan came to the side of the Great Desolate Army in her teens, she was always kind!

No matter how bad other scholars worked, she just delivered a few words of criticism.

It was never that much “terrible”!

But after this incident, many scholars saw Yan’s determination and didn’t dare to say anything else.

Yan directly ordered to hand over all the other chores All of them!

She let Ghost buster and others handle it.

She fully devoted herself to this new type of research!

She realized, This could be one of her most promising achievements for the rest of her life!

What gave Yan the greatest confidence was naturally A tip from Jiang Fan!

“Your Highness isn’t quite right lately.”

On a scenic trail outside the Wangling Mountain Range, Chang Yu Chun was walking with Ghost buster.

These two!

Nowadays, they were the Great Desolate Army apart from Yan.

The two people with the most prestige.

For Yan’s recent uncharacteristic behavior, many people within the Great Desolate Army had come to these two, to persuade Her Highness Yan.

However!

Whether it was Chang Yu Chun who had been with Yan for decades or the wise Ghost Buster, it was clear that underneath the surface of Yan’s calm.

She was very persistent.

Once she sets her mind on something, nine heads of oxen couldn’t pull back!

“Your Highness seems to be in a bit of a hurry.”

Ghost Buster nodded.

Both of them had heard that Yan was preparing to research the secret of the Red Sun!

For an outsider This sounds a bit exaggerated.

It had a bit of a “fire into the devil” meaning.

“Trust your highness.”

Ghost Buster said: “If there are any gossips outside, General Chang can be more decisive!”

“That’s natural.”

The corner of Chang Yu Chun’s mouth swept up a cold smile and said, “Some people are really looking for death, they really think that Her Highness is easy to bully!”

Although this world did not have the customs of the previous world, Yan was a woman as the superior and the most outstanding scholar.

But she still received a lot of criticism!

Especially over in the capital, the power of tradition was still very strong.

Gossip could bring a live person to death!

Chang Yu Chun was not soft hearted at all.

The next day, he brought the Great Desolate Army.

He immediately dispatched the army and the people who spread the rumors were all arrested.

Among them was none other than the old senior doctor who had just been expelled from the research group by Yan!

This person came from a wealthy family.

On account of his old qualifications, in the research institute, he was in command.

After being expelled by Yan, he was furious and returned to the capital.

He let people talk everywhere.

All of them were extremely unfavorable words to Yan!

Chang Yu Chun caught him red-handed.

Chang Yu Chun's methods were very ruthless.

He directly executed on the spot!

This incident shook the entire capital.

Chang Yu Chun also got a "Chang Butcher" title from this.

From then on, no one dared to speak up again.

On the side of the Transcendent Research Institute, the progress was not good.

Yan again mobilized more than a thousand scholars.

From the three colleges, the Academy of Scrupulous Things, the Academy of Heavenly Engineering and the Academy of Science and Technology also took some scholars

They Joined this research group.

With the codename "Red Sun" research group, the number of scholars exceeded a thousand.

It was the largest one ever!

With the joint efforts of so many people, one year after the establishment of the research group, there was some progress.

The scholar invented an instrument called a "regenerative spectrometer", which could weigh atoms.

Using this new instrument, the scholar experimented with weighing various atoms and one day; he discovered a strange phenomenon —

That was, that the weight of four hydrogen atoms was so much heavier than the weight of one nitrogen atom!

It was a strange phenomenon.

The weight of four hydrogen atoms should be exactly equal to the weight of one nitrogen atom.

This scholar could not figure out why.

He submitted a report on the phenomenon.

The research team at that time,

There was progress and reports large and small every day.

Yan did everything in detail and watched them all one by one.

This report from this scholar caught Yan's attention!

She immediately led a few backbones and researched this phenomenon!

Finally, Yan and several other scholars realized an amazing fact!

Hydrogen atoms could fuse into helium atoms, and the lost mass had been converted into tremendous energy!

As soon as this result came out, the entire research group went into a cheer!

They knew that the purpose for which they established this research group had been initially achieved!

It was now basically conclusive.

The terrifying energy inside the Red Sun was derived from fusion energy from atomic fusion!

It was not some mysterious substance as previously speculated!

Yan was also very excited!

She took a long breath of relief!

This year, she also heard a lot of outside rumors.

The pressure was very high!

She was afraid that her initial decision was wrong, but the fact proved once again.

An epoch-making genius like Yan had a super intuition that was incomprehensible to ordinary people!

Immediately after that, all kinds of research around atomic fission began.

Many scholars were like chicken blood.

One month later, the phenomenon of nuclear fusion was experimentally proven.

A preliminary definition was also born —

A form of nuclear reaction in which atoms of small mass, mainly deuterium or tritium, under certain conditions (such as ultra-high temperature and high pressure), nuclei fuse with each other to produce new nuclei of heavier mass, accompanied by a huge release of energy.

But it was useless, because after people discovered it, they wanted to make atomic nuclei fusion!

The conditions were very harsh!

Through their assumptions, they needed high temperature and high pressure similar to that inside the red sun!

There was no need to think about high pressure!

On the blue Star, it was simply impossible to achieve.

That's over 10 million degrees!

Mind-blowing!

Chapter 348

348: Atomic Plan! The second land's most terrifying creature is born!

Where was the current level of Xia technology that could create it?

"I feel like it's easier to build a storm generator!"

A scholar reluctantly joked in private.

The project entered a dead end again, but things were working!

Although realizing the enormous difficulties, Yan and other scholars did not give up.

They did everything to create high temperature conditions, but it was really too hard and too difficult.

Seeing this, Jiang Fan could not help but shake his head.

Even the Earth in the previous life had no control over nuclear fusion, let alone the current Xia!

The phenomenon of nuclear fusion was discovered.

The research team took just over a year but finding the right conditions to create fusion production took three years without success!

Yan spent her 50th birthday.

She simply invited everyone to a meal and went back to the lab again!

She re-read a report from various scholars!

Yan realized that the current path seems to have taken a detour!

"Maybe we should broaden the field. Is it possible to try other ideas?"

Yan looked at the clock on the wall.

While thinking, she stood up and walked towards the outside of the house!

It was wintertime.

As soon as someone goes out, there was the oncoming icy wind of winter!

Yan shrank her collar and put on her hat!

She was walking alone on the walkway.

Of course, there were personal guards nearby who were secretly protecting her.

Scholars at the research institute were walking in a hurry.

A few people were walking.

A lot of snow had fallen on the wide ground.

Yan looked at the snow.

There was a crash!

A few meters ahead, a handful of snowflakes fell from the trees.

It smashed in front of Yan's body.

Yan was stunned.

At that moment, an image flashed through her mind

The atoms ripped themselves apart!

This image came so vivid, amazing and intense.

She could feel the beating of the atomic nucleus almost from her imagination.

She could hear the sizzling sound of the atoms tearing apart.

It was an unprecedented inspiration.

Yan was shaking with excitement.

She immediately turned and ran back to the laboratory.

With a pen on a piece of paper, she drew down the picture she had just thought of!

"Since nuclear fusion can produce energy, then What about atomic nuclei fission?"

Yan thought of this one question!

She immediately recruited a group of scholars and told them about her speculation.

Many scholars were slightly taken aback.

Immediately afterwards their eyes lit up!

Someone even patted on the head.

Yeah, It was such a simple thing.

Why they had been doing it for years without thinking about it!

The experiment started right away.

But they immediately found out.

How to make an atomic nucleus fission?

As time went by, days passed by day.

Many scholars thought of countless ways, but nothing could make the nucleus of an atom fission!

The nuclei of hydrogen, helium, and other elements did not work.

Soon, the research team set their sights on more elements!

There were more than a thousand scholars.

Yan made two scholars into a group.

Try it on each element.

Finally, Hemmer who previously discovered the red sun phenomenon while experimenting with uranium found that when free protons bombard radioactive uranium, each uranium atom splits into two parts, producing barium and krypton.

This process also released a huge amount of energy.

This discovery was very significant!

Once again, the research team was excited!

It proved the validity of Yan's idea!

Subsequent studies confirmed that Not all atomic nuclei are capable of fission.

Only some very massive nuclei like uranium, thorium, plutonium, etc. can undergo nuclear fission.

The nuclei of these atoms, after absorbing a neutron, split into two or smaller nuclei, releasing two to three neutrons and a lot of energy, which can cause other nuclei to fission next Keeping the process going and producing a chain reaction!

"Father God, I get it!"

The research had come to this point.

Yan finally felt like she had taken the first step!

She knew about the more powerful weapon Jiang Fan was talking about.

But turning the theory into reality was not a simple task!

Yan took a day, after a preliminary simple calculation.

Yan knew that It was going to be an enormous project!

"With Xia's current strength, I'm afraid that it will really take the entire country."

Yan sighed inwardly.

But she was fearless!

The next day, Yan did not go to the laboratory.

Instead, Another high-level meeting was held!

Ghost buster, Chang Yu Chun and others were all present!

In the meeting Yan announced the "Atomic Plan"!

When the crowd heard the numbers from Yan's mouth, they were so shocked that they almost dropped their jaws!

"Your Highness, do you really want so much?"

Chang Yu Chun couldn't help but ask.

It was really too much!

"This is just the initial estimate, it might be more." Yan said.

Chang Yu Chun and the others were speechless!

"We'll give full support to Your Highness."

Ghost buster spoke up.

There was no doubt.

Neither did anyone else.

After the meeting was over, a super project of unprecedented scale, the "Atomic Project", was officially launched!

In the first phase, 30,000 scholars and the same number of general staff were deployed and there were 50,000 troops to help!

The entire King's Tomb mountain range was rebuilt!

All other projects gave way to this project!

Many of the less important projects were all canceled!

Like cars, TV, movies, etc.!

The money that was put in was also withdrawn!

All the departments in Xia were mobilized.

They mobilized all the departments of the summer country. They made all the efforts to guarantee the "Atomic Project"!

The entire kingdom was tightening their belts, ready to accompany Yan to complete this super project!

Jiang Fan knew that they were already on the right track!

Although the process was very tortuous, the result was not bad.

Yan's performance was worthy of being recognized by the system as a once-in-a-thousand-year genius!

Jiang Fan slightly sped up the flow of time and turned his attention to the second continent.

.....

The second continent was still under the rule of that giant gorilla.

Boom!

Boom!

A giant saber-toothed tiger was fighting with the gorilla!

The gorilla stepped into this giant saber-toothed tiger's territory.

It caused an ambush!
But the attack wasn't successful.
Instead, the gorilla was quickly pinned to the ground and beaten!
It didn't take long.
The gorilla finished the giant saber-toothed tiger.
Once again defended his position of domination!
But the surrounding crisis lurked.
The skeleton crawler family came out of the crypt.
Several came at once, coveting the position of the gorilla ruler.
The droplets hidden in the woods were also eyeing the giant gorilla!
There were other unidentified giant creatures that seemed intent on moving too!
Only, the real challenger was something else!
There was a crash!
An enormous creature emerged from the sea.
What's amazing was It's three heads!
It was looking like a large python, but it was different.
This three-headed snake quickly climbed ashore.
The huge six eyes were full of sinister and cunning!
It was immense.
Along the way, it alarmed a lot of creatures.
But the three-headed snake was quick.
It quickly disappeared deep in the woods!
Jiang Fan seemed to foresee an unprecedented battle for land supremacy!

Chapter 349

349: The Fall of King Kong! Ten years of atoms! The significant change of the Blue Star

This three-headed snake of immense size looked a little like a snake.
There were small, slightly raised horns on its head!
The long body also had a pair of less conspicuous small wings!
The tail at the back
There were actually two!
Jiang Fan recognized it at a glance.
It was like the overlord of the second land back then, Six-legged Pythons were quite similar.

The six-legged python once had evolving wings on its body!
But it hadn't fully developed yet.
A Giant Eel killed it!!
And this three-headed snake ..
It was the offspring of the six-legged python.
When the six-legged python offspring.
In order to avoid the pursuit.
There were two who escaped into the sea.
This giant three-headed snake was one of them!
Where's the other one?
Jiang Fan glanced at the situation on the sea.
Then couldn't help but faintly stare.
What a guy!
The other one didn't die.
Instead, it was hiding in the deep sea.
It was still developing!
The small eyes of the giant three-headed snake are full of cunning and wisdom!
It ascended on the second land.
The first thing it did not show was its great strength.
Instead, it found a place to hide.
Observed the land where giant beasts roamed in secret.
Within a few days, the giant three-headed snake was discovered
The owner of this land was the giant gorilla with the giant axe in its hand.
It had to hold and watch the giant axe every day and patrol over its territory!
Hissing
A few skeleton crawlers ambush in the shadows.
Always secretly spying on this giant gorilla.
They wanted to take revenge on the previous skeleton crawler!
Giant gorilla at this time had formed a family.
And gave birth to offspring.
One of them had inherited the genes of the giant gorilla!
The number of gorillas was increasing and gradually occupied all parts of the land!

But the giant three-headed snake found The most powerful group in this land

It was not a gorilla clan.

Rather

It was Atomic dinosaurs!

Today's atomic dinosaurs had developed and evolved over several generations of the entire group.

There were already more than a dozen of them!

But all of them were lazy by nature.

Eat and sleep, sleep and eat.

No ambition to dominate!

Besides the atomic dinosaurs.

On this land, there were other powerful giant beasts.

The giant three-headed snake watched this colony of giant beasts.

The cunning color in his eyes kept turning.

Soon, It came up with an idea!

The Giant Three-Headed Snake moved out.

It quickly found a defenseless one Giant Eel!

This Giant Eel was the descendant of the Giant Eel that ruled the second land back then!

But it hadn't fully grown yet.

And the skeleton crawler that killed its father back then was already dead.

It also no longer needed revenge.

Just stay in their own territory.

It was totally unexpected to see it living leisurely.

Terror suddenly attacked!

Under the surprise attack, This giant Eel did not take long.

It was subdued by the giant three-headed snake.

But!

The Giant Three-Headed Snake did not kill this Giant Eel.

Instead,

Carried the seriously injured one to the edge of an atomic dinosaur territory and put it on the ground.

Then it hid in the woods to the side.

The atomic dinosaurs in the territory also quickly found this seriously injured giant Eel.

But it was very lazy.
Just after looking, it went back to sleep on its back again!
It simply did not bother.
Atomic dinosaurs were not interested.
Did not mean that other giant beasts were also the same.
A seriously injured giant Eel.
For which a creature was a wonderful nutritional supplement!
Soon It attracted the attention of a gaze from all around!
The shadowy and cunning skeleton crawler was the first to arrive.
Three of them joined forces to expel the other beasts.
Carrying this seriously injured giant Eel.
Ready to find a place to enjoy.
But it did not go a few steps.
And was stopped by the giant gorilla who came to hear the news!
The skeleton reptiles had coveted giant gorillas for a long time!
When the enemies met, it was very jealous!
Not to mention that it would release the seriously injured Eel.
Both sides fought directly!
Giant gorilla with one against three!
With the enormous axe in his hand was not weak at all!
But the skeleton reptiles were also very smart.
It had no head-to-head encounters with giant gorillas.
And was mainly relying on the advantage of numbers.
Constantly going around and attacking.
Attacking from now and then!
When the two sides of the battle were difficult to separate,.
A giant beast suddenly jumped out from the back of the woods!
With lightning speed!
It quickly pounced on the giant gorilla.
This was a very large black scorpion!
It is also the beneficiary of taking safflower that year!
With a long tail.

A direct horizontal sweep, It stabbed at the giant gorilla.
The giant gorilla was completely defenseless.
Plus, the tail was too fast.
-It stung him in a second!
Toxin was injected into it!
When the three skeleton crawlers saw this, they immediately retreated far away!
The giant gorilla roared madly, swinging an enormous axe!
Trying to kill this abominable black scorpion.
But after the black scorpion succeeded.
He rushed back into the woods quickly.
The giant gorilla is chasing wildly.
The entire land
All resounded with its roar and roar that shook heaven and earth!
As time passed by, the toxin worked.
Giant gorilla speed was getting slower and slower.
The movement was also getting slower and slower.
The three skeleton crawlers saw the right moment and quickly rushed up!
They were about to kill the giant gorilla.
But unexpectedly
The giant gorilla fiercely swung an axe.
Directly cut one of the skeleton reptiles to severely injured!
And reached out and grabbed the tail of the other skeleton crawler!
Slapped it into the ground with force!
Bang! Bang! Bang!
Under dozens of consecutive hard slaps.
This skeleton reptilian body was strong.
But It could not withstand it.
It was killed instantly!
The remaining one skeleton crawler was scared out of his mind.
Slipped straight out of the distance but did not escape.
Instead, It started watching from a distance.
It knew very well.

Just now should be the return of this giant gorilla!
As expected, after a few minutes had passed.
This giant gorillas breath became weaker and weaker!
Finally dying.
The surrounding woods were rattling!
The battle just happened.
Naturally, it attracted the attention of the entire land.
Many giant beasts hid in the shadows to watch.
To see what a giant gorilla looked like.
They were all stupid!
If they killed the current ruler of the Second Land!
Then According to the latent rules.
It is the new overlord!
The behemoths were very enthusiastic!
But no one dared to make the first move!
Finally
A giant saber-toothed tiger could not hold back.
It directly rushed up.
Also many ethnic groups on the second land.
Many people died at the hands of giant gorillas.
This giant saber-tooth tiger one was to fight for supremacy.
And also for revenge!
But it still underestimated the battle power of giant gorillas!
Despite not being able to walk and was just sitting there.
Leaning on a giant axe.
Still fought with this giant saber-toothed tiger and was hard to separate!
It was a critical moment.
Another giant beast pounced out.

Chapter 350

350: The Fall of King Kong! Ten years of atoms! The significant change of the Blue Star

It was the black scorpion that just raided.
Seeing that the giant gorilla only had one breath left!

The skeleton crawlers watching from afar also rushed over to join the battle group!

Three giant beasts surrounded the maimed giant gorilla.

After a fierce slaughter.

All of them were wounded.

But also took away the last breath of the giant gorilla!

After the battle was over.

The three giant beasts were on their guard.

And was thinking about how to deal with the other two.

No one expected that

The real terror hidden behind the curtain appeared!

The Giant three-headed snake!

This time, the giant three-headed snake did it!

One head directly bit the big black scorpion!

It could spit out fire from its mouth!

It burned the most threatening black scorpion to death on the spot!

And the other two heads spewed fire at the same time.

And instantly hit hard the Skeleton Crawler and the Giant Saber-tooth Tiger!

Upon seeing the enormous size of the giant three-headed snake.

Skeleton Crawler and Giant Saber-tooth Tiger knew There was absolutely no way to fight this battle.

They quickly fled!

The giant three-headed snake didnt chase either!

Instead, Stomping on the enormous body of the giant gorilla.

The three heads roared to the sky!

Seemed to be announcing to the many creatures of this land!

The old leader was dead.

And a new leader was born!

The other giant beasts who were watching in the dark.

One by one, they were silent!

No resistance at all!

This giant three-headed snake was too big and too powerful!

So far!

Of all the giant beasts that have ruled this land
The most powerful one and smart and cunning!
Many giant beasts can already see.
Next will be a long reign of the giant three-headed snake years!
After the giant three-headed snake became the ruler.
The first thing it did was
To start the purge of the giant gorilla group!
Originally a huge gorilla clan.
Instantly fell apart!
Most were killed.
Only a very few survived.
Among them They were the descendants of giant gorillas!
And on the other side.
The seriously injured skeleton crawlers ran back into the cave.
And never dared to come out again.
Giant three-headed snake could not enter the well under the crypt.
It gave the skeleton crawler race sufficient time to flourish.
The skeleton crawler colony was slowly growing.
Only!
What they didnt expect was.
In the deeper part of the crypt.
The pattern was somewhat similar to them.
But even more terrifying creatures were forming!!!
After watching the fierce battle for supremacy in the second land.
Jiang Fan turned his gaze back to the first land.
The atomic project had been underway for three months!
After the initial tests, Yan and other scholars used uranium atoms as the raw material for the fission reaction.
Uranium was the heaviest of all the elements discovered so far
The heaviest one!
But there were many difficulties to follow!
The separation and purification of uranium atoms was not a simple matter.

The entire process was very complicated!

It was all about precision!

A minor mistake, and Then!

All the work done before was in vain!

In this case, Yan again increased the investment of human resources.

Even before the plan.

Yan had already predicted the difficulty of this Atomic Plan.

But the real implementation was still a little underestimated.

This reminded Jiang Fan of the previous life The Manhattan Project!

The project concentrated the best nuclear scientists mobilized over 100,000 people to participate in the project, which lasted 3 years and cost 2 billion dollars!

At its peak, it employed 539,000 people!

With the current industrial base of Xia.

Many aspects were Not yet so perfect!

According to Jiang Fans judgment.

He estimated that this project might take even longer!

The atomic program was in full swing.

But Yan did not neglect other aspects.

The peoples livelihood.

Yan still places great importance on it and increased the investment!

They canceled only some unnecessary projects.

This also led to the population of the Xia Kingdom.

It was still growing rapidly!

Agriculture entered into the mechanized era!

Most of the land in Xia was a plain area with fertile soil!

Perfect for mass mechanized farming!

Rice, wheat, sorghum, sweet potatoes, and other crops.

With the efforts of agricultural scholars, The offspring were getting better and better!

Yields were also getting higher and higher!

Ten thousand pounds per acre was no longer an empty phrase!

Medicine!

It concentrated the main research and development in the College of Medicine!

This was also a field that Yan values very much!

Thanks to the second technological explosion, the field of medicine also developed rapidly!

The birth of a variety of new types of drugs.

Originally, those difficult to cure difficult diseases

Now most of them had the means to heal!

Mechanized production lines were an important invention at this stage.

It greatly improved production efficiency!

Let the entire Xia population All could enjoy the latest scientific research products!

The most obvious thing was Life expectancy per capita had exploded!

In Kais era, Xia per capita life expectancy was only less than fifty!

Not that there was not enough to eat.

But the infant mortality rate and injury death rate was very high!

An insignificant tetanus could make a person lose his life!

And now

This was absolutely impossible.

Life expectancy per capita came to over seventy!

Its almost the same as when Jiang Fan crossed in his previous life!

But the current level of technology in Xia has not yet reached that level of the previous life.

Jiang Fan also found out.

The overall quality of humans on the Blue Star would be higher than the Earth in the previous life.

For example,

The appearance rate of congenital disease was much lower!

Time was passing.

The atomic program was in full swing.

Progress was slower!

Within five whole years Only a bit of raw uranium was refined.

There was still a considerable distance from the ultimate success.!

Jiang Fan was not in a hurry.

Compared to other planet owners.

He could have accelerated infinitely.

But because his own mind could not be sped up.

So

Only at the more important points in time.

Jiang Fan would slow down the acceleration.

For example, the current period of the atomic plan.

Jiang Fan must monitor it.

Otherwise, if there's an accident!

Waiting for Yan and others to grow old.

Then it would be troublesome.

Three more years had passed.

Atomic plan was at a critical moment!

After one failure after another!

Finally close to the first success.

And in these nearly ten years.

Xias population was also skyrocketing.

A bit of a population explosion!

On that side of the second land.

Although the giant three-headed snake ruled this land.

But besides hunting down the giant gorilla group.

It did not lay hands on other races!

As long as other creatures submit!

Then

It also would not strike!

Let the creatures of the second land be thriving!

In the middle of the ocean.

The number of fish was also slowly increasing!

It's a virtuous circle.

The increase of creatures brings more life to the Blue Star.

Thus making the Blue Star area larger.

And the larger Blue Star brought more living space and resources to these creatures!

Jiang Fan glanced at the planet panel.

These past years.

Another enormous change had occurred!

The diameter of the planet broke through to an unimaginable level!
